By Mr. THURMOND, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 1878: A bill for the relief of Kil Joon Yu Callahan (Rept. No. 99-377).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 1957: A bill for the relief of Lynne Cleaver and her child Leigh Alison Cleaver (Rept. No. 99-378).

S. 2271: A bill for the relief of Jens-Peter Berndt (Rept. No. 99-379).

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 1744: A bill to require States to develop, establish, and implement State comprehensive mental health plans (Rept. No. 99-380).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

H.R. 483: A bill for the relief of Edwin Rios and Geovanna Rios.

H.R. 1693: A bill for the relief of Enrique Montano Ugarte.

H.R. 1757: A bill for the relief of Leonard Leslie Gambie.

H.R. 3093: A bill for the relief of Juan Ricardo McRae.

H.R. 3154: A bill for the relief of John Patrick Brady, Ann M. Brady, and Mark P. Brady.

H.R. 3323: A bill for the relief of Alexander Lockwood.

H.R. 3365: A bill for the relief of Mountaha Bou-Assali Saad.

H.R. 3577: A bill for the relief of Milanie C. Escobal Norman and Angela Dawn Norman.

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. STAFFORD, from the Committee on Environment and Public Works:

Thomas Lynch Adams, Jr., of Kentucky, to be an Assistant Administrator of the Environmental Protection Agency; and

Kenneth M. Carr, of California, to be a Member of the Nuclear Regulatory Commission for the term of five years expiring June 30, 1991.

(The above nominations were reported from the Committee on Environment and Public Works with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. HATCH, from the Committee on Labor and Human Resources:

Mary McNally Rose, of Maryland, to be Deputy Under Secretary for Management, Department of Education;

Carol Fraser Fisk, of Virginia, to be Commissioner on Aging;

Justin W. Dart, Jr., of Texas, to be Commissioner of the Rehabilitation Services Administration; and

Clarence Thomas, of Missouri, to be a Member of the Equal Employment Opportunity Commission for the term expiring July 1, 1991.

(The above nominations were reported from the Committee on Labor and Human Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COCHRAN (for himself, Mr. GRAMM, Mr. BENTSEN, Mr. DOMENICI, Mr. BINGAMAN, Mr. GOLDWATER, and Mr. DECONCINI):

S. 2721. A bill to amend the Agricultural Act of 1949 to modify cross compliance requirements for producers of extra long staple cotton, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KERRY (for himself and Mr. KENNEDY):

S. 2722. A bill to waive the required congressional review period for a natural gas pipeline to be built by Tennessee Gas Pipeline Company across certain Army Corps of Engineers lands in Massachusetts; to the Committee on Commerce, Science, and Transportation.

By Mr. STEVENS (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. BURDICK, Mr. GRASSLEY, Mrs. HAWKINS, and Mr. MURKOWSKI):

S. 2723. A bill to amend title 39 of the United States Code to restore limited circulation second-class rates of postage for copies of a publication mailed to counties adjacent to the county of publication, and for other purposes; to the Committee on Governmental Affairs.

By Mr. LEVIN:

S.J. Res. 388. Joint resolution designating the week beginning January 4, 1987, as "National Bowling Week"; to the Committee on the Judiciary.

By Mr. HATCH (for himself, Mr. WEICKER, Mr. DOLE, Mr. KENNEDY, Mr. KERRY, Mr. HOLLINGS, Mr. FORD, Mr. WARNER, Mr. DENTON, Mr. ANDREWS, Mr. CHAFEE, Mr. INOUYE, Mr. NUNN, Mr. SARBANES, Mr. SIMON, Mrs. HAWKINS, Mr. EAGLETON, Mr. CHILES, Mr. THURMOND, Mr. HUMPHREY, Mr. BOSCHWITZ, Mr. EXON, Mr. NICKLES, Mr. GARN, Mr. RIEGLE, Mr. STAFFORD and Mr. METZENBAUM):

S.J. Res. 389. A joint resolution to designate March 1987 as the "Month of Developmentally Disabled Persons"; to the Committee on the Judiciary.

## SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SIMPSON (for Mr. DOLE (for himself and Mr. BYRD)):

S. Res. 460. A resolution to direct the Senate Legal Counsel to represent Senator Wilson and Robert White and to authorize testimony in the matter of Smith v. Ellis, et al.; considered and agreed to.

By Mr. SIMPSON:

S. Res. 461. A resolution relative to Rule XXXIX; considered and agreed to.

By Mr. DECONCINI (for himself, Mr. WILSON, Mr. DOMENICI, Mrs. HAWKINS and Mr. GRAMM):

S. Con. Res. 158. A concurrent resolution expressing the sense of the Congress that the Government of Mexico should condemn the recent fraud in the July 1986 elections and initiate steps to preserve the integrity of the electoral process; to the Committee on Foreign Relations.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. COCHRAN (for himself, Mr. GRAMM, Mr. BENTSEN, Mr. DOMENICI, Mr. BINGAMAN, Mr. GOLDWATER, and Mr. DECONCINI):

S. 2721. A bill to amend the Agricultural Act of 1949 to modify cross compliance requirements for producers of extra-long staple cotton, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

CROSS COMPLIANCE FOR EXTRA-LONG STAPLE COTTON PRODUCERS

● Mr. COCHRAN. Mr. President, I am today introducing a bill to amend the Agricultural Act of 1949 by exempting the producers of extra-long staple cotton from cross compliance requirements for the 1987 and 1988 crops. The purpose of this bill is to give producers of extra-long staple cotton an opportunity to plant acreage needed to fully supply all markets, domestic and foreign. Otherwise, the decision by the Secretary of Agriculture to require limited cross compliance across the board for all program crops will actually reduce exports, specifically exports of extra-long staple cotton. I do not believe Congress or this administration supports reductions in agricultural exports. I know this Senator surely does not. The bill I am introducing today is necessary to prevent the unintended and, I am sure, the unsupported outcome of a Federal program directly causing a reduction in exports.

On May 30, 1986, the Secretary of Agriculture opted to exercise his discretionary authority granted in the Food Security Act of 1985 (Public Law 99-198) and announced that limited cross compliance requirements will be in effect for the 1987 crops of wheat, feed grains, cotton, and rice.

Under the limited cross compliance provision, as a condition of eligibility for loans, purchase or payments for a wheat, feed grain, upland cotton, or rice crop, the acreage planted for harvest on a farm in other commodities, including extra-long staple cotton, may not exceed the crop acreage base of such commodities.

Mr. President, the Secretary's decision to implement limited cross compliance under the provision in current law will have a disastrous impact on the U.S. extra-long staple cotton industry by drastically reducing production in the face of rapidly expanding domestic and export demand. Also, a very successful, producer-financed, export development program will be virtually destroyed.

Objective management of agricultural commodity programs, in light of current supply-demand statistics and concern over reducing the Federal budget deficit, may dictate the Secretary's decision to require limited cross compliance. I will reserve judgment on that question until additional information is available. However, what concerns me is an "across-the-board" decision, as this one clearly is, affecting all program crops, that produces an obviously unwarranted and indefensible result. Specifically, if this decision is fully implemented, extra-long staple cotton exports will be reduced. I certainly do not think the Secretary of Agriculture is intentially trying to lower exports of extra-long staple cotton. But that will be the practical result of his decision, because it does not allow for differences that can and do exist among commodities.

Mr. President, I believe the Reagan administration understands the importance of trade to all U.S. industries, especially agriculture. And I believe every effort is being made to sort out the issues regarding U.S. access to foreign markets. That is why I do not believe this administration supports the implementation of programs resulting in the reduction of exports. I believe the situation with extra-long staple cotton and limited cross compliance is simply a combination of conditions not specifically examined in 1985 during the most comprehensive overhaul of farm legislation in more than 50 years. To avoid this outcome legislation is needed to exempt producers of extra-long staple cotton from limited cross compliance rules.

The extra-long staple cotton situation is unique in contemporary U.S. agriculture. Domestic consumption is up and exports have increased markedly in each of the past 3 years. Fueled by competitive prices and a producer-financed development program, exports of extra-long staple cotton increased from 12,500 bales in 1982 to 85,000 bales in 1984. Export commitments for the 1985 marketing year have already reached 99,500 bales. At this time in the 1984 marketing year export commitments were only 77,400 bales. And exports for the 1986 will be even higher. At this time last year outstanding sales for the 1985 crop were 19,000 bales, but for the 1986 crop outstanding sales today are 25,300 bales, a 33 percent increase.

One of the primary factors in this successful export effort has been the significant increase in the production and availability of high quality extra-long staple cotton in the United States. Prior to 1983, foreign mills were reluctant to buy U.S. extra-long staple cotton because of limited supplies. U.S. production averaged only 87,000 bales per year in the 10 years preceding 1983 and, after deducting 45,000 to 55,000 bales for domestic use, supplies available for export were severely limited. The increases in production in 1984 and 1985 gave credibility to U.S. producers' commitment to be reliable suppliers.

The 1985 National Base Acreage for extra-long staple cotton was 65,872 acres. However, producers responding to expanding export demand planted 83,000 acres, of which only 31,216 acres or 35.4 percent were enrolled in the price support program. The Department of Agriculture estimates 98,000 acres have been planted in 1986. The National base acreage for 1986 is approximately 75,000 acres, and the proportion of nonprogram acres is expected to be about the same as in 1985.

About 95 percent of extra-long staple cotton is grown by producers with much larger established upland cotton acreage bases. Since the current state of the farm economy dictates a very high percentage of the major-crop producing farmers—including upland cotton producers—will participate in Federal support programs, limited cross compliance rules will prevent extra-long staple cotton producers from planting the acreage they otherwise would and acreage needed to supply current and expected foreign demand. Due to the difference between "program base acres" and "acres actually planted," a limited cross compliance rule this year would have prevented nearly one-fourth of the extra-long staple cotton crop from being planted. Consequently, export markets for U.S. extra-long staple cotton, that have been developed at great cost to the industry, would be lost because foreign buyers would turn to more dependable sources in Egypt and Latin America.

Mr. President, such an outcome must be prevented. The bill I am introducing today will avoid such an impact on the extra-long staple cotton industry and I ask my colleagues to support it.●

---

By Mr. STEVENS (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. BURDICK, Mr. GRASSLEY, Mrs. HAWKINS, and Mr. MURKOWSKI):

S. 2723. A bill to amend title 39 of the United States Code to restore limited circulation second-class rates of postage for copies of a publication mailed to counties adjacent to the county of publication, and for other purposes; to the Committee on Governmental Affairs.

RURAL NEWSPAPER PRESERVATION ACT

● Mr. STEVENS. Mr. President, today I am introducing a bill which would partially restore the limited circulation postal rate which was recently eliminated in the consolidated Omnibus Budget Reconciliation Act of 1985. That rate allowed newspapers and other publications to mail at a less expensive postal rate if and only if they circulated less than 5,000 copies of their publication out of the county of publication. The act repealed section 4358(g) of title 39 of the United States Code.

This elimination has caused unintended havoc to community newspapers not only in Alaska but throughout the United States, particularly those located on or near county lines. As we all know well, these small newspapers play a crucial role in the rural areas of America, and in many areas are the sole source of local news and essential information. As such, they are the bedrock upon which our information system rests, and their importance to their communities and to the Nation is without question.

Although the National Newspaper Association and its members understand the need for and support our effort to balance the budget, they have asked for relief from the unintended devastation that has hit the many small newspapers that cover more than one county. The elimination of the limited circulation rate totally by the Omnibus Reconciliation Act was the vehicle which caused this unintended negative impact.

According to press reports, a number of local newspapers have already ceased publication because of the lack of ability of rural newspapers to provide outside-of-county papers. For instance, according to the June 18 issue of the Louisville Courier-Journal, the Robertson County Review folded on June 5, 1986. Although a number of reasons were given for the paper's demise—as is always the case in these situations—first on the list was the high cost of mailing. The paper's demise has left Robertson County, KY, without a local newspaper. We cannot afford to have this repeated in other parts of the country.

While our concern was and has been to see that large commercial publications are not subsidized by the taxpayers during these times of massive budget deficits, the rural press should not be included among that group. Their key role in disseminating local information is simply too important to tamper with. This role has historically been recognized by Congress and is a cornerstone of this Nation's postal policies.

Indeed, a recent study of preferred rates by the Postal Rate Commission

has shown that low postal rates for small-town newspapers—specifically the in-county rate—is one of the Nation's oldest programs, and was designed, and I quote from the study, to give "local media outlets a slight competitive boost in a communications system with strong nationalizing tendencies." It is also a policy, and again I quote from the study, "designed to protect rural culture from annihilation by urban institutions and values."

This bill would restore the rate, but only for copies destined for counties adjacent to the county of publication. This, I believe, would correct the unforeseen result of that Reconciliation Act action on the small yet significant number of rural papers that serve residents in multiple counties the Reconciliation Act will still result in a savings of roughly $30 million a year beginning in fiscal year 1986.

I want everyone to be aware, however, that the reauthorization will add approximately $9.3 million to the obligation of General Treasury. However, knowing our responsibility to achieving a balanced budget my bill will put a cap on the number of publications that can be sent at the subsidized "in-county" rate. This would mean that the wealthy newspapers and magazines of the metropolitan areas would no longer receive the lucrative but not essential Government largess. According to the Postal Rate Commission, this will save $14 million in the second-class rate category.

Mr. President, this is a modest proposal which would give needed relief to one of this country's treasures. I call it The Rural Newspaper Preservation Act.●

● Mr. ANDREWS. Mr. President, I rise today in support of the bill introduced by Senator STEVENS.

This is a matter of great concern to rural Americans.

Affordable newspaper postal rates are important for the rural newspapers, but more importantly they're vital for the readers of those papers.

While city papers are able to offer door to door delivery, the majority of rural newspaper subscribers receive their papers through the mail.

In recent years, newspaper subscribers in rural areas have been subjected to more than their share of postal increases.

These small journals cannot continue to absorb further postal increases and remain in business.

This would be a great loss for those living in the rural sections of our Nation.

While we were able to retain the revenue foregone postal funding at present levels in the fiscal year 1987 budget, the out of county limited circulation rates for newspapers was eliminated in the Omnibus Budget Reconciliation Act adopted earlier this year.

Senator STEVENS added an amendment to the supplemental appropriations bill to restore special adjoining county rates.

Unfortunately the House objected and it was dropped from the bill.

It is vital that these adjoining country postal rates be—restored to assure continuing and reliable newspaper service our neighbors in rural America.

Our rural citizens have the same right to know what is happening in their communities, their State, their Nation and around the world as their urban counterparts. Local newspapers also bind a community together. They are the voice of the people closest to the people and represent the earliest, and some would argue the most representative example of our first amendment freedom of speech.

By' assuring reasonable postal rates for these newspapers, we assure the continuation of a vital and historically important force in our national life—the community press.

This bill Mr. President, would restore special postal rates for newspaper delivery to adjoining counties for papers with up to 5,000 subscribers.

This bill returns these postal rates to their prebudget reconciliation numbers. It quite simply restores the needed and necessary status quo.

Mr. President, this not only a matter of fairness to rural newspapers, it is a reaffirmation of the commitment of this body to the people's fundamental right to know.●

---

By Mr. LEVIN:

S.J. Res. 388. Joint resolution designating the week beginning January 4, 1987, as "National Bowling Week"; to the Committee on the Judiciary.

NATIONAL BOWLING WEEK

● Mr. LEVIN. Mr. President, today I am introducing legislation which proclaims the week beginning January 4, 1987 as "National Bowling Week."

Since becoming part of our American recreational life, bowling has become one of the most popular sports. It enjoys widespread public participation.

What is particularly impressive about bowling is that it reflects that we are a Nation made up of a mosaic of nationalities. Many immigrants brought from their home country to America forms of bowling. From the British contribution of skittles or nine pins to the Italian contribution of bocci ball, bowling has become a virtual melting pot of cultures.

With participation by several millions each year, bowling has no prejudice with respect to size or shape. It can be enjoyed by everyone, in big cities as well as small towns. It can be an individual activity, a family outing or an organized community effort. Furthermore, not only does bowling have a recreational value, but it is also a very useful form of exercise.

I invite my colleagues in the Senate to join me as a cosponsor of this joint resolution.●

---

By Mr. HATCH (for himself, Mr. WEICKER, Mr. DOLE, Mr. KENNEDY, Mr. KERRY, Mr. HOLLINGS, Mr. FORD, Mr. WARNER, Mr. DENTON, Mr. ANDREWS, Mr. CHAFEE, Mr. INOUYE, Mr. NUNN, Mr. SARBANES, Mr. SIMON, Mrs. HAWKINS, Mr. EAGLETON, Mr. CHILES, Mr. THURMOND, Mr. HUMPHREY, Mr. BOSCHWITZ, Mr. EXON, Mr. NICKLES, Mr. GARN, Mr. RIEGLE, Mr. STAFFORD, and Mr. METZENBAUM):

S.J. Res. 389. Joint resolution to designate March 1987 as the "Month of Developmentally Disabled Persons;" to the Committee on the Judiciary.

MONTH OF DEVELOPMENTALLY DISABLED PERSONS

Mr. HATCH. Mr. President, today I am introducing a joint resolution calling for the recognition of the month of March 1987 as the "Month of Developmentally Disabled Persons." I am joined by 26 other Senators, including our majority leader, Senator DOLE, and both the chairman and the ranking minority member of the Subcommittee on the Handicapped, Mr. WEICKER and Mr. KENNEDY.

Developmental disabilities affect nearly 4 million children and adults in the United States. These disabilities result in lifelong substantial limitations of major activities such as self-care, mobility, self-direction, the capacity for independent living, and economic self-sufficiency. Developmental disabilities are attributed to chronic mental and/or physical impairments manifested before the age of 22.

Persons with developmental disabilities require a combination and sequence of special interdisciplinary or generic services and treatment for their entire lives. Due to the severity of their disabilities, developmentally disabled persons need to have individually planned and coordinated services.

We are introducing this resolution in order to educate the general public about the potential and special needs of persons with developmental disabilities. In addition, professional personnel, parents, and concerned citizens deserve to be recognized for their contribution in serving this population. It is our hope that commemoration of a "Month of Developmentally Disabled Persons" will serve as a vehicle to achieve both goals.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD at the conclusion of my remarks, and I urge the prompt approval of this resolution.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 389

Whereas there are 3,900,000 children and adults with developmental disabilities in the United States;

Whereas such persons have severe chronic disabilities attributed to mental or physical impairment which begin early in life and result in substantial limitations in major life activities such as self care, mobility, language, learning, and self direction;

Whereas persons with developmental disabilities need interdisciplinary or generic service and treatment for extended periods or their lives;

Whereas persons with developmental disabilities have the capability to become more independent and economically self sufficient;

Whereas the services and expertise provided by professional personnel, parents, and concerned citizens enable persons with developmental disabilities to participate more freely in education, employment and community living;

Whereas increasingly more persons with developmental disabilities are living in the community enabling them to live less restricted lives; and

Whereas through increased national awareness of such programs, the public will better understand the potential and needs of persons with developmental disabilities: Now, therefore, be it:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That May 1987 is designated as the "Month of Developmentally Disabled Persons" and the President is authorized and requested to issue a proclamation calling upon the people of the United States and all Federal, State, and local government officials to observe the month with appropriate programs and activities.

## ADDITIONAL COSPONSORS

S. 725

At the request of Mr. CHAFEE, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 725, a bill to authorize appropriations to carry out the Endangered Species Act of 1973 during fiscal years 1986, 1987, 1988, 1989, and 1990.

S. 812

At the request of Mr. GARN, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 812, a bill to amend the Export Administration Act of 1979 to authorize controls on the export of capital from the United States.

S. 1322

At the request of Mr. HECHT, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 1322, a bill to amend the Geothermal Steam Act of 1970.

S. 1486

At the request of Mr. DOLE, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 1486, a bill to amend the Equal Credit Opportunity Act.

S. 2345

At the request of Mr. D'AMATO, his name was added as a cosponsor of S. 2345, a bill to improve counseling, education, and services relating to acquired immune deficiency syndrome.

S. 2446

At the request of Mr. CHAFEE, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 2446, a bill to require the Secretaries of Agriculture and Health and Human Services to enforce certain food labeling requirements for packaged foods sold by certain restaurants.

S. 2455

At the request of Mr. MITCHELL, the name of the Senator from Nevada [Mr. HECHT] was added as a cosponsor of S. 2455, a bill entitled the "National Organ and Tissue Donor Act."

S. 2479

At the request of Mr. TRIBLE, the names of the Senator from Nevada [Mr. HECHT], and the Senator from Wyoming [Mr. WALLOP] were added as cosponsors of S. 2497, a bill to amend chapter 39 of title 31, United States Code, to require the Federal Government to pay interest on overdue payments, and for other purposes.

S. 2630

At the request of Mr. ROTH, the name of the Senator from New Hampshire [Mr. HUMPHREY] was added as a cosponsor of S. 2630, a bill to increase Government economy and efficiency and to reduce the deficit by implementing certain recommendations of the President's Private Sector Survey on Cost Control to strengthen the auditing of Department of Defense transportation bills, and for other purposes.

S. 2730

At the request of Mr. DOLE, the names of the Senator from Arizona [Mr. DECONCINI], and the Senator from Oregon [Mr. PACKWOOD] were added as cosponsors of S. 2730, a bill to amend the Federal Aviation Act of 1958 to provide that prohibition of discrimination against handicapped individuals shall apply to air carriers.

SENATE JOINT RESOLUTION 352

At the request of Mr. METZENBAUM, the names of the Senator from Ohio [Mr. GLENN], the Senator from California [Mr. CRANSTON], and the Senator from Maryland [Mr. MATHIAS] were added as cosponsors of Senate Joint Resolution 352, a joint resolution to designate the week beginning September 7, 1986, as "Gaucher's Disease Awareness Week."

SENATE JOINT RESOLUTION 367

At the request of Mr. HEINZ, the names of the Senator from Maryland [Mr. MATHIAS], and the Senator from Wisconsin [Mr. KASTEN] were added as cosponsors of Senate Joint Resolution 367, a joint resolution to designate July 31, 1986, as "National Kidney Program Day."

SENATE JOINT RESOLUTION 386

At the request of Mr. DODD, the names of the Senator from Tennessee [Mr. SASSER], the Senator from Maine [Mr. MITCHELL], the Senator from Massachusetts [Mr. KERRY], the Senator from Wyoming [Mr. SIMPSON], the Senator from Illinois [Mr. SIMON], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Connecticut [Mr. WEICKER], the Senator from Rhode Island [Mr. CHAFEE], the Senator from New Hampshire [Mr. RUDMAN], the Senator from Utah [Mr. GARN], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from New Mexico [Mr. DOMENICI], the Senator from Virginia [Mr. TRIBLE], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Washington [Mr. EVANS], and the Senator from Hawaii [Mr. MATSUNAGA] were added as cosponsors of Senate Joint Resolution 386, a joint resolution to designate October 6, 1986, as "National Drug Abuse Education Day."

SENATE CONCURRENT RESOLUTION 145

At the request of Mr. STEVENS, the name of the Senator from Connecticut [Mr. WEICKER] was added as a cosponsor of Senate Concurrent Resolution 5, a concurrent resolution to encourage State and local governments and local educational agencies to require quality daily physical education programs for all children from kindergarten through grade 12.

SENATE CONCURRENT RESOLUTION 147

At the request of Mr. CRANSTON, the name of the Senator from Wyoming [Mr. WALLOP] was added as a cosponsor of Senate Concurrent Resolution 147, a concurrent resolution to express the sense of the Congress that the monkeys known as the Silver Spring Monkeys should be transferred from the National Institutes of Health to the custody of Primarily Primates, Inc., animal sanctuary in San Antonio, TX.

SENATE CONCURRENT RESOLUTION 154

At the request of Mr. D'AMATO, the names of the Senator from Utah [Mr. HATCH], and the Senator from Kansas [Mr. DOLE] were added as cosponsors of Senate Concurrent Resolution 154, a concurrent resolution concerning the Soviet Union's persecution of members of the Ukrainian and other public Helsinki Monitoring Groups.

SENATE RESOLUTION 435

At the request of Mr. MOYNIHAN, the names of the Senator from Rhode Island [Mr. CHAFEE], the Senator from Pennsylvania [Mr. SPECTER], the Senator from California [Mr. WILSON], the Senator from Massachusetts [Mr. KERRY], and the Senator from Missouri [Mr. EAGLETON] were added as cosponsors of Senate Resolution 435, a resolution to recognize Mr. Eugene Lang for his contributions to the education and the lives of disadvantaged young people.

AMENDMENT NO. 2240

At the request of Mr. DURENBERGER, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of amendment No. 2240 intended to be proposed to S. 2701, a bill to provide a comprehensive policy for the United States in opposition to the system of apartheid in South Africa, and for other purposes.

AMENDMENT NO. 2275

At the request of Mr. MITCHELL, the names of the Senator from Maine [Mr. COHEN], the Senator from Wisconsin [Mr. KASTEN], and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of amendment No. 2275 proposed to S. 2638, a bill to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

AMENDMENT NO. 2400

At the request of Mr. HUMPHREY, his name was added as a cosponsor of amendment No. 2400 proposed to S. 2638, a bill to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

At the request of Mr. QUAYLE, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of amendment No. 2400 proposed to S. 2638, supra.

## SENATE CONCURRENT RESOLUTION 158—RELATING TO RECENT ELECTION FRAUD IN MEXICO

Mr. DECONCINI (for himself, Mr. WILSON, Mr. DOMENICI, Mrs. HAWKINS, and Mr. GRAMM) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 158

Whereas the great nation of Mexico has been pursuing its long-range commitment to popular democracy since the revolution between 1910 and 1929;

Whereas the United States understands and supports the Mexican efforts to modernize its political party system;

Whereas the municipal and gubernatorial elections, throughout Mexico beginning with the July 6, 1986, elections in Chihuahua and lasting until December 1986 provide an opportunity to reflect the Mexican people's desire for, and the commitment of the Government of Mexico to, fostering the growth of democratic institutions;

Whereas 1226 gubernatorial, deputy, and city council seats between August 3, 1986, and December 7, 1986, will be decided by national and popular self-determination and democracy;

Whereas President de la Madrid has pledged that elections in Mexico should be clean and "morally renovated" and has announced a top-level review of charges of fraud in the July 1986 elections in Chihuahua;

Whereas the mid-term municipal elections in December 1984 led to Mexican and international accusations of massive fraud and bribery and resulted in damaging this proud nation's status as a democratic leader in Latin American countries that claim that their political systems are responding to social pressures through democratic change;

Whereas at least three people and possibly as many as eleven were killed and scores injured in January 1986 when protests against alleged fraud in municipal elections forced police to move against demonstrators;

Whereas it has been documented that over 1,000 incidents of fraud in 14 hours—from ballot box stuffing to disappearances of election officials have been reported;

Whereas the Mexican and international press has widely reported the July 6th elections in Chihuahua as replete with ballot-stuffing, fraudulent voter lists, and ejecting judges from the polling places;

Whereas the Catholic Church has issued a homily stating that "we denounce the lies, fraud, the deliberate delaying of voting, the predominance of public force, the supplanting of individuals, the blackmail, and the threats and all the arbitrary acts that took place" on July 6, 1986;

Whereas the people of Chihuahua have filled the streets, attended rallies, participated in hunger strikes, and actively demonstrated their attempts to nullify the fraudulent elections;

Whereas American tourists and citizens have been warned to be careful in traveling through Juarez as Mexican troops have marched into this city to quell the demonstrations protesting election fraud;

Whereas opening the predominantly one-party system in Mexico to greater democratic freedoms can only increase the international support for addressing serious trade and debt problems; and

Whereas the political, social, and economic stability of Mexico is inextricably intertwined with the United States as events in one country increasingly influence the other: Now, therefore, be it

*Resolved by the Senate (the House of Representatives concurring),* That (a) it is the sense of the Congress that the longstanding friendship between Mexico and the United States is best served by the commitment of these countries to condemning electoral fraud, preserving democratic freedoms, and openly discussing the issues of importance to both countries.

(b) Placing the highest priority on this commitment, the Congress hereby—

(1) stresses that President Reagan and President de la Madrid should discuss at their meeting in August the progress of Mexico in opening up its predominantly one-party system to greater democratic freedoms, address the need to cooperate on the growing drug problem, and directly discuss the July 6th election in Chihuahua;

(2) urges the President of Mexico to live up to his pledge to achieve "morally renovated" elections in the remaining 1,226 seats scheduled for State and municipal elections from August until December;

(3) encourages President de la Madrid to nullify the fraudulent elections in Chihuahua which took place on July 6, 1986, and to schedule new elections monitored by a newly created internal nonpartisan committee to demonstrate his commitment to a free and fair vote.

SEC. 2. The Secretary shall transmit a copy of this concurrent resolution to the President.

Mr. DECONCINI. Mr. President, I would like to read a few statements made by the Catholic Church discussing a specific political situation in an unnamed country:

The churches will remain closed today "as a sign of protest, as a loud cry on our part for those whose eyes remain blindfolded or who have been blinded by their own guilt."

"We energetically denounce the shameful acts that took place on election day . . . we denounce the lies, fraud, the deliberate delaying of voting, the predominance of public force, the supplanting of individuals, the blackmail, the threats and all arbitrary acts that took place on that day."

Where is the Catholic Church making these statements? A student of history might guess El Salvador. Recent world events might point toward the Philippines. Current newspaper accounts might implicate a Central American country struggling for democracy. Future newspapers could carry this scenario for South Africa or Chile. Where is this, you might ask? This is in the border state of Chihuahua, located in the north of Mexico. Independent civic groups and hundreds of volunteers have documented fraud in what they claim to be more than one-third of the polling places in Jaurez. The Catholic Church, from which I just quoted, has been increasingly critical of the Mexican Government. They have bluntly told Catholics they have a moral duty to demand clean government. They have candidly told the government that the cheating in Chihuahua constitutes a "social sin." They have threatened to close the churches in protest.

Mr. President, I have previously attempted to address this problem. On June 26, I introduced a resolution asking President de la Madrid to appoint a nonpartisan commission comprised of Mexicans of all political parties to monitor the elections in Mexico. On July 6, the elections in Chihuahua were marred by fraud in the most bitterly fought state election in recent Mexican history. The Mexican press reported my resolution to be meddling with the internal affairs of Mexico by sending Members of Congress to monitor the elections. This is simply inaccurate. I have written Sen-

ator Riva Palacio, leader of the Mexican Senate, to explain this issue.

I rise today to articulate three important goals. First of all, to establish more effective and constructive diplomatic channels with the Mexican Government. I have written to my good friend, Senator Riva Palacio in the Mexican Senate) to explain and clarify my first resolution. I believe he mistakenly thought it included international observers. Sharing a 2,000 mile border, 400 miles along Arizona, requires honest and constructive diplomacy. We need to continually discuss, debate, compromise, cooperate, and collaborate in formulating policy between our two countries. We will occasionally disagree, but we must work together. Our two countries are increasingly effected by social, political, and economic factors.

Second by resorting to fraudulent activities witnessed by thousands of voters and hundreds of reporters the Mexican Government risks heightened dissent at home. Furthermore, they risk criticism from abroad. And they risk eroding support from the U.S. Congress. Erosion of domestic support and international confidence complicates Mexico's efforts to solve its worsening economic problems. This hurts Mexico's ability to obtain relief from foreign debt. This erodes their efforts to bolster trade. I am hopeful that fair and free elections will demonstrate their courage and conviction in the Mexican system. This can only assist our neighbors in solving their domestic and international economic problems. Cheating only undermines international confidence precisely when it is most needed.

Third, this is not an endorsement of one party over another, as some reporters in the Mexican press might claim. This is an attempt to support fair and honest elections and condemn fraud. Regardless of who wins, the Mexican people will benefit by ensuring that their political will is reflected by elected leaders.

As a matter of foreign policy, the stability of Mexico ranks second only to the Soviet strategic balance in significance to Americans in the next decade. American foreign policy must remain true, consistent and fair. When we discuss fair elections, we must encourage all our friends to be accountable. That is why this resolution is both constructive and timely. President de la Madrid will meet in mid-August with President Reagan. As Mexico discusses its international trade and foreign debt problems, we must ensure that fair elections are discussed in an open and frank manner. Congress can send a very important message to both Presidents. This resolution recognizes the great nation of Mexico as a longstanding friend and ally. But it would be a mistake to ignore their recent electoral fraud and corruption with silent diplomacy. This resolution supports democratic principles and fair elections in Mexico for all of its citizens.

## SENATE RESOLUTION 460—AUTHORIZING REPRESENTATION BY THE SENATE LEGAL COUNSEL

Mr. SIMPSON (for Mr. DOLE, for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 460

Whereas, in the matter of Smith v. Ellis, et al., miscellaneous numbered 175-86, pending in the Superior Court of the District of Columbia, one of the parties has obtained a subpoena for the deposition testimony of Robert White, Administrative Assistant to Senator Pete Wilson, and for the production of documents by him at the deposition, and another of the parties has stated an intention to request a subpoena for the deposition testimony of Senator Wilson;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(a) and 288c(a)(2) (1982), the Senate may dirct its counsel to represent Members and employees of the Senate with respect to subpoenas issued to them in their official capacities;

Whereas, by the privileges of the United States Senate and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, by Rule VI of the Standing Rules of the Senate, no Senator shall absent himself from the service of the Senate without leave;

Whereas, when it appears that testimony of Members or employees of the Senate is or may be needful for use in any court for the promotion of justice, the Senate will take such action as will promote the end of justice consistent with the privileges and rights of the Senate: Now, therefore, be it

*Resolved*, That the Senate Legal Counsel is directed to represent Senator Pete Wilson, Robert White and any other employee of the Senate who may be asked to testify or to produce documents in the case of Smith v. Ellis, et al.

(2) That Senator Wilson is authorized to testify in the case of Smith v. Ellis, et al., except when his attendance at the Senate is necessary for the performance of his legislative duties and except concerning matters about which a privilege against disclosure should be asserted.

(3) That Robert White and any other employee of the Senate to whom a subpoena may be issued are authorized to testify and to produce documents in the case of Smith v. Ellis, et al., except concerning matters about which a privilege against disclosure should be asserted.

## SENATE RESOLUTION 461—RELATIVE TO RULE 39 OF THE STANDING RULES OF THE SENATE

Mr. SIMPSON (for Mr. DOLE) submitted the following resolution; which was considered and agreed to:

S. RES. 461

*Resolved*, That if a Member who is precluded from foreign travel by the provisions of Rule 39 is appointed as delegate to an official conference to be attended by Members of the Senate, then the appointment of that individual shall constitute an authorization by the Senate and the individual will not be deemed in violation of Rule 39.

SEC. 2. This resolution shall be applicable only until November 30, 1986.

## AMENDMENTS SUBMITTED

### DEPARTMENT OF DEFENSE AUTHORIZATION ACT, FISCAL YEAR 1987

#### SPECTER (AND HEINZ) AMENDMENT NO. 2555

(Ordered to lie on the table.)

Mr. SPECTER (for himself and Mr. HEINZ) submitted an amendment intended to be proposed by them to the bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes; as follows:

At the end of the amendment insert the following:

None of the provisions of this Act shall be effective unless the Secretary of Defense makes available, under current authority, from the funds available in the Army Industrial Fund, $25,000,000 which shall be available to be used to implement immediately, or to transfer to another appropriation account in this Act to be used to implement immediately, the program proposed by the Department in its letter of August 30, 1985, from the Assistant Secretary of Defense for Acquisition and Logistics, to rehabilitate and convert current steam generating plants at defense facilities in the United States to coal burning facilities in order to achieve a coal consumption target of 1,600,000 short tons of coal per year above current consumption levels at Department of Defense facilities in the United States by fiscal year 1994: *Provided*, That anthracite or bituminous coal shall be the source of energy at such installations: *Provided further*, That during the implementation of this proposal, the amount of anthracite coal purchased by the Department shall remain at least at the current purchase level, 302,000 short tons.

#### LEAHY AMENDMENT NO. 2556

(Ordered to lie on the table.)

Mr. LEAHY submitted an amendment intended to be proposed by him to the bill S. 2638, supra, as follows:

At the appropriate place in the amendment add the following section:

SEC. . No funds made available for expenditure through Section 6 of this Title for

assistance for the Nicaraguan Democratic Resistance may be obligated or expended by the Central Intelligence Agency or any other intelligence agency or entity of the United States.

## BENTSEN AMENDMENT NO. 2557

(Ordered to lie on the table.)

Mr. BENTSEN submitted an amendment intended to be proposed by him to the bill S. 2638, supra, as follows:

At the appropriate point in the bill, add a new section as follows:

SEC. . Community Planning Assistance. The Secretary of Defense may use funds appropriated to the Department of Defense for fiscal year 1987 to provide planning assistance to local communities if the Secretary determines that the financial resources available to the community (by grant or otherwise) are inadequate. The Secretary may use such funds to assist communities located near newly established homeports under the Naval Strategic Dispersal Program at Ingleside, Texas and other Gulf Coast sites. For fiscal year 1987, not to exceed $200,000 may be used for this purpose at Gulf Coast sites.

## BYRD AMENDMENT NO. 2558

Mr. BYRD proposed an amendment, which was subsequently modified, to the bill S. 2638, supra, as modified:

At the appropriate point in the bill, add the following new section:

SECTION . MILITARY IMPACT STATEMENT BY THE JOINT CHIEFS OF STAFF ON U.S. NONCOMPLIANCE WITH EXISTING STRATEGIC OFFENSIVE ARMS AGREEMENTS.

(a) Not later than October 1, 1986; the Chairman of the Joint Chiefs of Staff of the armed forces of the United States shall submit to Congress a report, in both classified and unclassified versions, containing a detailed assessment, including the individual views of each of the chiefs, of the military impacts on the national security of the United States, of the possible military responses of the Soviet Union to an American decision to no longer comply with major provisions of existing strategic offensive arms limitation agreements, including the central numerical sublimits on strategic nuclear delivery vehicles contained in the SALT II accord. This assessment shall concentrate on possible Soviet military responses during the period between fiscal year 1987 and fiscal year 1996, inclusive, and shall address, among other considerations, the following:

(1) the impact on the ability of U.S. strategic forces to accomplish their nuclear deterrent mission, including the impacts on the survivability of U.S. strategic forces and on the ability of U.S. strategic forces to achieve required damage expectancies against Soviet targets, of any expansion of Soviet military capabilities undertaken in response to a U.S. decision to abandon compliance with existing strategic offensive arms agreements;

(2) the additional cost to the United States, above currently projected military expenditures for those periods for which such budget projections are available, of research, development, production, deployment, and annual operations and support for any additional strategic forces required to counter any expansion in Soviet military capabilities undertaken in response to a U.S. decision to abandon compliance with existing strategic offensive arms agreements;

(3) under average annual real growth projections in defense spending of 0%, 1%, 2%, and 3%, the percent of the annual defense budget in each year between FY 1987 and FY 1996 which would be consumed by increased U.S. strategic forces needed to counter the Soviet force expansions;

(4) the military impacts on U.S. national security of the diversion the funds indentified in subsection (a)(2) away from non-strategic defense programs and to strategic programs to counter expanded Soviet strategic capabilities, including the military impacts of such a diversion on the ability of U.S. conventional forces to meet the nation's specific non-nuclear defense commitments as a member of the North Atlantic Treaty Organization, and under the 1960 Treaty of Mutual Cooperation and Security with Japan;

(5) in addition, this report shall address the military implications for the U.S. of determined Soviet violations of offensive arms control agreements.

(b) Notwithstanding any other provision of law none of the funds authorized or appropriated by this or any other act may be obligated or expended, directly or indirectly, by the Organization of the Joint Chiefs of Staff for prospective studies and analyses to be accomplished by individual civilian contractors or civilian contractor entities, after October 1, 1986, if the report mandated in subsection (a) has not been received by the Congress; and,

(c) The prohibition contained in subsection (b) on the obligation or expenditure of funds after October 1, 1986, shall cease to have effect upon the receipt by Congress of the report mandated in subsection (a).

## GOLDWATER AMENDMENT NOS. 2559 THROUGH 2561

(Ordered to lie on the table.)

Mr. GOLDWATER submitted three amendments intended to be proposed by him to amendment No. 2341 to the bill S. 2638, supra, as follows:

AMENDMENT No. 2559

Strike out clause (1) of the matter to be inserted and renumber the remaining clauses appropriately.

AMENDMENT No. 2560

Strike out clause (2) of the matter to be inserted and renumber clause (3) of such matter as clause (2).

AMENDMENT No. 2561

Strike out clause (3) of the matter to be inserted.

## MATHIAS AMENDMENT NO. 2562

(Ordered to lie on the table.)

Mr. MATHIAS submitted an amendment intended to be proposed by him to the bill S. 2638, supra, as follows:

Notwithstanding any section of this bill, section 203 of this bill shall not be effective unless the President:

(1) requests the advice and consent of the Senate to ratification (with a report containing any plans the President may have to negotiate supplemental verification procedures, or if the President believes it necessary, any understanding or reservation on the subject of verification which should be attached to the treaty) of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties, signed in 1974 and 1976, respectively; and

(2) proposes to the Soviet Union the immediate resumption of negotiations toward conclusion of a verifiable comprehensive test ban treaty.

## BINGAMAN (AND BOREN) AMENDMENT NO. 2563

Mr. BINGAMAN (for himself and Mr. BOREN) proposed an amendment to the bill S. 2638, supra; as follows:

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. SALE OF TOBACCO PRODUCTS IN COMMISSARIES, EXCHANGES, AND SHIPS' STORES

(a) IN GENERAL.—(1) Chapter 147 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2486. Sale of tobacco products in commissaries, exchanges, and ships' stores; use of proceeds

"(a) Tobacco products may be sold in commissary stores, military exchanges, or ships' stores subject to the requirements prescribed in subsections (b) and (c).

"(b)(1) In the case of a commissary store, military exchange, or ship's store located in the United States, the price charged for any tobacco product shall be the prevailing price charged by private commercial businesses for the retail sale of such tobacco product in the retail market area in which the exchange or ship's store is located.

"(2) In the case of a commissary store, military exchange, or ship's store located outside the United States, the price charged for any tobacco product shall be the average amount charged by private commercial businesses for the retail sale of such product in the United States.

"(3)(A) In determining the prevailing price charged or the average price charged by a commercial business, applicable State and local taxes shall be included.

"(B) The prevailing price or the average price may be determined under an appropriate sampling procedure.

"(c)(1) The Secretary of a military department may use the profits from the sale of tobacco products by commissary stores under the Secretary's jurisdiction to promote health and fitness for members of the armed forces and their dependents.

"(2) Amounts made available under paragraph (1) shall remain available for obligation without fiscal year limitation.

"(d) The Secretary of Defense shall prescribe regulations to carry out this section.

"(e) In this section:

"(1) The term 'profits' means the amount which represents the difference between the price charged by commissary stores for the sale of tobacco products and the cost incurred by such commissary stores for such products.

"(2) The term 'tobacco product' includes cigarettes, cigars, tobacco processed for cigarette or pipe smoking, and tobacco processed for oral use.

"(3) The term 'United States' includes the Commonwealth of Puerto Rico and the territories and possessions of the United States.".

(b) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new section:

"2486. Sale of tobacco products in commis-

saries, exchanges, and ships' stores; use of proceeds.".

(c) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect October 1, 1986.

---

## McCONNELL (AND FORD) AMENDMENT NO. 2564

Mr. McCONNELL (for himself and Mr. FORD) proposed an amendment to the bill S. 2638, supra, as follows:

On page 229, between lines 14 and 15, insert the following new section;

(1) No chemical weapons, agents, or components used in chemical weapons may be shipped by any means into the Lexington-Bluegrass Depot in Richmond, Kentucky, for any purpose, including disposal;

(2) Following disposal of the chemical weapons stockpile stored at the Lexington-Bluegrass Depot, as required by PL 99-145, the facility may not be used for assembly, construction, testing, storage, or disposal of any chemical or biological weapon;

(3) The Secretary of Defense shall have the authority to waive these provisions in the event that he determines it is in the national security interest.

---

## STEVENS (AND OTHERS) AMENDMENT NO. 2565

Mr. STEVENS (for himself, Mr. D'AMATO, and Mr. DODD) proposed an amendment to the bill S. 2638, supra, as follows:

On page 229, insert the following after line 14:

SEC. 1221. COAST GUARD.

(a) Of the amounts authorized to be appropriated for the Department of Defense in fiscal year 1987:

(1) $200,000,000 shall be for the acquisition and maintenance of United States Coast Guard investories related to the national defense; and

(2) $100,000,000 in operating funds for the performance of defense readiness responsibilities of the United States Coast Guard. Funds made available pursuant to the authorizations specified in this section shall be attributed to functional category 050 (National Defense) of the Budget of the Government of the United States.

(3) Of these amounts authorized, $15,000,000 shall be available for transfer to the Secretary of Transportation and shall be available only for the program described in paragraph (b).

(b) ENHANCED DRUG-INTERDICTION ASSISTANCE.—

(1) ASSIGNMENT OF COAST GUARD PERSONNEL ON NAVAL VESSELS.—Chapter 18 of title 10, United States Code, is amended by adding after section 378 the following new section:

"SEC. 379. ASSIGNMENT OF PERSONNEL TO NAVAL VESSELS FOR DRUG ENFORCEMENT PURPOSES.

"(a) The Secretary of Defense and the Secretary of Transportation may provide that there be assigned on board surface naval vessels at sea in a drug-interdiction area members of the Coast Guard who are trained in law enforcement and have power to arrest, search, and seize property and persons suspected of violations of law.

"(b) Members of the Coast Guard assigned to duty on board naval vessels under this section shall perform such law enforcement functions (including drug-interdiction functions—

"(1) as may be agreed upon by the Secretary of Defense and the Secretary of Transportation; and

"(2) as are otherwise within the jurisdiction of the Coast Guard.

"(c) No fewer than 500 active duty personnel of the Coast Guard shall be assigned each fiscal year to duty as provided in subsection (a).

"(d) As used in this section, the term 'drug-interdiction area' means an area outside the land area of the United States in which the Secretary of Defense (in consultation with the Attorney General) determines that activities involving smuggling of drugs into the United States are ongoing."

(c) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter is amended by inserting immediately below the item relating to section 378 the following new item: "378. Assignment of personnel to naval vessels for drug enforcement purposes."

---

## D'AMATO (AND OTHERS) AMENDMENT NO. 2566

Mr. D'AMATO (for himself, Mr. CHILES, Mrs. HAWKINS, and Mr. MURKOWSKI) proposed an amendment to the bill S. 2638, supra, as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. FACILITIES FOR THE DETENTION OF CERTAIN ALIENS.

Not later than 60 days after the date of the enactement of this Act, the Secretary of Defense shall transmit to the Attorney General of the United States—

(1) a list of facilities under the jurisdiction of the Department of Defense which are suitable for use for the detention of Marielito criminal aliens;

(2) a statement of the estimated costs of using such facilities for the detention of such aliens; and

(3) a statement identifying the agencies of the Federal Government which would bear such costs.

A copy of this report shall be made available, upon request to the Attorney General, to Members of the United States Senate and the United States House of Representatives.

---

## COHEN (AND OTHERS) AMENDMENT NO. 2567

Mr. COHEN (for himself, Mr. NUNN, Mr. CHILES, Mr. DIXON, Mr. DURENBERGER, Mr. HATCH, Mr. THURMOND, Mr. ANDREWS, Mr. BOREN, Mr. BRADLEY, Mr. FORD, Mr. JOHNSTON, Mr. BENTSEN, Mr. EXON, Mr. DANFORTH, Mr. HOLLINGS, Mr. RUDMAN, Mr. SIMON, Mr. GOLDWATER, Mr. GRAMM, Mr. KASTEN, Mr. MITCHELL, Mr. STEVENS, Mr. WILSON, Mr. BUMPERS, Mr. DECONCINI, Mr. GORE, and Mr. LAXALT) proposed an amendment to the bill S. 2638, supra, as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. SPECIAL OPERATIONS FORCES.

(a) CONGRESSIONAL FINDINGS.—The Congress finds—

(1) that the threat to the United States and its allies from unconventional warfare, including terrorism and insurgency, continues to increase at an alarming rate;

(2) that, although the United States must continue to maintain and improve its strategic and conventional force capabilities in order to deter aggression and to protect the security of the United States and its allies, the use of armed force by the United States since the end of the Korean conflict has principally been in response to insurgencies against allies of the United States and to terrorist attacks directed at the United States and American citizens;

(3) that the most likely use of armed force by the United States in the foreseeable future will be counterterrorist, counterinsurgency, and other unconventional operations;

(4) that the capabilities needed to response to threats from unconventional warfare are not those traditionally fostered by the armed forces of the United States;

(5) that the Department of Defense has failed to recognize that conventional force capabilities can seldom be effectively employed in unconventional warfare missions;

(6) that conventional force commanders have a limited understanding of special operations forces capabilities and have misemployed such forces;

(7) that the Department of Defense has not given sufficient emphasis to the planning and preparation for unconventional warfare missions or to the appropriate integration of special operations forces capabilities into the national security strategy of the United States;

(8) that the National Security Council and the Office of the Secretary of Defense have not given sufficient attention to the formulation of policies to guide the development of special operations forces capabilities;

(9) that the Department of Defense has not provided adequate resources or support for special operations forces, particularly in airlift capability;

(10) that the Department of Defense has not given sufficient attention to ensuring the provision of adequate intelligence support for unconventional warfare missions;

(11) that the Department of Defense has not given sufficient attention to the tactics, doctrines, and training associated with unconventional warfare missions;

(12) that problems of command and control have repeatedly beset military forces of the United States engaged in unconventional warfare operations;

(13) that such problems were evident during the Mayaguez incident, the Iranian hostage rescue mission, the Grenada operation, and the Beirut peacekeeping mission;

(14) that the cooperation and coordination among the special operations forces of the Army, Navy, and Air Force are seriously deficient; and

(15) that the Department of Defense has not given sufficient attention to personnel policies, practices, and procedures to ensure the availability of sufficent numbers of officers with the skills required for unconventional warfare.

(b) ESTABLISHMENT OF SPECIAL OPERATIONS FORCES.—(1) The President shall establish, not later than 180 days after the date of the enactment of this Act, a unified combatant command for special operations forces.

(2)(A) The commander of the unified combatant command established pursuant to paragraph (1) shall hold the grade of general or, in the case of an officer of the Navy, admiral if appointed to that grade by the President, by and with the advice and consent of the Senate.

(B) The commander of such command shall be responsible for and shall have the authority necessary to conduct all affairs of

such command relating to special operations forces, including the following matters:

(i) Developing strategy, doctrine, and tactics.

(ii) Training of assigned forces.

(iii) Prescribing professional military education.

(iv) Planning resources (including validating requirements).

(v) Ensuring combat readiness.

(vi) Developing special equipment.

(vii) Ensuring the interoperability of equipment and forces.

(viii) Tasking of intelligence support.

(ix) Monitoring the promotions, assignments, retention, training, and professional military education of special operations forces officers.

(C) The commander of such command shall be fully prepared to assume operational command of selected special operations missions if directed to do so by the National Command Authority.

(3) The President shall assign to the unified combatant command established pursuant to paragraph (1) all active and reserve special operations forces of the Army, Navy, and Air Force based in the United States.

(4) The President shall assign special operations forces located outside the United States to the unified combatant command in whose geographic area such forces are stationed.

(5) Except in special cases determined by the Chairman of the Joint Chiefs of Staff, special operations missions shall be conducted under the operational command of the unified combatant commanders in whose geographic areas such missions are to be conducted.

(6) The Secretary of Defense shall create for the special operations forces a major force program category for the Five-Year Defense Plan of the Department of Defense.

(7) The Secretary of Defense shall substantially augment the capabilities of the Office of the Secretary of Defense to provide effective policy and resource oversight of special operations forces.

(c) MINIMUM GRADE FOR COMMANDERS OF SPECIAL OPERATIONS COMMANDS.—Commanders of the special operations command assigned to the United States European Command and the United States Pacific Command shall hold the grade of general or, in the case of an officer of the Navy, admiral if appointed to that grade by the President, by and with the advice and consent of the Senate.

(d) BOARD FOR UNCONVENTIONAL WARFARE.—The President shall establish within the National Security Council a board to be known as the "Board for Unconventional Warfare". The principal duty of such board shall be to coordinate the unconventional warfare policies of the United States.

(e) DEPUTY ASSISTANT TO THE PRESIDENT FOR NATIONAL SECURITY AFFAIRS FOR UNCONVENTIONAL WARFARE.—The President shall designate within the Office of the President a Deputy Assistant to the President for National Security Affairs for Unconventional Warfare.

(f) FUNDING.—Programs and activities under the Special Operations Forces Master Plan shall be paid for with funds appropriated to the Department of Defense for such purposes.

(g) REPORT.—(1) The President shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the actions that the President and the Secretary of Defense have taken to correct the deficiencies identified in subsection (a) and to implement the provisions of subsections (b) through (e).

(2) Such report shall be submitted not later than March 1, 1987.

## WILSON AMENDMENT NO. 2568

Mr. WILSON proposed an amendment to the bill S. 2638, supra; as follows:

On page 118, after line 16, add the following new section:

SEC. 705. ACQUISITION OF COMPOSITE HEALTH CARE SYSTEM.

(a) Section 1203 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) is repealed.

(b) The Secretary of Defense shall immediately undertake the acquisition of the Composite Health Care System utilizing the acquisition strategy described in Department of the Army Request for Proposal Number DAH 26-85-R-0009.

## PRYOR AMENDMENT NO. 2569

Mr. PRYOR proposed an amendment to the bill S. 2638, supra; as follows:

At the appropriate point in the bill add the following new section:

SEC. . It is the sense of the Senate that no reprogramming of funds shall occur in any federal agency unless a notification of such reprogramming has appeared in the Congressional Record and has been approved through procedures approved by the Senate.

# COMPREHENSIVE ANTI-APARTHEID ACT

## PRESSLER AMENDMENT NO. 2570

(Ordered to lie on the table.)

Mr. PRESSLER submitted an amendment intended to be proposed by him to the bill (S. 2701) to provide a comprehensive policy for the United States in opposition to the system of apartheid in South Africa, and for other purposes; as follows:

Delete Section 309.

# DEPARTMENT OF DEFENSE AUTHORIZATION ACT, FISCAL YEAR 1987

## BINGAMAN (AND OTHERS) AMENDMENT NO. 2571

Mr. BINGAMAN (for himself, Mr. EXON, Mr. GLENN, Mr. DIXON, and Mr. GOLDWATER), proposed an amendment to the bill S. 2638, supra; as follows:

On page 317, after line 22, insert the following new section:

SEC. 2191. STRATEGIC HOMEPORTING.

Notwithstanding any other provision of law, funds appropriated pursuant to an authorization in this or any other Act may not be used to construct homeporting facilities at Staten Island, New York, or Everett, Washington, and funds authorized to be appropriated for such purpose in this Act are instead authorized to be appropriated for Navy munitions procurement.

## WILSON (AND OTHERS) AMENDMENT NO. 2572

(Ordered to lie on the table.)

Mr. WILSON (for himself, Mr. NUNN, Mr. QUAYLE, and Mr. LUGAR) submitted an amendment intended to be proposed by him to the bill S. 2638, supra; as follows:

On page 4, line 11, strike out "$5,557,490,000" and insert in lieu thereof "5,597,490,000".

On page 6, between lines 12 and 13, insert the following new subsection:

(g) Rolling Airframe Missile Program.—(1) None of the funds appropriated pursuant to an authorization in this title may be obligated or expended in connection with procurement of the Rolling Airframe Missile program until the Secretary of Defense has certified in writing to the Committees on Armed Services of the Senate and the House of Representatives that—

(A) the total Navy research and development cost of the Rolling Airframe Missile program will not exceed $219,700,000; and

(B) the Secretary will terminate the program if at any time he determines that the total Navy research and development cost will exceed the amount specified in subparagraph (A); and

(C) the recurring missile unit flyaway cost for a minimum of 4,900 missiles will not exceed $100,000 per missile (using fiscal year 1986 dollars as the base year); and

(D) the design of the Rolling Airframe Missile and its unique support equipment are complete and that the system performance has not been degraded from the original development specifications (as contained in Navy Decision Coordinating Paper No. SO-167-AA); and

(E) the Director of Operational Test and Evaluation has approved a test and evaluation master plan for the Rolling Airframe Missile.

(2) If the Secretary of Defense fails to make the certification described in paragraph (1) by March 30, 1987, he shall cause the Rolling Airframe Missile program to be terminated effective on that date.

(3) Subsection (d) of section 205 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 608), is repealed.

(4) Department of Defense reprogramming request 85-91PA is approved.

On page 11, line 2, strike out "$9,265,378,000" and insert in lieu thereof "$9,305,306,000".

On page 13, between lines 5 and 6, insert the following new subsection:

(f) Penquin Missile Program.—Funds appropriated pursuant to authorization in this title may not be obligated or expended for development of the Penguin Missile, to include integration of such missile with LAMPS Mark III, until the Secretary of Defense submits a report to the Committees on Armed Services of the Senate and the House of Representatives which—

(1) identifies all funding, by year, required for completion of research, development, test and evaluation of the Penguin missile; and

(2) certifies that the total procurement and research and development cost of the Penguin missile program will not exceed $200,000,000.

## GRAMM AMENDMENT NO. 2573

(Ordered to lie on the table.)

Mr. GRAMM submitted an amendment intended to be proposed by him to amendment No. 2405 proposed by Mr. KENNEDY to the bill S. 2638, supra; as follows:

Before the period at the end of the amendment: "and insert in lieu thereof the following:

SEC. 1002. APPLICATION OF SERVICE CONTRACT ACT OF 1965 TO DEPARTMENT OF DEFENSE SERVICE CONTRACTS

(a) MINIMUM CONTRACT SIZE.—The matter preceding paragraph (1) of section 2(a) of the Service Contract Act of 1965 (41 U.S.C. 351(a)) is amended by inserting "or, in the case of a contract entered into by the Department of Defense, $1,000,000" after "$2,500".

(b) PRINCIPAL PURPOSE RULE.—Section 2 of such Act (41 U.S.C. 351) is amended—

(1) in subsection (a), by striking out "Every" and inserting in lieu thereof "Subject to subsection (c), every"; and

(2) by adding at the end the folowing new subsection:

"(c) In the case of a contract entered into by the Department of Defense, this Act shall apply only to a contract the principal purpose of which is to furnish services and shall not apply to a contract which requires the provision of services if the principal purpose of the contract is not to furnish services.".

(c) PREDECESSOR CONTRACTS.—Section 4(c) of such Act (41 U.S.C. 353(c)) is amended—

(1) by striking out "No" and inserting in lieu thereof "(1) Subject to paragraph (2), no"; and

(2) by adding at the end the following new paragraph:

"(2)(A) Paragraph (1) shall not apply in the case of a contract that succeeds a contract (that is subject to this Act) entered into by the Department of Defense unless the Secretary concerned determines on the record after opportunity for an agency hearing (notwithstanding section 554(a)(4) of title 5, United States Code) that the wages and fringe benefits under the successor contract are less than the prevailing wages and fringe benefits in the locality in which the work is to be performed.

"(B) As used in this paragraph, 'Secretary concerned' means—

"(i) the Secretary of a military department, in the case of a contract awarded by such department; or

"(ii) the Secretary of Defense, in the case of a contract awarded by a Defense Agency of the Department of Defense.".

(d) DEFINITIONS.—Section 8 of such Act (41 U.S.C. 357) is amended—

(1) By redesignating subsections (a), (b), (c), and (d) as subsections (d), (e), (a), and (f), respectively; and

(2) by inserting after subsection (a) (as so redesignated) the following new subsections:

"(b) The term 'locality', as used with respect to a contract entered into by the Department of Defense, means the particular urban or rural subdivision of a State in which work is to be performed.

"(c) The term 'prevailing rates', as used in paragraphs (1) and (2) of section 2(a) with respect to a contract entered into by the Department of Defense, includes the rate of the entire range of wages and benefits paid to corresponding classes of service employees in the locality in which work is to be performed.".

(e) WAGE AND FRINGE BENEFIT DETERMINATIONS OF SECRETARY.—(1) Section 10 of such Act (41 U.S.C. 358) is amended—

(A) by striking out "It" and inserting in lieu thereof "(a) Subject to subsection (b), it"; and

(B) by adding at the end the following new subsection:

"(b) In the case of a contract entered into by the Department of Defense, the Secretary shall make determinations of minimum monetary wages and fringe benefits for the various classes or service employees under paragraphs (1) and (2) of section 2(a) with respect to a service contract under which more than 25 service employees are to be employed.".

(2) The amendment made by paragraph (1) shall apply with respect to contracts entered into after September 30, 1986.

SEC. 1003. APPLICATION OF THE DAVIS-BACON ACT TO MILITARY CONSTRUCTION CONTRACTS

(a) IN GENERAL.—Subsection (a) of the first section of the Act entitled "An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes", approved March 3, 1931 (40 U.S.C. 276a(a)), commonly known as the Davis-Bacon Act, is amended—

(1) by inserting "(1)" after "(a)"; and

(2) by inserting "or, in the case of contracts awarded by the Department of Defense, every contract in excess of $250,000" after "$2,000" in the first sentence.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to solicitations for bids or proposals made on and after the date of the enactment of this Act.

SEC. 1004. NONAPPLICABILITY OF THE SERVICE CONTRACT ACT OF 1965 TO CERTAIN MARINER SERVICE CONTRACTS

(a) IN GENERAL.—Chapter 141 of title 10, United States Code (as amended by section 962 of this Act), is amended by adding at the end thereof the following new section:

"§ 2409. Nonapplicability of the Service Contract Act of 1965 to certain mariner service contracts

"The Service Contract Act of 1965 (41 U.S.C. 351 et seq.) shall not apply to any contract for services furnished on a vessel owned or chartered by an agency named in section 2303(a) of this title.".

(b) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter (as amended by section 962 of this Act) is amended by adding at the end thereof the following new item:

"2409. Nonapplicability of the Service Contract Act of 1965 to certain mariner service contracts.".

(c) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect with respect to solicitations for bids or proposals issued on or after the date of enactment of this Act.

SEC. 1005. INCREASE IN THRESHOLD APPLICABLE TO STATUTORY CONTRACTING-OUT PROCEDURES

(a) IN GENERAL.—Section 502(d) of the Department of Defense Authorization Act, 1981 (10 U.S.C. 2304 note) is amended by striking out "40 or fewer" and inserting in lieu hereof "50 or fewer".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on January 1, 1987.

---

## GRAMM AMENDMENT NO. 2574

(Ordered to lie on the table.)

Mr. GRAMM submitted an amendment intended to be proposed by him to amendment No. 2403 proposed by Mr. KENNEDY to the bill S. 2638, supra; as follows:

Before the period at the end of the amendment: "and insert in lieu thereof the following:

SEC. 1002. APPLICATION OF SERVICE CONTRACT ACT OF 1965 TO DEPARTMENT OF DEFENSE SERVICE CONTRACTS

(a) MINIMUM CONTRACT SIZE.—The matter preceding paragraph (1) of section 2(a) of the Service Contract Act of 1965 (41 U.S.C. 351(a)) is amended by inserting "or, in the case of a contract entered into by the Department of Defense, $1,000,000" after "$2,500".

(b) PRINCIPAL PURPOSE RULE.—Section 2 of such Act (41 U.S.C. 351) is amended—

(1) in subsection (a), by striking out "Every" and inserting in lieu thereof "Subject to subsection (c), every"; and

(2) by adding at the end the following new subsection:

"(c) In the case of a contract entered into by the Department of Defense, this Act shall apply only to a contract the principal purpose of which is to furnish services and shall not apply to a contract which requires the provision of services if the principal purpose of the contract is not to furnish services.".

(c) PREDECESSOR CONTRACTS.—Section 4(c) of such Act (41 U.S.C. 353(c)) is amended—

(1) by striking out "No" and inserting in lieu thereof "(1) Subject to paragraph (2), no"; and

(2) by adding at the end the following new paragraph:

"(2)(A) Paragraph (1) shall not apply in the case of a contract that succeeds a contract (that is subject to this Act) entered into by the Department of Defense unless the Secretary concerned determines on the record after opportunity for an agency hearing (notwithstanding section 554(a)(4) of title 5, United States Code)that the wages and fringe benefits under the successor contract are less than the prevailing wages and fringe benefits in the locality in which the work is to be performed.

"(B) As used in this paragraph, 'Secretary concerned' means—

"(i) the Secretary of a military department, in the case of a contract awarded by such department; or

"(ii) the Secretary of Defense, in the case of a contract awarded by a Defense Agency of the Department of Defense.".

(d) DEFINITIONS.—Section 8 of such Act (41 U.S.C. 357) is amended—

(1) by redesignating subsections (a), (b), (c), and (d) as subsections (d), (e), (a), and (f), respectively; and

(2) by inserting after subsection (a) (as so designated) the following new subsections:

"(b) The term 'locality', as used with respect to a contract entered into by the Department of Defense, means the particular urban or rural subdivision of a State in which work is to be performed.

"(c) The term 'prevailing rates', as used in paragraphs (1) and (2) of section 2(a) with respect to a contract entered into by the Department of Defense, includes the rate of the entire range of wages and benefits paid to corresponding classes of service employees in the locality in which work is to be performed.".

(e) WAGE AND FRINGE BENEFIT DETERMINATIONS OF SECRETARY.—(1) Section 10 of such Act (41 U.S.C. 358) is amended—

(A) by striking out "It" and inserting in lieu thereof "(a) Subject to subsection (b), it"; and

(B) by adding at the end the following new subsection:

"(b) In the case of a contract entered into by the Department of Defense, the Secretary shall make determinations of minimum monetary wages and fringe benefits for the various classes or service employees under paragraphs (1) and (2) of section 2(a) with respect to a service contract under which more than 25 service employees are to be employed.".

(2) The amendment made by paragraph (1) shall apply with respect to contracts entered into after September 30, 1986.

SEC. 1003. APPLICATION OF THE DAVIS-BACON ACT TO MILITARY CONSTRUCTION CONTRACTS.

(a) IN GENERAL.—Subsection (a) of the first section of the Act entitled "An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes", approved March 3, 1931 (40 U.S.C. 276a(a)), commonly known as the Davis-Bacon Act, is amended—

(1) by inserting "(1)" after "(a)"; and

(2) by inserting "or, in the case of contracts awarded by the Department of Defense, every contract in excess of $250,000" after "$2,000" in the first sentence.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to solicitations for bids or proposals made on and after the date of the enactment of this Act.

SEC. 1004. NONAPPLICABILITY OF THE SERVICE CONTRACT ACT OF 1965 TO CERTAIN MARINER SERVICE CONTRACTS.

(a) IN GENERAL.—Chapter 141 of title 10, United States Code (as amended by section 962 of this Act), is amended by adding at the end thereof the following new section:

"§ 2409. Nonapplicability of the Service Contract Act of 1965 to certain mariner service contracts

"The Service Contract Act of 1965 (41 U.S.C. 351 et seq.) shall not apply to any contract for services furnished on a vessel owned or chartered by an agency named in section 2303(a) of this title."

(b) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter (as amended by section 962 of this Act) is amended by adding at the end thereof the following new item:

"2409. Nonapplicability of the Service Contract Act of 1965 to certain mariner service contracts.".

(c) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect with respect to solicitations for bids or proposals issued on or after the date of enactment of this Act.

---

## GRAMM AMENDMENT NO. 2575

(Ordered to lie on the table.)

Mr. GRAMM submitted an amendment intended to be proposed by him to amendment No. 2402 proposed by Mr. KENNEDY to the bill S. 2638, supra, as follows:

Before the period at the end of the amendment: "and insert in lieu thereof the following:

SEC. 1002. APPLICATION OF SERVICE CONTRACT ACT OF 1965 TO DEPARTMENT OF DEFENSE SERVICE CONTRACTS

(a) MINIMUM CONTRACT SIZE.—The matter preceding paragraph (1) of section 2(a) of the Service Contract Act of 1966 (41 U.S.C. 351(a)) is amended by inserting "or, in the case of a contract entered into by the Department of Defense, $1,000,000" after "$2,500".

(b) PRINCIPAL PURPOSE RULE.—Section 2 of such Act (41 U.S.C. 351) is amended—

(1) in subsection (a), by striking out "Every" and inserting in lieu thereof "Subject to subsection (c), every"; and

(2) by adding at the end the following new subsection:

"(c) In the case of a contract entered into by the Department of Defense, this Act shall apply only to a contract the principal purpose of which is to furnish services and shall not apply to a contract which requires the provision of services if the principal purpose of the contract is not to furnish services.".

(c) PREDECESSOR CONTRACTS.—Section 4(c) of such Act (41 U.S.C. 353(c)) is amended—

(1) by sriking out "No" and inserting in lieu thereof "(1) Subject to paragraph (2), no"; and

(2) by adding at the end the following new paragraph:

"(2)(A) Paragraph (1) shall not apply in the case of a contract that succeeds a contract (that is subject to this Act) entered into by the Department of Defense unless the Secretary concerned determines on the record after opportunity for an agency hearing (notwithstanding section 554(a)(4) of title 5, United States Code) that the wages and fringe benefits under the successor contract are less than the prevailing wages and fringe benefits in the locality in which the work is to be performed.

"(B) As used in this paragraph, 'Secretary concerned' means—

"(i) the Secretary of a military department, in the case of a contract awarded by such department; or

"(ii) the Secretary of Defense, in the case of a contract awarded by a Defense Agency of the Department of Defense.".

(d) DEFINITIONS.—Section 8 of such Act (41 U.S.C. 357) is amended—

(1) by redesignating subsections (a), (b), (c), and (d) as subsections (d), (e), (a), and (f), respectively; and

(2) by inserting after subsection (a) (as so redesignated) the following new subsections:

"(b) The term 'locality', as used with respect to a contract entered into by the Department of Defense, means the particular urban or rural subdivision of a State in which work is to be performed.

"(c) The term 'prevailing rates', as used in paragraphs (1) and (2) of section 2(a) with respect to a contract entered into by the Department of Defense, includes the rate of the entire range of wages and benefits paid to corresponding classes of service employees in the locality in which work is to be performed.".

(e) WAGE AND FRINGE BENEFIT DETERMINATIONS OF SECRETARY.—(1) Section 10 of such Act (41 U.S.C. 358) is amended—

(A) by striking out "It" and inserting in lieu thereof "(a) Subject to subsection (b), it"; and

(B) by adding at the end the following new subsection:

"(b) In the case of a contract entered into by the Department of Defense, the Secretary shall make determinations of minimum monetary wages and fringe benefits for the various classes or service employees under paragraphs (1) and (2) of section 2(a) with respect to a service contract under which more than 25 service employees are to be employed.".

(2) The amendment made by paragraph (1) shall apply with respect to contracts entered into after September 30, 1986.

SEC. 1003. APPLICATION OF THE DAVIS-BACON ACT TO MILITARY CONSTRUCTION CONTRACTS

(a) IN GENERAL.—Subsection (a) of the first section of the Act entitled "An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes", approved March 3, 1931 (40 U.S.C. 276a(a)), commonly known as the Davis-Bacon Act, is amended—

(1) by inserting "(1)" after "(a)"; and

(2) by inserting "or, in the case of contracts awarded by the Department of Defense, every contract in excess of $250,000" after "$2,000" in the first sentence.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to solicitations for bids or proposals made on and after the date of the enactment of this Act.

SEC. 1004. NONAPPLICABILITY OF THE SERVICE CONTRACT ACT OF 1965 TO CERTAIN MARINER SERVICE CONTRACTS

(a) IN GENERAL.—Chapter 141 of title 10, United States Code (as amended by section 962 of this Act), is amended by adding at the end thereof the following new section:

"§ 2409. Nonapplicability of the Service Contract Act of 1965 to certain mariner service contracts

"The Service Contract Act of 1965 (41 U.S.C. 351 et seq.) shall not apply to any contract for services furnished on a vessel owned or chartered by an agency named in section 2303(a) of this title.".

(b) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter (as amended by section 962 of this Act) is amended by adding at the end thereof the following new item:

"2409. Nonapplicability of the Service Contract Act of 1965 to certain mariner service contracts.".

(c) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect with respect to solicitations for bids or proposals issued on or after the date of enactment of this Act.

---

## WILSON AMENDMENT NO. 2576

(Ordered to lie on the table.)

Mr. WILSON submitted an amendment intended to be proposed by him to amendment No. 2413 proposed by Mr. WILSON (and others) to the bill S. 2638, supra, as follows:

On page 2, strike lines 4 through 24 and insert in lieu thereof:

(A) the total Navy research and development cost of the Rolling Airframe Missile program will not exceed $219,700,000; and

(B) the Secretary will terminate the program if at any time he determines that the total Navy research and development cost will exceed the amount specified in subparagraph (A); and

(C) the recurring missile unit flyaway cost for a minimum of 4,900 missiles will not exceed $100,000 per missile (using fiscal year 1986 dollars as the base year); and

(D) the design of the Rolling Airframe Missile and its unique support equipment are complete and that the system performance has not been degraded from the original development specifications (as contained in Navy Decision Coordinating Paper No. SO-167-AA); and

(E) the Director of Operational Test and Evaluation has approved a test and evaluation master plan for the Rolling Airframe Missile.

On page 3, between lines 6 and 7, insert the following:

(4) Department of Defense reprogramming request 85-91PA is approved.

On page 3, strike all after line 10 and insert in lieu thereof:

(f) PENGUIN MISSILE PROGRAM.—Funds appropriated pursuant to authorization in this title may not be obligated or expended for development of the Penguin Missile, to include integration of such missile with LAMPS Mark III, until the Secretary of Defense submits a report to the Committees on Armed Services of the Senate and the House of Representatives which—

(1) identifies all funding, by year, required for completion of research, development, test and evaluation of the Penguin missile; and

(2) certifies that the total procurement and research and development cost of the Penguin missile program will not exceed $200,000,000.

---

## HUMPHREY AMENDMENT NOS. 2577 AND 2578

(Ordered to lie on the table.)

Mr. HUMPHREY submitted two amendments intended to be proposed by him to amendment No. 2404 proposed by Mr. KENNEDY to the bill S. 2638, supra, as follows:

AMENDMENT No. 2577

Strike out "not" before "apply".

AMENDMENT No. 2578

Strike out "shall not apply" and insert in lieu thereof "shall apply and, notwithstanding the amendment made by section 1002(a) to section 2(a)(1) of the Service Contract Act of 1965 (41 U.S.C. 351(a)(1)), section 2(a)(1) of such Act is amended by inserting "or, in the case of a contract entered into by the Department of Defense, $500,000" after "$2,500".

---

## WILSON AMENDMENT NO. 2579

(Ordered to lie on the table.)

Mr. WILSON submitted an amendment intended to be proposed by him to amendment No. 2362 to the bill S. 2638, supra; as follows:

By striking out of the matter to be inserted those clauses designated as (A), (B), and (C) and inserting in lieu thereof the following:

(A) identifies all funding, by year, required for completion of research, development, test and evaluation of the Penguin missile; and

(B) certifies that the total procurement and research and development cost of the Penguin missile program will not exceed $200,000,000.

---

## WILSON AMENDMENT NO. 2580

(Ordered to lie on the table.)

Mr. WILSON submitted an amendment intended to be proposed by him to amendment 2363 to the bill S. 2638, supra; as follows:

By striking out of the matter to be inserted those clauses designated as (A), (B), (C), (D), (E), and (F) and inserting in lieu thereof:

(A) the total Navy research and development cost of the Rolling Airframe Missile program will not exceed $219,700,000; and

(B) the Secretary will terminate the program if at any time he determines that the total Navy research and development cost will exceed the amount specified in subparagraph (A); and

(C) the recurring missile unit flyaway cost for a minimum of 4,900 missiles will not exceed $100,000 per missile (using fiscal year 1986 dollars as the base year); and

(D) the design of the Rolling Airframe Missile and its unique support equipment are complete and that the system performance has not been degraded from the original development specifications (as contained in Navy Decision Coordinating Paper No. SO-167-AA); and

(E) the Director of Operational Test and Evaluation has approved a test and evaluation master plan for the Rolling Airframe Missile.

---

## MURKOWSKI (AND OTHERS) AMENDMENT NO. 2581

(Ordered to lie on the table.)

Mr. MURKOWSKI (for himself, Mr. CRANSTON, Mr. WARNER, and Mr. DECONCINI) submitted an amendment intended to be proposed by them to the bill S. 2638, supra; as follows:

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. REPEAL RELATING TO ATOMIC WEAPONS TESTING LIABILITY.

(a) IN GENERAL.—Section 1631 of the Department of Defense Authorization Act, 1985 (Public Law 98-525; 98 Stat. 2646) is repealed effective on June 1, 1987.

(b) EFFECT ON STATUTES OF LIMITATIONS.—(1) The period during which section 1631 of the Department of Defense Authorization Act, 1985, was in effect shall not be taken into account in computing the period provided in any Federal or State statute of limitations applicable to any civil action for an injury, loss of property, personal injury or death described in subsection (a)(1) of such section.

(2) In any case in which the period provided in any Federal or State statute of limitations applicable to such an action expires within the one-year period beginning on June 1, 1987 (after the application of paragraph (1) in such case), the action shall not be barred in such case by such statute if the action is commenced within that one-year period.

---

## HAWKINS AMENDMENT NO. 2582

(Ordered to lie on the table.)

Mrs. HAWKINS submitted an amendment intended to be proposed by them to the bill S. 2638, supra; as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. . DENIAL OF TRADE BENEFITS TO MEXICO.

(a) IN GENERAL.—Notwithstanding any other provision of law, the President may not increase, on or after the date of enactment of this Act, the quantity of products of Mexico that may be entered under any limitation imposed by Federal law, or by any international agreement, on the total quantity of any article that may be entered.

(b) DEFINITIONS.—For purposes of this Act—

(1) The term "products of Mexico" means any article that is grown, produced, or manufactured (in whole or in part) in Mexico.

(2) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(3) The term "customs territory of the United States" means the States, the District of Columbia, and the Commonwealth of Puerto Rico.

(c) EFFECTIVE PERIOD.—

(1) The provisions of this Act shall apply with respect to articles entered—

(A) after the date that is 15 days after the date of enactment of this Act, and

(B) before the date that is 15 days after the date on which the President submits to the Congress the certification described in paragraph (2).

(2) If the President determines that—

(A) Mexico—

(i) has successfully prosecuted the murderer, or murderers, of Enrique Camarena, or

(ii) has made satisfactory efforts to apprehend and prosecute the murder, or murderers, of Enrique Camarena in an expeditious manner, and

---

## DOMENICI (AND CHILES) AMENDMENT NO. 2583

(Ordered to lie on the table.)

Mr. DOMENICI (for himself and Mr. CHILES) submitted an amendment intended to be proposed by them to the bill S. 2638, supra; as follows:

At the appropriate place in the bill, add the following new section:

SEC.—. LIMITATION ON NEW SPENDING AUTHORITY.

(a) IN GENERAL.—Any new spending authority (as defined in section 401(c)(2) of the Congressional Budget Act of 1974) provided by—

(1) any of the sections of this Act specified in subsection (b), or

(2) any amendment made by any such section, shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

(b) SECTIONS SPECIFIED.—The sections to which subsection (a) applies are sections 611, 625, 631, 635, 636(f), 931, 1006, 2175, and 2183 of this Act.

---

## WARNER AMENDMENT NOS. 2584 AND 2585

(Ordered to lie on the table.)

Mr. WARNER submitted two amendments intended to be proposed by him to the bill S. 2638, supra; as follows:

At the appropriate place, insert the following:

It is the sense of the Senate with respect to the tax treatment of Military Benefits, that for purposes of paragraph (1) of section 61(a) of the Internal Revenue Code of 1954 (defining gross income), the term "fringe benefits" does not include the following military benefits:

(a) Subsistence and uniform allowances granted a member of the uniformed services (as defined in title 37) and amounts received by them as commutation of quarters.

(b) Any in-kind benefit received by a member or former member of the uniformed services and his family resulting from his status or service as a member of the Armed Forces of the United States other than those received as a result of such status or service being considered that of an "officer" or "employee" of the government.

AMENDMENT No. 2585

At the appropriate place in Title II, Sec. 202, add the following new subsection:

( ) DoD SOFTWARE ENGINEERING INSTITUTE AND VERY HIGH SPEED INTEGRATED CIRCUITS, AIR FORCE.—Of the funds appropriated pursuant to an authorization in this Act, not more than $14,541,000 may be obligated and expended for the DoD Software Engineering Institute and not more than $127,897,000 may be obligated and expended for the Very High Speed Integrated Circuits program.

---

## DANFORTH (AND OTHERS) AMENDMENT NO. 2586

(Ordered to lie on the table.)

Mr. DANFORTH (for himself, Mr. GORTON, Mr. GARN, and Mr. RIEGLE) submitted an amendment intended to be proposed by them to the bill S. 2638, supra; as follows:

At the appropriate place in the bill, insert the following:

SEC. . AUTHORIZATION OF APPROPRIATIONS FOR THE AIR FORCE.

Notwithstanding any other provision of this Act, funds are hereby authorized to be appropriated for fiscal year 1987 for the Air Force as follows:

For missiles, $8,866,000,000.

For research, development, test, and evaluation, $15,334,573,000.

For expenses, not otherwise provided for, for operation and maintenance, $19,687,171,000.

---

## BENTSEN AMENDMENT NO. 2587

Mr. BENTSEN proposed an amendment to the bill S. 2638, supra; as follows:

At the appropriate point in the bill, add a new section as follows:

SEC. . COMMUNITY PLANNING ASSISTANCE.

The Secretary of Defense may use funds appropriated to the Department of Defense for fiscal year 1987 to provide planning assistance to local communities if the Secretary determines that the financial resources available to the community (by grant or otherwise) are inadequate. The Secretary may use such funds to assist communities located near homeports proposed under the Naval Strategic Dispersal Program at Ingleside, Texas and other Gulf Coast sites. For fiscal year 1987, not to exceed $200,000 may be used for this purpose at Gulf Coast sites.

---

## DeCONCINI (AND D'AMATO) AMENDMENT NO. 2588

(Ordered to lie on the table.)

Mr. DeCONCINI (for himself and Mr. D'AMATO) submitted an amendment intended to be proposed by them to the bill S. 2638, supra, as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 2121. AUTHORIZATION OF APPROPRIATIONS FOR ENHANCED DRUG INTERDICTION ACTIVITIES.

(a) IN GENERAL.—Funds are hereby authorized to be appropriated to the Department of Defense for fiscal year 1987 for enhancement of drug interdiction assistance activities of the Department as follows:

(1) For procurement of aircraft for the Navy—

(A) $83,000,000 to be available for modification of four P-3 aircraft by the addition of APS-138 radar, including the purchase of four APS-138 radar sets; and

(B) $138,000,000 to be available for refurbishment and upgrading of four existing E2C Hawkeye surveillance aircraft for drug interdiction purposes, and the procurement of four replacement E2C Hawkeye aircraft and related spares for the Navy.

(2) For procurement for the Air Force, $49,500,000, to be available for procurement of 3 aerostat radar systems, 3 aerostat radar spaces for such system, and 1 aerostat radar spare for an aerostat radar system authorized and funded for location in the Bahamas by section 5(b) of the Urgent Supplemental Appropriations Act, 1986 (Public Law 99-349; 100 Stat. 723).

(3) For operation and maintenance for the Air Force, $12,615,000 to be available for the transfer of 6 Air Force helicopters to Davis Montahn Air Force Base for use in carrying out drug interdiction missions.

(4) For the Secretary of Defense, $12,000,000 for enhanced intelligence collection activities concerning illegal importation into the United States of drugs originating in South America.

(b) LOANS TO THE UNITED STATES CUSTOMS SERVICE.—The Secretary of Defense shall make available the refurbished, upgraded, and modified aircraft, using funds appropriated pursuant to authorizations in subsection (a)(1) to the United States Customs Service in accordance with chapter 18 of title 10, United States Code, except that the four replacement E2C Hawkeye aircraft procured using funds appropriated pursuant to authorizations in subsection (a)(1) shall be delivered to the Navy.

(c) RESPONSIBILITIES OF THE UNITED STATES CUSTOMS SERVICE.—(1) The United States Customs Service shall have the responsibility for operation and maintenance costs attributable to the aircraft refurbished, upgraded, or modified using funds appropriated pursuant to authorizations in subsection (a)(1) and the aerostat radar systems using funds appropriated pursuant to authorizations in subsection (a)(2), except that responsibility for the operation and maintenance costs by the United States Customs Service shall commence upon receipt of the modified, refurbished, and upgraded aircraft authorized in subsection (a)(1) and upon completion of the installation of the aerostat radar systems authorized in subsection (a)(2).

(2) Upon enactment of this Act, the Commissioner of Customs shall immediately commence consultations with the Commandant of the United States Coast Guard regarding coordination of the deployment of the aircraft authorized in subsection (a)(1) and on loan to the United States Customs Service under subsection (b) in order to maximize the detection, surveillance, and intelligence gathering capabilities of the drug surveillance aircraft on loan to the United States Customs Service. The Commissioner of Customs shall make quarterly reports to the Committees on Appropriations and the Committees on Armed Services of the Senate and the House of Representatives regarding drug interdiction plans developed under this paragraph.

(d) AMOUNTS IN ADDITION TO OTHER AMOUNTS.—The amounts authorized by subsection (a) are in addition to any other amounts authorized to be appropriated to the Department of Defense in this Act for fiscal year 1987.

## WARNER AMENDMENT NO. 2589

Mr. WARNER proposed an amendment to the bill S. 2638, supra, as follows:

It is the sense of the Senate with respect to the tax treatment of Military Benefits, that for purposes of paragraph (1) of section 61(a) of the Internal Revenue Code of 1954 (defining gross income), the term "fringe benefits" does not include the following military benefits:

(a) Subsistence and uniform allowances granted a member of the uniformed services (as defined in title 37) and amounts received by them as commutation of quarters

(b) Any in-kind benefit received by a member or former member of the uniformed services and his family resulting from his status or service as a member of the Armed Forces of the United States other than those received as a result of such status or service being considered that of an "officer" or "employee" of the government.

---

## DANFORTH (AND OTHERS) AMENDMENT NO. 2590

Mr. DANFORTH (for himself, Mr. BINGAMAN, Mr. CHAFEE, and Mr. LEVIN), proposed an amendment to the bill S. 2638, supra, as follows:

On page 19, between lines 18 and 19, insert the following new section:

SEC. . RESTRICTIONS ON USE OF RESEARCH AND DEVELOPMENT FUNDS OF THE DEPARTMENT OF DEFENSE.

This Act does not authorize any research, development, test, and evaluation funds to or for the use of the Department of Defense for the purpose of making any grant or contribution to any educational institution unless the Secretary of Defense, using existing authority, determines—

(1) that the purpose of such grant or contribution has a potential relationship to a military function or operation; and

(2) that the grant or contribution is based on the technical merit of the proposed research that best satisfies the requirements of the Department of Defense.

---

## LEVIN AND (WARNER) AMENDMENT NO. 2591

Mr. LEVIN (for himself and Mr. WARNER) proposed an amendment to the bill S. 2638, supra, as follows:

On page 220, line 10, beginning with "report", strike out all that follows through line 19, and insert in lieu thereof "reports described in subsection (b) and thirty (30) legislative days have elapsed following the date on which the Congress has received both reports.

"(b) REPORT REQUIREMENTS.—In order for Congress to make an informed decision on the need for the establishment of a Federally Funded Research and Development Center for the support of the Strategic Defense Initiative Organization and on the ability of such an entity to function as an independent and objective source of technical support, the Secretary of Defense and the Comptroller General of the United States shall each submit to Congress a report that includes the following:".

---

## DODD AMENDMENT NO. 2592

Mr. DODD proposed an amendment to the bill S. 2638, supra, as follows:

On page 186, between lines 9 and 10, insert the following:

SEC. 963. LIMITATIONS ON THE PROCUREMENT OF BALL BEARINGS AND ROLLER BEARINGS; EXPEDITED CONSIDERATION UNDER CERTAIN TRADE LAWS.

(a) FINDINGS.—The Congress finds that—

(1) a healthy domestic ball and roller bearing industry (hereafter in this subsection referred to as the "industry") is of critical importance to a sound domestic industrial base in the United States;

(2) the industry has a broad role in the supply of essential components to other industries representing the core of a modern industrial economy;

(3) the Federal Government has previously recognized the importance of the industry to the defense-related industrial base of the United States by requiring that certain bearings purchased by the Department of Defense be manufactured in the United States or Canada;

(4) the United States market for this industry has been increasingly penetrated by imports over the past decade, which has resulted in reductions in capacity, employment, and abandonment of certain markets by domestic producers in the industry; and

(5) the industry is under a state of siege, caught between an eroding share of the domestic market and rising imports of bearings that compete with the industry's domestic customers.

(b) LIMITATIONS ON PROCUREMENT.—(1) Except as provided in paragraph (2), the Department of Defense may not procure ball bearings or roller bearings which have been manufactured outside the United States (including the Commonwealth of Puerto Rico, the Virgin Islands of the United States, and the territories and possessions of the United States).

(2)(A) If the Secretary of Defense certifies in writing to the Secretary of Commerce that—

(i) any kind of ball or roller bearings needed by the Department of Defense is not manufactured in the United States; or

(ii) any kind of ball or roller bearings manufactured in the United States is not available in sufficient quantities to meet the needs of the Department of Defense,

the prohibition prescribed in paragraph (1) shall not apply in the case of any contract for the procurement of such kind of ball or roller bearings which is awarded pursuant to a procurement solicitation issued during the period beginning 30 days after the date on which the certification is received by the Secretary of Commerce and ending on the date on which the Secretary of Defense or the Secretary of Commerce determines that the certified condition has terminated.

(B) Notwithstanding subparagraph (A), the Department of Defense may not conduct a procurement with respect to which a certification has been made under such subparagraph if the Secretary of Commerce disagrees with the findings of the Secretary of Defense (with respect to a condition described in such subparagraph) contained in the certification and notifies the Secretary of Defense, in writing, of the disagreement within 30 days after the date on which the certification is received by the Secretary of Commerce.

(3) The Secretary of Defense shall prescribe regulations to carry out this subsection.

(4) This subsection shall apply to procurement solicitations issued by the Department of Defense during the 5-year period beginning on January 1, 1987.

(d) AMENDMENTS TO THE TRADE EXPANSION ACT OF 1962.—Subsection (b) of section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862(b)) is amended—

(1) by striking out "Upon request" and inserting in lieu thereof "(1) Upon request", and

(2) by adding at the end thereof the following new paragraph:

"(2)(A) The President and the Secretary shall give expedited consideration to any application submitted under this section with respect to imports of ball bearings or roller bearings.

"(B) The Secretary shall provide notice to the Secretary of Labor of any determination made by the Secretary under paragraph (1) that imports of ball bearings or roller bearings threaten to impair the national security.".

(e) AMENDMENTS TO THE TRADE ACT OF 1974.—(1) Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) is amended by adding at the end thereof the following new subsection:

"(e) The Secretary shall give expedited consideration to any petition filed under section 221 on behalf of workers of a firm, or subdivision of a firm, that produces ball bearings or roller bearings if the Secretary of Commerce has determined under section 232 of the Trade Expansion Act of 1962, at any time during the 3-year period preceding the date of the determination of the Secretary under subsection (a), that imports of ball bearings or roller bearings threaten to impair the national security.".

(2) Section 251 of the Trade Act of 1974 (19 U.S.C. 2341) is amended by adding at the end thereof the following new subsection:

"(e) The Secretary shall give expedited consideration to any petition filed under subsection (a) on behalf of a firm that produces ball bearings or roller bearings if the Secretary has determined under section 232 of the Trade Expansion Act of 1962, at any time during the 3-year period preceding the date of the determination of the Secretary under subsection (c), that imports of ball bearings or roller bearings threaten to impair the national security.".

## DODD (AND BOREN) AMENDMENT NO. 2593

Mr. DODD (for himself and Mr. BOREN) proposed an amendment, which was subsequently modified, to the bill S. 2638, supra; as follows:

On page 147, after line 22, insert the following new section:

SEC. 933. PROHIBITION ON FELONS CONVICTED OF DEFENSE CONTRACT RELATED FELONIES AND PENALTY ON EMPLOYMENT OF SUCH PERSONS BY DEFENSE CONTRACTORS.

Subsection (a) of section 932 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) is amended by—

(1) inserting after "management of supervisory capacity" the following ", including the capacity of service on the board of directors,"; and

(2) striking out "one year" and inserting in lieu thereof "three years".

## WARNER AMENDMENT NO. 2594

Mr. WARNER proposed an amendment to the bill S. 2638, supra; as follows:

At the appropriate place in Title II, Sec. 202, add the following new subsection:

( ) DOD SOFTWARE ENGINEERING INSTITUTE AND VERY HIGH SPEED INTEGRATED CIRCUITS, AIR FORCE.—Of the funds appropriated pursuant to an authorization in this act, not more than $14,541,000 may be obligated and expended for the DoD Software Engineering Institute and not more than $127,897,000 may be obligated and expended for the Very High Speed Integrated Circuits program.

## WILSON (AND OTHERS) AMENDMENT NO. 2595

Mr. WILSON (for himself, Mr. NUNN, Mr. QUAYLE, and Mr. LUGAR) proposed an amendment, which was subsequently modified, to the bill S. 2638, supra; as follows:

On page 4, line 11, strike out "$5,557,490,000" and insert in lieu thereof "5,597,490,000".

On page 6, between lines 12 and 13, insert the following new subsection:

(g) ROLLING AIRFRAME MISSILE PROGRAM.—(1) None of the funds appropriated pursuant to an authorization in this title may be obligated or expended in connection with procurement of the Rolling Airframe Missile program until the Secretary of Defense has certified in writing to the Committees on Armed Services of the Senate and the House of Representatives that—

(A) the total Navy research and development cost of the Rolling Airframe Missile program will not exceed $219,700,000; and

(B) the Secretary will terminate the program if at any time he determines that the total Navy research and development cost will exceed the amount specified in subparagraph (A); and

(C) the recurring missile unit flyaway cost for a minimum of 4,900 missiles will not exceed $100,000 per missile (using fiscal year 1986 dollars as the base year); and

(D) the design of the Rolling Airframe Missile and its unique support equipment are complete and that the system performance has not been degraded from the original development specifications (as contained in Navy Decision Coordinating Paper No. SO-167-AA); and

(E) the Director of Operational Test and Evaluation has approved a test and evaluation master plan for the Rolling Airframe Missile.

(2) If the Secretary of Defense fails to make the certification described in paragraph (1) by March 30, 1987, he shall cause the Rolling Airframe Missile program to be terminated effective on that date.

(3) Subsection (d) of section 205 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 608), is repealed.

(4) Department of Defense reprogramming request 85-91PA is approved.

On page 11, line 2, strike out "$9,265,378,000" and insert in lieu thereof "$9,289,678,000",.

## MURKOWSKI (AND NUNN) AMENDMENT NO. 2596

Mr. MURKOWSKI (for himself and Mr. NUNN) proposed an amendment to the bill S. 2638, supra; as follows:

On page 228, between lines 17 and 18, insert the following new subsection:

(b) Drug Educational and Counseling Report: The Secretary of Defense, in consultation with the National Drug Enforce-

ment Policy Board and the Department of Education, shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report, not later than December 1, 1986, discussing (i) the extent to which youth in schools operated by the Department of Defense for dependent members of the Armed Forces are receiving education on drug and substance abuse, (ii) the types of drug education programs that are currently being provided, (iii) whether additional drug education programs are needed, and (iv) the extent to which drug education programs for youth in grades K through 12 include or should include preventative peer counseling classes.

Redesignate subsection (b) as subsection (c).

## BYRD AMENDMENT NO. 2597

Mr. BYRD proposed an amendment to the bill S. 2638, supra; as follows:

On page 197, between lines 12 and 13, insert the following new section:

SEC. 1106. CONVERSION OF CHROMIUM AND MANGANESE ORE TO HIGH CARBON FERROCHROMIUM AND HIGH CARBON FERROMANGANESE.

(a) IN GENERAL.—During fiscal year 1987 and during each of the six succeeding fiscal years, the Administrator of General Services shall obtain bids from domestic producers of high carbon ferrochromium and of high carbon ferromanganese and award contracts for the conversion of chromium and manganese ores held in the National Defense Stockpile into high carbon ferrochromium and high carbon ferromanganese, respectively.

(b) STOCKPILE GOALS.—(1) Contracts awarded under subsection (a) shall provide for the addition of not less than 53,500 short tons of high carbon ferrochromium and 67,500 short tons of high carbon ferromanganese to the National Defense Stockpile in each of the fiscal years referred to in the preceding sentence.

(2) If, in any fiscal year referred to in subsection (a), the minimum quantity of high carbon ferrochromium or high carbon ferromanganese to be added to the National Defense Stockpile, as prescribed in paragraph (1), is not met, the quantity of such material to be added to such stockpile in the succeeding fiscal year shall be increased by the quantity of the deficiency.

(c) SEVEN-YEAR MINIMUM QUANTITIES.—The total quantities of carbon ferrochromium and high carbon ferromanganese in the National Defense Stockpile at the end of the seven fiscal years referred to in subsection (a) shall be as follows:

(1) Carbon ferrochromium, 374,000 short tons.

(2) High carbon ferromanganese, 472,000 short tons.

(d) In this section, the term "National Defense Stockpile" means the stockpile provided for in section 4 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98c).

## NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will meet in SR-301, Russell Senate Office Building, on Tuesday, August 12, 1986, at 3:30 p.m., to conduct a business meeting.

On its legislative agenda, the committee will be considering the following items: Senate Resolution 438, directing the Senate Committee on Rules and Administration to study the Senate rules and precedents applicable to impeachment trials; Senate Resolution 439, to authorize the reprinting of a Senate document from the 93d Congress entitled "Procedures and Guidelines for Impeachment Trials in the United States Senate"; an original bill to authorize appropriations for the Federal Election Commission for fiscal year 1987; an original bill that would amend 2 U.S.C. 58a in order to authorize the Senate Sergeant at Arms to pay for State long distance telephone charges based on the amount of time the service is used; two printing resolutions for the House of Representatives—House Concurrent Resolution 288 and House Concurrent Resolution 301; an original resolution to amend rule XXXV of the Standing Rules of the Senate so that the chairman of the Ethics Committee can give notice in the CONGRESSIONAL RECORD of approval of foreign travel by a Member, officer, or employee after the foreign travel has concluded; an original resolution to authorize the purchase of U.S. Capitol Historical Society wall calendars for the use of the Senate; and several original resolutions to pay gratuities to survivors of deceased Senate employees.

Administrative business scheduled to be considered are the results of the test period of the Dole proposal for subway service to the Hart Building during rollcall votes.

For further information concerning this meeting, please contact Carole Blessington of the Rules Committee staff on x40278.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs will be holding a business meeting on Wednesday, August 13, 1986, at 2 p.m. in S-205 of the Capitol, on the following bills:

S. 1452, a bill to settle Indian land claims in the Town of Gay Head, Massachusetts;

S. 2118, a bill to provide for the distribution of funds appropriated to pay a judgment awarded to the Sisseton and Wahpeton Tribes of Sioux Indians;

S. 2564, a bill to provide for the proper administration of justice within the Salt River Pima-Maricopa Indian Reservation by granting jurisdiction to the Salt River Pima-Maricopa Indian Community Court over certain criminal misdemeanor offenses;

H.R. 1344, a bill to provide for the restoration of Federal recognition to the Ysleta del Sur Pueblo and the Alabama and Coushatta Indian Tribes of Texas;

H.R. 1920, a bill to establish Federal standards and regulations for the conduct of gaming activities on Indian reservations and lands; and

H.R. 3554, a bill to provide for the restoration of the Federal trust relationship with, and Federal services and assistance to, the Klamath Tribe of Indians and the individual members thereof consisting of the Klamath and Modoc Tribes and the Yahooskin Band of Snake Indians, and for other purposes.

Those wishing additional information should call the committee at 224-2251.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, August 6, 1986, in order to consider the nominations of: James Colvard to be Deputy Director of OPM; Mary Wieseman to be special council, to MSPB; and Janet Steiger to be Commissioner of the Postal Rate Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

## REMARKS OF DONNA ALVARADO AT LIBERTY WEEKEND NATURALIZATION CEREMONY

● Mrs. HAWKINS. Mr. President, I was privileged to take part in the Liberty Weekend naturalization ceremony in Miami, FL in which 14,200 immigrants took the oath of citizenship. This was the largest naturalization ceremony ever held in the United States, surpassing the record previously set by Miami in 1984. During that ceremony, Donna Alvarado, Director of the ACTION agency gave a stirring speech that I would like to share with the rest of my congressional colleagues.

Mr. President I ask that the text of Donna Alvarado's speech be printed in the RECORD.

The speech follows:

AN ADDRESS BY DONNA M. ALVARADO, DIRECTOR OF ACTION, TO THE "LIBERTY WEEKEND" NATURALIZATION CEREMONY

Senator HAWKINS, distinguished legislators and personal representatives of President Ronald Reagan; Governor Graham, chief executive of the great State of Florida, honored guests and friends, Hermanos and Hermanas.

It is an honor and a privilege to share this evening with you. You have studied about U.S. Government—about the balance of powers. I just have to tell you that Senator HAWKINS is my boss in the Congress, and we are thankful for her strong leadership.

Today will live in history. This is one of the most important moments of our lives. Many of you have just taken the most solemn oath possible—total allegiance to your adopted homeland—the USA. You have spent many long years getting ready for this occasion. We honor you and we welcome you.

Our Nation rejoices as our newest citizens take your rightful place among the people. You will add your strength, your traditions and your dreams to the American vision. You have come here tonite from 68 different lands. You have chosen America, and freedom—chosen to share the rights, and with them the duties, of all American citizens.

It has not been an easy road to get here. You have overcome great obstacles and undergone hardships and sacrifices to share this moment in American history.

Many of you escaped to America from communism. From countries in which the state reigns supreme, where one individual is interchangeable for another, and all are expendable to the supremacy of the state. Our Constitution gives America a very different philosophy—in America the rights of the individual are paramount and cannot be trampled by the power of the state. That fundamental belief defines our national character, and carries with it grave responsibility.

This oath of allegiance is much more than well-spoken words. The true meaning lies in your hearts, and most importantly, in your future actions on behalf of this Nation. These acts will truly be the measure of your loyalty. You see, our Government is not merely the Congress, the States, the Governor, the country or even the President. We are the Government—and you and I, our neighbors and our coworkers. Not just the intellectuals, the prosperous, the famous and the powerful—but each one of us with all our strengths and weaknesses. We are the Government—for better or worse. Our country has bestowed a most precious gift on us—citizenship. In return we must give of ourselves—we must vote, and pay our fair share of taxes. But we must do even more if our communities are to prosper and grow. We must give ourselves to America.

When the interests of freedom are threatened, we must be prepared to give even of our life's blood in defense of the Nation. Indeed, this country's immigrants have always been among the first in battle when the call has been given.

And now, as we enjoy the peace and prosperity of years to come, it is just as important to serve the national interest by giving of ourselves in our communities. In this way, can truly repay the debt of gratitude we all owe this great Nation—by making this the land of opportunity for all our citizens. What our country demands is not complicated—it can be as simple as tutoring a child who cannot read; encouraging a teenager to say "no" to drugs; comforting the lonely, sick and the dying; lending a helping hand to help the destitute get back on their feet; sharing an open heart and a tolerant spirit with citizens who must overcome physical and mental disabilities. By volunteering a few hours a week you can make a major difference, and enrich your community; you can assure the future of America and the best of all like all that is good, noble and true—you will benefit most of all. As our constitution declares, only in this way can we "secure the blessings of liberty to ourselves and our posterity" we the people are the Government. The Government must respect the rights of individuals. And if we, as individuals, don't accept the responsibility for the well-being of our families, our neighborhoods, and the continuing strength of this great Nation into the 21st century, I can promise you this: There is no one else who will. You are our newest citizens. You are also citizens of Miami and of the Nation, part of the great miracle of American pluralism. Our national motto, "e pluribus unum," says it all. We are all Americans.

I love this country and I believe in the brightness of her future with every breath in my body. After the years you have spent here, the risks you have taken, the spiritual and material investments you have made, and the commitment you have demonstrated tonight, I know you share that love.

With all our imperfections and unrealized dreams, the United States is still the last, best hope for freedom and democracy in the world.

Finally, I want to say how honored I am to be here on this historic day. How very proud of you I feel. My grandfather was an immigrant to America. Many of my relatives remain in Mexico. Our American family takes special pride and joy in retaining our ties to Mexico. For wherever we live, we are still a family. We all take pride in our roots, in the rich heritage that we have brought to strengthen America. No treasures are greater than an individual's family history and cultural ties. Unique and independent, we are all threads of the American fabric. You have studied the history of these States. You have learned the duties of citizenship. Remember, if you will, how many millions of people the world over dream of coming here, of taking the oath you took tonight. You have pulled up roots and merged your future with that of this great Nation.

I ask you to remember this historic hour. Every July 3, on the eve of Independence Day, look back to this night. Recall your great joy, the centennial of Lady Liberty, the words of President Reagan, the oath given by the Chief Justice—remember the great pride you now feel, and ask yourselves—in each year to come, "what have I done this past year to make America a better place for my family, my friends and my neighbors?"

We have a saying in Spanish—"si se puede, se debe." If you have the right, you have the duty. Fourteen years from now, in the year 2000, may you be able to recall this great evening, to look back at everything you have done since, and say, "Yes, I have done my part. I have kept my trust. I have helped carry my country into the 21st century."

God bless you one and all—our newest citizens . . . and may God forever bless America.●

## RECOGNIZING C&P OF WEST VIRGINIA

● Mr. ROCKEFELLER. Mr. President, on June 2 a major honor was bestowed upon the Chesapeake and Potomac Telephone Co. of West Virginia. C&P received the President's Volunteer Action Award, the most prestigious award given in our country in recognition of volunteer service. Moreover, C&P of West Virginia was one of only three corporations granted the award this year and is the first West Virginia organization to be so honored since the award was established in 1982.

The President's Volunteer Action Award was granted to C&P of West Virginia in appreciation of its outstanding programs in two related areas which are both critical to West Virginia—education and economic development. C&P of West Virginia has played a pivotal role in creating one of the most significant initiatives taken in recent years to improve West Virginia's schools. Called Partners in Education, the program is an effort to develop close linkages between individual schools and local businesses. Over 150 of C&P's dedicated employees are participating in 15 individual business/school partnerships, each of which entail activities to benefit students, faculty, employers and employees. After leading the effort to get the statewide "Partners in Education" program underway, C&P of West Virginia is now actively involved at the local level in encouraging other businesses to establish partnerships with schools. School/business partnerships have now been developed with 47 schools throughout the State.

C&P of West Virginia has made this commitment to education in recognition of the role education plays in the State's economic future. "Partners in Education" is an innovative, effective initiative which is truly deserving of national attention.

The second program honored by the President's Volunteer Action Award focuses on assisting individual communities in developing their local economies. C&P of West Virginia's Business Retention and Expansion Program works with municipalities in assessing their strengths and targeting areas for development. The program has sponsored development seminars which have attracted hundreds of interested local leaders and citizens. Through this effort, C&P is benefiting the economic well-being of the State as a whole.

Mr. President, our country needs the private sector to assist in strengthening our schools and pursuing other opportunities for economic growth. C&P of West Virginia is a model in this area. I am grateful to President Reagan for drawing attention to this company's efforts, and hope that the award will inspire many more businesses to pursue similar goals. I join West Virginia's citizens in thanking C&P for its immense contribution. Our country has honored C&P's commitment to the American volunteer spirit—it serves as an example to us all.●

## PREVENTING ILLITERACY

● Mr. ZORINSKY. Mr. President, on July 14, during consideration of the Head Start reauthorization bill, the Senate passed by unanimous consent my amendment to require the Secretary of Education to conduct a study of beginning reading instruction. This amendment follows up on last year's report of the Commission on Reading, "Becoming a Nation of Readers." This Commission was made up of the top

U.S. reading experts, and their report was based on 20 years of research. It recommended that "well-designed" phonics instruction be used through the second grade, but it did not indicate which beginning reading programs provide such instruction. My amendment directed the Department of Education to compile this information and make it available nationally so that parents as well as educators will have specific information to determine whether their schools are using the most effective reading programs.

This legislation is now in conference, and I would like to share with the conferees as well as all Members of the Senate and House one of the many letters I have received which reflect the need for the type of information my legislation calls for.

The letter follows:

LINCOLN, NE,
*July 18, 1986.*

Hon. Sen. EDWARD ZORINSKY,
*U.S. Senate,*
*Washington, DC.*

DEAR SIR: I applaud you on the recent amendment you sponsored regarding the directive to have the U.S. Education Dept. study our methods for teaching reading to our children. I have just completed reading the books, *Why Johnny Can't Read* and *Why Johnny STILL Can't Read* by Rufolf Flesch. I am appalled, frustrated, and angry, particularly because any changes may be too late for my children.

I am the mother of a girl, 13, and a boy, 9, who have been schooled in the whole word reading method. The older child is very bright, an excellent reader but cannot spell. I expressed concern about a phonics-based program when she was in first grade and was assured the school included "some" phonics in their whole word approach.

Now my 9-year-old is having difficulties with reading and has been tested out as "Learning Disabled." He scored 121 on a gifted screening exam (130 or above is required to be placed in the program) and was in the 99th percentile in math on the California Achievement test. This past year, he has been taught reading in a small group primarily by the Orton-Gillingham Method (phonics based). He had a very successful year in both areas of reading and spelling and needs improvement in only one area for his grade level: fluency and accuracy. It certainly has made me wonder if it is the child with a problem or the method.

Perhaps the whole word method is an acceptable way to teach reading for some students, but if the phonics-based method works better for teaching reading and spelling to all students, let's get it back into our school systems!

Thank you for your continued support and assistance in this area.

Very sincerely,

MARY R. MARTIN.●

## STATE LOTTERIES—A LOSING GAME

● Mr. DURENBERGER. Mr. President, I would like to take a few minutes to draw attention to a growing trend in financing State governments: the establishment of Government sponsored lotteries. Over the past few years, these betting games have expanded in number to include 22 States and the District of Columbia. Other State governments are currently considering the possibility of jumping on the lottery bandwagon. Lottery interest is not restricted to State officials but includes eager game players who in many cases have taken the initiative to encourage their representatives to pass lottery legislation. In my State of Minnesota, the legislature recently voted against lotteries, but the issue is certain to come up again.

I have serious reservations about this trend and have spoken out repeatedly against the spreading use of State lotteries and, more recently, against creating a national lottery to finance the Federal deficit. The reason is simple. Lotteries are not fair. You cannot run a successful lottery by telling the whole truth. You need a hard-sell promotional campaign which is often vague and deceptive about the odds and prizes. In addition, lottery advertising tends to be targeted to lower income individuals, who statistically spend an above average proportion of their income on lottery games. In short, lotteries are a regressive tax on low-income individuals who can least afford to pay.

Neither State governments nor the Federal Government should be in the business of running these deceptive betting games. Rather, a government's responsibility is to serve and protect its people. I hope that State governments currently considering lottery proposals will carefully explore their negative effects on American citizens and governmental integrity.

Mr. President, I would ask that three articles on State lotteries be printed in the RECORD.

The articles follow:

THE ODDS ON GAMBLING TELL US WHO AND WHY

(Brad Edmondson)

Americans spend more money on gambling than they give to their churches or invest in their colleges. Gross wagering—the handle—amounted to $177 billion in 1984, more than 15 times the amount American donate to churches, twice as much as they spend on higher education and over half of what they spend on food.

The gambling industry's revenues—the handle minus the payout, before expenses—were $18.8 billion in 1984, according to Gaming and Wagering Business Magazine. It calculates that illegal gambling had the greatest market share, at $5.2 billion or 28 percent, followed by state lotteries with 22 percent, race tracks and offtrack betting with 16 percent and bingo and charitable games at 7 percent.

Legalized gambling is increasingly popular with voters and legislators because it promises revenues without raising taxes. Advocates often quote Thomas Jefferson, who called the lottery "a wondering thing; it lays taxation only on the willing." Twenty-two states and the District of Columbia have lotteries now, 15 other states have lottery proposals before their legislatures, and eight bills for a national lottery are before Congress. LaFleur estimates that a national lottery could cut $5 billion from the federal deficit.

But despite its political popularity, not everyone gambles. The urge to bet, favorite games and the amount people are willing to risk are all strongly influenced by age, sex, income, education and religion. For decades casinos have used demographic research to identify their best customers, design gaming rooms and create new contests. Government officials now use consumer research to persuade people to play the numbers.

In the gambling industry, lotteries, bingo and slot machines are known as "shallow play" because they don't require much money or time. Yet they are the most profitable games because the odds are much more against the player than in the more complex card, dice and roulette games. At Central Michigan University, Dr. Gary Shapiro used data from a 1975 University of Michigan survey to explore the demographic differences between "shallow" and "deep-play" gamblers.

Religious preferences have a strong effect on one's favorite games and the overall urge to gamble. Shapiro found that slot and keno (casino bingo) players were most likely to be Protestant and to attend church once a week or more. Craps players were most likely to be Catholic, but three-quarters attended church less than once a month. Overall, Catholics are most likely to gamble; 80 percent of those surveyed in 1975 were bettors. Fundamentalist Christians and atheists are least likely to gamble. Only 33 percent of fundamentalists and 40 percent of atheists said they gambled in the 1975 survey.

Race may also play a role. In a February 1986 ABC News/Washington Post poll, 18 percent said that buying a lottery ticket was "wrong," but only 5 percent of Catholics said this, compared to 28 percent of white Protestants and 51 percent of black Protestants.

Craps players enjoy life in the fast lane, according to the Shapiro study. They were willing to risk five times as much money as keno or slots players, and they were three times more likely than other players to agree with the statement, "I put on a show to impress others, and I know I am not the person I pretend to be."

Craps players were also the oldest (average age: 48) and had the highest incomes. Blackjacks were youngest (average age: 40), most educated and had the second-highest incomes. People who said they enjoyed risk were most likely to play craps, but the enjoyment of risk was less among the three other groups and it was lowest for slots players. All the groups said they gambled primarily for enjoyment and excitement, but craps and blackjacks players were most likely to say that they played to make money.

Men were the majority of players for all games, but their dominance increased toward the deep end; 40 percent of those who said they preferred slot machines were women, followed by bingo (33 percent), blackjack (17 percent) and craps (6 percent).

People who play bingo games and keno are the most sociable and fun-loving of all gamblers, according to Roger Snowden, publisher of the Bingo Bugle, a chain of weekly newspapers for bingo players. Among the 50 million Americans who have played bingo, 57 percent are women. Two-thirds are under age 45, and 40 percent have annual incomes below $16,500. "Heavy" bingo players (once

a week or more) are likely to be women aged 65 or over.

Lotteries are an American tradition—their revenues supported the Revolutionary War and helped build Harvard, Princeton and Yale. But they do not have universal appeal. "The lottery is a middle-class game," said Dr. Stephen Crocker, vice president for research at Scientific Games, Inc., a leading supplier of lottery equipment. Four out of five lottery players are aged 35 or older. Most players are men, with annual incomes between $18,000 and $36,000 and some college education. Missouri State Lottery researchers estimate that about 20 percent of men and women with incomes under $35,000 buy lottery tickets, 17 percent of those with income between $35,000 and $50,000 and less than 1 percent of those with incomes of $50,000 and over.

Seven out of 10 adults in a typical lottery state have purchased a ticket at least once, but the appearance of universal appeal is deceiving. California sold 800 million tickets at $1 apiece during the first 90 days of its lottery last year, or about $30 in tickets for every man, woman, and child in the state. Yet according to the Field Institute's California Poll, 18 percent of the state's adults bought 71 percent of the tickets. These are the heavy lottery players, who bought more than 20 tickets in the contest's first 45 days. They are more likely than others to be black, Hispanic or Asian, and they are poorer and less educated than the average Californian.

For that matter, different people play different lotteries. "Most of the people who play our basic three-digit numbers game make less than $15,000," said David Gale, marketing director for the 12-year-old Ohio lottery. "Lotto's higher jackpots capture the middle-class market. It's a question of one's attitudes toward money. The lottery is a cheap form of entertainment that allows you to dream about having wealth. To a person making less than $15,000, a $50 prize is a lot of money. To the breadwinner in a middle-class family, it doesn't even pay for groceries. But anyone responds to the chance for $5 million."

Ohio's $5 million Super-Lotto game began in February. "Eventually the market for any game is going to max out," Gale said. "We have to keep topping ourselves and introducing new games to keep the sales growing, and we have to advertise aggressively all the time. But nothing beats the media attention we get from a huge jackpot, and that's strictly a matter of chance."

To pull out of a 1985 sales slump, officials of the New York Lottery lengthened the chances of winning to one in 6.1 million, amassed a $41 million lotto jackpot, and set off a two-week buying frenzy. Television ads once showed a lotto winner promising gifts to her family gathered around the dinner table, but now the ad shows a shopkeeper mesmerizing a potential ticket buyer by shouting, "We're talking gobs of greenbacks . . . We're talking multitudinous moolah."

Stephen Crocker likes to tell the story of a man in a three-piece suit who was standing in line to buy tickets for the $41 million jackpot. "A reporter asked him why he was buying tickets, because he didn't look like he needed the money," Crocker said. "The man said, 'Everyone has their own greed level—you just hit mine.' "

Serious gamblers thrive in Nevada, where 63 percent of the state's jobs and 81 cents of every tax dollar are directly related to gambling, according to Economics Research Associates Inc. of San Francisco. For that matter, the 1975 Michigan survey found that three-quarters of Nevadans were active gamblers.

In Nevada, tourism means gambling, and Las Vegas visitors (12.8 million people in 1984) are profiled every year by the city's visitors bureau. It estimates that half are men and half are women. But the visitors are more likely to be aged 35 or older and married than are all U.S. adults. Sixty-three percent of Las Vegas' tourists come from the West, and 54 percent live within 400 miles of the city.

Vegas visitors are more educated and wealthier than the general population. The bureau estimates that one-third are college graduates, 61 percent have gone to college for at least a year and 98 percent are high school graduates. One in four visitors had annual household incomes of $50,000 or more.

Las Vegas high rollers had a trip gambling budget of $1,255 in 1984, compared to an average of $737 for all gamblers, according to the visitors bureau. They also attended more shows and spent more on non-gambling activities. On average, high rollers visit Las Vegas more frequently and prefer the "deeper" card, dice and roulette games.

Surveys of Atlantic City casino gamblers reveal a similar split between high rollers, who play table games, and low rollers, who play slot machines. Arbor, Inc.'s continuous survey taken at Atlantic City casinos shows that tablegame players average 3.9 gambling trips a year, with an average gambling budget of $360 per trip; slot players average 2.5 trips a year with a gambling budget of $105. Slot players are more likely to be 55 or older, while table players are more likely to be under 35.

Although both rake in revenues of over $2 billion, there are important differences between the two gambling centers, Atlantic City gamblers, of which there were 28.5 million in 1985, arrive in cars or buses, stay an average of eight hours in the city and spend $300 or less. In isolated Las Vegas, by contrast, there were only 12.8 million visitors, but the average one flies in, stays four days, and spends $735 on gambling alone. Because Las Vegas' visitors are more upscale, analysts consider it to have a brighter future than Atlantic City. But both could be hurt if either West Virginia or Louisiana legalizes casino gambling—as both might in this fall's elections.

High rollers are the self described audience of Gambling Times magazine (circulation 100,000). Ninety-six percent of its readers are men, with a median age of 56.5 and an average household income of $75,000. They spend an average of 11 days on gambling trips a year, with a gambling budget of $3,605 per trip and $1,903 for expenses. They prefer blackjack and craps to other games by a wide margin. One-third are smokers and three-quarters are regular drinkers.

WHO BUYS LOTTERY TICKETS?

*Surveys from around the country*

4 out of 5 lottery players are 35 or older.

Most players are men with some college education and an annual income between $18,000 and $36,000.[1]

20% of men and women with incomes under $35,000 buy lottery tickets.

17% of those with incomes of $35,000–$50,000 buy tickets.

1% of those with incomes over $50,000 buy tickets.

18% of California's adult residents bought 71% of tickets sold in the first 90 days of the state's 1985 lottery; they were more likely to be minorities, poorer and less educated than the average Californian.[2]

In a 1986 survey 18% of respondents felt that buying a lottery ticket was wrong.[3]

5% of these were Catholic.

28% were white Protestants.

51% were black Protestants.

EAST V. WEST

*Atlantic City is different than Las Vegas*

28.5 million gamblers came to Atlantic City in 1985.

12.8 million gamblers came to Las Vegas.

Gamblers came to Atlantic City in cars and buses and stayed an average of 8 hours.

Gamblers came to Las Vegas by plane and stayed an average of 4 days.

In Atlantic City gamblers spent $300 or less.

In Las Vegas they spent an average of $735 on gambling alone.

Jerome Skolnick spent three years interviewing casino executives, vice cops and gamblers in Las Vegas. In his book "House of Cards," Skolnick says that the large sums risked by high rollers come either from personal wealth or from income unreported to the IRS. He also says that proprietors of high cash-flow businesses—such as restaurateurs, musicians and retailers—are likely to take high-stakes gambling trips after skimming cash from their gross revenues.

Shapiro and the Gambling Times survey support this view. Shapiro found that craps and blackjack players were far more likely than bingo or slots players to be self-employed, and eight in 10 Gambling Times readers are professionals, managers, proprietors or retirees.

Why do people gamble? Nine out of 10 gamblers said they gambled for "play, leisure and recreation," according to a survey by Ronald Smith and Frederick Preston of the University of Nevada-Las Vegas. In second place was "to relieve boredom and generate excitement," with "monetary profit" a distant third. But professionals and people who had gone to college were more likely to choose "play, leisure and recreation," while less-educated, blue-collar and unemployed people were more likely to choose "monetary profit." When asked why other people gambled, all groups cited "monetary profit" as the primary reason.

Federal Communications Commission regulations forbid casinos from mentioning games of chance in their broadcast advertising, but an ad for the Trump Casino in Atlantic City that is now famous in the industry came too close to the line. The ad showed a succession of nervous faces and other scenes of gaming-table drama without ever showing the games.

"Why do thousands of people come here every day?" says the announcer. "Chances are it's not the ocean. Trump Casino Hotel. We know why you're really here."

Adweek gave the ad high marks for creativity and humor, saying that it shows serious gamblers that Trump "understands a gambler's dirty little secret and is ready to stroke it." Unfortunately, the FCC agreed and demanded that the ads be pulled.

[From the Boston Globe, July 7, 1986]

STATES DISCUSS LOTTERY THAT COULD PAY $100M

CONCORD, N.H.—Eleven states and the District of Columbia are considering launching a weekly lottery whose jackpots could hit an unprecedented $100 million, a participant in the talks said yesterday.

George Jones, director of the New Hampshire Sweepstakes Commission, rated chances of the multistate lottery becoming a reality at better than 50-50. He said the target starting date is Jan. 1.

"We've had a number of meetings," Jones said of officials studying the proposed megalottery. "There's been a board put together. There's been some bylaws drafted, the financial aspects of it have been roughly laid out . . . It's moving along fairly rapidly."

Though the project requires numerous approvals, Jones said six states and the District of Columbia "are pretty solid on this." In addition to New Hampshire, he cited New York, New Jersey, Rhode Island, Washington and Oregon.

New Hampshire pioneered the first modern state lottery in the early 1960s. Several years ago however, the state's games began losing ground rapidly to the immensely popular Megabucks lottery in Massachusetts, a game with multimillion-dollar jackpots never seen in the New Hampshire games.

Jones opposes a national lottery, saying it would undercut state lotteries and be difficult to run efficiently.

Though various approvals would be required for other states to participate, Jones said a new state law sets the stage for New Hampshire's involvement. Only the governor, Executive Council and a special legislative committee still must approve, he said, "which I can't imagine would be any problem."

(David Ellis, a spokesman for the Massachusetts Lottery Commission, said last night. "I never heard anything that is realistic talking about a large regional lottery.

("I think you would find it a tough go in the Legislature because of the success of the lottery in Massachusetts." Ellis said "Someone would have to make a very convincing case on how it would benefit us [and] we haven't heard that yet."

(Ellis said he did not believe Massachusetts residents would drop the local games for the multistate lottery. "When the Tristate went to $9.6 million we didn't lose any business. This is an industry that hasn't reached its potential yet.")

---

STATE LOTTERIES AS FISCAL SAVIOR OR FISCAL FRAUD: A LOOK AT THE EVIDENCE

(John L. Mikesell and C. Kurt Zorn)

As early as 1966, the lottery was characterized as "a fickle form of finance."[1] At that time, only New Hampshire had a state lottery. In 1986, the number of lottery states will reach 22 plus the District of Columbia, including almost 60 percent of the nation's population. This increase in the number of lotteries reflects a popularity rare among public revenue sources. For example, 1984 lottery referenda in California, Missouri, Oregon, and West Virginia all passed by substantial margins; in only 10 of the 274 counties involved did the question receive less than half the votes cast. In the present environment, which is clearly prolottery, it is reasonable to examine lotteries as means of government finance. Has something changed to make them productive and acceptable sources of revenue, or does the growth ot the state lotteries across the United States represent the expansion of a bad idea?

SOME LOTTERY BACKGROUND

The Commission on the Review of National Policy Toward Gambling defines a lottery to be "a form of gambling in which chances to share in a distribution of prizes are sold."[2] Most of the prizes are cash. Winners are picked by lot, according to a selection scheme established by the state. Because of chance selection, no player skills are involved. The lottery is operated by the state, although many functions of a lottery may be contracted to private suppliers or dealers. Public, private, and charitable lotteries thrived from colonial times to the late nineteenth century in the United States, financing major universities, public buildings, and many public services, but scandals and unethical practices culminated in federal and state controls and prohibitions. The last legal operation of that earlier era, the Louisiana lottery, ended in 1894 when federal regulations dramatically inhibited interstate lottery transactions.

No government lottery existed from then until 1964, when the New Hampshire legislature authorized a lottery to finance local education, part of its continuing effort to avoid the levy of general sales and individual income taxes. New York followed with a lottery in 1967. In neither case did proceeds from the lottery meet expectations.

The lottery seemed likely to be a fiscal dud until the New Jersey lottery, started in January 1971, broke new ground by marketing its games as entertainment and using techniques designed to serve the customers.[3] Proceeds exceeded expectations. Largely because of the New Jersey success, 13 states were operating lotteries by the end of 1975. At that time, adoptions included all states north of the Mason-Dixon line from Illinois to the Atlantic, excluding Indiana and Vermont. Maryland was the only other lottery state.

Motives behind state adoption varied. Some states implemented lotteries because of the revenue they feared lost to their lottery neighbors, but more compelling was the lure of revenue without new or increased taxes. In addition, the lottery offered substantial prizes for a few, entertainment for even more people, and the possibility of reducing illegal gambling. In the aftermath of the taxpayer revolt and in the era of reduced federal assistance, the continued attractiveness of lotteries to states is not surprising.

Table 1 charts the course of state adoptions. In 1980, thirteen states had instituted lotteries. The number increased to 17 states plus the District of Columbia in 1983. By 1986, twenty-two states plus the District of Columbia had lotteries. Eleven other states could enact a lottery with only legislative action; the remaining 17 would require constitutional action to remove prohibitions before instituting a lottery. As the table notes, several states earmark at least a portion of lottery proceeds to specific uses; education is one of the more frequent purposes, although more states place revenue in the general fund than direct it to an identified use.

LOTTERIES AS A REVENUE SOURCE

State lotteries collect large amounts of money. Receipts in fiscal year 1984 ranged from approximately $4.5 million in Vermont to almost $1.2 billion in Pennsylvania. The national total exceeded $6.4 billion.[4] Of course, total ticket sales represent only the magnitude of customer participation, not the contribution the lottery makes to state finances. Net proceeds, the amount left after prizes and administrative costs have been deducted, is the important amount in terms of revenue generation. In fiscal year 1984, net proceeds ranged from approximately $1.2 million in Vermont to $514.8 million in Pennsylvania or more than $2.6 billion nationwide. While less than total sales, the proceed figures remain absolutely large; states collect a lot of money through their lotteries.

Proponents of the lottery contend that it is an outstanding state revenue source. The argument involves both pragmatic and theoretical elements. In the first place, participation in the lottery, unlike payment of taxes, is strictly voluntary. Lotteries are popular and widely approved by the public; the 1984 referenda results previously noted are striking evidence of that. Taxes do not enjoy the popularity of the lottery. Thus, the lottery is an attractive option; it is both popular and voluntary. Furthermore, lotteries entertain participants; few enjoy filling out tax forms.

Second, the lottery generates enough revenue to relieve pressure on the fiscal system. The absolute revenue performance has been noted: more than $2.6 billion was generated for state use in fiscal year 1984, and, with both new adoptions and sales growth, the proceeds would be much larger for 1986 and beyond. On a per capita basis, 1984 net yields ranged from $49.87 in Maryland to $2.21 in Vermont. The median across the states, however, was a robust $21.19. In some states, notably Maryland, New Jersey, and Pennsylvania, the lottery nets about as much revenue as would an increase in the state sales tax of one percentage point, a considerable yield at the fiscal margin. Even more important than the substantial revenue is the fact that revenues are often earmarked for certain important state functions (see Table 1). For example, in fiscal year 1984 Massachusetts allocated over $240.0 million to cities and towns and the arts; Michigan's primary and secondary schools benefited from a $236.3 million influx of funds; New Hampshire transferred over $5.6 million to education; New Jersey allocated over $358.3 million to education and state institutions; New York's schools received over $392.0 million; Ohio transferred $250.0 million to education; and Pennsylvania's senior citizens benefited from over $431.2 million in funds. That earmarking serves to stimulate provision of those services as well as to guarantee financial support for them in difficult budgetary periods.

Third, state operation of a game of chance provides a gambling alternative outside the possibly unsavory and certainly dishonest elements associated with illegal gambling. The state games promise above-board operation and, through their open availability, may reduce the market captured by illegal operations. Modern lotteries have, in fact, been remarkably free of scandals—a major exception being an embarrassing manipulation of a lottery game in Pennsylvania—so the promise of a clean option has been met.

Opponents of state lotteries emphasize the problems with lotteries, normally within the context of standard tax analysis. In the first place, lotteries do not do well on the revenue adequacy or yield standard. As Table 2 shows, net revenue generated by state operated lotteries averaged 1.5 percent of own-source revenues across states in 1978 and only increased to more than 1.95 per-

cent by 1984. By no means do these figures indicate that lotteries provide significant amounts of own-source revenue for states on average, but the data indicate that by 1984 seven states were receiving more than two percent of their own-source revenue from lotteries. Pennsylvania led the pack, raising over 4.4 percent of its own-source revenue in 1984 from its lottery while Illinois, New Jersey, and Pennsylvania raised more than three percent of their revenues through the operation of lotteries.[5] Overall, even at its best the lottery is a relatively small source of revenue generated by a state.

Of course, in comparison to total state revenue, intergovernmental assistance included, the share is even less.

Further indications of the relative insignificance of lotteries as a source of revenue are documented in Table 3. Lottery proceeds tend to be a small portion (averaging 9.2 percent in lottery states in 1984) even of the small charge and miscellaneous revenue category of state revenue, a category roughly including the nonutility "commercial" functions of the state. The relatively large percentages in Pennsylvania, Maryland, New Jersey, and Illinois are the exceptions, and, even in that group, the highest share is only 25 percent of charge and miscellaneous revenue. When the lottery is included with 22 identifiable tax sources, its proceeds ranked ninth or higher (a weak test of importance) in significance in only 12 of the 17 states in 1984. In Maryland the lottery was the fourth largest source of such revenue behind the individual income tax, gross sales and gross receipts taxes, and motor fuel tax. At the other exteme, net revenue from lotteries was the 15th largest source of revenue in the state of Vermont in 1984. The taxes it most frequently ranks immediately behind—motor vehicle license—are generally regarded as so insignificant as to be outside normal fiscal analysis. Thus, the absolute revenue importance of the lottery is small.

There is, however, another aspect of revenue yield, and that is the performance of lottery yield over time. At first glance it appears that lotteries provide a reliable and growing source of revenue for state governments. Table 4 indicates that total net revenue generated by state lotteries grew at relatively robust rates throughout the 1978–84 period. Even during the recession of 1980–81 lottery net revenues continued to grow at a 9.7 percent rate. Closer analysis, however, reveals a basic instability of that revenue. The track record of lottery net revenues on a state-by-state basis is checkered at best. Thirteen of the 17 states which operated lotteries during the 1978–84 period experienced decline in at least one year. These declines were as small as 0.8 percent in Massachusetts and as large as 50.0 percent in Maine. Even the range of percentage increases raises concern about the stability of lottery revenue. Increases ranged from 0.8 percent in Michigan to 214.3 percent in Ohio. Most states experiencing increases had sizable fluctuations in the magnitude of increases. For example, Pennsylvania has a 97.8 percent increase between 1977 and 1978, a modest increase of 6.9 percent between 1980 and 1981, and a 45.1 percent increase between 1983 and 1984.

Clearly, a state cannot rely on its lottery to be a stable, reliable source of net revenue. Lottery revenue is affected by a changing consumer preferences, introduction of new games, marketing efforts, competition from neighboring states' games and illegal games, and other factors outside the states' control.

Because lottery proponents support the activity partly on the basis of the support it provides for selected expenditure categories, some attention must be given the effect which lottery revenue has on those functions. In particular, attention must be given to whether lottery revenue directed to the earmarked function supports additional expenditure or whether it simply substitutes for other revenue which would have been appropriated for the function. This fungibility question is as difficult to answer here as it is in other areas of government finance. If lottery revenues are in practice fungible, regardless of their legal earmarking, expenditures in functional categories to which the revenues are directed would not increase beyond their expected patterns once the lottery begins operation. Instead, legislators would use lottery revenue to replace other general revenue that would otherwise have been appropriated for the function. Conversely, if lottery revenues are not fungible, expenditures in earmarked functional categories would be expected to increase due to the additional revenues being generated by a lottery.

A test of effect is difficult because the majority of states do not earmark lottery revenues; in several other instances, the lottery is too recent or the earmarking too amorphous to allow analysis. Four states with older lotteries, Michigan, New Hampshire, New Jersey, and New York, earmark lottery revenues for education. Table 5 provides information about state and local direct general education expenditure as a percent of total state and local direct expenditure for Michigan, New Hampshire, and New Jersey in an attempt to highlight the fungibility question.[6] Data are provided for a ten-year span surrounding the start date of the lottery in each state. If lottery revenues are fungible, it is expected that the percent of total direct general expenditure accounted for by education would increase, *ceteris paribus.*

The mixed results in Table 5 indicate the difficulty surrounding the fungibility question. In only one case, New Hampshire, did the percentage of direct general expenditure accounted for by education increase. In the New Jersey case, a decline occurred in the years immediately following adoption of the lottery. A decline also followed the earmarking of funds in Michigan. While it might be tempting to conclude that lottery revenues are indeed fungible in Michigan and New Jersey, this may not be the case. Without other information, one cannot be sure whether, for example, lottery revenues kept the ratio at 37.6 percent in 1972 in New Jersey when other factors would otherwise have caused greater reductions in the ratio. Thus, one can conclude that the claims made by lottery proponents that the net revenue contributes to the expansion of functional areas are not provable.

NON REVENUE ISSUES IN LOTTERY ADOPTION

One criticism against the lottery deals with its fairness as a method for distributing the cost of government. Proponents argue that the lottery is nearly ideal because it is voluntary and participation is broad. They often note evidence that lottery participation rates are highest in the middle to upper income levels.[7] To them, those attributes demonstrate that the lottery is, indeed, a fair and appropriate source of revenue.

Public finance scholars, however, reject that conclusion. They employ the standard analysis of vertical equity and conclude that state lotteries place a greater relative burden on low income families than on high income families and that the use of state lotteries reduces the net income of low income groups relative to that of high income groups. This regressivity of state lotteries has been demonstrated frequently and decisively.[8] The pattern is strong, even leading to the conclusion that, by some measures, lottery regressivity is double that of a state sales tax.[9] From the position of government finance, there is no doubt that state lotteries violate the standard of vertical equity.

That equity indictment is weakened if the lottery is viewed as a state business enterprise selling an entertainment service. The lottery revenues are not transfers, as is the case with a tax; they are the outcome of a voluntary exchange. The exchange is no less voluntary than the purchase of alcoholic beverages, a purchase subjected to heavy excise taxation with accompanying criticism for regressivity. Just as the regressive nature of user charges for other public products does not cause rejection of charges as an appropriate means of finance, so too, lotteries might be considered an appropriate state enterprise. The net revenue produced by the lottery is an important extra contribution, above its basic value as a service to the public.

Is there a value inherent in lotteries that is worthy of state production and promotion? States restrain or prohibit private production of gambling, presumably because of social ills creatd by gambling. In this vein, it is certainly unclear that sales of this service merit state support and promotion. As Suits noted a decade ago, "The government has become a pusher. And they're not pushing fire or police protection—only dreams."[10] A review of lottery annual reports shows that the merchandising of lotteries has intensified since then. Blakely notes that lottery bureaucracies develop a keen interest in expanding to new bettors. That concern subverts the reason for having state run games. "The games' worth can only be assayed by a careful and thoughtful balancing of all its economic, political, social, and moral implications. This is what the lottery bureaucracy is supposed to do. Unfortunately, with its stake in the venture, it cannot be counted on to do this balancing well, or even to do it at all."[11] Furthermore, most lotteries seldom advertise critical details of their operations. Not only are the odds of winning not clearly advertised, but prizes distributed over several years are not quoted in present values. Such marketing practices by a private firm would not be permitted. Whether state enterprise should operate at this ethical level is doubtful.

Even though gambling may be entertaining and not irrational, even for an unfair game, why should a government be in such a business?[12] Why should this activity be the government service most heavily marketed? Although the lottery may not be eligible for attack as a regressive tax, because it is voluntary and is the voluntary sale of a service, it certainly may be attacked as an improper business for government provision and production.

Another issued related to the adoption of a lottery is the cost of raising the revenue. The collection cost per dollar of net revenue from any revenue source includes both administrative cost and compliance cost. Lotteries have minimal compliance cost, but they compare most unfavorably to other revenue sources in terms of administrative cost rates. Some lottery costs involve marketing as well as ordinarly administration,

but when considering lotteries as a producer of revenue, the distinction between types of costs necessary for revenue production is not important. Table 6 displays the cost of administering state lotteries as a percent of net lottery revenue for the 1978 through 1984 period. The striking feature of the data presented is the wide variation in administrative costs as percentage of revenues across states. In 1978 it took 5.7 cents to raise every dollar of lottery revenue in Michigan, while it took more than one dollar in administrative costs to raise one dollar of revenue in Maine. In 1980 Connecticut spent 6.4 cents to raise a dollar of lottery revenue, while Maine spent $3.51 for every dollar raised. By 1984 no state was spending more on administration than it was raising in lottery revenue, but a wide variation still existed in administrative costs—from 4.8 percent in Illinois to 76.8 percent in Maine. These costs are all understatements of full administrative cost, because commissions paid to vendors are uniformly excluded. These costs are often around 5 or 6 percent of total sales.

Because reported state tax collections do not exclude the costs of administering each tax, the percentages of net lottery proceeds going to lottery administration previously detailed does not directly compare with administrative cost ratios reported for state taxes. To make a theoretically accurate comparison, lottery administrative cost is divided by the total proceeds collected by the state, excluding only those proceeds simply transferred from lottery losers to lottery winners. In other words, the computation is administrative cost as a percentage of net proceeds plus administrative cost. The denominator, gross collection by the state, is logically comparable with gross state tax collections, so that the administrative cost percentages reported in Table 7 are comparable with the cost of collecting taxes. There is a substantial range in costs, from 4.6 percent in Illinois to 43.4 percent in Maine in 1984. The mean has been around 20 percent, although that level has declined slightly in more recent experience.

These percentages may be directly compared with administrative costs associated with other revenues, a comparison that highlights the inefficiency of lotteries as sources of revenue. Estimates of the administrative costs associated with raising broad-based taxes at the state level range from less than 1.0 percent of net revenue [13] to 1.6 percent to 4.4 percent of total tax revenue.[14] Thus, lotteries are substantially less efficient vehicles of revenue generation than more traditional sources. A lottery normally does cover its full operating cost, so it does better than most user-charge financed state services. Of course, most user-charge financed services have a more substantial public finance justification for their provision than does a lottery.

Although they are outside the standards normally applied in the analysis of revenue sources, two other arguments sometimes made by lottery supporters should be examined. These are the arguments that lotteries divert gambling from illegal forms to the state enterprise and that lotteries stimulate state business activity.

The first argument suggests that the lottery can reduce the profit of crime, organized and independent, by providing an attractive substitute for illegal games. Evidence on this assertion appears in a national study of gambling patterns. That study found that "legalization of the lottery tends to reduce the volume of illegal betting as a whole by reducing the participation in horse books, and sports cards. . . . [T]he presence of a state lottery appears to encourage, rather than discourage, gambling on numbers. . . . [R]eduction in illegal participation is accompanied by a substantial increase in the number of dollars wagered by those who bet illegally." [15] On the basis of this evidence, state lotteries seems unlikely to make dramatic reductions in total gambling, although it may change those patterns.

The second argument supports the lottery as a mechanism for stimulating state business activity. Proponents note the sizable commissions paid vendors of lottery tickets and argue that his volume represents stimulated state economic development. Critics note that these revenues are simply economic transfers, expenditures not made at other stores for other goods or services. While these revenues may provide the margin needed to keep some businesses open, it is equally possible that altered spending patterns may have forced other firms to close. The likelihood is that the lottery has no aggregate impact on activity, simply transferring some business activity from one set of vendors to another.[16]

Two tests are employed to gain some indication of the impact of lottery adoption on state economic activity. Both approaches compare the three years before the lottery was adopted. Both approaches employ per capital personal income in the state, the single best indicator of net economic activity. Both tests standardize state per capita income in reference to the Census region in which the state is locate. [17] To restrict the analysis to modern lotteries, only those initiated since 1969 were included. Data availability prevented inclusion of lottery adoptions since 1982. Thus, 15 states are included in the analysis.

The first test considered whether real growth in per capita income in the lottery state exceeded the growth in per capita income in its Census region by a larger percentage in the post-lottery years than in the pre-lottery years, a finding that would be consistent with the argument that lotteries create economic activity in the adopting state. The data showed that state per capita income growth was typically less than that in the region before lottery adoption (0.11 percentage points less) and was more after adoption (by 0.17 percentage points). The difference, however, is not statistically significant at the 0.05 level; real growth rates appear to be unaffected by the adoption of the lottery.

The second test compares per capita income in the lottery state relative to per capita income in the Census region, for the three years before and after the lottery. The mean ratio is higher in the pre-lottery period (although not by a statistically significant amount), so it is not possible to argue that the lottery makes significant improvements in the economic position of lottery state residents.

The overall evidence is consistent with the idea that lottery activity in a state simply transfers business among store categories, with no discernible difference from normal patterns in the region, the pattern which would have been expected without the lottery. Although not tested here, lottery states bordering jurisdictions without lotteries may extract sales from nonresidents. The extent to which this occurs is again uncertain, but no aggregate effect is discernible.

CONCLUSION

A pragmatic observer could conclude that state lotteries are a useful fiscal tool because they produce state revenue without major public complaint, and additional revenue without large political hassles is generally to the good. On balance, several conclusions about the lottery seem in order:

1. Lotteries represent a relatively small source of state government revenues. They must be aggressively marketed and packaged as entertainment sources to produce that revenue.

2. Lottery revenues are not stable. They fluctuate substantially from year to year; revenue yields are difficult to forecast.

3. Costs of administering lotteries as percentage of net revenues are dramatically greater than the costs of administering state taxes.

4. When state lottery net proceeds are analyzed as a selective excise tax on the voluntary purchase of a state-provided entertainment service, much in the fashion of state excises on equally voluntary purchases of cigarettes or alcoholic beverages, the lottery is a regressive source of revenue. All studies show that low income people spend a substantially greater share of their income on lotteries than do higher income people, a pattern consistent through the income classes. By some indices, the lottery is twice as regressive as a state sales tax.

5. The lottery reduces participation in some forms of illegal gambling, but, based on limited research, indications are that it may increase it in others. Wagering volume probably increases.

6. Lottery bureaucracies in some states develop marketing strategies that emphasize prizes and the road to personal riches, not the role of the lottery as an entertainment form which produces state revenue. Odds of winning in some states are seldom easily accessible, and large prizes are seldom stated in true present value terms. Furthermore, lottery administrators make claims about uses of lottery funds to enhance certain programs and services that, in light of fungibility, cannot be supported by expenditure patterns.

The pattern of lottery adoptions suggest that more states may add lotteries in the next couple of years. It would be wrong, however, to believe that a lottery is a remedy for fundamental fiscal troubles of a state.[18]

[16] Convenience stores appear to be a winner in the transfer. Of nine states reporting sales by store category, convenience stores are in the top three rankings in four states. Only liquor stores appear more frequently as a top seller. Congressional Research Service, *Overview of State Lottery Operations*, Committee Print for Subcommittee on Intergovernmental Affairs, House Committee on Government Affairs (September 25, 1984).

[17] Data were obtained from the U.S. Department of Commerce, Bureau of Economic Analysis, *State Personal Income: Estimates for 1929-82 and a Statement of Sources and Methods* (Washington: U.S. Government Printing Office, 1984) and U.S. Department of Commerce, Bureau of Economic Analysis, *Survey of Current Business* (Washington: U.S. Government Printing Office, assorted years). Deflation employs the implicit gross national product deflator.

[18] It should be noted that no compelling reason exists why the state should actually operate a lottery itself. The lottery could be privately owned, regulated, and taxed in the manner of a race track. The question of appropriate production is relevant but beyond the scope of this analysis.

TABLE 1.—STATE LOTTERIES: AUTHORIZATION, INITIAL OPERATION, AND USE OF NET REVENUES

| State [1] | Authorization | Initial operation | Use of net revenues |
|---|---|---|---|
| Arizona | Intiative | July 1981 | Yearly minimum set by legislature for local transportation assistance fund. Balance to general fund. |
| California | Initiative (November 1984) | September 1985 | Public education. |
| Colorado | Referendum | January 1983 | Fifty percent for capital construction, 40 percent for conservation trust fund, 10 percent for parks and recreation. |
| Connecticut | Legislation | February 1972 | General fund. |
| Delaware | ...do | November 1975 | Do. |
| District of Columbia | Initiative | August 1982 | Do. |
| Illinois | Legislation | July 1974 | Do. |
| Iowa | ...do | August 1985 | Economic betterment, education, agricultural projects, and roads. |
| Maine | Referendum | June 1974 | General fund. |
| Maryland | Initiative, legislation, and a referendum | May 1973 | General fund. Effective 10/3/83, lotto profits allocated to 24 political subdivisions, to expire 10/84. Legislation pending. |
| Massachusetts | Legislation | March 1972 | Distributed to 351 cities and towns for discretionary use. The first $3 million of lotto is alloted for the arts. |
| Michigan | ...do | November 1972 | Primary and secondary education (earmarked in 1981). |
| Missouri | Referendum (November 1984) | Early 1986 | General fund. |
| New Hampshire | Legislation | March 1964 | Education. |
| New Jersey | Referendum | January 1971 | Education and state institutions. $75,000 per year for compulsive gambling studies. |
| New York [2] | ...do | September 1976 | Elementary and secondary education. |
| Ohio | Legislation | August 1974 | General fund, until 1983; education since 1983. |
| Oregon | Initiative (November 1984) | April 1985 | Economic development. |
| Pennsylvania | Legislation | March 1972 | Senior citizens. |
| Rhode Island | Referendum | May 1974 | General fund. |
| Vermont | ...do | February 1978 | General fund (debt retirement and capital construction). |
| Washington | ...do | November 1982 | General fund. |
| West Virginia | Referendum (November 1984) | November 1985 | Do. |
| TriState Lottery | Legislation | September 1985 | To respective states (Maine, New Hampshire, and Vermont). |

TABLE 2.—NET REVENUE FROM LOTTERIES AS A PERCENT OF STATE GENERAL REVENUE FROM OWN SOURCES [1] BY STATE, FISCAL YEAR 1978-84

| | 1978 | 1979 | 1980 | 1981 | 1982 | 1983 | 1984 |
|---|---|---|---|---|---|---|---|
| Arizona | | | | | 1.94 | 0.91 | 0.65 |
| Colorado | | | | | | 1.92 | 1.30 |
| Connecticut | 2.12 | 1.96 | 2.65 | 2.12 | 2.09 | 2.24 | 2.44 |
| Delaware | 0.33 | 0.76 | 0.92 | 1.01 | 1.00 | 1.05 | 1.19 |
| Illinois | 0.56 | 0.39 | 0.44 | 1.01 | 1.59 | 2.40 | 3.54 |
| Maine | 0.27 | 0.20 | 0.09 | 0.13 | 0.26 | 0.37 | 0.39 |
| Maryland | 3.71 | 3.79 | 5.05 | 4.41 | 4.86 | 4.33 | 4.21 |
| Massachusetts | 1.99 | 1.79 | 1.99 | 1.26 | 1.20 | 1.34 | 1.51 |
| Michigan | 2.49 | 2.76 | 3.16 | 2.49 | 2.41 | 2.38 | 2.14 |
| New Hampshire | 0.88 | 0.71 | 0.88 | 0.89 | 0.99 | 0.97 | 0.78 |
| New Jersey | 2.16 | 2.50 | 2.69 | 2.90 | 3.02 | 3.65 | 3.76 |
| New York | 0.74 | 0.64 | 0.57 | 0.61 | 0.99 | 1.39 | 1.69 |
| Ohio | 0.75 | 0.67 | 0.60 | 1.67 | 1.96 | 1.69 | 2.36 |
| Pennsylvania | 1.50 | 1.82 | 1.88 | 1.90 | 2.35 | 3.48 | 4.43 |
| Rhode Island | 1.78 | 2.03 | 2.01 | 1.30 | 1.24 | 0.24 | 1.38 |
| Vermont | | | 0.04 | 0.11 | 0.20 | 0.20 | 0.19 |
| Washington | | | | | | 1.40 | 1.13 |
| District of Columbia | | | | | 0.50 | 1.44 | NA |

[1] Own source general revenue includes all tax revenue, all current change revenue (including lottery proceeds), and all miscellaneous revenue (interest, special assessments, property sales, etc.). It does not include intergovernmental assistance received, utility or liquor store sales, or insurance trust revenue.

Source: U.S. Department of Commerce, Bureau of the Census, "State Government Finances," assorted years.

TABLE 3.—LOTTERY REVENUE SIGNIFICANCE IN FISCAL 1984

| State | Rank of lottery among State tax sources [1] | State tax immediately ahead of lottery | Net lottery proceed as percent of State charge and miscellaneous revenue [2] |
|---|---|---|---|
| Arizona | 11 | Alcoholic Beverage | 3.6 |
| Colorado | 8 | Insurance Excise | 4.9 |
| Connecticut | 7 | Death | 10.9 |
| Delaware | 10 | Insurance Excise | 3.4 |
| Illinois | 7 | Motor Vehicle License | 19.2 |
| Maine | 15 | Motor Vehicle Operators License | 1.8 |
| Maryland | 4 | Motor Fuel | 18.0 |
| Massachusetts | 8 | Death | 8.9 |
| Michigan | 6 | Motor Vehicle License | 10.7 |
| New Hampshire | 14 | Public Utility Excise | 1.9 |
| New Jersey | 5 | Corporate Income | 15.2 |
| New York | 8 | Motor Fuel | 10.3 |
| Ohio | 7 | Motor Vehicle License | 10.3 |
| Pennsylvania | 5 | Motor Fuel | 25.4 |
| Rhode Island | 8 | Motor Vehicle License | 3.9 |
| Vermont | 15 | Death and Gift | 0.6 |
| Washington | 9 | Tobacco Excise | 7.3 |

[1] The 22 separate taxes: general sales and gross receipts taxes; motor fuels taxes; taxes on tobacco products; public utilities taxes; insurance taxes; alcoholic beverage taxes; parimutuels; amusements taxes; individual income taxes; corporation net income taxes; motor vehicles licenses; licenses for corporations in general; occupations and businesses licenses; motor vehicle operators licenses; hunting and fishing licenses; alcoholic beverages licenses; public utilities licenses; amusements licenses; property taxes; severance taxes; death and gift taxes; document and stock transfer taxes.

[2] In keeping with Census definitions, charge and miscellaneous revenue excludes revenue from utilities and state liquor stores.

## SONIA MELNIKOVA-EICHENVALD CALL TO CONSCIENCE

● Mr. CRANSTON. Mr. President, today I am once again participating in the Congressional Call to Conscience as part of the continuing congressional effort to draw attention to the deplorable human rights situation in the Soviet Union.

In these last few weeks our attentions have been focused on the country of South Africa and its heinous apartheid regime which cruelly denies its own citizens the most fundamental human rights. But the abuses of Pretoria, horrible as they are, should not cause us to forget the inhumanity systematically perpetrated by Moscow against religious believers of every denomination, against dissidents, against human rights activists, against families who merely want to be together.

On November 4, United States and European negotiators will once again meet to review the Conference on Security and Cooperation in Europe, to continue what has been known as the Helsinki process. In the 11 years since the Helsinki Accords were signed, the Soviet Union has shown no improvement in its human rights record.

One of the most painful abuses is the continued reluctance on the part of the Soviets to reunite families, and even married couples, even though the Helsinki Accords clearly obligate them to do so.

We have recently received word that Anatoly Scharansky's family will be allowed to emigrate to join him in Israel. I commend the Soviet Government for this action and I am hopeful that this move indicates a change in policy which will result in the reunification of many more families.

One such case of a divided couple which has been brought to my attention is that of Sonia Melnikova-Eichenvald. Sonia is married to a constituents of mine, Michael Lavigne from San Francisco. Michael and Sonia first met in November 1983 and were married in Moscow in April 1985. Before her marriage to Michael, Sonia has been refused 12 times since 1979 to join her sister in the West. No reasonable explanation was ever given. As Michael's wife, Sonia was refused permission to go to the United States twice. She was also refused twice on appeal. The reason: "It is undesirable for you to join your husband in the United States."

Sonia had been an architect, but lost her job upon her first application to emmigrate. Michael was able to stay in Moscow for almost 3 years, first as a nanny for a family in the American Embassy and then as an administrative assistant at the New Zealand Embassy. When, on May 10, 1986, he had to travel to America for family reasons, his visa was considered expired, and he was not allowed to return.

Sonia and six other Soviet citizens who are married to Americans recently sent a letter to 100 Soviet organizations, including newspapers, magazines, and Government agencies. The letter concluded with their fervent request: "You who read this letter will go home tonight, you will kiss your husband or wife, you will play with your children and sit down to supper in the circle of your family. Think about us and do everything in your power to help us."

Sonia will reapply to emigrate in September 1986. I implore the Soviet authorities to allow Sonia to join her husband in California without further delay.●

## PHYSIOLOGICAL BASIS FOR MENTAL DISORDERS

● Mr. INOUYE. Mr. President, I wish to submit for the RECORD, an article written by Drs. Paul H. Wender and Donald F. Klein entitled "Psychiatry Returns to Biology: Evidence Mounts for Physiological Basis of Mental Disorders."

These two distinguished scientists are well known within the mental health community. Dr. Wender is currently Professor of Psychiatry and Director of Psychiatric Research at the University of Utah, College of Medicine. Dr. Klein is Professor of Psychiatry at Columbia University and Director of Psychiatric Research at the New York State Psychiatric Institute. Both Dr. Wender and Dr. Klein have been active in the American Psychiatric Association for a number of years.

In my judgment, the issues which they raise in this paper are extraordinarily important ones and should be seriously considered by every one of us. Mr. President, I ask that their article be printed in the RECORD.

The article follows:

PSYCHIATRY RETURNS TO BIOLOGY: EVIDENCE MOUNTS FOR PHYSIOLOGICAL BASIS OF MENTAL DISORDERS

(By Paul H. Wender and Donald F. Klein)

Ideas about mental illness have fluctuated erratically during the past few centuries. Possession by demons is no longer a serious contender for explanatory honors in Western cultures, but the long dispute among biological, psychological and social explanations continues. Mounting evidence points to the biological basis of mental disorders and to the usefulness of psychotropic drugs, seriously challenging psychosocial theories.

Freudian theories postulated that internal psychological conflict was the basis of neurotic and even psychotic disturbances. Although the "talking cure" fought an uphill fight against "mind disease" theories for

decades, it progressed steadily, spawning numerous kinds of psychotherapy as it gained dominance. In the 1940's, Freudian ideas became entrenched in popular culture, as in the musical "Lady in the Dark" and the Gregory Peck-Ingrid Bergman movie "Spellbound." The success of D.M. Thomas's psychoanalytic novel "The White Hotel" reflects the continuing belief that repression causes mental malfunction.

The public is in the midst of a cultural lag, despite some awareness of the usefulness of tranquilizers, antidepressants and antipsychotic drugs. What is not widely known is that persuasive scientific data are implicating biological factors not only in major mental illnesses but also in numerous less severe mental disturbances, usually considered psychological. Although mental health professionals know about some of these developments, many with years of experience in psychological therapy find it difficult to switch to new treatment approaches.

The major discoveries of biological contributions to mental illness have occurred in three areas: (1) the role of inheritance in mental illness—the nature vs. nurture controversy; (2) the use of medication as treatment; (3) basic knowledge about the brain.

NATURE OR NURTURE?

The nature/nurture dilemma is being resolved through the use of a relatively new research strategy that studies comparison groups of adopted persons. The ancients, of course, noticed that mental illness tends to run in families. By the 17th century, Thomas Willis wrote in *The London Practice of Physick*, ". . . men born of parents that are sometimes wont to be mad will be obnoxious to the same disease." In the early 20th century, scientists clearly documented that psychiatric disorders "ran" in families but were not sure whether the illness was transmitted by genes or through learning.

In the 1960's, the U.S. National Institute of Mental Health sponsored an American-Danish adoption study in Denmark, designed to measure the influences of nature and nurture in schizophrenia. In adoptees, the biological parents supply the genes while the adoptive parents provide the environment. In one study, the researchers studied the nature of psychiatric illness in the biological and adoptive relatives of adopted schizophrenic adults and adopted normal adults. They found an increased frequency of schizophrenia and related illnesses only among biological relatives of the adopted schizophrenics. Thus, the study revealed genetic contributions to the disorder but did not find that family environment played a significant role in the genesis of schizophrenia. In another study, the researchers investigated the adult fate of persons adopted at an early age and raised by either normal or schizophrenic adopting parents. Even though being raised by a schizophrenic may be a very disturbing experience, the researchers found no difference between the two groups in the rate of schizophrenia and related disorders. Contrary to conventional wisdom, there was no evidence of social or cultural transmission of schizophrenia.

Similar strategies have been used to investigate the role of genetic factors in depression, suicide, antisocial disorder, hyperactivity, alcoholism, and even criminality. All, surprisingly, demonstrate a substantial genetic component.

One of the most important findings of the adoption studies is that mental disorders occur along a continuum of severity, with minor forms more common than severe ones. Although less than 1 percent of the population will ever become schizophrenic, 3 to 4 percent will develop less marked but frequently incapacitating disorders related to schizophrenia. Schizophrenia affects about two million people in the United States. Its mild forms could affect as many as eight million people.

The lifetime risk of developing major biological depression is 15 percent (20 percent of women and 10 percent of men). Of every seven people, one is likely sometime to develop a serious depression that includes such physiological attributes as changes in sleep patterns, diurnal variation in mood, loss of sexual interest, dry mouth and skin, and hypothalamic dysfunction. Many moderate depressions that were formerly considered "neurotic" are now recognized as less severe biological depressions.

When one includes alcoholism, which is sometimes genetic, the U.S. prevalence of mental illnesses having biological components increases by about 10 million. Taken together, the major and minor forms of biologically produced psychiatric illnesses may afflict up to 30 percent of the general adult population.

MIND, MOOD, AND MEDICINE

The remarkable effectiveness of a variety of new psychotropic drugs has also implied that mental illnesses are due to underlying physiological malfunctions. Obviously, the effectiveness of medication does not prove biological causation—the effectiveness of aspirin for a headache does not mean that lack of aspirin caused the headache. However, because the major psychotropic drugs have no effect on normal people, researchers have postulated that the medications work by normalizing defective brain regulators.

The beneficial effects of antipsychotic medications have enabled mental hospitals to reduce drastically the number of chronic inpatients, returning many of them to a productive life (for others, the need for sheltered situations in the community of course remains a pressing social problem). Hospital treatment of patients suffering from acute pyschotic episodes has become so effective that discharge is possible in a few weeks. The drugs have also made psychotic patients much more readily accessible to the psychosocial treatments that might help them adjust to environmental stresses.

The availability of powerful antidepressants and lithium is changing treatment approaches to depression, especially in severe melancholic episodes, where psychotherapy may be less effective. However, many patients (and therapists) do not realize that some less severe depressions are also biologically produced and may respond to antidepressants. Medication should also be tried more in patients with panic disorder and generalized anxiety disorder.

Medications are particularly important in preventing the suicides that frequently result from depression, schizophrenia, and alcoholism. Without adequate therapy, approximately 10 percent of severe depressives will commit suicide (about 3,000,000 of the current U.S. population). This estimate may greatly understate the problem because of the possibility of suicide in "accidental" deaths, includng those of 25,000 drunken drivers each year. Suicide is also the second most common cause of death in children and adolescents. Because of the effectiveness of drugs in shortening many depressive episodes, they should routinely be tried in severe depression.

THE BIOPHYSIOLOGY OF THE BRAIN

Increasing knowledge of the brain's role in governing emotions and behavior is helping to identify the physiological factors that seem to be implicated in mental illness.

The part of the brain that governs sensing, thinking, and feeling consists of at least 10 billion cells. Researchers hypothesize that in coordinated brain activity, impulses are transmitted from cell to cell electrochemically. Minuscule amounts of chemicals known as neurotransmitters are discharged from one cell into another, stimulating or inhibiting cell action. People differ constitutionally in the production and processing of neurotransmitters, and psychiatric drugs seem to act by influencing such differential chemical functioning. Animal research has been the basis of much of the progress in brain investigation, demonstrating how different amounts of various neurotransmitters in the brain can be related to changes in appetite, sleep patterns, sexual activity, and mood.

Generally, cells will respond only to those chemicals for which they have specific "receptor sites." Recently, a procedure was developed at Johns Hopkins University that can demonstrate whether there are cell receptor sites for any given chemical. The first important breakthrough in studies of this kind came with the unexpected discovery that the pain-relieving properties of morphine and related agents resulted from imitation of the function of an entirely unknown set of neurotransmitters—the endorphines and enkephalines. Similarly, the discovery of receptors for agents such as Valium and dextro-amphetamine suggested that the brain has systems for tranquilizing us against anxiety and for stimulating us when we are fatigued. Astonishingly, brain receptor sites have even been found specifically for PCP, the psychosis-producing drug often called "angel dust."

The refinement of the technique for receptor identification opens the way for the development of drugs that can act with greater precision. The major problem with active drugs is that they produce a broad array of effects. For instance, drugs that decrease anxiety often produce sleepiness. Clearly, drugs that are more like the specific chemicals that affect receptor sites are likely to act within a narrower range and to have fewer side effects. Eventually, pharmacologists may become less dependent on trial and error in their search for useful drugs and may be able to design specific new therapeutic agents.

Putting together the genetic and chemical evidence, we hypothesize that in some people genetic factors (or such biological factors as birth accidents and viruses) produce congenital dysfunctional brain chemistry that affects mental functioning; in others, genetic factors may produce constitutional vulnerability to particular life events—such as separations, failure, losses, and rejection.

IMPLICATIONS

The large-circulation newspapers and magazines have begun to report these biological discoveries, but on the whole, Freudian thinking still dominates ideas about mental illness. Persons afflicted with mental problems tend to think of medications as second-class therapy. Many psychoanalysts, psychologists and social workers remain unimpressed by the flood of biological data, and some psychiatrists have not yet received sufficient training to employ the new medications or to deal with their

side effects. Understandably, professionals who have spent years learning psychoanalysis and psychotherapy believe that they have effective methods for treating a large number of mental problems. Some mistakenly assume that medication is merely a palliative, insisting that only insight can lead to cure. Psychologists and social workers face the additional obstacle of being unable to dispense prescription medicine, and many are unwilling to adapt their practices by working with physicians or by restricting their case loads to problems that do not require medication.

Another factor that prevents adequate use of the biological treatments is the tendency of some people to consider depression, alcoholism, and other mental illnesses as signs of weak will rather than as symptoms of physiological defects. They do not want to recognize that human beings are not in complete control of their own lives.

Historians have described three major blows to human vanity: Copernicus' discovery that the earth went around the sun rather than vice versa; Darwin's evidence that we descended from apelike creatures; and Freud's argument that unconscious factors kept us from being fully in control of our behavior. Biological theories of mental illness seem to some people to be reducing man's dignity still further because they demonstrate that sometimes one cannot by oneself control moods and behavior through will and self-discipline. But those who remain suspicious of drug treatment ignore the possibility that biological advances may grant us the power to reestablish control over ourselves in some areas where psychological means have been inadequate.●

## CRUCIAL BANKING LEGISLATION MUST NOT BE HELD HOSTAGE TO EXPANDED BANK POWERS

● Mr. HEINZ. Mr. President, there is a mountain of critical financial issues pending before the Senate Banking Committee which, if left unresolved, threatens to become a mudslide of competitive imbalance, regulatory chaos, and financial instability and bury the financial services industry. These matters can—indeed, they must—be addressed immediately in the limited time remaining in the 99th Congress. Unfortunately, the most critical issues demanding legislative remedies are trapped in the web of a large, complex measure which calls for a complete overhaul of the current financial services industry without adequate time to assess its impact on the banking system in the few legislative days remaining in this Congress.

The Banking Committee, under the able leadership of Chairman GARN, will soon consider S. 2592, the Deposit Insurance Reform and Competitive Enhancement Act, or a variation of that bill. Chairman GARN is to be commended for his Herculean efforts in attempting to address the major issues confronting the financial services industry today. Given the rapid and revolutionary forces that have buffeted the industry in recent years, it is our responsibility to reexamine the statutory framework. However, now is not the time to conduct this type of review, particularly if it entails sacrificing other provisions which are vital to the continued viability of the banking system.

I believe that three components of S. 2592 must be excised and moved as expeditiously as possible.

First, the Federal regulators' authority to arrange emergency interstate acquisitions of failing financial institutions must be extended. This title was first approved as part of the Garn-St Germain Depository Institutions Act of 1982, to enable Federal regulators to deal with financially distressed institutions in the most effective and orderly fashion in order to ensure absolute protection for deposits and full confidence in the marketplace.

These authorities were absolutely essential in 1982 to stanch the hemorrhage and ensure the survivability of our financial industry during a period of tumultuous economic conditions. They are equally important today to facilitate the industry's transition through an economy undermined by falling oil and commodities prices.

The emergency acquisition and capital assistance programs have been extended twice since they originally expired on October 15 of last year; the latest extension expired on July 15, 1986. Since that time, the Federal Deposit Insurance Corporation and the Federal Savings and Loan Insurance Corporation's hands have been tied. They cannot arrange any additional mergers of failing institutions, a situation which, in my mind, is absolutely untenable given the rising number of institutions tottering on the brink of insolvency, the potential increased cost to be borne by the Federal deposit insurance funds in the absence of this authority and the very real possibility of undermining public confidence in the system.

Second, it is incontrovertible that the Federal Savings and Loan Insurance Corporation is a ticking time bomb. It is being pushed beyond its capacity and faces potential bankruptcy in the absence of any remedial action. Losses at insured institutions have been mounting in recent years. The ratio of FSLIC reserves to deposits had been steadily declining since 1983, to levels that have caused increasing concern to the Federal Home Loan Bank Board. Unfortunately, the number of problem institutions continues to grow at an inordinate rate and, I might add, at a rate which cannot be successfully handled by the insurance fund. It is evident that the Federal Home Loan Bank Board cannot effectively manage the number of problem cases now facing it because the FSLIC's resources are, in a word, inadequate.

Although the Bank Board recently imposed a special insurance assessment on individual FSLIC-insured institutions, this measure has not produced enough income to offset the costs associated with the resolution of a growing number of very expensive FSLIC cases. More importantly, it has not been enough to replenish the real reserves of FSLIC and bolster the needed long-term recapitalization of the fund.

The dire straits of the FSLIC and the urgency underlying its recapitalization efforts are not new. In fact, in a speech given nearly a year ago, Ed Gray, Chairman of the Home Loan Bank Board stated:

> The continuing strains on the FSLIC require a forthright recognition of the need by the leaders of the thrift industry to recapitalize the FSLIC. . . . [R]ecapitalization of the FSLIC is what is most necessary to ensure that our insurance corporation will always be able to meet its obligation.

The Treasury Department, working in conjunction with the Bank Board and OMB, has designated a proposal to recapitalize the FSLIC. This plan is incorporated in S. 2592. While it may still have some technical problems, the proposal should provide the FSLIC with sufficient financial and organizational resources as well as the flexibility to deal with its caseload, ensure the long-term viability of the insurance fund and bolster depositor confidence in the system.

Finally, closing the so-called nonbank bank loophole—under which a firm that only takes deposits or only makes loans can escape regulation under the Bank Holding Company Act—is a crucial complement to this legislation. Right now, nonbanking firms can own these limited service banks and can operate outside the parameters of Federal law regulating geographic and product expansion of bank holding companies.

While these entities profess to be "regulated," they are not subject to the same rules as other companies which own banks, as that term is currently defined. As such, they offer, in the words of Paul Volcker, Chairman of the Federal Reserve, "the potential for abuse" and the potential for "creating a situation fraught with adverse consequences for the system as a whole."

In addition to being free of current regulatory oversight, the loophole could exacerbate the crisis within the thrift industry. As I have previously noted, the currently high projected cost of resolving failures is sapping the FSLIC. As a practical matter, the loophole gives commercial banks and other enterprises a simple and inexpensive way to acquire interstate franchise rights. A very serious result has been the virtual elimination of serious bids for severely troubled thrifts. This trend threatens to nullify the intended benefits of one of the most important powers granted to FSLIC by the Garn-St Germain Act, that is, the au-

thority to arrange interstate acquisitions for failing institutions.

Mr. President, this situation cannot continue. It is making a mockery of our existing laws and a shambles of our system. The loophole must be closed so that if an entity wants the benefits of the banking system, particularly those provided by the bank holding company structure, it must play by the same rules.

There are a number of other provisions in S. 2592, many of which have merit, but most are fairly controversial. I certainly do not think, Mr. President, in the waning days of this Congress, that the critically important measures discussed above should be held hostage pending action on the more controversial provisions. That alone calls for jettisoning many provisions of S. 2592 in order to enact immediately what I consider to be the core of Chairman GARN's bill.

Beyond that somewhat pragmatic and procedural point, Mr. President, I feel compelled to speak to the merits of one additional portion of S. 2592—that which would permit commercial banks to expand into previously prohibited activities of investment banking, otherwise known as the securities business. I have spoken on this floor, in committee, and elsewhere on this subject many times, but it needs to be said again: It simply is not in our national interest to undertake a piecemeal dismantling of the wall between commercial and investment banking at this time.

There is much to be said on this subject, and I would refer those interested in greater detail to my remarks during the debate on the 1984 banking bill, during which I discussed the history and continuing relevance of the Glass-Steagall Act which separates commercial from investment banking, as well as the complete range of arguments against bank expansion into the securities business. At this time, I will make just three points on this issue.

First, there has been absolutely no conclusive demonstration that expanded securities powers would either strengthen the financial system or enable that system to better serve the needs of American consumers and business. It is indisputable that some segments of the American banking system have had their problems, but they have been due to a wide range of problems—including mismanagement, fraud, and deviation from basic principles of sound banking—which have nothing whatsoever to do with the array of products and services available to banks. Not only has there been no demonstration that expanded powers would cure current banking problems, but I have heard, Mr. President, from many bankers who tell me that banks are doing and can do very well in the traditional banking business as long as prudence is exercised. Furthermore, leading representatives of American consumer and business groups, including the National Federation of Independent Businesses, the American Association of Retired Persons and the Consumer Federation of America have strongly and consistently opposed expanded securities powers for banks.

My second point, Mr. President, is that beyond the absence of compelling evidence in favor of expanded powers, there is considerable evidence that such expansion could, in fact, undermine the safety and soundness of our banking system. That point has been made many times, but I want to assure my colleagues that it is neither remote nor hypothetical. The dangers and riskiness of the securities business were demonstrated forcefully just last week when the New York Times reported that Wall Street investment firms lost hundreds of millions of dollars in the mortgage-backed securities market, which is precisely one of the new powers which S. 2592 would give to commercial banks. I ask that the New York Times article on this subject be printed in the RECORD at the end of my remarks.

The point, Mr. President, is that it is acceptable for a private firm to sustain such losses in risky enterprises, but is entirely unacceptable to have such risks underwritten by American taxpayers through the Federal deposit insurance system.

Finally, I would like to respond to those who say that the financial marketplace and regulatory responses have evolved so much in recent years that the Glass-Steagall Act's separation of commercial from investment banking has become outmoded. I would say to those people, if the Wall of Jericho needs to come tumbling down, do it with a full-blown sounding of the trumpet, and not with a few half-hearted toots. If you want to review and reevaluate the legal structure of the American financial system, including the barrier established by Glass-Steagall, then let's get to it. Let us not, however, forestall such a comprehensive review while eroding that structure in a piecemeal fashion. If, after such review, the Congress were to revise or repeal the Glass-Steagall barrier, then many other changes would be required beginning, for example, with the system of Federal deposit insurance.

I will close, Mr. President, by noting that the American financial system has functioned extremely well as the underpinning of the strongest economy in the world for the past 50 years. The separation of commercial from investment banking has helped foster not only a stable banking system, but also a system of capital formation which is second to none. Significant modifications to the American financial structure should not be undertaken lightly; in fact, proposals to erode Glass-Steagall pose a very serious threat to the strength of the American financial services industry and to the safety and soundness of the American banking system.

The article follows:

TURBULENCE IN PASS-THROUGHS

(By James Sterngold)

On the trading floor of Dillon, Read & Company is a pot sprouting a vigorous green plant, labeled with a brass plaque: "The Perfect Hedge." It is an amusing reminder that, despite an array of sophisticated market techniques, there is no hedge, or foolproof protection, against a steep decline in the value of a security.

That painful lesson was driven home anew in the past few months, when the market for mortgage-backed securities was sharply affected by an unusual shift in interest rates that caught even the savviest of professionals off guard.

Top firms such as Salomon Brothers, the First Boston Corporation and Goldman, Sachs & Company, among others, are believed to have lost hundreds of millions of dollars when the hedges they had relied upon to protect their huge holdings of mortgage-backed securities plunged them deeper into the red rather than keeping them afloat.

For many investment bankers and traders who had earned fortunes from this booming business, it was a sobering episode. The lingering memory may change the way many large securities firms operate.

"You take your worst-case scenario, and it came true," said Stephen L. Joseph, a senior vice president and head of the mortgage-backed securities department at Drexel Burnham Lambert Inc. "Before you could only imagine we might have those conditions. Now you know that it really does happen."

Lewis S. Ranieri, who helped create the market and is head of the mortgage-backed securities department at Salomon Brothers, the industry powerhouse, said he saw some long-term benefits from the experience.

"Objectively, you have to be pleased simply by the fact that the system didn't collapse," he said. "But we learned a very expensive lesson: that we're not as smart as we thought we were. We'd had five great years, and maybe the gods resented our hubris, so they got back."

Mortgage-backed securities were created 16 years ago as a way of making home mortgage more accessible and affordable. Thrift institutions, banks and insurance companies can sell their outstanding mortgages to one of several Government agencies, which then bundle them into large pools and, in effect, sell off pieces in the form of bonds to major institutional investors and individuals. The money that the lenders receive from selling their old mortgage can be used for making new mortgage loans.

Wall Street has mined this rapidly expanding market and the amount of mortgage securities outstanding has grown to more than $600 billion, of which $116 billion has been issued this year alone, according to Salomon Brothers. By comparison, less than $300 billion was outstanding at the end of 1983.

Substantial fees are generated by these underwritings, and the increased volume of securities provides grist for extremely lucrative trading operations, the most profitable side of this business.

THEN CALAMITY STRUCK

But "too much of a good thing" might well describe the calamity that hit the market in the second quarter.

First, the volume of new mortgage backed securities being issued swelled to unheard-of levels.

Then—and this was the catch—because of an unusual twist in the structure of these securities, their price began to fall slightly as the price soared of other Government securities often used to hedge portfolios of the mortgage-backed bonds.

It was an incendiary combination. Known technically as "negative convexity," it has also been dubbed "the double whammy." Here is the story of what happened in the market's springtime blood-letting.

The basic type of mortgage-backed security is known as a pass-through. These are mainly issued by the Government National Mortgage Association (often called Ginnie Mae), the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation, although some types of mortgage securities are issued by Wall Street firms.

Pass-throughs consist of a pool of mortgages, carrying a like interest rate, which are bundled together and resold as bonds. The monthly payments of interest and principal made by all the individual mortgage borrowers are passed through to the bondholders, and the agency collects a fee for handling this chore.

Overhanging the value of these bonds is a huge variable: how many of the homeowners will prepay their mortgages, either by refinancing at lower rates when they are available or by selling their houses. Corporate and Government bonds often have some guarantee that they will not be called, or prepaid, before a specified date. But mortgage-backed securities generally offer no call protection. The recent problems, in fact, resulted from prepayment activity never before witnessed.

Interest rates in general, after having fallen for months, led throngs of homeowners to take out new low-rate mortgages and use the proceeds to pay off their old high-rate mortgages.

PREPAYMENTS TRIM YIELD

Such prepayments of principal reduce the overall yield on mortgage-backed securities and thus make them less attractive to investors. This held the prices of the securities down.

"There was an amazing acceleration of prepayments," said Mr. Joseph of Drexel Burnham Lambert. "It was shocking."

That created two additional problems. First, major institutional investors—such as insurance companies, pension funds and certain mutual funds—that buy billions of dollars of mortgage-backed securities sold them as fast as they could, often back to the Wall Street firms they had been bought from."It was almost panic selling," said one trader. The heavy selling helped keep a lid on mortgage-backed security prices.

Second, with so high a level of refinancings, more and more new mortgage-backed securities were issued, leaving the securities dealers with rising inventories, few buyers and mounting losses, particularly in the middle of the quarter.

UNEXPECTED FLOW OF ISSUES

The volume of new issues was "mind-boggling," said Mr. Ranieri of Salomon Brothers. "To give you some perspective, the market grew about 25 percent last year, which all of us thought was astounding," he commented. "But it could grow from 60 to 100 percent this year. The market never anticipated, and has never handled, this kind of volume, ever."

Worse was in store. To protect the value of their inventories against unexpected market swings, Wall Street firms generally adopt a hedging strategy that uses Treasury securities as a kind of counterbalance because of the liquidity in that market.

If a firm owns, say, $10 million worth of mortgage-backed securities (known as a long position) it might make a commitment to sell about $6 million of Treasury bonds or bond futures (a short position). Historically, the two securities have moved more or less in tandem, so any decline in the value of the long position in mortgage-backed securities is countered by a gain in the value of the short position in Treasury bonds.

That is the theory. What happened is that the Treasury bonds rose in price because interest rates fell during most of the spring (the price of a bond with a fixed interest rate moves inversely to market interest rates). At the same time, the price of mortgage-backed securities was steady or falling as a result of the heavy mortgage prepayments.

For instance, the price of a Ginnie Mae bond with a 12½ percent interest rate dropped steadily from a price of $109.125 in mid-December to $107.625 at the end of February and $105.35 toward the end of June. Meanwhile, a 10-year Treasury security, paying a 9½ percent fixed interest rate, rose from a price of $101.875 in mid-December to $108.531 at the end of February to $112.844 at the end of June. In other words, dealers lost money both on their holdings of mortgage-backed securities and on their artfully crafted hedges.

"You could have gotten killed on both sides," said Robert P. Andres, the president of the Merrill, Lynch Mortgage Capital Corporation.

Merrill avoided much of the problem by hedging with other mortgage-backed securities, Mr. Andres added. "It was devastating for some people, but I don't think they believed it," he said. "They said it had to turn around. But it didn't. It got worse."

Yet dealers were not willing to pull out because they feared that by doing so they would give up a share of the market to their competitors. In this game of chicken, Wall Street style, most major firms stood their ground and took their losses.

"You don't walk away from a market you spent much of your working life creating," said Mr. Ranieri: "You had to preserve your market position, just grin and bear it."

The customers of many of these firms benefited by being offered mortgage-backed bonds at a low price just so the securities dealers could get them out of their portfolios.

"We have become more aggressive in marketing our positions so they don't sit around," said Mr. Joseph: "Before, we might have bought a $100 million issue, sold one-half to two-thirds in a couple of days, then stuck the rest away for a while. Now we reduce prices and get the product out of the door faster."

Mr. Andres described the episode as a watershed for a market that had made so much money so easily that it had never prepared for tough times. "This will probably make people more disciplined and more reflective on what they're doing and where they're heading," he remarked.

Mr. Ranieri said he would consider another hedging technique: options on mortgage-backed securities rather than the Treasury market. An option is the right, but not the obligation, to buy or sell a set amount of securities at a set price on a future date. They can be used as an insurance policy with an up-front premium paying for the protection.

Options which are more conservative, are more expensive to use, but "they let you sleep at night," as one trader put it.

"People realize after this that securitization is not a panacea," Mr. Renieri said. "We'll be more careful. However, I have to say that if you get another strong rally like we had in Treasuries, we could find ourselves back in the soup."●

## AIDS DEMONSTRATION PROJECTS

● Mr. D'AMATO. Mr. President, I rise today to cosponsor legislation addressing one of the most critical diseases facing our Nation—aquired immune deficiency syndrome. I commend my colleagues, Senators HATCH and KENNEDY, for recognizing the critical nature of AIDS and for proposing legislation to remedy many of the flaws in our health care treatment which affect those individuals who have AIDS.

As of June 1986, over 21,500 cases of AIDS had been reported. This figure is expected to rise steadily—and tragically. Estimates indicate that by 1991 there may be 196,000 cases of AIDS and 125,000 deaths resulting from AIDS. The number of Americans currently infected with the disease is estimated to be between 1 million and 1,500,000 individuals.

AIDS has proven to be a costly disease to treat. In 1986, it is estimated that the United States will spend between $870 million and $1.3 billion for health care for individuals with AIDS. The public health service estimates that by 1991 the direct costs to provide health care for individuals who have AIDS will be between $8 billion and $16 billion a year. Clearly, the high incidence and cost of this disease calls for immediate action on the part of the Federal Government.

Last year during the fiscal year 1986 appropriations process, the chairman of the Subcommittee on Labor, Health and Human Services, and Education appropriated $16 million for the care and treatment of AIDS patients in four metropolitan areas in the country. As a member of the Senate Appropriations Committee, I was pleased to support this funding.

However, because of the rapidly increasing incidence of AIDS, additional assistance is required to meet the health care needs of AIDS patients. S. 2345 aims to meet these growing needs and, consequently, I am pleased to lend my support to this legislation.

Specifically, the legislation finances demonstration projects to establish cost-effective networks of outpatient medical services. In addition, the bill

provides for counseling and mental health services for AIDS patients and for those individuals who have a positive test for the AIDS virus. Case-management services also will be provided to ensure that such individuals are aware of, and are provided with the full range of, health care services. I commend my colleagues on the Senate Committee on Labor and Human Resources for solidifying and expanding this Nation's commitment to those who are in such serious need of health care. I urge my colleagues to join me in affirming this commitment.●

## "ADOPT AN EAGLE NEST:" SAVING AN ENDANGERED SPECIES

● Mr. KASTEN. Mr. President, the protection of endangered species is one of the most honorable tasks a person or organization can undertake. Saving unique animals and plants from extinction is a responsibility that no one can afford to ignore.

Over the past decades, concerned citizens have banned together to form such groups as the National Wildlife Federation, the Wilderness Society, the Audubon Society, and others. These groups have worked hard to heighten public awareness of the responsibility we share to protect endangered species.

But, Mr. President, sometimes it is the small voices that energize the actions of many. I offer as an example a program in my home State of Wisconsin working to preserve the bald eagle.

It is ironic, and very sad, that the bald eagle, our national emblem since 1782, is in danger. The bald eagle was placed on the Federal endangered species list in 1972. In 1976, 43 States listed the bird as endangered, and five other States, including Wisconsin, identified the bald eagle as "threatened."

This magnificent bird of prey, once so plentiful along Wisconsin's waterways, had fallen victim to logging, agriculture, and summer resorts—activities that provide work and recreation for the people of the State.

Today there is a movement afoot to help bald eagles and humans coexist in Wisconsin. Called the Adopt an Eagle Nest Program, this movement to save the bald eagle is growing in Wisconsin and could go a long way toward preserving this special and historically significant species.

Adopt an eagle nest was developed by a seventh grade English teacher from Burlington, WI, a town of 8,500 in the southeast part of the State, who spends his summer in Winchester, a small town in the lakes region just south of the Wisconsin-Michigan border.

Gary Humphrey saw a picture in the Lakeland Times showing Wisconsin Department of Natural Resources workers putting osprey nests in trees. He thought it would be a good idea for his students to learn about endangered species.

What began as a classroom assignment has developed into a statewide project to save the bald eagle. Humphrey and his students campaigned for the school to spend $100 to "adopt" an eagles' nest. When the DNR received the $100 voted by the Burlington Junior High student council, Ron Nicotera, who heads the DNR's endangered species division, visited the school to offer his thanks.

The $100, he told the students, would help pay for surveys, the banding of young birds, the collection of specimens for contaminant analysis, care, and rehabilitation.

Inspired by what their donation meant to the survival of bald eagles in Wisconsin, the students then challenged other schools to match the Burlington offer.

Mr. President, more than $17,900 has been received by the Wisconsin DNR through the Adopt An Eagle Nest Program, and interest continues to grow. To help promote the campaign, the DNR has offered a special print of two adult eagles by Wisconsin nature artist, Richard Van Order, entitled "The Call of Freedom."

Participants in the Adopt An Eagle Nest Program receive a certificate of adoption, a status report, and a photograph of young eagles in a nest. The goal is to see 400 pairs of eagles nesting and producing young. This would represent a healthy population and would remove the bald eagle from Wisconsin's endangered list.

This is an important program for Wisconsin, an important program for the protection of an endangered species, and a wonderful example of how the interest, concern, and initiative of private citizens can help preserve the best of America.

I commend Mr. Humphrey, the students of Burlington Junior High School, and Wisconsin's Department of Natural Resources for their creative concern in protecting America's bald eagle.●

## A LIBERAL FOR REHNQUIST

● Mr. HECHT. Mr. President, a good friend of mine, Mr. Northcutt Ely of Redlands, CA., has brought to my attention an editorial by California Supreme Court Justice Stanley Mosk. I agree wholeheartedly with Mr. Northcutt that this article, which appeared in the July 30, 1986 edition of the Los Angeles Times, is a fine statement in support of the nomination of Justice William Rehnquist for the position of Chief Justice of the United States. Accordingly, I ask that the article be included in the RECORD.

The article follows:

### A LIBERAL FOR REHNQUIST: HIS FEDERALISM SERVED THE CAUSE OF INDIVIDUAL RIGHTS

(By Stanley Mosk)

My good friend Pat Brown, for whom I have the utmost respect and affection, put his foot in his mouth the other day. While advocating retention of all justices on the California Supreme Court regardless of their philosophy or political origin, the former governor confessed that he would oppose William H. Rehnquist's nomination as chief justice of the United States. Why? Because Rehnquist is too conservative. Inconsistent? Well, yes, Pat conceded with his characteristic and lovable candor.

I must respectfully disagree. If I were in the Senate, I would vote to confirm the nomination of Justice Rehnquist. Though I have often found fault with his conclusions, in my view he is a thoroughly competent craftsman and a thoughtful legal scholar. The concepts that he advances, though often not to my taste, deserve to be ventilated and discussed.

It is assumed that Rehnquist is a diehard reactionary whose philosophy is totally out of step with modern reality. A thoughtful appraisal of his opinions does not confirm that assumption, at least not all of the time.

The Warren court, perhaps encouraged by the civil-rights movement of the 1950s and '60s, abandoned the previous pathetic approach to overt injustice in our society and elected to employ the federal Constitution to achieve a liberating effect in the areas of political opportunity, criminal justice and racial equality. The states were compelled to fall in line, often reluctantly.

The Burger court, however, appears to have abandoned the role of keeper of the nation's conscience. There have been numerous retreats in the use of the Constitution to advance individual rights.

As a result, states have faced a difficult choice. They could react to the ebb and flow of the tide on the Potomac, and also reduce protection of individual rights. Or they could abandon dependence on the federal Constitution, and employ state constitutions as authority for preserving expanded rights. Many states, including California, opted for the latter. Indeed, the California Constitution provides that "Rights guaranteed by this Constitution are not dependent on those guaranteed by the United States Constitution."

Some conservative politicians, disturbed at the use of the state Constitution to provide greater individual rights than the high court required, used the initiative process to compel California courts to employ only the federal charter in criminal cases. Nevertheless, the principle of federalism is still adopted whenever possible, so that the federal Constitution sets the floor below which individual rights may not fall, but the state establishes the ceiling.

This problem came to the attention of Rehnquist and his colleagues in a significant context. Where two constitutional rights conflict, which is to prevail? If a few orderly persons seek signatures on political petitions in a privately owned shopping center and the owner seeks to bar them, this conflict arises. The citizens are asserting their freedom of speech and their right to petition the government for a redress of grievances. The shopping center's owner is defending his right to determine the use of his private property.

In the case of Robin vs. Pruneyard, the state Supreme Court said that the right of the petition circulators should prevail as

long as there was no interference with the business of the shopping center. The case went up to the Federal Supreme Court.

In this conflict between free speech and private property rights, where was Rehnquist? Forthrightly on the side of free speech and, more significantly, in defense of the right of the states to define the limits, if any, one speech and related activity. His court, he wrote, "does not limit the authority of the state to exercise its police power or its sovereign right to adopt in its own Constitution individual liberties more expansive than those conferred by the federal Constitution." This was true federalism.

It was interesting that some of his colleagues took a more conservative approach. Justices Lewis F. Powell, Jr. and Byron R. White asked: What if the speakers advocated views seriously antithetical to the owner, as, for example, Ku Klux Klan spokesman invading a shopping center owned by a black? A provocative question, but fortunately that issue was not involved in the Pruneyard case.

In the recent session of the court, Rehnquist demonstrated his concern for the environment. In Japan Whaling Assn. vs. Baldridge, he joined with Justices Thurgood Marshall, William J. Brennan, Jr. and Harry A. Blackmun in a dissent that excoriated President Reagan's secretary of commerce for not enforcing congressional regulations concerning the protection of whales.

I could cite other examples of Rehnquist opinions that would satisfy, or at least not offend, traditional liberals like Pat Brown. But, if I did, I would be falling into his error of weighing competence on the basis of agreement with case results.

The bottom line is that William Rehnquist has the academic background and the judicial experience to justify his elevation to chief justice. The quality of his opinions amply demonstrates judicial competence.

Yes, Pat Brown, you were wrong. Liberals can support the confirmation of Justice Rehnquist.●

## NAUM & INNA MEIMAN: PERSISTENTLY PERSECUTED

● Mr. SIMON. Mr. President, Naum and Inna Meiman are Soviet Jews who desperately want to emigrate to Israel. The Meimans have applied for exit visas several times, but the Soviet Government repeatedly refuses their requests.

The Soviets claim that because of classified work he once performed, Naum was privy to state secrets. Naum's calculations, however, were completed over 30 years ago. They are, in fact, long since outdated and well publicized. Even more ridiculous is the Soviets's denial to emigrate to Inna so she may obtain medical treatment for cancer.

The Meimans are good and caring people whose basic human rights have been denied by the Soviet Government based on trumped up charges. The Meimans have not committed any crime, yet the Soviets treat them like criminals and hold them captive in Moscow.

The Soviet Government has persistently persecuted the Meimans since they first filed emigration papers. Naum and Inna have been subjected to constant harassment and torment by the secret police. The Meimans home has been ransacked, their telephone has been disconnected, and much of their mail has been confiscated.

The Soviets must recognize that their harassment and denial of human rights will not be tolerated, and we shall never relent in our efforts on behalf of the refuseniks. As persistently as the Soviets deny the Meimans' basic rights, the more determined their friends around the world are in seeing them released.

I strongly urge the Soviet Government to allow Naum and Inna Meiman to emigrate to Israel.●

## RETIREMENT OF BATES ELLIS: A DEDICATED PUBLIC SERVANT

● Mr. SASSER. Mr. President, I wish to pay tribute to Bates Ellis, who is retiring this year after 32 years of outstanding service as register of deeds for Robertson County, TN. Bates' commitment to his job and his community is a shining example that all public servants should look to for guidance.

In addition to serving his community for over three decades as an elected official, Bates has taken an active role in volunteer organizations. He has served with distinction as the president of the Tennessee Registers' Association for the past year. He has served as a member of the board of directors of the Senior Citizens of Springfield, worked as a member of his local Lion's Club for 23 years and been an active supporter of amateur sports in his community.

Bates' service to his community extends to his life in church as well. He has been a member of the First Baptist Church of Springfield since 1945. He has served the church as deacon since 1958 and secretary for 6 years.

Mr. President, the highest compliment that can be paid an individual is the respect of one's neighbors. Bates Ellis' lengthy tenure in public office speaks volumes about the respect he generated. Being elected to the same public office for eight terms is a tribute to his professional ability and an acknowledgment of the high esteem he is accorded by his neighbors.

Bates Ellis has done more than serve his community well. He has set a fine example for all of us who hold public office. I pay tribute to his outstanding service to his community and wish him well.●

## NATIONAL DEFENSE AUTHORIZATION

Mr. SIMPSON. Mr. President, I want to commend the managers of the bill we are working on, Senators GOLDWATER and NUNN, and all Senators for the progress made today. I do hope, indeed, we can continue the good progress tomorrow. It is a necessary thing for us.

In the morning the leader will be inquiring of the Democratic leader to discuss delaying or vitiating tomorrow's cloture votes. He will be discussing that with the minority leader.

## PROVIDING EMERGENCY ASSISTANCE TO FARMERS AND RANCHERS IN 1986

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I ask that H.R. 5288, a bill to provide emergency assistance to farmers and ranchers adversely affected by natural disasters in 1986, which is at the desk, be read the first time.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 5288) to provide emergency assistance to farmers and ranchers adversely affected by natural disasters in 1986.

## AUTHORIZING REPRESENTATION BY SENATE LEGAL COUNSEL

Mr. SIMPSON. Mr. President, I send a legal counsel resolution to the desk on behalf of Senator DOLE and Senator BYRD and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 460) to direct the Senate legal counsel to represent Senator WILSON and Robert White and to authorize testimony in the matter of *Smith* v. *Ellis, et al.*

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 460) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 460

Whereas, in the matter of *Smith* v. *Ellis, et al.*, Misc. No. 175-86, pending in the Superior Court of the District of Columbia, one of the parties has obtained a subpoena for the deposition of testimony of Robert White, Administrative Assistant to Senator Pete Wilson, and for the production of documents by him at the deposition, and another of the parties has stated an intention to request a subpoena for the deposition testimony of Senator Wilson;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(a) and 288c(a)(2) (1982), the Senate may direct its counsel to represent Members and employees of the

Senate with respect to subpoenas issued to them in their official capacities;

Whereas, by the privileges of the United States Senate and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, by Rule VI of the Standing Rules of the Senate, no Senator shall absent himself from the service of the Senate without leave;

Whereas, when it appears that testimony of Members or employees of the Senate is or may be needful for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistent with the privileges and rights of the Senate: Now, therefore, be it

*Resolved*, That the Senate Legal Counsel is directed to represent Senator Pete Wilson, Robert White and any other employee of the Senate who may be asked to testify or to produce documents in the case of *Smith* v. *Ellis, et al.*

2. That Senator Wilson is authorized to testify in the case of *Smith* v. *Ellis, et al.*, except when his attendance at the Senate is necessary for the performance of his legislative duties and except concerning matters about which a privilege against disclosure should be asserted.

3. That Robert White and any other employee of the Senate to whom a subpoena may be issued are authorized to testify and to produce documents in the case of *Smith* v. *Ellis, et al.*, except concerning matters about which a privilege against disclosure should be asserted.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

---

□ 2340

## FOREIGN TRAVEL

Mr. SIMPSON. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A Senate resolution (S. Res. 461) relative to rule XXXIX.

Mr. SIMPSON. I move the adoption of the resolution.

The PRESIDING OFFICER. Is there objection?

Without objection, the resolution was considered and agreed to as follows:

S. RES. 461

*Resolved*, That if a Member who is precluded from foreign travel by the provisions of Rule 39 is appointed as a delegate to an official conference to be attended by Members of the Senate, then the appointment of that individual shall constitute an authorization by the Senate and the individual will not be deemed in violation of Rule 39.

SEC. 2. This resolution shall be applicable only until November 30, 1986.

Mr. SIMPSON. I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

---

## ORDERS FOR THURSDAY

RECESS UNTIL 10:15 A.M.

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 10:15 a.m. on Thursday, August 7, 1986.

RECOGNITION OF CERTAIN SENATORS

Following the recognition of the two leaders under the standing order, I ask unanimous consent that the following Senators be recognized for special orders for not to exceed 5 minutes each: Senators HAWKINS, DOLE, PROXMIRE, HUMPHREY, MELCHER, DIXON, BENTSEN, BAUCUS, SASSER, and DECONCINI.

ROUTINE MORNING BUSINESS

Following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 11:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

LIVE QUORUM AT 11:30 A.M.

I further ask unamimous consent that at 11:30 a.m., under the provisions of rule XXII, a live quorum begin, to be followed by a cloture vote on the Byrd Amendment No. 2414.

---

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

---

## PROGRAM

Mr. SIMPSON. Mr. President, if cloture is not invoked on the Byrd amendment, the Senate will vote immediately on cloture on the Dole Amendment No. 2417. If cloture is not invoked on the Dole amendment, the Senate will resume consideration of the DOD bill S. 2638. Pending is the DeConcini amendment under a 40-minute time limitation.

If cloture is invoked on the Byrd amendment the Dole amendment would fall.

Mr. BYRD. Mr. President, would the distinguished acting Republican leader state for the RECORD also what will happen in the event the cloture motion on the Byrd amendment fails and a cloture motion on the Dole amendment is adopted?

Mr. SIMPSON. Mr. President, I inquire of the Chair what the situation would be in the event of that occurrence?

The PRESIDING OFFICER. The Senator is asking what the Chair understands the situation to be if the cloture motion on the Byrd amendment fails and the cloture motion on the bill is adopted.

Mr. BYRD. The cloture motion on the Dole amendment.

The PRESIDING OFFICER. If the cloture motion on the Dole amendment is adopted.

No amendment would be in order at that point and the Senate would stay on the Dole amendment until it was disposed of.

Mr. BYRD. To the exclusion of all other business and all other amendments to the DOD bill. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. SIMPSON. Mr. President, I indicate that the time for special orders tomorrow will be tight because of the impending cloture vote, and all Senators with special orders are encouraged to be prompt in the morning, so that they may have their full time.

I inquire of the Democratic leader if he has any further business.

Mr. BYRD. I thank the acting Republican leader. I have no further business.

---

## RECESS UNTIL 10:15 A.M. TOMORROW

Mr. SIMPSON. Mr. President, in accordance with the previous order, I ask unanimous consent that the Senate stand in recess until 10:15 a.m. on Thursday, August 7, 1986.

There being no objection, the Senate, at 11:49 p.m., recessed until tomorrow, Thursday, August 7, 1986, at 10:15 a.m.

# EXTENSIONS OF REMARKS

## ALBERTA HARDY PERRY, OUTSTANDING EDUCATOR

### HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. FLORIO. Mr. Speaker, I would like to pay tribute to a highly respected community leader residing in the First Congressional District, Alberta Hardy Perry.

Alberta Hardy Perry is a native of Mickleton, Gloucester County, NJ. She began her education at the historic Little Red School, Mickleton, and graduated as valedictorian from Swedesboro High School. Two years of higher education was completed at Glassboro Normal School. She received a bachelor of science degree in elementary education later from Glassboro State College.

In 1955, Mrs. Perry graduated with a master of education degree from Temple University with a major in speech pathology and secondary education.

In pursuit of further learning, she studied at the University of Pennsylvania, Rutgers of New Brunswick, and Trenton State College. From the U.S. Department of Education, she received grants to continue in the specialized field of speech pathology at Adelphi University, Long Island, NY and esophogeal speech at the University School of Medicine, Miami, FL.

Alberta Perry was awarded the Certificate of Clinical Competency in Speech Pathology by the American Speech and Hearing Association, Washington, DC, which is the highest achievable certificate.

During World War II, she went to Los Angeles, CA, with her husband, John Perry. Because of her background in physics, she was employed by the U.S. Signal Corps and was sent to the University of California, Los Angeles, to complete training as an electrician, grade 11.

For 45 years, Mrs. Perry has worked with children from kindergarten through 12th grades. She taught in Woodbury, Deptford Township, and Swedesboro, where she was an elementary teaching principal. Mrs. Perry retired from the West Deptford School System after serving 13 years there as a speech pathologist.

Her community service affiliations are extensive. She has served as a Girl Scout leader, been associated with Campfire Girls and also the YWCA in Camden, NJ. Mrs. Perry has served on the evaluation review committee of the Visiting Nurse Home Care and Health Service of Gloucester County.

Mrs. Perry was appointed by the Gloucester County Board of Freeholders to the feasibility study committee for Gloucester County College. After concluding the county needed a community college, and the voters approved the concept in a nonbinding referendum, the freeholders named Mrs. Perry one of the charter members to the board of trustees, a position she held for 12 years. Upon serving as vice chairperson for 7 years, Mrs. Perry was elected chairperson. At that time, Mrs. Perry was the only woman chairperson of either a 2- or 4-year public college board of trustees in the State of New Jersey.

She has conducted workshops for the American Association of College Trustees (AACT) in Washington, DC, in Atlanta, and New Orleans. Additionally, Mrs. Perry served in numerous capacities at the AACT national convention at Miami, Portland, St. Louis, and Vancouver, Canada.

Among the honors bestowed on her are: Honorary member of the American Speech and Hearing Association, Washington, DC; 1978—Distinguished Alumni Award, Gloucester State College; 1975—South Jersey Woman of the Year, Gloucester County Branch NAACP; 1977—Medallion Award for Community Service, Gloucester County College; 1976—Outstanding Community Service Award from the Women's Progressive Club of Swedesboro; 1976—Certificate of Honor from the New Jersey Federation of Women's Clubs; 1976—Centennial Medallion Carter Woodson Association for Study of Afro-American Life and History. On July 16, 1986, the New Jersey Federation of Colored Women's Clubs presented her with the Outstanding Citizen Award for Education. She was also selected as the outstanding woman of Gloucester County during National Women's History Week by Glassboro State College. Prof. Richard Ambacher, head of the communications department of Glassboro State College, submitted her biographical sketch for National Women's Week, and was awarded first place.

Mrs. Perry was one of the founders of Links, Inc., a service group that has grown into a national organization helping blacks through scholarship programs, farm labor support, and affirmative action efforts. She has held every office of Links, Inc., except treasurer. As a tribute to her contributions, her fellow members have established a scholarship in her name at Gloucester County College.

Listed among her organization affiliations are: Membership in th NEA; New Jersey Retired Teachers; Gloucester County Retired Teachers; New Jersey Speech and Hearing Association; Gloucester County Historical Society; the First Baptist Church of Deptford Township; and the Woodbury Old City Restoration Committee.

Mrs. Perry is a former member of the AAUW of Gloucester County and the National Sorority, Phi Delta Kappa, ETA Chapter, Camden.

Her husband, John Perry, Sr., and son, John Perry, Jr., are owners of John's Auto Transmission Service, Inc., located in Woodbury. She has four grandchildren.

I salute Alberta Hardy Perry for her contribution to the quality of life for the people of the First Congressional District, the State, and the Nation.

## HISPANIC LITERACY: IN THE NATIONAL INTEREST

### HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. TORRES. Mr. Speaker, I want to share an article with my colleagues on literacy problems facing Hispanic Americans. This article titled "Hispanic Literacy: In the National Interest" was written by Raul Yzaguirre, president of the National Council of La Raza. Mr. Yzaguirre has been working to provide a positive response to the very real problems of adult English illiteracy. I believe the information contained in the article is important and I want to make this material available to other Members of Congress.

The article follows:

HISPANIC LITERACY: IN THE NATIONAL INTEREST

(By Raul Yzaguirre)

Most Hispanic adults cannot read and understand the newspaper in which this column is printed. National research studies suggest that 56% of Hispanic adults are functionally illiterate. They can't address a letter well enough to have it reach its destination, can't decipher rental agreements or credit card agreements, and can't read and understand ballot propositions or newspaper editorials. English literacy levels are also low among our young people. Approximately 80% of Hispanic high school students cannot read well enough to fully understand their textbooks.

Some Hispanics counted as "illiterate" do read and write Spanish but have not yet mastered English. However, data from San Antonio suggest that 60% of those who cannot read this editorial in English could not read it in Spanish either. These statistics are an indication of an alarming problem in our community—functional illiteracy English.

The days are long gone when all one needed to "get ahead" or "get by" was the ability to speak English. In our increasingly technological society, Hispanics must be able to read and write English well to be competitive in schools and the labor market, and to be informed participants in our society.

Most Hispanics recognize this fact. In fact, studies from Dade County, Florida, indicate that Hispanics, even more than Blacks and Whites, place high importance on the ability to speak, read and write English correctly. The problem in many communities is not a lack of desire to increase English literacy, it is lack of opportunity to do so.

Improving and expanding literacy services for Hispanic adults are critical for a variety of reasons: to improve employment opportunities; to break intergenerational cycles of

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

illiteracy; to meet the literacy needs of Hispanic dropouts; and to assist those who must meet literacy requirements to become U.S. citizens.

Current efforts to reduce illiteracy among Hispanics are grossly inadequate. Federal programs such as the Adult Education Act and the Job Training Partnership Act (JTPA) are not targeted to serve the Hispanic and limited-English proficient communities. These programs underserve those who are most undereducated and thus most in need; providing English literacy services is not a priority activity.

Only one current federal program specifically addresses the literacy of Hispanic adults. The Family English Literacy Program created by the 1984 Bilingual Education Act provides English literacy services to parents of children in bilingual programs, both to increase parents' literacy skills and to help them assist their children in school. Only four programs nationwide were funded this year.

It is inherently obvious why Hispanics are concerned with the high rate of English illiteracy: limited ability to read and write English diminishes the life opportunities for over half the members of our community. However, all Americans would be well advised to consider the cost to our country of these high rates of illiteracy.

Hispanics represent a growing and increasingly important segment of the U.S. work force and citizenry. An inadequately prepared work force threatens productivity and international competitiveness. The next century will bring a growing population of retired White workers increasingly dependent on the earnings of minority workers to support the Social Security system. The nation's work force must be continuously replenished by adequately trained and functionally literate workers. Illiterate citizens have difficulty casting an informed vote, and illiterate non-citizens are foreclosed from seeking citizenship and participating in our political process.

Perhaps the greatest threat to our democratic society comes from the inability to pass on our common culture. Our democratic values and national ideals, the basic tie which binds all Americans together, must be shared by all communities. Civics, U.S. history and government courses are core requirements in all our public schools. However, if students have already dropped out before they take these courses, if they cannot understand the language of instruction in these important subjects, or lack the skills to read the textbooks, the schools cannot impart our common culture.

Despite the rhetoric about the need to protect English as our common language, I don't hear its proponents urging increased funds to teach English to illiterates and non-English speakers. Congress should enact a program to provide increased English literacy services to Hispanic and other limited-English-proficient adults. Such a program represents an investment in human capital which will lead to increased employability and decreased need for public assistance and services in the long run. English literacy programs can also provide parents with training to help their children succeed in school and help people to move from permanent residency to citizenship status.

Illiteracy within the Hispanic community is not solely an Hispanic concern: it is a national concern. Efforts to assure full English literacy on the part of all Americans are essential to assure an economically and politically strong nation in the 21st century.

## DISASTER LOAN EFFICIENCY ACT BADLY NEEDED

### HON. JIM OLIN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. OLIN. Mr. Speaker, under the proposed Disaster Loan Efficiency Act, SBA authority to make disaster loans is terminated and other laws are changed to conform to the termination. SBA oversight of lender and borrower eligibility continues.

Federally insured institutions including banks, credit unions, and savings and loans will make the loans to small businesses, agricultural cooperatives, and individuals.

The SBA will continue to administer the disaster loan program. Specifically, the SBA will be allowed to guarantee loans and give interest subsidies to qualified borrowers. Two kinds of loans will be permitted: guaranteed loans that have interest subsidies and guaranteed loans with no interest subsidy. The Government guarantee for all loans will be 90 percent.

Currently the SBA certifies that the borrower is a good credit risk and that the loan is of sound value as reasonably to assure payment. Financial institutions will assume responsibility for making this certification before approving disaster loans. The financial institutions will also assume the SBA's present duty to certify that the borrower requires the Government guarantee and/or subsidy and would not be eligible for an nonguaranteed and/or unsubsidized loan. Simply stated, borrowers taking part in the disaster program will be people who intend to pay back their loans but need the Government to guarantee and/or provide an interest subsidy to make the loan repayment terms manageable. The SBA's oversight role will include reviewing the financial institution's certifications.

As under current law, the term of the loan will be not more than 30 years.

Interest rates for disaster loans under this proposal will be tied to the 6-month Treasury bill rate on the date the loan is approved.

The interest rate paid under this program will be the 6-month Treasury bill rate plus 4½ percent. Borrowers qualifying for the interest subsidy will pay a 4 percent interest rate while the Government pays T-bill plus 4½ percent minus the 4 percent paid by the borrower. A borrower may qualify for the 4 percent interest rate when the financial institution determines that the borrower cannot pay the market interest rate and that credit is not available elsewhere. Borrowers who do not qualify for the interest subsidy will pay an interest rate of T-bill plus 4½ percent. If the total rate exceeds 10 percent, borrowers and the Government will split the amount of interest over 10 percent.

In another SBA loan program, the business loan guarantee program, the SBA ties the ceiling for interest rates to the prime rate. It is important to note that under regulation Z which governs the Federal Reserve, interest rates for loans going to individuals may not be tied to the prime rate.

The SBA shall set up a system under which financial institutions making loans under $100,000 may apply for reimbursement for administrative expenses. The guidelines should be flexible enough to accommodate regional business customs.

The SBA Administrator may sell existing disaster loans. At least 90 days before such a sale, the SBA Administrator shall report to the House and Senate Small Business Committees providing evidence of how selling the loans will be to the Government's economic advantage.

The maximum loan amounts for homeowners and businesses will track present law. Specifically, homeowners and renters may borrow up to $100,000 for real property and $20,000 for personal property. Business owners may borrow up to $500,000 for physical damage or economic injury. The SBA Administrator may waive the $500,000 business borrowing cap for major sources of employment.

OMB indicates that up to $1 million may be saved in the first year private financial institutions handle disaster loans. The first year savings will be lower than in subsequent years because of severance payments to SBA workers and administrative costs connected with selling existing loans in the secondary market. Savings as high as $4 million may be realized in subsequent years.

The need for regional office employees who currently make and service SBA disaster loans will be all but eliminated under this proposal. For example, in 1985, $13.1 million was allocated for disaster loanmaking and $6.3 million was allocated for disaster loan-servicing. Savings will be derived from transferring the major portion of these responsibilities to private financial institutions.

Declared disaster: same as under existing law. The President or the SBA Administrator continue to make the declaration.

Eligible lenders: federally insured commercial banks, credit unions, and savings and loans.

This act is badly needed. I hope all my colleagues will join in supporting the Disaster Loan Efficiency Act.

## STATE DEPARTMENT VISA POLICY RE NORTHERN IRELAND NEEDS REVISIONS

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. BIAGGI. Mr. Speaker, as chairman of the bipartisan 114-member Ad Hoc Congressional Committee for Irish Affairs, I have had a longstanding and deep concern about the Department of State's visa policies with respect to political figures from Northern Ireland seeking to enter and visit in the United States.

It has been a policy of selectivity which has served to exclude certain segments of political thought entirely while permitting others carte blanche privileges to come and go in our Nation.

In the past several weeks, the State Department approved the visa application of Rev. Ian Paisley, a militant leader of the Democratic Unionist Party in Northern Ireland. Reverend

Paisley was allowed to come to the United States to participate in a special religious conference at the Bob Jones University in South Carolina. This is one of a host of visas granted to Reverend Paisley by the Department of State.

Meanwhile, just 3 weeks earlier, the Department of State denied the visa application of Hon. Gerry Adams, an elected member of the British Parliament, who was invited to address the National Convention of the Ancient Order of Hibernians in Buffalo. This organization is the Nation's oldest and largest Irish American group and was celebrating its 150th anniversary this year.

The policy, as it is applied now, is in fact censorship masquerading as a policy. When one segment of political thought is totally excluded, it is entirely inconsistent with the principle of free speech so central to our democracy. One does not have to agree with a political philosophy as much as one should accept the principle that it has a right to be heard and presented in this Nation. The Northern Ireland issue is a controversial and emotional issue. Different sides have different perspectives. Yet, by the fashion in which our visa policy is presently constructed, the American public knows the British Government position, the Irish Government position, and the militant Protestant position. Yet the views of the Nationalist side in Northern Ireland are denied access to this Nation because none of their leaders are permitted to travel into the United States.

To add further irony to the situation, the Department denied Mr. Adams' visa because of alleged statements he made which they felt were advocating for the overthrow of a government. Meanwhile, Reverend Paisley, in a series of statements issued in opposition to the recent Anglo-Irish agreement, endorsed by the State Department, threatened to make Northern Ireland "ungovernable."

I reiterate the position I have subscribed to for the past decade. The United States must adopt an open visa policy with respect to Northern Ireland. It is vital that there be a full, fair, and free exchange to views on this issue of importance to the 40 million Irish Americans in this Nation. This exchange of views can never be accomplished when we close our doors on segments of political thought.

I have sent letters today to Chairmen FASCELL and LUGAR of the House and Senate Foreign Relations Committees to urge that they convene an immediate investigation into the visa policy and work for reforms to ensure it be less selective and more responsive to all views.

At this point in the RECORD, I am inserting a statement from Nicholas Murphy, the new national president of the Ancient Order of Hibernians, opposing the visa policy.

A.O.H. PROTESTS U.S. STATE DEPARTMENT TWO-FACED VISA POLICY: "YES" TO PAISLEY, "NO" TO GERRY ADAMS

Statement of Nicholas Murphy, National President of the Ancient Order of Hibernians (A.O.H.) in America:

"The Ancient Order of Hibernians protests and condemns the two-faced visa policy of the U.S. State Department. The duly-elected Nationalist Member of Parliament from Belfast, Gerry Adams, was invited by the Ancient Order of Hibernians to address their recent national convention. But the U.S. State Department denied Adams a visa to enter this country.

"Now, I have just learned that the U.S. State Department has allowed Ian Paisley to enter this country and spew his message of hatred and violence. Why is it that Nationalist Gerry Adams is not allowed to talk to Americans, while the vehemently anti-catholic demagogue, Ian Paisley, is allowed to freely travel in the United States spouting religious hatred and vilifying all who would have the island of Ireland one nation, undivided?

"The Ancient Order of Hibernians asks our elected representatives to identify and call to task those persons in the U.S. State Department who formulate and carry out this despicable, two-faced, discriminatory visa policy."

## MARY SPOOR WILSON HONORED

### HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. LEWIS of California. Mr. Speaker, I would like to take this opportunity to pay tribute to a truly remarkable woman, Mary Spoor Wilson. Mary will be honored with the Distinguished Citizen Award by the council and district of the Boy Scouts of America at a testimonial dinner on September 9 of this year.

It is most appropriate that Mary should receive this award as it is designed to recognize outstanding citizenship of those who strive to make the community a better place in which to live. Recipients of this award are truly role models to the youth of the community, as they must have a solid record of leadership and service in his or her profession or avocation and a dedication to the young people in the community.

Mary exemplifies the very attributes deemed necessary for the Distinguished Citizen Award. At a very early age she began her life of service to the community and was launched into a life of community service. Her family background is one framed in patriotism, love, and devotion to country. As a young bride during World War II, she was a member of the Red Cross Canteen and served on the board of the Serviceman Wives Organization.

With a growing family, Mary became active in the PTA, holding many offices in that organization at the local and county levels of the Girl Scouts and Boy Scouts of America.

Having grown up in a home where political activism was a part of one's responsibility as a good citizen, Mary Spoor Wilson became just that, a true activist. In 1946, she gathered a group of 100 young people for a dinner that launched the birth of the Young Republicans in the area. Mary represented San Bernardino County and was chosen to represent the Young Republicans on the southern division board of the California Federation of Republican Women.

To list her credits and accomplishments in the political world would be a tremendous task, but it can be said that she launched the careers and contributed to the success of many great names in California politics.

There are many other facets to Mary's life. She is a charter member of the Associates of the Redlands Bowl—nationally famous for its summer concerts with internationally famous musicians and symphony orchestras—charter member of Junior Woman of the Contemporary Club board of directors and holder of many offices on the Assistance League of Redlands, long time member and past president of the Contemporary Club, board of directors and officer of the YMCA, board of directors Kimberly-Shirk Association and served on the San Bernardino County Grand Jury. The list of her accomplishments could go on and on, covering a span of 46 years. Needless to say, the life of Mary Spoor Wilson has been, and continues to be, a life of service to her community, her county, her state, and her nation.

Mr. Speaker, I ask that you join me in saluting Mary Spoor Wilson. Her selfless contributions and fine accomplishments make her an outstanding community leader and a most deserving recipient of the Distinguished Citizen Award.

## NATIONAL LOTTERY ACT OF 1986

### HON. WILLIAM CARNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. CARNEY. Mr. Speaker, I am pleased to announce that last Tuesday, July 29, I introduced H.R. 5273, entitled the "National Lottery Act of 1986."

This is far from a novel idea. The Continental Congress approved a lottery to raise $10 million to support the colonial troops in the Revolutionary War. Three Ivy League institutions—Harvard, Dartmouth, and Columbia—were funded in part by lotteries. In 1934, Congressman Edward A. Kenney introduced a bill to authorize the raising of funds by lottery for the purpose of providing additional means of defraying the cost of Government, including expenditures authorized for veterans and their dependents. A poll commissioned in mid-1984 found that 62 percent of those polled in the United States would approve of a national lottery.

The purpose of this bill H.R. 5273, is to establish a National Lottery Commission which would be charged with the formation of and regulation of a national lottery. It would function to create a surplus revenue fund to be used to reduce the Federal debt. A trust fund for the revenue generated by the lottery shall be set up within the Treasury under chapter 98 of the IRS Code of 1954. Expenditures from the trust fund will be divided as follows to ensure their proper usage: At least 50 percent will be used for the reduction of the Federal debt, and not more than 50 percent will be used for the payment of lottery prizes, administrative expenses, a minimum State sales tax on ticket sales, and for certain social welfare programs under the Department of Health and Human Services. In addition, all prizes awarded through the national lottery will be exempt from Federal income taxation.

The Commission members would act to establish a monthly lottery, issue regulations, define procedures such as the licensing of ticket agents, determine how winners shall be selected and prizes paid, and facilitate consultation with State and local agencies to minimize the potential for conflict between these bodies and the functioning of a national lottery.

Several of my distinguished colleagues have proposed lottery legislation in the past, unfortunately, without much success. Mr. Speaker, I hope that my colleagues will join me in supporting this particular piece of legislation which I feel is a creative, highly beneficial, and manageable way in which we can bring the Federal debt under control and work toward its reduction without increasing the tax burden on the American people. H.R. 5273 would also facilitate closer cooperation between Federal, State, and local authorities, benefit State revenues through a tax on ticket sales, and provide excess revenue for various social welfare programs. We surely need to control the rate of Government spending, and we must also attempt to reduce the deficit we have already accumulated. I believe that through the establishment of a national lottery we can constructively generate surplus revenue while providing more jobs and reducing the Federal debt.

## WESTPORT UNITED METHODIST CHURCH CELEBRATES ITS 150TH ANNIVERSARY

### HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. WHEAT. Mr. Speaker, on Sunday, October 26, Westport United Methodist Church will celebrate its 150th anniversary. I would like to congratulate Rev. Gene E. Cole and the members of his congregation on this historic occasion.

The church, one of the oldest in Kansas City, has maintained a long tradition of dedication to charitable works and community service since its founding in 1836 by Rev. James Porter. The Reverend Porter came to Kansas City from Tennessee to preach "under brush arbors, trees, and in homes." He first held services in a private home and then in an old schoolhouse at the corner of Archibald and Central Streets. In 1846, the local Baptist, Christian, and Presbyterian churches joined with the Methodists to create the Union Church, a building that would serve all four denominations.

Seven years later, the Methodists withdrew from the Union Church to construct a church at Westport United Methodist Church's present site of 40th and Washington Streets in Kansas City's historic Westport region. The lower level of the two-story wooden church served as Kansas City's first public school, which later became known as Allen Elementary School and Westport High School.

During the Civil War Battle of Westport in 1864, the church's leaders converted the church into a hospital and the members bravely ministered aid to wounded and dying soldiers of both the Union and Confederate Armies.

As the congregation grew, the church was rebuilt, enlarged and remodeled several times before becoming the beautiful building it is today. The stone structure, remaining intact from 1896, is characterized by huge, rounded archways and towering columns. The interior contains elegant stained glass windows, a pipe organ, cushioned oak pews, a cross shape in the ceiling and a large cross below the words of Psalm 100: 4.

The congregation that assembles in Westport United Methodist Church consists of a variety of people from various social, economic and ethnic backgrounds, all gathering to worship and pay homage in their esteemed and tradition-filled church.

Mr. Speaker, it is with pleasure that I bring Westport United Methodist Church's 150th anniversary to the attention of my colleagues in the House of Representatives and invite them to join with me in wishing the congregation many more years of outstanding community service in Kansas City. May they continue to feel pride for their noteworthy past, while working toward the future with vision, faith and love.

## DISCRIMINATION AGAINST ARAB-AMERICANS

### HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. KANJORSKI. Mr. Speaker, I rise today to bring to your attention a problem which has become increasingly worrisome for those of us who are concerned about the terrible effects of racism in our Nation. For many years we have all been aware of discriminatory attitudes and practices directed against blacks, Hispanics, Jews, and other ethnic groups. While these problems have been, and continue to be serious and deserving of our attention, there has been precious little attention paid to a new racist attitude which has spread throughout our Nation in recent years.

I am referring to racism directed at Arab-Americans. Some small-minded people have discriminated against Arab-Americans simply because leaders of certain Arab nations, such as Libya's Col. Mu'ammar Qadhafi, have taken militant anti-American stances.

This is, of course, a reprehensible attitude. Arab-Americans should not be judged any less patriotic Americans than any other group simply because a foreign government currently in power opposes the United States.

To date, not one Arab-American has been accused of acts of terrorism or treason in this country. Yet unsubstantiated prejudices and ethnic slurs continue. This kind of harassment unfairly victimizes many loyal Americans because of the actions of a few desperate individuals 6,000 miles away from our shores.

In the last year, more than 50 cases of violence have been reported against Arab-Americans for no other reason than their ethnic background. Among the most dastardly of these acts were three separate bombings in three American cities which killed a Arab-American leader and injured two Boston policemen.

Violence of this kind is not political. It is criminal. American citizens have the right to live without fear for their lives, especially when the fear is based on someone else's misguided ideas about the meaning of one's ethnic background.

Mr. Speaker, I call on all of my colleagues to stand up against discrimination against Arab-Americans, just as this body has stood against other kinds of discrimination in the past.

## WORKER RIGHT TO KNOW ABOUT OCCUPATIONAL DISEASE RISK

### HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. FLORIO. Mr. Speaker, we will soon be debating an important piece of legislation that addresses the fundamental right of workers involved in occupations that put them at high risk of contracting diseases to be aware of the risks they face. I recently received an insightful letter in support of H.R. 1309, the High Risk Occupational Disease Notification and Prevention Act, from Dr. Irving Selikoff, professor emeritus of the Mount Sinai School of Medicine of the City University of New York. Dr. Selikoff, a leader in the fields of epidemiology and biostatistics, raises the point that most cancers are environmental in origin and that the 400,000 annual cancer deaths can be reduced through an increased effort in prevention.

As chairman of the House Subcommittee on Commerce, Transportation and Tourism with jurisdiction over toxic substances, I have worked to call attention to the need for firm standards for exposure to toxic substances as well as community right to know provisions that would enable workers and residents to be aware of what types of substances are being manufactured in their communities. In particular, I have focused on the need for action relating to asbestos exposure, one of the most serious occupational carcinogens. I support H.R. 1309 and am pleased that this legislation creates a much needed mechanism for informing employees of the risks they face when exposed to toxic substances.

There are two components to preventing the spead of disease and hardship due to occupational exposure to toxic substances. The first—an established regulatory framework for preventing exposure by informing workers and residents of the hazards of existing chemicals in the workplace and community—is being shaped through regulations such as the OSHA hazard communication standard and community-right-to-know provisions in the Superfund reauthorization bill.

The second component deals with workers that have already been exposed to these dangerous substances and currently face a high risk of contracting diseases as a result. It is morally important that these workers be informed of their risk and that they be directed to appropriate resources for medical assist-

ance and counseling. If the disease is detected early enough, suffering can be reduced and life can be prolonged.

H.R. 1309 provides for the creation of a Risk Assessment Board within the Department of Health and Human Services which will identify and isolate worker groups that run a 30-percent risk of disease. The Board would then notify these individuals and recommend that they place themselves under medical surveillance. The legislation also designated existing health care and research facilities as occupational and environmental health centers and provides for further research in this field. This legislation is a necessary supplement to regulations dealing with exposure of individuals to dangerous substances in the workplace. I urge my colleagues to lend their support to this bill and direct their attention to the text of the letter I received from Dr. Selikoff:

MOUNT SINAI SCHOOL OF MEDICINE,
THE MOUNT SINAI HOSPITAL,
*New York, NY, July 23, 1986.*

Hon. JAMES J. FLORIO,
*U.S. House of Representatives,*
*Washington, DC.*

DEAR REPRESENTATIVE FLORIO: I am writing to seek your support for major legislation to prevent cancer and other occupational diseases: H.R. 1309/S. 2050—The High Risk Occupational Disease Notification and Prevention Act. I believe enactment of the legislation is critical to the goal of disease prevention.

A recent well-publicized study published on May 8, 1986 in the New England Journal of Medicine confirmed what many scientists and physicians have been saying: that cancer is caused, by and large, by agents in our environment, and that to reduce the number of cancer deaths (more than 400,000 this year) we must direct our efforts and resources toward prevention rather than the almost total reliance on treatment of cancer once it appears.

Until 1960 cancer was viewed by many as one among a number of diseases of life which occurred inevitably with age. Two concurrent experiences changed that perspective. First, statistics from different countries showed varying cancer rates. For example, higher levels of stomach cancer existed in Japan than in our country. Colon cancer was found to be high in the U.S. uncommon in Rumania. There were many more examples all of which had two possible explanations. Either there was something different about the populations in these countries, or there was something different about the way they lived.

Secondly, in a series of occupational circumstances, various chemicals, dusts and radiation were found to cause cancer. Liver cancer was found in Louisville, Niagara Falls, Midland and South Charleston from exposure to vinyl chloride; benzidine in dye plants produced bladder cancer; mesothlioma followed asbestos exposures; benzene, chromium, bischloromethyl ether, betanapthylamine, arsenic, and others were found to cause cancer in mine factory and refinery workers.

Thus, as early as 1965, there was growing appreciation that most cancers were environmental in origin. More than 20 years later this realization has been confirmed and reconfirmed a thousand times. To reiterate what has become a virtual truism—cancer is a disease more easily prevented than cured. The question is how?

The Congress has taken the first steps: the regulatory apparatus to prevent environmental disease by preventing exposure is in place. The laws, and the agenices to implement these laws, exist. Only the will is needed to put them to use.

The second step has not been taken and is long overdue. When our regulatory efforts are too little or too late, and exposure has unhappily occurred, there is still often time to prevent the disease. Even before disease actually appears, a chain of events takes place during the incubation ("latency") period that can often be broken. And, if disease does occur, if we detect it early enough, we often are able to reduce suffering and prolong life.

To take that second step requires that those exposed (workers) be informed that they are at risk, and directed to appropriate resources for medical assistance and counseling. Also, there needs to be adequate resources in place that are prepared to accept a responsibility that may extend over the entire life of the worker (and sometimes his family).

Congress now has the opportunity to take action on behalf of millions of workers already known by the government to be at serious risk of cancer and other occupational diseases. The necessary elements for intelligently, efficiently and cost effectively preventing disease are embodied in the High Risk Occupational Disease Notification and Prevention Act, currently pending before the House of Representatives and the United States Senate.

We can prevent much (although unfortunately, not all) cancer if we identify, notify and assist these American workers who have been exposed to carcinogens and other toxic agents in the past and who in, the coming 5, 10, or 15 years, are at risk of occupational disease. This is the crux of the High Risk legislation. At present, there is no established national program to notify current and former employees at identified risk from toxic exposures so that appropriate counseling and medical surveillance can begin to protect their health. In addition to identification, notifcation and counseling, the High Risk bill calls for expanded federal research, training and education to further identify and define worker populations at risk and to improve the means of medical surveillance.

The bill also authorizes and directs certification of occupational and environmental health centers among existing health-care facilities to provide technical support to local medical communities for ongoing medical surveillance of workers at risk. It creates an insurance incentive for the early detection and treatment of occupational disease while establishing a set of protections for workers against discrimination on the basis of their identification and notification status.

With respect to this sizable share of cancers and other diseases arising from workplace hazards, the prospects for successful intervention are promising. It is all the more disconcerting, therefore, that people at high risk are not being sought out, informed and helped to help themselves. The cancers of the 1990s and the 21st Century are being initiated now and we are doing very little to prevent them. We should not abandon to unnecessary death and disease thousands of working men and women—and sometimes their children.

Your support for the High Risk Occupational Disease Notification and Prevention Act can make a tremendous advance toward the prevention of cancer and other work-related diseases.

Respectfully yours,

IRVING J. SELIKOFF,
*Professor Emeritus, Mt. Sinai School of Medicine of the City University of New York.*

## IS BIPARTISANSHIP IN FOREIGN POLICY MAKING A COMEBACK?

### HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. RICHARDSON. Mr. Speaker, one of the leaders of the House on foreign policy, our colleague, IKE SKELTON, has contributed an outstanding piece that I commend to my colleagues.

It is positive, insightful, and a presentation for the future.

IS BIPARTISANSHIP IN FOREIGN POLICY MAKING A COMEBACK?

(By Ike Skelton)

Recently, the House of Representatives voted 221-209 to provide $100 million in military and humanitarian aid to the Nicaraguan democratic resistance, the contras. At the same time it voted to provide $300 million in extra economic assistance to the four democracies of Central America—Costa Rica, Honduras, El Salvador and Guatemala.

Fifty-one Democratic members supported the Bipartisan Edwards-Skelton amendment, including a number of members who had voted against aiding the contras in March. The bipartisan support for a strong Central American policy was not limited to the 51 Democrats but also included other Democrats, many of whom supported the proposal of my Democratic colleague from Oklahoma, Dave McCurdy, which was similar in important respects to the measure which passed. An indication of this broader support was a subsequent amendment that sought to provide only refugee assistance of $27 million. Seventy-two Democrats opposed that amendment.

This last debate on Nicaragua indicated an important development—the re-emergence of a bipartisan consensus on foreign policy. Like the first buds hinting at the coming of spring, this vote on aid to the contras might herald the restoration of the bipartisan consensus that existed prior to Vietnam.

It is a development that we—in the Congress and in the administration—would do well to encourage for the benefit of the nation and those around the world who hope to live in peace and freedom.

On March 12, 1947, President Harry Truman addressed a joint session of Congress and declared "that it must be the policy of the United States to support free peoples who are resisting attempted subjugation by armed minorities or by outside pressures." The policy of containment enunciated in this speech served this country well over the course of the next two decades.

Western Europe and Japan, devastated by the Second World War, prospered both economically and politically under U.S. protection. A large peacetime military, the creation of the CIA, a unified Department of Defense, NATO, the Marshall Plan, were

just some of the dramatic changes that came about as a result of a bipartisan consensus that fought isolationists of the left and right. The United States decided to assume the responsibilities and burdens of its status as a world power. The leaders of that era had learned the hard and bitter lessons of an earlier generation: Isolationism did not guarantee peace; appeasement only encouraged dictators.

In Vietnam, however, we misapplied the policy of containment. Europe was, and remains, vital to the security of the United States; Vietnam never was. President Kennedy was right when he said that in the final analysis it was their war to win or lose. Our efforts in Vietnam should have been confined to providing support, but not taking on the fight ourselves. The years after 1965 witnessed the progressive unraveling of the consensus on foreign policy that had existed between the two parties. We all know the tragic outcome—58,000 Americans killed, South Vietnam and Laos brought under communist rule, and a holocaust perpetrated on the people of Cambodia.

Our frustrating experience in Vietnam resulted in an important transformation at home—the loss of self-confidence, of national purpose, by Americans about their country's role in the world. This loss of self-confidence was followed by communist victories in Angola, Ethiopia, Mozambique and Nicaragua. The dramatic successes of the 1940s and '50s in Europe and Japan were followed by setbacks in the Third World in the 1960s and '70s.

Today, a number of us in the Democratic Party are involved in an effort to re-establish that bipartisan consensus on matters of foreign policy that existed prior to Vietnam. This is mostly a matter for Democrats to hash out. It was in the Democratic Party that the great debate over Vietnam was fought, pitting those sharing George McGovern's world outlook against those sharing the outlook of Truman, Kennedy and Johnson.

We are making headway. The recent vote in the House is an example of the progress. It was at the insistence of House Democrats that the administration found $300 million in unobligated foreign aid appropriations for the four democracies of Central America. Our Republican colleagues in the House supported us on this matter. It was House Democrats who wanted tough language that would expel any resistance group found violating human rights, smuggling drugs or misappropriating funds. Once again, our Republican colleagues supported us on this matter. It was House Democrats who insisted that groups left out in the last year's humanitarian aid effort, the Indians and the Southern Opposition Bloc, be included this year. Once again, our Republican colleagues supported us.

While we are not completely over the Vietnam syndrome of the 1970s, we are making progress. Putting together a workable plan to promote democracy in all the countries of Central America will help us put together the bipartisan coalition on foreign policy that proved so successful in the 20 years after World War II. Until we put that coalition back together, sustaining any long-term policy on Central America will be difficult, if not impossible.

## AFRICA MOVES TO HELP ITSELF

### HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. SCHEUER. Mr. Speaker, we are all aware of the terrible plight of sub-Saharan Africa.

Besides the recent and tragic famine, today's Africa is beset by many serious problems: overpopulation, deteriorating infrastructures, lagging economic development, intermittent warfare, and widespread environmental despoilation.

However, I speak today with a degree of renewed hope and optimism based on my experience at the first All-African Conference on Population and Development, which was held in Harare, Zimbabwe, from May 11 to 16.

At this conference, parliamentarians from 31 African countries and representatives from another 10 African nations which lack parliaments, came together to discuss the implications of uncontrolled population growth to development hopes and aspirations of all kinds. This was the first conference held by Africans to discuss the critical problem of the population explosion in Africa. It demonstrates that African leadership finally appears ready to take responsibility for its excessive rate of population growth.

Over the next several days, I plan to introduce into the record several of the statements made at this conference. Today, I am including the resolutions and declarations that were unanimously adopted by the conference.

ALL-AFRICA PARLIAMENTARY CONFERENCE ON POPULATION AND DEVELOPMENT

DECLARATION

1. We, the Parliamentarians from 29 African countries, having met in Harare, Zimbabwe from 12-16 May 1986 to address ourselves to the inter relationships between Population and Development in Africa;

Having reviewed and endorsed the different recommendations arising from various conferences, including the 1984 Kilimanjaro Programme of Action for African Population and Self Reliant Development, the Mexico City Declaration of Population and Development, and the Action Plan adopted at the International Parliamentary Assembly on Population and Development in Mexico, 1984;

Having taken stock of Africa's development needs and resources in relation to its population and having analyzed and discussed our continent's food and agriculture; environment; health, mortality and fertility; education; employment, and migration;

Aware that current and projected population growth rates frustrate the achievement of our economic and social goals in these areas;

Aware also that as elected representatives of the people, we have a unique role to play in the population and development process, which includes not only our responsibilities as law makers but also our role as leaders of public opinion at the national and at the local level.

2. Pledge ourselves to provide leadership, and to support our governments and people in efforts to improve the quality of life to our citizens. We dedicate ourselves specifically to introducing legislation, educating and promoting programmes to:

Improve health care, utilizing the primary health care strategy with emphasis on services for women and children and with particular attention to implementing rapidly the child survival strategy consisting of: growth monitoring, oral rehydration, breast feeding, immunization, female education, food supplementation, and family planning;

Introduce and strengthen programmes of family planning information and services, including those of government, non government organisations, and the private sector;

Provide realistic and relevant approaches to education that will impart skills especially in agriculture and rural development and emphasize the dignity of labour. This should include population and family life education within and at all stages of the formal school system and outside of it.

Improve the status of women through increased educational and employment opportunities, elimination of laws (and social practices) that discriminate against women, and, where it is not already the case, ratification of the U.N. Convention on the Elimination of All Forms of Discrimination Against Women.

Adopt realistic migration policies that respect the human rights of migrants and recognise the contributions of migrants to both sending and receiving areas. Refugees, as one category of migrants, deserve special attention, and governments should consult each other to find solutions to the refugee problem.

Strive to achieve self sufficiency in food production in Africa by improved land management and increased financial and technical investments in the agricultural sector, and improvement in intra African trade.

Protest and restore the environment and adopt national conservation strategies that endeavour to maintain a balance between natural resources and the demands of current and future generations.

Formulate and implement national population policies and programmes that attempt to decrease the high rates of population growth in Africa in order to help attain a balance between the needs and opportunities of our people on the one hand and the available resources on the other.

3. To continue the work begun at this All Africa Parliamentary Conference on Population and Development and to ensure that the articles of this Declaration are carried out, we further pledge ourselves:

To establish a permanent African Council of Parliamentarians on Population and Development to continue to mobilize national, continental, and global support for population and development issues in Africa, to coordinate the activities of national parliamentary groups and to promote collaboration and exchange of experience among them, and to monitor implementation of the declaration adopted at this conference.

To establish in those countries with operating parliaments, national parliamentary groups on population and development which will be affiliated with the African Parliamentary Council on Population and Development.

The Conference also expresses thanks to the International Community (U.N. and its related Agencies, bilateral government agencies, International N.G.O.S.) for their sustained interest and help in the field of Population and Development in Africa which we hope will continue and increase.

The Conference expresses its special gratitude to the Global Committee of Parliamentarians on Population and Development for

co-sponsoring the Conference and for providing the technical and financial support.

RESOLUTION

We the All Africa Parliamentarians, having met in Harare, Zimbabwe from 12-16 May 1986 to address ourselves to the inter relationships between Population and Development in Africa, having reviewed the different recommendations arising from various conferences, including the 1984 Kilimanjaro Programme of Action for African Population and Self Reliant Development, the Mexico City Declaration of Population and Development, and the action plan adopted at the International Parliamentary Assembly on Population and Development in Mexico, 1984, being desirous that policy makers and legislators in Africa continue to hold the issues of Population and Development in the forefront resolve that:

1. There be instituted a permanent Council of African Parliamentarians, on Population and Development to continue to mobilise national, continental and global support for population and development issues in Africa and to monitor implementation of the Declarations adopted at this and other conferences on Population and Development held within and outside Africa.

2. An Interim Committee be constituted at this Conference to formulate a constitution and rules of procedures and take other steps necessary for the establishment of the said Council of African Parliamentarians on Population and Development.

3. * * * for this Conference be elected as Interim Committee for a period of twelve months or up to the adoption of the constitution for the proposed permanent council of African parliamentarians on Population and Development which ever is the earlier.

4. For the purpose of continuity and efficiency, the Secretary General elected at the Harare All Africa Parliamentary Conference (1986) continue to hold this office as the Secretary General of the interim Committee.

5. All countries in Africa with Parliaments, be requested to establish National Parliamentary groups on Population and Development, as a matter of urgency, which will be affiliated to the proposed African Parliamentary Council on Population and Develoment.

6. The Global Committee of Parliamentarians on Population and Develoment provides the Interim Committee with the necessary assistance for the implementation of this resolution.

7. Cooperating agencies such as UNDP, UNFPA, UNICEF, WHO, UNCR, HABITANT, World Band and IPPF continue to provide technical and financial support both at the national and regional level.

8. All governments and private donors be requested to continue to support parliamentary activities in each country and through the African Parliamentary Council on Population and Development.

The following African Parliamentarians are hereby elected to constitute themselves into an Interim Committee of the African Parliamentary Council on Population and Development:

Angola, Mr. Gelim Paim.
Botswana, Mr. P. Balopi.
Cote D'Ivoir, Mrs. M. Achi Ahou Ya.
Gambia, Mr. Sadjo Touray.
Kenya, Mr. Kimani wa Nyoike (Secretary General).
Liberia, Mr. Tuan Wreh.
Madagascar, Mr. J.L. Ramandriarisoa.
Mali, Mr. Moussa Touré.
Rwanda, Mr. Fidele Ntuyenabo.
Senegal, Dr. Moustapha Touré.
Swaziland, Mr. E.G.F. Magagula.
Tanzania, Mr. A.C. Tandau.
Togo, Mr. Adja Bandja.
Tunisia, Mrs. Fathia Mzali.
Zaire, Mr. Maneng Ma Kong.
Zambia, Mr. L. Mulimba.
Zimbabwe, Mr. P.A. Chinamasa.

## JUSTICE HERE AND ABROAD

### HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. LELAND. Mr. Speaker, I encourage my colleagues to read the following address by Paul Kirk, the Democratic National Chairman, which he gave before the National Bar Association on July 28, 1986.

In his address Mr. Kirk reiterates the strong commitment that the Democratic Party has had—and will continue to have—for justice here in the United States and abroad, including South Africa.

If we, as Members of Congress, are sincere in our desire to achieve justice and equality, we have to be able to go beyond rhetoric into legislative action. Mr. Kirk's words concisely and truthfully address this necessity. I urge all my colleagues to read this important address.

ADDRESS BY DEMOCRATIC NATIONAL CHAIRMAN, PAUL G. KIRK, JR.

I want to thank President Gray for his generous introduction. And I also commend your President-Elect Tom Broome.

As I travel the country, people ask, "Isn't it tough to be a Democrat these days?" But, each day that goes by, my response comes a little easier. You and I were schooled to understand and practice justice in its true meaning.

Last week in the nation's capital, the Republican President and the Republican Attorney General rejoiced as the Republican Vice President cast the deciding vote with the majority of the Republican Senate to support, through a public display of bargain basement judge-swapping, the appointment of their nominee to the Seventh Circuit Court of Appeals.

Last week as well, the government in Pretoria applauded as the same Republican Administration, by its passive and pathetic response, condoned the continued racial repression of a majority of citizens in South Africa.

Last week, your definition, my definition, America's definition of true justice was stained here at home and around the globe by the Republican Party.

So to those who ask if it is tough to be a Democrat these days, my reply it, "It is not tough to be a Democrat—it is essential to be a Democrat if America's definition of true justice is to be restored."

And it is essential to elect more men and women who share our understanding of justice. And so last week, it was my pleasure to be in the Second Congressional District of Mississippi, campaigning for Mike Espy whose election will make history for that State. We need Mike Espy's voice in the Congress, and he needs your help in order to be elected. so I ask you to be generous with your resources on Mike Espy's important campaign.

It is a special pleasure for me to be here this week as a guest of the organization which for over 60 years has been America's legal conscience. From the very beginning, the National Bar Association has been at the forefront of America's struggle for civil rights, equal justice under law, and human rights around the world. More than ever today, we need you in that battle—we need your conscience, your commitment, and your leadership.

For the progress we have made together in the past three great decades of action on civil rights is now at greater risk than at any time in those extraordinary years of hope and action. To a large extent, that progress was bipartisan. But when the going got tough on school desegregation in the 1950's, on voting rights in the 1960's, and on social and economic justice in the 1970's, it was the Democratic Party that heeded the call to a just society and advanced the greatest dream of all—one America for all Americans, regardless of their race or sex or the country of their birth.

But the 1980's have been different. These years have become a decade of retreat on civil rights. A Republican Administration and a Republican United States Senate are rolling back the clock on the brilliant initiatives and majestic achievements of Martin Luther King, Roy Wilkins, Fannie Lou Hamer, and Whitney Young. Instead of advancing the cause of economic equity central to the lives and the very future of America's working men and women, the Democratic Party is struggling to hold the line, and to halt the unconscionable attempts of those who should know better in high places, yet who seek to reverse the hard-won successes of the past.

I am here today to urge your strongest possible support for the election of a Democratic Majority in the Senate in 1986 and a Democratic President in 1988. We need a Senate that stands for equal justice in America and throughout the world. Instead we have a Republican Senate that is wrong on civil rights in this country, wrong on apartheid in South Africa, and wrong on all the other issues of social justice where America can and should be doing better. And we need a President who will help us lead that fight, instead of urging us to sound retreat.

We should not have to refight in the 1980's the famous battles that were won with so much difficulty in the 1960's and 1970's. We should not have a Senate that attempts to undermine the Voting Rights Act. We should not have a Justice Department that believes affirmative action is unconstitutional. And why should we have to settle for a nominee as Chief Justice of the United States a man who defends tax credits for segregated schools, who thought *Brown* v. *Board of Education* was wrongly decided in 1954, and who did his best to intimidate Black and Hispanic American voters in Arizona in 1960?

I share the concern of the NBA about the failure of the House and Senate to pass legislation to remedy the Supreme Court's unforuante decision in the Grove City College Case. When a school or hospital or any other public or private institution receives federal funds and engages in discrimination because of sex or race or age or disability, all federal aid to that institution should be cut off—not just funds for the narrow program involved in the discrimination. The House of Representatives passed far-reaching legislation to reinstate that fundamental principle—and it should never have been permitted to die at the hands of a Republican filibuster in the Republican Senate.

With the Democratic Senate we elect in 1986, we will break that filibuster next time and pass the Civil Rights Restoration Act. The use of federal aid to subsidize discrimination in any way, shape, or form is wrong, and it is time we had a Democratic Senate again to put that issue right once and for all.

We also need a Congress able and willing to challenge this Administration's unacceptance retreat on affirmative action. Every President since Franklin Roosevelt, Republicans and Democrats alike, have supported these requirements for equal employment opportunity—but not this Republican President and not this Republican Administration. The current standards for affirmative action recommended in the late 1960's to the Nixon Administration by a group of 350 corporations. Their proposals, including the "management by objectives" concept of goals and timetables, were included in the historic Department of Labor regulations in 1970, and they have remained substantially unchanged since that time. They are widely accepted—and widely effective—and they deserve to be continued.

Contrary to the distortions of Ed Meese and Brad Reynolds, the Executive Order on affirmative action explicitly prohibits the use of quotas. Department of Labor studies published during the Reagan Administration demonstrate conclusively that goals and timetables have not led to quotas. If isolated incidents are found involving quotas, all the Administration has to do is enforce the law and punish the offenders. But that is not excuse for their unseemly effort to emasculate the current order.

The debate over quotas is nothing more than a right-wing smokescreen to mislead the public. The Exeuctive Order enjoys overwhelming bipartisan approval in Congress; it also has the broad support of the National Association of Manufacturers, the Business Roundtable, the civil rights community—and most of all, the American public.

Last year, a Harris Poll reported that by a record margin of 75 to 21 percent, the American people support federal affirmative action programs for minorities, and women, provided there are no rigid quotas. And if Ed Meese does not understand the message, the Democratic Senate we elect in 1986 will send it to him in a new form he can't mistake—tough new civil rights legislation that makes affirmative action not just an executive order, but a public law binding on the Executive Branch of Government.

I am also proud to know that the NBA supports the current effort in the House of Representatives to defund the Civil Rights Commission. Sometimes I think we just ought to go ahead and defund the Justice Department, too—or at least apply a little truth in labeling, and change its name from the Department of Justice to the Department of Injustice.

For over 25 years, the U.S. Commission on Civil Rights, founded by President Eisenhower, served as a distinguished independent watchdog on civil rights. But the Commission as we knew it no longer exists today.

Since 1983, when the Commission was reconstituted by this Administration, it has abandoned the historic mission mandated by Congress. Instead of finding facts impartially, it has become a trojan horse in the temple of civil rights, undermining progress from within and advancing the cause of the enemies of equal justice. Today, the Leadership Conference on Civil Rights calls the Commission "the propaganda arm of the Department of Justice." In this time of fiscal austerity, it is a waste of taxpayers' money to fund an agency which has become a "sham and a national disgrace."

But most of all, this Administration displays its true colors on civil rights in appalling position on the great moral issue of our time—ending apartheid in South Africa. Apartheid is 20th century slavery. It cannot be condoned; it must be condemned. This Administration was quick to resort to tough economic sanctions against Poland, Nicaragua, and Libya—and it ought to be equally quick to invoke tough sanctions against South Africa.

I am proud of the Democratic Party and our record on South Africa. The Democratic majority in the House of Representatives, led by Congressmen Ron Dellums and Bill Gray, has already led the way in adopting legislation imposing far-reaching economic sanctions against South Africa. This week, Democratic Senators Ted Kennedy and Alan Cranston will take that legislation before the Republican Senate.

Win or lose this week, the Democratic Party will not rest until apartheid is abolished. America has fought too hard against racism in our land to turn our backs on those who struggle against apartheid in South Africa. Their cause is our cause, and we must demonstrate to all the world that America is a friend, not of apartheid, but of a free South Africa.

In other areas as well, we have unfinished business to advance. Above all, we have an economic agenda of equity and opportunity that builds on achievements of the past, and will lead us to the future with a strong and vital economy.

The economy has become a major issue in 1986, because nothing is more damaging to our dream of a just society than the faltering, deficit-ridden, no-growth economy that the Republican Administration has given us. The pigeons of Kemp-Roth are coming home to roost. The damage is measured every day in rising unemployment, declining growth, recession in basic industry, and depression in ariculture. We cannot and we must not accept a national economic policy that produces harsh results like that and denies the hope of a better life for tens of millions of our people.

The principles at the core of our Democratic alternative on the economy are clear. First, there must truly be genuine opportunity for every American now, tomorrow, and in the future.

Second, every American, not just the economic elite who are rich and powerful, must truly have the chance to share in the American dream.

Third, we must invest in the fundamental areas of national life that offer the truest hope for our country's future. We will not default on our commitment to insist on a secure America. But we will also never default on the equally essential commitment to invest in education, in technology and infrastructure, housing and health care—so that all Americans will have a future of rising opportunity, instead of shrinking hopes and diminished dreams.

The Democratic Party is committed to an American economy that offers a fair chance for every citizen—a genuine opportunity for every American in every state and region of the country to fulfill his or her potential in this land.

We want leaders who will create new partnerships between the public and private sector—with new mechanisms of cooperation to address family, business and community needs. I categorically reject the ideology that regards government as the enemy. Instead, in the New America I see, government will be the catalyst that brings together the rich diversity of our society—business and labor, churches and community organizations, neighborhoods and citizens.

In the New America I see, the public and private sectors will work in partnership for a brighter future of growth and opportunity. This era of reaction and retreat has run its course. The New America I see is waiting in the wings ready for us to begin a new burst of progress and achievement.

In such periods in the past, this country has always turned to the Democratic Party as the engine for progress and constructive change. So I am here to tell you day, "Start your engines, Democrats—the future belongs to us."

We know, of course, that our enduring values will never change. As Chairman of the Democratic Party, I know that we cannot win unless we broaden our base. But, I also know that we will not win if we abandon our base. I know that the Democratic Party cannot sustain itself as the majority party in America if it takes the minorities of America for granted.

To those who see that as the dilemma of the Democratic Party, I reply that talk of any such dilemma is nonsense. At its greatest momements in the past, the Democratic Party has earned your support—and we intend to keep on earning it in the years to come, as we work together for the New America that is now within our reach.

## HOUSE SHOULD VOTE FOR THE TEXTILE WORKER

### HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. STUDDS. Mr. Speaker, the House of Representatives tomorrow will have the opportunity to extend a lifeline to thousands of American workers whose jobs in the textile and apparel industry are threatened by a flood of cheap imports. By voting to override President Reagan's veto of the Textile and Apparel Trade Enforcement Act, the House will vote in favor of an industry that is forced to compete more and more against goods produced in countries that subsidize textile and apparel production, ban American-made goods, and deny their people basic workers' rights. Should we fail to act forcefullly, and if the current trend of imports continues for 4 more years, some $1.8 million jobs will be lost nationwide.

Edward W. Clark, Jr., of New Bedford, MA—a city I have the privilege to represent—described the choice facing the Congress in this morning's Boston Globe. I commend Mr. Clark's comments to my colleagues as we approach this important vote.

The article follows:

HOUSE SHOULD VOTE FOR THE TEXTILE WORKER

(Edward W. Clark, Jr.)

For eight years Nelson Tabares worked at Berkshire Hathaway, a New Bedford textile company. Last August the company shut its doors, saying it could no longer compete with cheaper imports. For Nelson Tabares

and other immigrants who have come here in search of the American dream, that dream is fast fading.

Tomorrow Nelson and 100,000 New England garment workers will be watching Congress. They will be joined by millions of workers in Southern textile mills. Texas border towns and New York City sweat shops who comprise a $45 billion industry that accounts for one of every eight manufacturing jobs in the United States.

The fate of the industry and the cities of New Bedford, Fall River and others will be determined by a vote of the US House of Representatives to override President Ronald Reagan's veto of the Textile and Apparel Trade Enforcement Act. Congress passed the act, 282-159, on Dec. 3, 1985. Despite strong bipartisan support Reagan vetoed the legislation.

Today the textile industry is in trouble. More and more clothing is produced offshore. Foreign governments offer preferential loans, grants, tax breaks and other subsidies to attract US and other foreign firms. At the same time these countries ban American made products. Some countries have established separate areas for the sole use of foreign firms. Wages paid to foreign workers average one-tenth of those paid to US workers. Repressive governments pass laws outlawing the right to organize unions and the right to strike. Policies such as these guarantee a cheap source of labor to foreign companies in search of a large profit.

Textile imports today comprise 50 percent of the American market, a far greater percentage than imported autos or steel. A Commerce Department paper shows that if the trend of imports continues for four more years, 1.8 million US jobs, $40 billion of the GNP and $8 billion in consumer income will be lost.

Since 1980 more than 10,000 Massachusetts residents employed in the textile industry have lost their jobs. They have not moved on to better-paying jobs. Most have taken lower-paying service-sector jobs. Without strong congressional action, Massachusetts is in danger of losing the more than $770 million payroll the textile industry provides.

American manufacturing is already in trouble as the nation moves to a more service-oriented economy. This struggle to save jobs is a major test in an ongoing political debate over the future of America's industrial base. For union members it is not an idle debate, but a struggle for survival.

The Amalgamated Clothing and Textile Workers Union, other unions and industry are working to save these jobs. Joining the cause is the National Organization for Women, the National Association for the Advancement of Colored People and the National Consumers Union. A June poll conducted by Government Research Corp. indicates 78 percent of the public supports "some sort of action to protect the nation's [textile] industry from unfair trade practices."

The legislation vetoed by Reagan is not a departure from current policy. The act would require the administration to enforce the objectives of the Multi-Fiber Agreement (MFA), the multilateral agreement renegotiated last week under the General Agreement on Tariffs and Trade (GATT).

A Feb. 14 report submitted by Treasury Secretary James Baker admits the failure of the current textile import program. The MFA allows countries to increase their imports to the United States by an annual rate of 6 percent. The Reagan administration has not enforced the MFA. Last week the administration continued to increase South African textile imports, which last year increased by 139 percent from the year before.

Critics say passage will invite retaliation, further endangering our balance of trade. The recent experience of the European Economic Community proves tough restrictions can work without retaliation. A recent study by a Washington law firm found the EEC was able to operate under the MFA and dramatically reduce its level of imports without retaliation. EEC strategy was based on the notion that survival of the basic industry is paramount. Not one nation retaliated. The EEC won an 8 percent rollback of import levels from Hong Kong. In contrast the recent US Hong Kong agreement allows for an increase in imports. The new agreement displaces an estimated 25,000 US jobs.

Consumers have not benefited from imports. Products bought overseas from factories where workers earn as little as 16 cents an hour under intolerable labor conditions are sold for exactly the same price as an equivalent US-produced product.

As US manufacturers cease production foreign manufacturers increase their prices for the same products. Within hours of the last US velveteen manufacturer declaring bankruptcy, Japan announced a substantial increase in its prices for the same product.

Union members are looking to Washington for action. Eight years ago Congress invested in the future of US automakers when it worked to help Chrysler Corp. Although critics cried it was interference in the free market, several hundred thousand jobs were saved. Every other textile manufacturing country in the world has taken some sort of action to protect its workers and jobs. Our country needs to develop a long-range plan to save jobs through balanced trade policies and economic planning so we can guarantee US workers the ability to feed and clothe their families.

## STEVE SOLARZ REPLY TO PRESIDENT REAGAN

### HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. FRANK. Mr. Speaker, our colleague down from New York [Mr. SOLARZ] is one of the most thoughtful participants in the foreign policymaking process at the national level. He has developed an expertise in international policy which is equalled by few Members of Congress. And he has drawn on that expertise to become a widely respected spokesperson for a sensible foreign policy which genuinely reflects American values.

On July 12, Mr. SOLARZ was selected by the Demorcatic leadership of the House to respond to President Reagan's weekly radio address. Mr. SOLARZ did an excellent job of articulating democratic responses on several of the points at issue and his remarks in response to the President's July 12 radio address follow:

STEVE SOLARZ REPLY TO PRESIDENT REAGAN

[As delivered]

This is Congressman STEVE SOLARZ from Brooklyn. A short while ago, President Reagan eloquently addressed the Nation about the fate of the 2,500 Americans who are still missing in action more than a decade after the end of the war in Vietnam.

I want to assure the President that the Democartic Party stands with him in his determination to achieve the fullest possible accounting of the tragic fate that has befallen our fellow Americans. As much as we would like to put the bitter memories of Vietnam behind us, we cannot write the final chapter in our involvement in Indochina until this issue is resolved.

The return of our MIA's—whether it be the remains of the dead or the bodies of the living—is not a partisan issue, but an American issue. The President deserves credit for making the MIA question a matter of the highest national priority and he can count on our support in this essential effort.

At the same time that we do everyhing possible to bring back those Americans who died and disappeared in Vietnam, we must make equally sure never to send any more Americans to die and disappear in needless and hopeless wars in other foreign lands in the future.

There have, of course, been times in the past, and there may well be situations in the future, where we have no alternative but to use force in defense of our Nation.

For two centuries, we have maintained our independence, and protected our most cherished values, because millions of young Americans were willing to lay their lives on the line for democarcy. And the day may come again when the future of freedom depends on our willingness to take up arms in defense of our most vital national interests.

Yet, by seeking a militay solution to the conflict of Central America, and by failing to address the causes of conflict in Southern Africa, the administration is pursuing policies that make more likely the eventual involvement of American troops in foreign wars that bear no relationship to our most vital interests.

By defining the Sandinistas as a major threat to American security, the President is setting the stage for the introduction of American combat forces into Nicaragua.

For now, the administration is content to arm the Contras. But what will happen when it becomes clear—as it surely will—that the Contras cannot overthrow the Sandinista regime?

Will we then be trapped by our overheated rhetoric?

Will the President tell us than that our only options are to send in the marines or to surrender to a Marxist takeover of Central America?

These are the questions we must confront now—before Americans begin to die and disappear in the jungles of Central America.

The best way of preventing the spread of communism south of our border is not by arming the Contras, but by supporting the democracies of Latin America in their effort to solve the problem at the negotiating table rather than on the battlefield.

In South Africa, the hostility produced by the apartheid system could ignite a cataclysmic confrontation that might easily engulf the entire region. If the flames of war should spread throughout Southern Africa, the United States might well find itself being drawn into an unnecessary and unwanted conflict.

The best way to avoid such a confrontation is to abolish apartheid. Yet, the President's chief of staff, Don Regan, has said that if we impose sanctions against South Africa, American women would no longer be able to buy diamonds. This is an insult to the women of our country who are surely

more interested in removing the shackles of racism than putting on the jewels of repression.

The only way of abolishing apartheid is by putting pressure on the Government of South Africa to negotiate a peaceful solution with the black leadership of their country. Yet, Mr. Regan's statement on diamonds makes clear, the administration's policy is comprised of all carats and no sticks.

Likewise, in arms control, the administration's policy is endangering our interests and jeopardizing our lives. Every President since Dwight Eisenhower, except Ronald Reagan, has concluded an arms control agreement advancing American security.

Surely the Soviets bear a measure of responsibility for the impasse at Geneva. Yet the fact is that President Reagan alone has been unable to achieve an arms control agreement with the Soviet Union. Sooner or later, unless we end the arms race in nuclear weapons, the arms race will end us—and our entire Nation may be missing in action.

And so, on this summer weekend, as we enjoy the beauty of our country and the blessings of freedom, we should pause to remember those—like the brave Americans still missing in action in Southeast Asia—who have sacrificed so much on our behalf. But let us remember as well the need to peacefully resolve those crisis and conflicts abroad that could plunge our Nation into war and lead to even more American dead and missing in the future.

This is Congressman STEVE SOLARZ. Thank you for listening.

## CASTRO, FAIR GAME

### HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. RICHARDSON. Mr. Speaker, Fidel Castro's atrocities often go unnoticed. Here is an illustration that should rate Mr. Castro alongside Mr. Pinochet and Botha as one of the top despots.

CASTRO, FAIR GAME

(By Stephen S. Rosenfeld)

Each year on July 26, Fidel Castro celebrates the anniversary of the launching of his revolution in Cuba. This year the festivities can be seen in a different light. The price paid by Cuba's legions of political prisoners, who have made Castro the leading jailer in the world, is finally becoming clear.

The person most responsible for this change is Armando Valladares, whose memoir of his 22 years as Castro's prisoner came out here in May, following publication in Europe. "Against All Hope" is a book and a political event. For Valladares is the Cuban Solzhenitsyn, another writer whose report from a revolution's heart of darkness burst through the haze of propaganda, inattention and state debate and brought the West's consciousness to a new place.

As happens, "Against All Hope" has provoked reviews extending beyond the book into the political culture. Many ask how the phenomenon of innocents held in bestial prisons could have existed into the third decade of Cuban communism, yet only now does the general political community start to see it truly.

And only now does the mass of Cubans become concretely aware of the unjust incarceration and inhuman torture of their fellow citizens, thanks to the 10 programs based on the book broadcast to Cuba earlier this year by the American government's Radio Marti.

The American right, to account for the broader public's ignorance of Cuban prisons, pounces on what it sees as the propensity of American liberals to view Castro through rose-colored glasses—for considerations of sympathy, "peace," guilt, radical chic or whatever.

The left, which is embarrassed but perhaps not as much as it ought to be, cites circumstances. For instance, it is suggested apologetically that when the American human rights movement got up steam in the 1970s, its necessary priority was the immediate and gory outrages of right-wing regimes. Others suggest that the few releases of prisoners Castro has recently made, and the current possibilities of negotiating the emigration of other Cuban prisoners, finally sensitized our public to the issue.

It is evident that Ronald Reagan has presided over changes in the political atmosphere that have finally made Castro's crimes both fair and necessary game—and not only for Americans concerned with human rights but perhaps increasingly for Latins, whom Castro is otherwise so ready to instruct in anti-Yankee ways. But there is another consideration, one that goes to the peculiar relationship between politics and literature.

I had lunch with Armando Valladares in 1982 a few weeks after Castro released him in response to an appeal by French President Francois Mitterand. Valladares had written prison poems; the French are good about appealing for poets. Valladares was thin and gaunt, a man of sad eyes and halting speech, quiet and rather calm, strangely dispassionate: a victim of a terrible system, but—how unfair it is to say this about him—not a compelling figure or one with what seemed to me a compelling story. I recall thinking he was still sick and tired and in a strange place; translation added another veil.

Only his book made plain that here was one of the enduring works of prison literature, the century's distinguishing genre: a record of state violence and individual resistance, authentically told, inspiring, unforgettable. Television may be the medium of contemporary politics, but literature conveys the dimension of individual character. The one creates celebrities, the other heroes, like Armando Valladares.

Some in the West still regard Castro as the fun dictator, bask in the glow of six-hour talks with him, consider him someone we all need to understand better. Valladares seems to me to understand him perfectly, and closes his book with a lie Castro told in 1983, while Valladares was rotting: "From our point of view, we have no human-rights problem—there have been no 'disappeareds' here, there have been no tortures here, there have been no murders here. In 25 years of revolution, in site of the difficulties and dangers we have passed through, torture has never been committed, a crime has never been committed."

## EMERGENCY DROUGHT RELIEF BILL

### HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. DERRICK. Mr. Speaker, tomorrow the House of Representatives will vote on the emergency drought relief legislation. I rise in strong support of H.R. 5288, and would like to take this opportunity to commend the chairman of the Agriculture Committee as well as the other committee members for their fine leadership in bringing this measure to the floor in such an expeditious manner. I would also like to express my appreciation to Chairman DE LA GARZA for allowing me to have input into the recommendations reported by the committee.

The Southeast is experiencing its worst drought in 100 years. Rainfall in my home State of South Carolina is some 15 to 20 inches below normal since the first of the year. Compounding this situation are the recordbreaking temperatures.

These conditions are expected to cause $200 million in crop losses in South Carolina alone. Our cattle and dairy producers are facing a very critical time. Pastures have dried up, feed is scarce, and the livestock is starving. As a result, the State's livestock markets are being flooded with cattle as farmers take to slaugther those animals they can no longer feed.

The Southeast is truly suffering, and it is heartwarming to note the voluntary assistance that is being offered. Over the last several weeks, our farmers have seen and felt the generosity of others all across the country through donations of hay, money, and manpower. Governors, State agriculture departments, and transportation companies have all joined together in the relief effort. This help is greatly appreciated.

Just last week the Secretary of Agriculture declared that all but two counties in South Carolina have sustained sufficient losses to warrant a disaster designation, triggering the general disaster relief laws. While low-interest FmHA loans will help, the fact of the matter is many of our farmers are in such dire straits that they just can't afford to take on any more debt. The Secretary has also announced that USDA will take some additional steps to aid the drought-stricken farmers, but it is my firm belief that we can do more.

H.R. 5288 will expand on existing authorities to meet the needs of our farmers. The bill will provide for an emergency livestock and poultry feed program, disaster payments and a delay in payments of the dairy assessment program. This measure will go a long way in addressing this desperate situation. In addition, it will insure that we have in place emergency steps should other areas be hit by similar drought conditions or by floods.

I wish to stress to my colleagues the seriousness of this matter in my region of the country. H.R. 5288 is vital to the livelihood of all of our Nation's farmers, and I urge my colleagues to join me in the bipartisan adoption of this legislation.

## AMERICAN SEATING CO. CELEBRATES CENTENNIAL ANNIVERSARY

### HON. PAUL B. HENRY

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. HENRY. Mr. Speaker, it is a pleasure today for me to offer special congratulations to one of the largest manufacturers of public seating in the world, the American Seating Co., of Grand Rapids, MI, as it celebrates its centennial anniversary on September 6, 1986.

The company had its beginnings 100 years ago as the Grand Rapids School Furniture Co., founded by Gaius Perkins, who was at that time the president of the Grand Rapids School Board. Concerned about the comfort of the public seating in schools, the company made its start with school desks and chairs. By 1888, the Grand Rapids School Furniture Co. had multiplied sevenfold employing 350 workers, and by 1892 it ranked as the top seating manufacturer in the world. By 1899, the company merged with 18 of the largest manufacturers of seating in the United States and was renamed the American Furniture Co. A consolidation in 1920 resulted in changing the company name to the American Seating Co.

Most recently, American Seating has concentrated its efforts on its rapid expansion in the office furniture business, and is now a leading supplier of interior systems furniture for the office and technical markets.

Over the past century American Seating has experienced tremendous growth, and has created employment opportunities for a great number of people. In 1886, the company employed approximately 50 workers in the Grand Rapids area, and today it employs over a thousand people distributed over most of the 50 States, Canada, and other foreign countries.

The philosophy of the American Seating Co. was developed in 1920, and is still valid today.

Superiority in products and in service, absolute dependability in every article sold and in every statement made in selling it: these are the foundations on which American Seating is built . . . The highest loyalty of every member of the organization lies in faithfully guarding these foundations.

American Seating is a company which has developed a reputation for serving its customers, shareholders, and employees with high commitment. Mr. Speaker, and colleagues, I ask you to join with me in congratulating the American Seating Co. for its success over the past 100 years, and in wishing them another 100 years of good fortune.

## WALTER MALICKI, OF HOLLYWOOD, FL, RESCUES TWO PERSONS INVOLVED IN A POTENTIAL EXPLOSIVE COLLISION

### HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. SMITH of Florida. Mr. Speaker, today I want to pay a special tribute to Walter Malicki, of Hollywood, FL, in recognition of the heroic act he performed on June 26, 1986.

In a country where people often forget about helping others, it is important to recognize those who risk their lives for the safety and health of others. I, therefore, would like to commend Mr. Malicki for his brave and courageous actions.

Mr. Malicki, a resident of my district, exhibited true bravery by rescuing two people involved in a potentially explosive car and truck collision. After sighting the collision and recognizing the emergency, Mr. Malicki used proper judgment and awareness in rescuing a truck driver, who was trapped inside his vehicle, after the truck collided with the car and proceeded to careen into an electric pole. Mr. Malicki then went to the second vehicle and decided to not make any attempt to remove a woman from her car fearing any action might result in additional injuries to the driver. Instead, he quickly removed the battery cables in order to eliminate a possible electrical short which might result in an ignition spark. Hollywood Fire Rescue arrived and removed the victim from the vehicle. Hollywood Fire Chief Jim Ward praised Malicki for acting with intelligence and sensitivity. Mr. Ward also said that:

A hero isn't someone who happens to be at the right place at the right time. A hero is someone who performs an act of courage by doing the right thing at the right time.

I feel Mr. Malicki deserves special recognition for his actions. The quick, clear, and precise actions taken by Walter Malicki are exceptional. Mr. Malicki demonstrated true bravery and has merited all the heroic adjectives for his actions.

## CRISIS WITH OUR TRADE IMBALANCE

### HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. GALLO. Mr. Speaker, I would like to address my colleagues who will be voting tomorrow to sustain the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985.

We are all fully aware that this country is facing a crisis with out trade imbalance and it is clear that action must be taken to reduce this damaging deficit. The uncertainty arises over what should be done in order to reduce this imbalance.

I do not believe that H.R. 1562 is the answer. I believe that this bill is a short-term measure that would invite retaliation from our trading partners.

I believe that an aggressive approach is needed on the part of the U.S. Government to enforce America's rights under the existing and future trade agreements. The recent textile trade agreements between the United States, Hong Kong and Taiwan and the renegotiation of the Multi-Fiber Arrangement in Geneva, Switzerland, represent an opportunity for the administration to start over with a clean slate. If the provisions in these agreements are strictly enforced by the administration, then I believe that we can get the trade deficit under control.

Agreements are only as good as their enforcement. Those of us who are voting to sustain the President's veto of H.R. 1562 are doing so with the hopes that these new agreements will be strictly enforced.

It is my belief that the trade imbalance, if not corrected, could be the Achilles' heel with regard to our economic future and manufacturing capability. I have sent a letter to the President stating the above and I ask that my colleagues urge the administration to strictly enforce our rights to fair and open trade as well.

## I'M THE SAME OLD FLAG

### HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. RICHARDSON. Mr. Speaker, recently I attended an inspirational service at the Temple Baptist Church in Santa Fe, NM, at which our patriotic spirit as a nation was extrolled.

This outstanding service contained a recitation of "I'm the Same Old Flag" which brought tears to the eyes of many in the audience. The organizers and parishioners of the church should be commended for putting together such an outstanding service.

I'M THE SAME OLD FLAG

Hello! Remember me? Some people call me Old Glory, others call me the Stars and Stripes; I have also been referred to as the Star Spangled Banner. But, whatever they call me, I am your Flag, or, as I proudly state . . . the Flag of the United States of America. There is something that has been bothering me, so I thought I might talk it over with you . . . because it's about you and me.

I remember some time ago, I think it was Memorial Day, people were lined up on both sides of the street to watch the parade. The town's high school band was behind me, and naturally, I was leading the parade. When your daddy saw me coming along, waving in the breeze, he immediately removed his hat and placed it against his left shoulder so that his right hand was directly over his heart. Remember?

And you. Yes, I remember you. Standing there straight as a soldier. You didn't have a hat, but you were giving the correct salute. They taught you in school to place your right hand over your heart. Remember little sister? Not to be outdone, she was saluting the same as you. Oh, I was very proud as I came down your street. There were some soldiers home on leave and they were standing at attention giving the military salute. Also, some V.F.W. veterans with

their caps at jaunty angles were saluting smartly. Ladies as well as the men, paid me the reverence I deserve.

Now I may sound a little conceited. Well, I am. I have a right to be, because I represent the finest country in the world . . . The United States of America. More than one aggressive nation has tried to haul me down, but they all felt the fury of this freedom loving country. Remember . . . many of you had to go overseas to defend me.

What has happened? I'm still the same old Flag. Oh, I've had a couple more stars added since you were a boy. A lot more blood has been shed since that Memorial Day parade long ago. Dad is gone now. The home town has a new look. The last time I came down your street, I saw that some of the old landmarks were gone, but in their place, shining majestically in the Sun, were a number of new buildings and homes. Yessir, the old home town sure has changed.

But now . . . I don't feel as proud as I used to. When I come down your street, you just stand there with your hands in your pockets and give me a small glance, then look or turn away.

When I think of all the places I've been . . . Anzio, Guadalcanal, the Battle of the Bulge, Korea, and Vietnam; I wonder what's happened? I'm the same old flag. But now I see children running around and shouting as I pass by. They don't seem to know who I am. I saw an old man take his hat off, and then look around. He didn't see anybody else with theirs off, so he quickly put his back on.

Is it a sin to be an American partriot anymore? Have you forgotten what I stand for? Have you forgotten all the battlefields where men fought and died to keep this Nation, your Nation, free? When you salute me, you are actually saluting them.

Take a look at the memorial honor rolls sometime. Look at the names of those who never came back, and are resting 'neath white crosses on a far away shore. Some of them were friends or relatives of yours . . . maybe even went to school with you. That's who you're saluting . . . when you revere me.

Well, it won't be long until I come down your street again. So when you see me, stand straight, place your hand over your heart, and you'll see me waving back. My salute to you. I'll show you that I, too, remember!

## A TRIBUTE TO SYBIL N. CROOKHAM

### HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. COELHO. Mr. Speaker, I would like to take this opportunity to honor one of my constituents, Sybil N. Crookham, whose life of leadership and public service is regarded in the highest esteem by her community.

Sybil Crookham taught at Winton School in Winton, CA, from 1934 until 1974, serving as principal from 1948 until 1974. Mrs. Crookham is the founder of the Winton kindergarten system. Although she has retired, she has remained active in school affairs as a current member of the school site committee.

Her former students and colleagues have nothing but the most laudatory comments about Mrs. Crookham, saying she has "amazing energy" and is "one who will never grow old." Her concern for her students extended beyond the classroom. She would provide shoes and other necessities when her students could not afford them.

Now, as the community of Winton honors Mrs. Crookham by renaming Winton School as the Sybil N. Crookham School, I would like to join the community of Winton in saluting her life of public service and her commitment to our Nation's most special resource—our children. Sybil Crookham is certainly a special individual.

## A COMMONSENSE APPROACH TO PORNOGRAPHY

### HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. BENNETT. Mr. Speaker, I include in the CONGRESSIONAL RECORD at this point, a stimulating and helpful article from a recent edition of the Washington Post written by Representative JIM COURTER, one of the most able Members of Congress, in my opinion. I particularly congratulate him on dealing so thoughtfully with the difficult question of pornography. He puts his finger on the heart of a problem in pointing out that the real harm is not to the body, but to the character of human beings. He echoes the concern of every parent that the children of the next generation may have a reasonable chance to live as normal and joyful individuals with clean and wholesome lifestyles. There are people who for personal financial gain, attempt to destroy that opportunity. That is a real tragedy. As Representative COURTER so ably states, the real tragedy is in the destruction of character. His article reads as follows:

[From the Washington Post, July 13, 1986]

A COMMON-SENSE APPROACH TO PORNOGRAPHY

(By Jim Courter)

The Meese commission's lengthy report on pornography is disappointing in the most important respect. Convinced that its findings would be less controversial if it focused on physical danger, the commission attempted to connect pornography with personal violence.

This is unfortunate because sociological evidence is always ambiguous. A 1970 pornography commission found no connection. "As we in 1986 reexamine what was done in 1970," the report says, "so to do we expect that in 2002 our work will similarly be reexamined." Building their case on the sands of social science, the commissioners will not complain if their proposed solutions are repealed in 15 years.

Right-wing extremists think you can end personal violence by bankrupting Hugh Hefner. Left-wing fanatics think democracy means anarchy and everyone doing his or her "thing." But the real case against pornography is not harm to the body, it is harm to character.

Most Americans show a solid common sense on the problem. They worry about their families—how their children grow up, learn to behave and what their character will be. Although parents have influence, their children are mostly watching television or out of the home.

No family can entirely control the forms of entertainment the children are subject to. It is as reasonable to call on the community to help protect the family from pornographers as it is to ask for help against toxic waste polluters or drug dealers. Government exists to secure the conditions for improving the quality of life, and most people recognize that pornography degrades the quality of life.

Government has no place in the bedroom. The bonds of intimacy between two people are delicate; intimacy needs privacy in order to flourish.

The privacy of the bedroom, however, needs to be defended not only against would-be totalitarians—but also against the Larry Flynts; that is, against the threat to intimacy from pornography itself.

Irving Kristol has written that pornography's "whole purpose is to treat human beings obscenely, to deprive human beings of their specifically human dimension." It encourages men and women to look at and treat each other as objects to be used, not persons to be loved. Kristol cites D. H. Lawrence, author of "Lady Chatterley's Lover," who wrote that pornography attempts "to do dirt on [sex]. . . . [It is an] insult to a vital human relationship." By invading the bedroom, pornography, like intrusive government, weakens the ties of love.

What do we mean by the privacy of the bedroom? We mean the ability to express desire and affection out of the sight of anyone else. But pornography makes desire a public spectacle, carried out in sight of the whole world. Those who are concerned about the right to privacy really cannot defend publication ("making public") of the grossly erotic.

Pornography is said to be hard to define. But if so, why do the media have so little difficulty keeping obscene statements out of print and pornographic photos off the airwaves? While the commission's report is ridiculed, no TV network dares broadcast the Meese commission's evidence, even though it is on public record. Like Justice Clark, they know pornography when they see it.

Courts have developed reasonably applicable definitions of "pornography" over many years; it is hard to imagine that anyone ever committed a porn-related crime by mistaking the nature of the material. As Prof. Francis Canavan writes, pornography is no more difficult to define than "negligence" is in the thousands of tort cases juries routinely dispose of.

Constitutional freedom of expression protects the expression of ideas, especially political expression. The First Amendment even protects the individual's right to argue for a different morality, or for no morality at all. But pornography does not present "ideas." According to Prof. Harry Clor, obscene publications "are primarily addressed to the passions, to appetites and probably, to primitive symbolic processes." That's why no Supreme Court majority has ever extended First Amendment protection to pornography.

Can the law uphold standards of behavior? Censorship enthusiasts suppose that morality can be imposed by law. Liberals seem to argue that the law can't accomplish anything at all (contradicting the opinion that the law should eliminate the immorality of racism). The sober view is that the law can support standards, not of sanctity, but of decency.

The Supreme Court's 1973 decisions in *Miller* v. *California* properly point toward

local community control under the states' traditional police powers. Tolerance levels vary, and not every community in the United States will apply the same standard in the same way—Piscataway, N.J., is very different from Greenwich Village or Haight-Ashbury.

While the Meese commission proposes some worthwhile legislative initiatives, legally imposed national standards are virtually unenforceable. Far better than legal restraints, community opinion is the strongest force for decent public entertainment. Retailers and movie theaters are too concerned about their profits to force salacious entertainment on an indignant public.

Indecent cable TV broadcasts are more of a problem. I'm inclined to believe that sponsor boycotts are very effective. There is nothing undemocratic about voluntary economic sanctions against those who pay for junk broadcasts invading the privacy of your home. Civil rights protesters have practiced such sanctions for decades. The matrix of democracy is public opinion, and its expression is what the First Amendment was designed to protect.

Because the family is central to self-government, democracies have an obligation to protect family affection. Discouraging pornographic publications is part of a self-governing people's natural right to sustain their civic character and keep their government free.

## ALPA

### HON. KENNETH J. GRAY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

Mr. GRAY of Illinois. Mr. Speaker, it pleases me to be able to rise and acknowledge a group of men and women who continually provide this Nation and the international community with a dedicated and professional service: our airline pilots. These men and women are constantly engaged in transporting the public safely throughout the world.

The Air Line Pilots Association is recognizing seven of their members for outstanding performance in the face of hazardous circumstances. These men, when faced with danger to their aircraft, their passengers, and the safety of those on the ground responded calmly and professionally to avert disaster and provide for the safe return of their passengers, crew and equipment. Their ability to perform so admirably is a testimony to the high caliber of the individual responsible for American aircraft and to the dedication and training which these men and women possess. The accomplishment of these men is representative of our pilots. I would like to join the Air Line Pilots Association and recognize these men before our August body. As a Member of Congress, I would like to ask that we join in recognizing these men and all the pilots they represent for their courage and professionalism they showed in overcoming a potentially disastrous situation.

Mr. Speaker, I ask all of the Members to join me in saluting: Capt. Jim Robertson, Eastern Airlines; First Officer Gerry Bellmer, Eastern Airlines; Capt. Carl Simmons, Northwest Airlines; First Officer Michael Gadient, Northwest Airlines; Second Officer William Reagan, Northwest Airlines; Capt. Dale Buss, Frontier Airlines; and Capt. Jim McIntyre, TWA.

## CARING ABOUT CHILDREN

### HON. FRED J. ECKERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. ECKERT of New York. Mr. Speaker, on August 4, the House of Representatives passed, with my support, S. 140, the Children's Justice Act. This important legislation amends the Child Abuse Prevention and Treatment Act to establish a program to encourage States to enact child protection reforms which are designed to improve legal and administrative proceedings regarding the investigation and prosecution of child abuse cases, especially child sexual abuse cases.

Reforms in the area of child protection are desperately needed as indicated by the fact that 90 percent of all persons accused of child sexual abuse will get off scot-free and of the 10 percent who are convicted, less than 5 percent will serve time in prison. Such a record must be improved as soon as possible.

S. 140 would provide needed protection to our Nation's children. It would establish grants to States to facilitate prosecution and enhance law enforcement efforts at the State and Federal level to prosecute child abuse offenders. The FBI would be required to modify its crime reporting to assist States in the collection of statistics. Funds would also be set-aside to help reduce trauma to children and to establish crisis child care nurseries to provide assistance to parents dealing with child abuse cases.

Mr. Speaker, I insert a copy of my Washington Report for the week of August 3 concering childhood vaccines in the RECORD at this time for the information of my colleagues and others concerned about the childhood immunization program:

[From the Washington Report, Aug. 3, 1986]

CARING FOR CHILDREN

If you care about our country's children, if you are concerned about things that threaten their health and happiness, here's something to think about: the future availability of certain critical childhood vaccines may be in jeopardy.

Congress needs to act to prevent a serious public health crisis. A subcommittee on which I serve—the Subcommittee on Health and the Environment, the subcommittee which recently achieved a major breakthrough in advancing a much-heralded acid rain control bill—is now moving to protect children by insuring adequate availability of life-protecting vaccines.

The prices of many essential childhood vaccines are soaring and the number of companies producing these vaccines is shrinking. For example, the price of critically important DTP vaccine (D=diphtheria; T=tetanus; P=pertussis) has jumped 1300% in the past five years and only two companies make and distribute it.

It's a problem you don't hear much about in the news, but I think it's a serious problem. I think it's a problem that needs to be better understood and that needs to be addressed by Congress sooner rather than later.

What's going on? Some background:

America has the best national childhood immunization program in the world. Over the past forty years, the occurrence of childhood diseases that are preventable through vaccine inoculations has decreased dramatically, principally because of the widespread use and acceptance of vaccines.

There were 57,000 cases of paralytic poliomyelitis in 1952—versus 4 cases in 1984. Measles dropped from 894,134 reported cases in 1941 to 1,497 in 1983. In 1941 measles caused the death of 2,250—versus 2 in 1983. Diphtheria has been virtually eliminated.

These facts do not mean that these diseases are no longer a threat. What the facts prove is that the vaccines are effective and their continued use is essential.

If we permit immunization levels to fall—and some argue that is starting to happen—infectious diseases such as polio, measles, diphtheria and pertussis could reappear. Farfetched? Exaggeration? No. Great Britain relaxed its immunization efforts and over the last several years paid the price with repeated outbreaks of pertussis.

So what's the problem? The problem is that however wonderful the marvels of medicine may be, none of our vaccines is perfect; sometimes there are adverse reactions.

For example, oral polio vaccine has virtually eliminated paralysis due to wild polio virus—but each year we experience 5 to 10 cases of paralysis caused by reacton to the vaccine itself. The DTP vaccine may work wonders, but studies show that once in every 310,000 doses given, the pertussis component to the DPT vaccine causes permanent brain damage. Other vaccines commonly used to protect children against measles, mumps, rubella, etc. may also on rare occasions cause serious adverse health problems.

Parents whose children suffer serious adverse reactions from vaccines are not going to take any consolation from the knowledge that, overall, the benefits associated with immunizing our children vastly—vastly—outweigh the risks.

They will derive little solace from the evidence of the past decades which conclusively shows that for every child harmed by a vaccine, hundreds, perhaps thousands, are spared illness or death. No, those unfortunate few are going to sue. That's perfectly understandable.

The lawsuits are mounting. Huge settlements are leading insurance companies to review their liability policies. Premiums are increasing. Coverage is being reduced. Policies are being cancelled altogether. Some vaccine manufacturers have already ceased producing their products because they concluded the liability risk is too great.

I am not suggesting that we are facing an immediate public health crisis. What I am suggesting is that there are danger signs on the horizon and now is the time to take action to prevent a future serious public health crisis. I am not suggesting that the outlook is bleak and we are going to be seeing recurrence of diseases that we thought were under control. What I am suggesting is that there is a clear need for vigilance. The problem needs some preventive medicine from Congress.

Congress needs to deal with the problem of vaccine liability to help insure that there will be a stable supply of childhood vaccines. The way to do that is to help the children and their families who are the unfortunate victims of childhood vaccine-related

injury by making it easier for them to bear the burden of medical, rehabilitative and other expenses resulting from such rare and unavoidable injury.

To help those children and their families—and to help protect all children by insuring a stable supply of essential childhood vaccines—I have joined in cosponsoring "The National Childhood Vaccine Injury Act of 1986" and recently helped conduct a special Congressional hearing on this important issue.

Our bill is an attempt to curb the litigation explosion, and by so doing ease the price pressure on vaccines, through the establishment of a National Vaccine Injury Compensation Program. It helps insure prompt and adequate compensation for those unfortunate few who are injured by rare unpreventable reaction to vaccines.

A Master appointed by a Federal Court would determine causation and damages of a claim for vaccine injury. The determination would be based on a pre-established table of injuries prepared by medical experts. The fund would be financed by a per-dose excise tax and there would be quarter of a million dollar cap for non-economic damages. A family dissatisfied with the disposition at this level would be free to file suit in court, where damages would not be capped, but where certain product liability defenses would be afforded the defendants.

This whole issue of dealing with vaccine liability and trying to insure an adequate supply of essential vaccines at reasonable costs and provide just compensation for the injured is not one of those issues that you and I read about as we scan the daily news. But if we care about children, if you are concerned about their health and happiness, if you have compassion for the families of the vaccine-injured children, this is an important issue that Congress should face. Don't you think?

## THE PLIGHT OF IDA NUDEL

### HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. FOWLER. Mr. Speaker, along with many of my colleagues I had the privilege earlier this year of meeting with Ilana Friedman. Mrs. Friedman has spent the last 14 years trying to get her sister, Ida Nudel, a visa to emigrate from the Soviet Union to Israel. Mrs. Friedman's attempts have been constantly blocked and in the meantime her sister has suffered greatly. Ida has repeatedly been subjected to severe harassments and deprivations because of her desire to emigrate and the extraordinary humanitarian assistance she has given to other refuseniks.

I recently came across a moving article in the Southern Israelite which details Ms. Nudel's plight and her sister's efforts. I hope that my colleagues will all take the time to read this informative article and I am presenting it for inclusion in the RECORD.

Finally, let me say that this tragic situation reinforces my firm conviction that the United States must use all of its resources in pressing the Soviets to treat Soviet Jews more fairly and humanely and to improve their overall abysmal human rights record.

The article follows:

SISTER WAGES 14-YEAR BATTLE TO WIN IDA NUDEL'S FREEDOM

(By Carol Green)

For Ilana Friedman, there is neither day or night. After she returns home from her job as a bookkeeper at Na'amat/Pioneer women, she goes on to her next job—waging a one-woman crusade for the release of her sister, Soviet Prisoner of Conscience Ida Nudel. For the past 14 years, Friedman has been working ceaselessly on behalf of her sister, who is in exile in a distant region of the Soviet Union.

Friedman has corresponded with most of the world's major heads of state on her sister's behalf: the Red Cross, the Socialist Party, the Communist Party, Amnesty International. An entire room in Friedman's Rehovot apartment is filled with letters and documents related to Ida's case.

Though she is a pleasant woman who enjoys people and laughter, Friedman has little time for either. "They didn't only destroy Ida's life," she remarks with bitterness.

The sisters' ordeal began in 1971 when they applied for permission to leave the Soviet Union. Although neither sister was an active Zionist, both intuitively felt that Israel was their homeland. "In the Soviet Union they don't let you forget that you are a Jew," observes Friedman.

As the only members of their family to survive the Holocaust, the sisters were very close. Nudal lived with Ilana and her husband and young son in one Moscow apartment. "My son is Ida's son; my family is Ida's family," says Friedman.

When Ida was refused an exit visa, both sisters were puzzled. They had never been involved with politics or in any illegal activities. "We were so naive. We both thought it was a bureaucratic slip," recalls Friedman.

The sisters decided that Friedman and her family would go and that Ida would remain in Moscow and join the family later. "If I would have known that it would be years until I'd see Ida again, I wouldn't have left," says Friedman.

With Ilana gone, Ida was left alone. "That was when she started to help people," explains her sister. Ida got to know other refusniks. She helped them prepare requests to leave and accompanied them to government offices to secure exit visas. She hosted them in her apartment. Sometimes the place would get so full that Ida could not find a place to sleep. In her circle of activists Ida became known as the "angel."

Ida also adopted the prisoners of conscience who were languishing in Soviet prison camps. She wrote to them and sent them care packages. She called them "her boys." Ida knew that the KGB was spying on her. In her apartment she left notes to her KGB "visitors." "You can take everything except the care packages for the boys."

Ida also began to participate in political activities and demonstrations. On June 1, 1978, a group of refusnik women staged a legal public demonstration to coincide with official festivities marking the International Day of the Child. "The idea was to show that the Soviet Union is not a paradise for children," explains her sister. Ida objected to using children in a demonstration and only reluctantly agreed to participate. That morning, Ida tried to leave her apartment to go to the demonstration. KGB agents blocked the door. Without court authorization, they placed her under house arrest. From her fourth floor balcony, Ida hung out a banner saying: "KGB, Give Me My Visa." For this act she was charged with the crime of "hooliganism" and sentenced to four years of exile in Siberia. "Ida was punished like a man; no other woman was ever punished this way," explains her sister.

Ida lived in a barrack-like hut without running water and had to tramp long distances in the snow, in below-freezing temperatures, for firewood and other basic provisions. Her barracks-mates were 60 hardened criminals, she was the only woman. More than once she was physically attacked, so to protect herself she slept with a knife under her pillow. Nonetheless she persevered confident that after four years she would be free.

"All the time she was in Siberia, she didn't complain," recalls her sister. When people asked her where she got strength to carry on, she answered, "I feel as though three million Soviet Jews are standing behind me."

In March 1982, Ida Nudel was officially released from exile. But when she returned to her Moscow apartment, KGB agents welcomed her. They told her that she had 72 hours to leave Moscow. "Ida had no place to go. We have no family in the Soviet Union," explains her sister. Ida became a wandering Jew. For eight months she traveled from city to city seeking a haven. More than once, she spent the night on a bench in the railway station. With neither a steady job or a permanent address, Ida lived in fear of being arrested for the crime of "parasitism."

In November 1982, Ida reached the town of Bendary in Moldavia and for some reason, the authorities allowed her to settle there. However, Bendary is hardly a home for Ida. She is an outcast; the townspeople shun her, fearful of KGB warnings that they will face severe recriminations if they approach her. Ida lives in isolation. Her dog is her only companion.

Yet even in distant Bendary, Ida remains the "angel." She continues to correspond with her boys, the prisoners, and sends them care packages of food and vitamins whenever she can. She is visited occasionally by refusnik families and she does receive some mail from the west although none of her letters are allowed to go out.

Ida's sister spoke with her recently by telephone. She reports that her sister is ill and broken in spirit. "When I left, my sister was a strong healthy woman," recalls Friedman. "Now she suffers from chronic heart, liver and kidney ailments and her eyesight has badly deteriorated". Friedman points to the most recent photograph of her sister as proof of this deterioration.

Meanwhile, the authorities continue to refuse the sisters' requests to be reunited, although according to Obir, the Soviet emigration authority, Ida's visa refusal expired in 1977. Still the government holds on to her claiming that they cannot release her because she knows state secrets from the days when she worked as a government economist.

Friedman says that this is ludicrous. "First of all, she worked in an open public agency and never had access to classified information and even if she had, what could she possibly remember after 15 years?" asks Friedman.

Back in Rehovot, Friedman continues her letter-writing campaign. She has gathered a small group of supporters called "Israel Women for Ida Nudel," who some years ago published a book about Ida. She has other supporters as well. Recently, World Jewish Congress President Edgar Bronfman ap-

proached the Soviet government on Ida's behalf.

But mostly Friedman fights her battle alone, composing her letters in Hebrew or Russian. An American man from nearby Ra'anana translates them. "My husband met him on miluim (reserve army duty). One night they were doing guard duty and my husband told him our story. He wanted to help," Friedman explains.

After 14 years, Ilana Friedman is tired of fighting. She would like to have more free time to spend with her husband and son. But more than anything, she would like Ida back.

The release of Anatoly Shcharansky has given the sisters renewed hope. Shcharansky was one of Ida's "boys." He has vowed to work for the release of Ida and other Soviet POCs. Other close friends of Ida's, the Goldstein family, have recently arrived in Israel and have promised to work for her release.

Despite the release of Shcharansky and the Goldsteins. Friedman restrains herself from building up hope for the release of her sister. She has had her hopes dashed before. Two years ago, when actress Jane Fonda visited Ida in Bendary, Kremlin watchers predicted that Ida's release would be imminent. It was not.

Still Friedman carries on, each day writing another letter or pestering another official. "I cannot rest until I have Ida back," she explains. "Perhaps it will be some day soon," she says longingly, her large eyes filling with tears.

## SOVIET JEWRY

### HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. KINDNESS. Mr. Speaker, as chairman of the 1986 Congressional Call to Conscience Vigil for Soviet Jewry I commend the following statement by Hon. THOMAS CARPER to the Members for their perusal.

STATEMENT OF HON. THOMAS R. CARPER, ON SOVIET JEWRY—AUGUST 5, 1986

Mr. Speaker, I am joining today with many of my colleagues to protest the mounting anti-Semitism campaign in the Soviet Union. Jewish emigration has declined by 98 percent since 1979 to extremely low levels, reaching the lowest point last year of only 896 persons.

Only 31, Jews were allowed to emigrate from the Soviet Union during the month of July 1986—the lowest number of refusniks permitted to leave in 20 years. Presently there are over 400,000 Jews in that country who have applied for an exit visa and have been refused. Paralleling this decline has been a sharp increase in officially sanctioned anti-Semitic campaigns directed at Soviet Jewish refuseniks (those who have been refused emigration visas). Anti-Semitic campaigns have been led by the "Anti-Zionist Committee of Soviet citizens," founded in 1983 by Gen. D. A. Dragunsky, a military commander. The Committee contends that the Jewish emigration problem has been solved since any Jews who wanted to leave the Soviet Union have already done so. In addition, the Committee often links Zionism to Nazism.

Other forms of discrimination include the loss of jobs for those applying to emigrate, restrictions on Jewish university enrollment, and arrests of Jewish activists. In 1984, many refuseniks were arrested and/or put on trial, and a major crackdown began on Hebrew teachers.

The problems and difficulties that these people face were highlighted to me recently when I received information about my adopted refusenik, Stanislav Zubko. Mr. Zubko, a candidate of sciences in Chemistry, worked as a senior researcher in one of the scientific research institutes in Kiev. In 1979, Stanislav Zubko, together with his mother—Anna Levitskaya—applied for permission to emigrate to Israel. His request to emigrate was turned down, after which there followed constant persecution by Soviet authorities. He was fired from his job, and was completely denied any chance to engage in professional work as a scientist. He was forced to work as a stockman in a store.

Mr. Zubko continued, nevertheless, to seek permission to emigrate to Israel and started helping a number of refuseniks. In less than two years, he was subjected to groundless administrative arrest six times. As a sign of protest against the most recent arrest, Zubko declared a hunger strike for ten days.

On May 16, 1981, the Zubko's apartment was searched, allegedly in connection with an apartment robbery that had supposedly occurred earlier that year. In his mother's apartment, authorities found some hashish and a pistol.

Zubko denied charges levied against him, and categorically stated that these items has been planted in his apartment. His assertion that the drugs and pistol did not belong to him was not even investigated by the authorities. Ironically, it had been established that the fingerprints of the accused could not be found on the objects that had been uncovered during the search.

In violation of the law, the objects that were confiscated during the search had not been wrapped and sealed in the proper manner, which raises doubts as to the validity of the most telling evidence—the only evidence upon which the prosecution based its case.

The prosecuting attorney in Mr. Zubko's trial supported the unsubstantiated accusations, and the court found Zubko guilty on both counts. Zubko was sentenced to four years imprisonment in a general regime camp.

According to Stanislav Zubko's mother, his state of health is deteriorating. He suffers from severe arthritis and from hunger, but fortunately he does not have to perform any hard physical work. Because he is in a camp with criminals, he is completely isolated.

Stanislav Zubko is only one of at least 400,000 Soviet Jews who are still imprisoned in their own country. Refusing to allow Mr. Zubko to emigrate is in direct violation of international law as expressed in Article 13, Section 2 of the Universal Declaration of Human Rights which states: "Everyone has the right to leave any country, including his own, and to return to his country."

Most of the imprisoned refuseniks are accused on such immaterial grounds as "defaming the Soviet state and social system," when in fact the only crime is, in most cases, the desire to maintain their Jewish identity and heritage as well as the desire for the fundamental right of emigration. I hope we, as free Americans, never forget the plight of these Soviet Jews who long for a taste of the freedom we cherish.

## PRIVILEGE OF KNOWING JANET COWAN

### HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. KOLTER. Mr. Speaker, I rise today to recognize one of the most generous, giving persons that I have ever had the privilege of knowing. Janet Cowan, a resident of Ford Cliff Boro in the great State of Pennsylvania, has enhanced the lives of her family, friends and coworkers since March 11, 1938—the very day on which she was born.

She is a person who has put her heart and soul into the task of enriching the lives of others in her community, her profession and her personal endeavors.

For the past 27 years she has, through her own innovative contributions, provided some 5,000 or more students in her elementary classrooms with the ultimate opportunity to prepare themselves for the challenges of today's world. She makes learning a pleasure and an adventure and provides instruction above and beyond the prescribed parameters of quality education.

She has served her community as president of Boro Council, and for many years has been actively involved in a variety of service organizations. Presently she unselfishly devotes her time to performing outstanding duties as legislative and political committee member of the business and professional women's group in her area; legislative chairperson for her local teacher's association; secretary of the Manor Township Lioness Organization; vice-president of the Armstrong County Democratic Women's Organization; and registration chairman of the Armstrong County Democratic Association.

Janet is unique in her endeavors, for she does her jobs well in each area in which she serves, and she does so in such an unobtrusive way that most people do not realize how much she gives in the way of time, energy and assistance in accomplishing her goals and assisting everyone with whom she comes in contact.

To her family and her many friends and acquaintances, she has given herself and continues to do so without a thought of gaining anything in return except the satisfaction of doing her best for those whose lives she touches.

She has earned this tribute by her untiring, unselfish style of life which endears her to all who know her. Thank you Janet for all that you do to bring happiness to others in a world in which people like you are one in a million.

## CONGRATULATIONS TO NEVADA CITY, CA

### HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. SHUMWAY. Mr. Speaker, it is with great pleasure that I ask my colleagues to join with

me in paying tribute to Nevada City, CA, which has been named one of the first 15 "Designated Bicentennial Communities" in the Nation by the Commission on the Bicentennial of the U.S. Constitution. Only four cities in the Western States have received this honor.

Nevada City, a national historic district, remains one of the most outstanding examples of gold mining towns in California. Its carefully preserved Victorian and early mining town architecture make it a living reminder of the colorful Gold Rush days which hastened the colonization of the West and changed the face of American history. Situated near the northern end of the Mother Lode, Nevada City for years was the heart of the rich northern mines in the lode. It remains surrounded by the largest, richest, and longest-operating gold-quartz mining field in California.

Nevada City's birth as a small mining community in 1849 was spontaneous, following fast on the heels of word that gold had been found in California. Miners poured into the area and, by 1850, it was not only one of the first gold mining communities, but one of the largest. Many such communities had brief "flash in the pan" existences, literally. By 1853, the California Gold Rush was essentially over, as most of the placer, or surface, mines had been worked dry. Nevada City, however, continued to grow. With the discovery and development of hard-rock, hydraulic, and other modern mining techniques, Nevada City retained an important place in mining history. And, when J.J. Ott's now-famous assay office in Nevada City confirmed in 1859 that an ore sample was rich in silver as well as gold, a renewed rush was on.

The gold and silver taken from the Comstock Lode which had yielded that revealing sample had significant results. It financed much of the Civil War for the North, brought the State of Nevada into the Union, and made millionaires of many—millionaires who, in turn, went on to contribute to the Nation. The first long-distance telephone cable was a result, as were cables under the seas, and some of today's splendid structures in such cities as San Francisco.

The first town was largely comprised of canvas-wood construction, easy prey to both fire and flood. Despite many such tragedies, Nevada City's stoic and pioneering citizens prevailed, rebuilding, progressing, and continuing to contribute to the area's rich heritage. Preoccupation with the peril imposed by fire resulted in the organization of fire companies and construction of extravagant firehouses, one of which is considered the finest surviving example of such architecture in the region. The Main Street Fire House now serves as the Nevada County Historical Society's museum, and is one of the best known historical buildings in the Mother Lode.

Nevada City had its share of famous residents and was the site of the founding of various respected organizations. Herbert Hoover lived in Nevada City, working as a hard-rock miner while studying engineering at Stanford. The University of California at Berkeley had its foundation here, when Prof. Henry Durant, transplanted from Yale University, met with a committee to form an academy which was incorporated as the College of California.

The residents of Nevada City are very proud of their heritage, and have worked diligently to preserve this important chapter in Western history. However, their efforts reach much further back than the gold rush. Each year, Nevada City is known for its September Constitution Day Parade, and the residents truly go out of their way to pay homage and tribute to that most revered document.

Thus, it is especially appropriate for this colorful and critical link in America's development to have been selected as a designated bicentennial community. The city's efforts will focus America's attention on our precious and historic Constitution, which is the goal of the Commisison. I will look forward to working with Nevada City in the days ahead, to commending the city's residents for their success, and to knowing that my colleagues join with me in acknowledging this very special and well-deserved designation.

## A TRIBUTE TO THE LIA'S 60TH ANNIVERSARY

### HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. LENT. Mr. Speaker, the Long Island Association [LIA] has done more than perhaps any single organization to improve Long Island, NY, as a place to live, work and do business. The LIA is celebrating its 60th anniversary this year, and I'd like to take this opportunity to recognize the LIA's outstanding commitment and many years of service to our communities.

The LIA is the region's largest business and civic organization, bringing together business, labor, government and academia. It represents over 2,000 small businesses, local chambers of commerce, colleges and universities, and trade associations. It was first established in 1922 by a group of businessmen from Kings, Queens, Nassau and Suffolk Counties who formed a regional chamber of commerce with offices in Manhattan. The group was incorporated as the Long Island Chamber of Commerce on July 1, 1926, and over the years evolved into the LIA as we know it today.

I'm proud to be able to say that Long Island is in the midst of unprecedented economic growth and prosperity. Disposable household income is among the highest in the Nation, and our unemployment is the lowest. That is quite an accomplishment, and all Long Islanders can share in the benefits.

The LIA has worked to help create an atmosphere where business can thrive and prosper. More important, this organization has strived to balance this booming economy and at the same time enhance the quality of life Long Islanders cherish.

In addition the LIA has been an advocacy organization at local, State and Federal levels of government. It worked directly with Long Island Members of Congress to protect the deductibility of State and local taxes while improving Federal tax reform legislation for individuals and business.

The LIA has successfully worked to involve all segments of business and the community, bringing the many interests of the region together in a common voice. Those of us who live there appreciate what a unique and special place Long Island is, and we are grateful to the LIA for its dedicated efforts to preserve those qualities and values that make Long Island so desirable.

On behalf of my Fourth District constituents, I'd like to personally thank the LIA and all its members for their many years of dedicated service to our communities and wish them another 60 years of continued success. Thank you.

## A TRIBUTE TO CAPT. WILLIAM GENTLEMAN

### HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. DAUB. Mr. Speaker, I appreciate this opportunity to commend a citizen from Nebraska's Second Congressional District for his exemplary efforts as a paramedic. Capt. William Gentleman, a fire captain from Omaha, NE, has been honored as the top paramedic in the Nation by the National Association of Emergency Medical Technicians. I congratulate Captain Gentleman for his accomplishments, and I want to take this time to inset in the RECORD an article that recently appeared in the Omaha World Herald outlining his contributions.

[From The Omaha World Herald, July 25, 1986]

NATION'S TOP PARAMEDIC, AN OMAHAN, IS SURPRISED

An Omaha fire captain honored as the top paramedic in the nation said Thursday that he was surprised to learn he was even in the running.

"It was quite a shock," said Capt. William Gentleman, who has been a paramedic for seven of his 17 years with the Omaha Fire Department. "By the time this all came about, I thought this was all over."

Gentleman, 38, of 10027 R St., was honored by the National Association of Emergency Medical Technicians. He received the Asmund S. Laerdal Award for Excellence July 12 at a conference in Orlando, Fla. Mayor Boyle announced the presentation of the award during his Thursday press conference.

STILL NOT OVER IT

Gentleman said he knew his name had been submitted as a candidate earlier this year. He said he dismissed the possibility of winning when he learned that the application might have been sent in too late.

He said he did not know he was to receive the award until his name was announced during a banquet at the Orlando conference.

"I still haven't gotten over it," he said. "I don't think anyone thinks they're a winner or even in the running in a national competition."

Gentleman received an engraved crystal disc and $1,000. He said he would use the money to finance his research on improving patient ventillation techniques.

Boyle said the award is presented each year in recognition of a paramedic's contributions to community relations, local involvement in emergency medical service, national contributions, past commendations and letters of support.

Gentleman is a field supervisor for paramedics at the department's station at 35th Street and Ames Avenue.

He instructs new paramedics and teaches cardiopulmonary resuscitation to Omaha firefighters and members of rural and volunteer fire departments throughout eastern Nebraska. He also provides public CPR instruction at community colleges and is an advanced cardiac life support instructor.

ARTICLES PUBLISHED

Gentleman, who has had articles on paramedic and emergency medical techniques printed in national publications, said he traces his desire to be a firefighter back to his family's involvement in public service. His father, John Meecham, is retired Omaha police officer, and his mother, Connie, worked as an administrative supervisor in the city's Law Department.

A brother and sister are Omaha police officers.

"I'm really proud to be a fireman," he said. "I know from being around that we have some of the best people in the nation."

## NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

### HON. LANE EVANS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 5, 1986*

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 4428) to authorize appropriations for fiscal year 1987 for the Armed Forces for procurement, for research, development, test, and evaluation, for operation and maintenance, and for working capital funds, to prescribe personnel strength for such fiscal year for the Armed Forces, and for other purposes.

Mr. EVANS of Illinois. Mr. Chairman, I rise in support of the amendment offered by Representatives BOXER, BRYANT, and SCHROEDER to provide judicial review de novo for military whistleblowers.

Military whistleblowers have played a vital role in uncovering egregious examples of waste, fraud, and mismanagement in the defense establishment. But they constantly face the threat of reprisal and retaliation. While the bill currently permits an investigation of reported retaliations, these investigations are totally "in house." What this means is that the Department that has been accused of misdeeds is the same Department that decides whether or not retaliation has taken place. It acts as defendant, prosecutor, judge, and jury.

Amending this bill to provide for judicial review de novo will allow the military whistleblower who has gone through the "in house" system to petition for court review. The appeals court would then decide whether the whistleblower's complaint of retaliation merited further investigation.

The de novo review is necessary because without it, any court review would have to rely on the record created by the same department whose actions are in question to begin with.

Allowing specified military personnel access to the courts is not unprecedented. Decisions by the Board of Correction of Military Records are already, in certain cases, justiciable before the Federal courts.

Experience has shown us that military whistleblowers provide a needed and unique service. We should not take action which will in reality shut the door on this fruitful channel of information.

I urge our colleagues to pass this amendment.

## FAIRNESS IN COMPETITION ACT OF 1986

### HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. KINDNESS. Mr. Speaker, last week I introduced H.R. 5304, the Fairness in Competition Act of 1986, as a means of addressing the extreme vulnerability American producers experience in the face of unfair foreign competition. No incident highlights this vulnerability more than LTV Corp.'s filing last week for reorganization in bankruptcy.

Foreign governments are in the practice of subsidizing products for export to the United States and our producers are at a distinct disadvantage in the market. My bill would give U.S. industry and labor the right to seek injunctive relief and treble damages against the foreign government, foreign corporation, or other relevant defendant covered under the bill.

The test under a new section 27(a)(2) of the Clayton Act, would be whether the subsidy, first, causes or threatens material injury to an industry or to labor in the United States, second, prevents the establishment or modernization of any industry inside the United States or third, results in monopoly or restraint of trade.

The bill contains language in section 27(b)(1) making it clear that a subsidy by a foreign government is to be considered a commercial activity under the Foreign Sovereign Immunities Act of 1976 (28 U.S.C. sections 1602-1611), so that a foreign government would be unable to avoid U.S. court jurisdiction by arguing that a subsidy was an act of state; that is, a political rather than a commercial decision.

In addition, the definition of subsidy would be amended to include any rebate, repayment or, offset of, or credit against, any tax or tax liability levied or assessed on the value of articles, if such rebate, repayment, offset, or credit is made by reason of the exportation of those articles. This section would address the common practice of rebating the value added tax on products for export.

In this time of large trade deficits and repeated allegations of unfair trade practices for which there are inadequate remedies, I believe workers and unions should have a mechanism, in addition to that used by corporations, which will enable them to assert their right to a level trading plane.

I urge my colleagues to carefully consider this important piece of legislation which will not only provide a genuine enforcement remedy against unfair trade practices, but will send a clear signal to our trading partners that we will not tolerate illegal subsidization of products for export to the United States.

## THE 25TH ANNIVERSARY OF THE ALLEGHENY COUNTY LABOR COUNCIL

### HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. KOLTER. Mr. Speaker, I rise today to call your attention to an important anniversary that will take place in September 1986.

This year marks the 25th anniversary of the founding of the Allegheny County Labor Council. For 25 years, the labor council has served the needs of working men and women in Pittsburgh and Allegheny County. In particular, I would like to commend the labor council leadership for the their fine work in sheparding the council through these very difficult economic times in Western Pennsylvania. Their efforts are to be commended.

Once again, Mr. Speaker, let us recognize the 25th anniversary of the formation of the Allegheny County Labor Council, and wish its members much success in the future.

## PROTECTING THE RIGHTS OF MEDICAID RECIPIENTS SEEKING ADMISSION TO LONG-TERM CARE FACILITIES

### HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. GALLO. Mr. Speaker, today I am introducing legislation to protect the rights of Medicaid recipients seeking admission to long-term care facilities.

This legislation is aimed at protecting Medicaid eligible patients from having to sign private pay contracts as a precondition of admission to a skilled nursing facility and, further, from being denied admission to such a facility if they do not sign the contract.

While serving in the New Jersey State Assembly, I became aware of a problem where some New Jersey nursing homes had been refusing to accept Medicaid or potential Medicaid-eligible patients unless the patient paid at the private pay level for a specific time period under contract with the nursing home.

In response, I introduced legislation, which subsequently became State Law, to prohibit administrators and operators of skilled nursing or intermediate care facilities from requiring incoming patients or their families to sign private pay contracts prior to being accepted as Medicaid patients.

While the prohibition of private pay contracts may well be covered under section 1909(d) (42 U.S.C. 1396h), the State of New Jersey has included an additional provision

which, I believe, is equally important in protecting Medicaid patients from being denied admission to skilled nursing or intermediate care facilities. Specifically, New Jersey Medicaid law prohibits nursing homes from denying admission to Medicaid recipients if that nursing home has a Medicaid occupancy rate below the statewide average. Under these circumstances, the skilled nursing facility is required to accept patients on a first-come-first-served basis. The State Medicaid agency may make individual exceptions to this provision based on the licensed bed capacity of a nursing home or the financial condition of a nursing home.

The legislation I have introduced today will make this latter provision a Federal requirement.

Since the enactment of this legislation in New Jersey, there has been a reduction in the monthly waiting list from 2,303 in September, 1985, to 1,981 in February, 1986. Although the New Jersey Department of Human Services has cautioned that a fuller analysis of the effect of the legislation on the waiting list needs to be made because of a number of interrelated factors, the department has also stated that it is significant that the waiting list dropped below 2,000 persons for the first time since July 1985 and is now at the lowest point in many years.

First and foremost, this bill will increase our Federal efforts to require that admissions policies at certified extended care facilities are fair to Medicaid patients. It will also provide for greater enforcement of the current Federal law that prohibits administrators and operators of extended care facilities from requiring incoming patients and their families to sign private pay contracts as a precondition for admission.

By requiring payment of private rates or denying admission to nursing homes, our senior citizens, poor and disabled individuals and their families have been placed in a tough position at a time when they are already under pressure to make a decision regarding the future of a loved one.

## STETSON F. BENNETT, A GREAT AMERICAN

### HON. ROBERT LINDSAY THOMAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. THOMAS of Georgia. Mr. Speaker, it gives me great pleasure today to introduce to this body a great Georgian and a great American, Mr. Stetson F. Bennett. Mr. Bennett was born and still lives today in the southeast Georgia community of Jesup. Since his birth more than 57 years ago, he has exemplified those beliefs and virtues that have made this country great.

This year, the State of Georgia recognized the leadership, service, and dedication of Mr. Bennett by presenting him with the first-ever award for a clerk of superior court in the State of Georgia. So great is the esteem in which his peers and colleagues hold him, that they have named this new award the Stetson F. Bennett award, which will be presented to the outstanding superior court clerk each year. Mr. Bennett was recognized for the 22 years he has honorably and ably conducted the office of clerk of superior court of Wayne County. He further served an additional 16 years in that office as deputy clerk, for a total of 38 years of public service.

In all those years, Mr. Bennett has been unswerving in his dedication to the people of the State of Georgia. Many lives have been turned around and saved from becoming burdens to themselves, their families, and the State, because of the influence and efforts of Mr. Bennett. He has endured chronic illness and severe pain, but never once has he failed to conduct the service of the court in the most professional and ethical manner.

Mr. Bennett has served his community as president of the Wayne County Chamber of Commerce, secretary and treasurer of the Wayne County Hospital Authority, and as a member of many other boards and civic organizations. He has served his State as president of the Clerks of Superior Court Association of Georgia and as a member and secretary of the State of Georgia Board of Corrections.

He has been an exemplary husband and father and a strong and ardent representative of his religious faith, and he has been a beacon of community leadership. He has dedicated his life to serving his God, his family, and his fellow man.

Mr. Speaker, it is my great pleasure to recognize this great American and to place this tribute to him in the CONGRESSIONAL RECORD.

## AFRICAN DEVELOPMENT

### HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. SCHEUER. Mr. Speaker, the first-ever All-African Conference of Parliamentarians on Population and Development, held in Zimbabwe in May, was cause for great optimism because it demonstrated the growing desire of African leaders to address Africa's excessive rate of population growth.

Another aspect of African development was addressed by Abdou Diouf, President of Senegal and chairman of the Organization of African Unity in late May at a special session of the United Nations devoted to the programs of African development.

Mr. Diouf's speech recounted Africa's woes, acknowledged the mistakes of previous policies, and asked for an additional $100 billion in aid for African over the next 5 years. Mr. Diouf promised that African governments would more wisely spend this aid that has frequently been the practice in the past, and would introduce sound economic policies aimed at successfully promoting private enterprise and development in Africa.

While I found much to admire about Mr. Diouf's speech, I was troubled by two aspects of his statement. First and foremost, we donor nations need to see more than rhetoric and good intentions. In the past, Africa has promised reforms, but failed to deliver. As a proponent of aid to Africa, I could work much more effectively if Africans asked for help after these policies were enacted and after this rhetoric had been translated into action. I think the African people, as well as Members of Congress, feel better about giving money to projects in progress rather than to those that remain continually on the drawing board.

Second, after the optimism fostered by the African conference in Zimbabwe, I was disappointed that Mr. Diouf omitted any reference to population control in his list of goals. Speaker after speaker at the All-African conference documented the premise that rapid population growth exacerbates or causes most of Africa's severest problems.

Population control is a necessary prerequisite to solving the problems that Mr. Diouf plans to address with this new aid. If Africa is, as Mr. Diouf claims, ready to make the hard choices needed to solve its ills, the first should be the politically unpopular, but necessary, resolve to limit its excessive rate of population growth.

Mr. Speaker, today I would like to include in the record a speech given by Edward Jaycox of the World Bank documenting the problems produced by Africa's excessive rate of population growth:

ECONOMIC DEVELOPMENT IN SUB-SAHARAN AFRICA: THE POPULATION DIMENSION

(By Edward V.K. Jaycox)

Mr. Chairman, Your Excellencies and Distinguished Delegates, it is always a pleasure to return to this lovely country and I am particularly honored to have been invited to address this distinguished gathering.

We meet at an especially opportune moment for Sub-Saharan Africa. The region is emerging from one of the worst famines in recent history. Good rains have come to much of the region. Many African governments are now making significant progress in economic reform efforts. Per capita incomes should rise this year for the first time since 1980.

All of this makes 1986 a year of opportunity for Sub-Saharan Africa. Yet it is also a time of enormous challenge because the agenda of unfinished business is formidable indeed.

Low-income Africa is poorer than it was a generation ago in 1960. And though the recent good news interrupts the trend of chronic economic decline, it will not be enough to reverse it. Productivity is stagnant, commodity prices are still very low, the debt burden is serious and growing, and if present trends continue the human disaster of 1983-84 in Sub-Saharan Africa will inevitably return to haunt the world community.

This afternoon I would like to discuss briefly the most important long-term social and economic issue confronting Sub-Saharan Africa: the rampant growth of population. For many countries this issue is the number one problem on the agenda.

How serious is this issue? What are the implications for Africa's economies, for the general well being of your people—those living today and those yet to come? What can be done to deal with the situation?

Numbers can be boring but let me try to put the problem into perspective. First of all, let me emphasize that when we speak of the population problem in Sub-Saharan Africa, we do not mean there are now too many people in the region. In most parts of the region there are not. With about 20 per-

cent of the world's cultivable land but only about 9 percent of its people, density is not the problem in Sub-Saharan Africa either. The problem is that the population growth rate is explosively high in relation to economic growth. It is, in a word, phenomenal—the fastest growth rate of any continent in history in relation to a low rate of GDP growth. In fact, population growth has been more dynamic than the economic development. If the process has been reversed, Africa would be able to absorb a growing population more easily, but it has not.

The introduction of public health measures and vaccinations has reduced death rates, but without parallel efforts to reduce birth rates, overall population growth has accelerated. As a result, Africa's population is now expanding at about 3.1 percent a year.

If this growth rate continues, population would double in 22 years, quadruple in 44 years, and increase eightfold in 66 years.

In the case of Sub-Saharan Africa, the assumptions underlying the standard population projections of the Bank are quite optimistic. For example, it is assumed that the move from high fertility to replacement-level fertility—which took about a century and a half in the United States—will be completed within a much shorter time space in Africa, perhaps 50 to 60 years.

Even if we take these assumptions at face value, despite their optimism, the projections are frankly frightening. By the year 2025—less than 40 years from now—Kenya's population will be four times the size it was in 1980; Nigeria's and Ghana's will have grown more than threefold; the population of Sub-Saharan Africa as a whole will have risen from about 460 million to 1.3 billion. That is, one thousand, three hundred million. And if the assumptions are less optimistic—if fertility falls less rapidly—then the consequences can be catastrophic.

The poor economic performance of Sub-Saharan Africa cannot be blamed on rapid population growth alone, nor will slower population growth solve all its economic problems. External economic shocks, as well as in appropriate domestic policies, have contributed to the region's economic crisis. But rapid population growth is creating severe strains in some countries and, throughout the region as a whole, it is causing a decline in living standards. Thus continuing rapid population growth is a central development problem and the absence, until recently, of specific national plans and programs to deal with the problem has aggravated it.

Allow me to elaborate a bit on just four reasons why rapid population growth is a major development problem.

First, it aggravates the difficult choice between higher consumption now and the investment needed to bring higher consumption in the future. As population grows more rapidly, larger investments are needed just to maintain current levels of both physical and human capital—that is, a person's health, education, and skills. For example, African populations, in addition to growing rapidly, are young. Children less than 15 years of age now constitute about 46 percent of the total population, compared to 37 percent in Asia and 40 percent in Latin America; children under 5 years of age make up nearly 19 percent of the total.

Higher fertility countries also face large increaes in their labor forces and the prospect of mounting unemployment. Between now and the end of the century, industry and agriculture combined will be able to absorb only about half of the projected increase in the labor force. The other half will either have to subsist on marginal land, or be jobless.

A second reason why population growth is a central development problem is the impact on the health of mothers and children. Mothers . . . women represent a seriously undervalued potential in the entire development process. Children, of course, represent the future of that process.

An African mother's chance of illness or death during pregnancy and childbirth are high. Infant and maternal mortality is also high compared to other developing country regions. The reasons are associated with poor health generally and the shortage of medical facilities. However, the mother's age and the number of children she has are also important.

Better spacing and timing of births and reduction in the number of births would help reduce these risks and reduce infant and child mortality as well. In Africa and elsewhere, infant mortality is strongly affected by birth spacing.

Large potential health gains from family planning, now better understood than they were 20 years ago, provide a natural appeal to policy makers and people. Spacing births by two years or more would alone reduce infant mortality by 12-20 percent in much of Africa.

A third reason why rapid population growth is a central development issue is the threat it poses to the natural resource base. Throughout the continent, natural support systems are under growing strain. In country after country sustainable-yield thresholds of forests and grasslands are being breached. The destruction of tree cover in Africa represents one of the most dramatic human alterations of the environment. Nearly every country is affected. One consequence is the severe fuel shortages because of declining wood resources. In Addis Ababa the price of increasingly scarce wood for fuel has risen tenfold during the 1970s and now claims up to 20 percent of household incomes. Soil erosion, the loss of soil organic matter, and the depletion of soil nutrients are diminishing land productivity over much of Africa.

Even where harvests seem to belie erosion problems, soil loss can be serious. Zimbabwe has achieved a remarkable recovery from drought, with last year's harvest estimated to be double the country's requirements. Yet the country's Natural Resources Board estimates that half the communal land farmed by peasants is already severely eroded. By early in the next century, lands now considered good may be unable to produce even subsistence yields. In Ethiopia, Kenya, and in many other countries the stroy is the same.

It points up the failure of Africa to modernize agriculture at a time of rapid population growth. According to an FAD study, Africa's land could in theory support several times the present population at adequate nutritional levels. However, that would entail substantial migration within countries and across borders. It would also require investments in irrigation, new technology, and assistance to small farmers on a scale that is unlikely to be achieved soon. Just to sustain current and inadequate standards of nutrition, agricultural production in Africa should grow at a sustained rate above 3 percent a year for the next 20 years. Improving agricultural policies will help: in some countries that rate of agricultural growth is not impossible. But for the region as a whole, such growth is unlikely. Only a few countries—all outside Africa—have achieved growth rates in agriculture above 3 percent a year for sustained periods.

Each year, Africa's farmers attempt to feed 16 million additional people, roughly 10 times the annual addition of North America or Europe. And they must attempt to do this on a vulnerable land base. But while the yields of wheat, maize and rice have risen modestly, the yields of subsistence staples, including sorghum and millet, have been stagnant or even declining. Food production on the continent has increased primarily by expanding the cultivated area—often unto steep land with unstable soils or into forests whose thin soils are quickly depleted after a few seasons of plowing.

Although essentially agrarian, African countries are losing the ability to feed themselves. In 1984, approximately 140 million of its 546 million people were fed entirely with grain from abroad.

A fourth reason why rapid population growth is an economic problem has to do with the fact that it is creating urban economic and social difficulties that threaten to become unmanageable. By the year 2000 there are expected to be more than 60 cities in Africa with populations of more than one million people—in contrast to only one in 1950 in the continent. Let me provide a few more graphic statistics about the scale of this problem:

Between 1960 and 1980, the populations of Nairobi, Dar-es-Salaam, Lusaka, Lagos, and Kinshasa—to name a few—increased more than sevenfold. Most of the new arrivals moved into shanties. In 1981, Lusaka had 540,000 people, 250,000 of them in squatter settlements or illegal developments. Three quarters of the population of Bangui are estimated to live in spontaneous settlements.

This unprecedented rise in the urban population poses formidable problems of management even to maintain, let alone improve, the living conditions of city dwellers.

In summary, excessively rapid population growth strains every facet of a developing society. It expands the labor force faster than new jobs. It produces burgeoning cities and rings them with slums. It overstrains the food supply and the natural resource base on which food growing depends. It aggravates illiteracy, malnourishment and poor health and it perpetuates poverty.

Even in a vigorously prosperous environment, dealing with such intense demographic pressures is difficult. In the poor, weak economies of Sub-Saharan Africa the task is overwhelming.

What can be done? What is being done?

Fortunately, at least on the surface, the attitudes of Sub-Saharan governments are beginning to change. Almost 40 governments have adopted the Kilimanjaro Program of Action on population. It called on them to ensure the availability of family planning services to all couples and individuals, compared with the mere 5 percent who are actually utilizing such services today.

Most governments in Africa now support slowing population growth, either to achieve demographic targets or for health reasons. But the sad fact remains that health programs are generally weak. Little effort has gone into increasing demand for family planning and the existing demand for family planning information has hardly been tapped. Meanwhile, there is a conspicuous absence of firm political and financial support for specific programs, especially for programs in the Ministries of Agriculture, Education, Youth, and Recreation.

In an environment where the idea of birth limitations is still new, governments must take the lead in encouraging provisions of services, in the private sector as well as by government itself. Equally important, governments must take the lead in promoting the dissemination of information about family planning and developing a social consensus on its legitimacy. In fact, no intervention in this sensitive area is likely to succeed unless it is locally designed and managed in ways which fit with local cultural values.

At the same time, governments need to deliberately avoid monopolizing the actual provisions of family planning services. Heavy government involvement in delivering those services is likely to impose extended demands on strained administrative and financial resources. Governments, therefore, need to develop a distinct African approach, probably involving a deliberate fostering of pluralism. Local governments, communities and private sector initiatives to extend access to family planning services should all be encouraged.

It should note here the significant effort underway by the Government of Zimbabwe—a leader in this area in Sub-Saharan Africa. It has done exceptionally well in the relatively short period since independence. More than one quarter of married women in reproductive age in Zimbabwe are using a modern method of contraception (and over two-thirds of mothers have knowledge of oral contraceptive). Although the detailed results of the 1982 census are not yet available, it is clear that the fertility rate has declined significantly since the previous census of 1969. What are the main reasons for the success in Zimbabwe?

First, increasing female education, urbanization, high per capital income ($740) by African standards, and the high cost of raising a large family have probably increased demand for family planning. Health has also improved; life expectancy at birth is now about 56 years and the infant mortality rate has reportedly fallen significantly.

Second, and most importantly, the Government of Zimbabwe has taken leadership to build a consensus about the legitimacy of family planning. It has frequently expressed its concern about the damage done by rapid population growth. It has maintained and strengthened its programs to deliver family planning services and further strengthening is planned. Unfortunately, most African governments have not been so supportive of family planning. Political support should be continuous.

The cost of providing family planning in Africa is not great in absolute terms, but will not be easily met by domestic resources alone. Including some basic maternal and child health care, the cost ranges between $20 and $50 a year per active user, with average costs falling as services improve and contraceptive prevalence rises toward 20 percent of couples of reproductive age.

A long-run figure of $20 per user implies about $0.75 per capita spending over the population as a whole, assuming about 25 percent of eligible couples use family planning. On health services as a whole, African governments now spend between $3 and $15 per capita. In this context, to achieve spending of $0.75 per capita specifically on family planning within the next decade seems a reasonable goal.

Simultaneously, an increase in donor assistance, not only for family planning but for policy planning, data collection and analysis, census support, and training is necessary for several decades in Africa if family planning is to be a realistic option.

The most important single step that any nation can take to reduce its rate of population growth is to establish a framework—a national plan—within which all of these measures—effective public information programs, dependable delivery systems for contraceptive techniques and services—can be formulated, and against which progress can be evaluated.

The World Bank also has an active role to play in helping address the problem of rapid population growth. The Bank attaches major importance to this key development issue and offers its support in four ways:

First, by helping improve understanding, through its economic and section work and through policy dialogue with member countries, of the consequences for development of faster or slower population growth;

Second, by helping support development strategies that naturally build demand for smaller families, especially by improving womens' opportunities in education and income generation.

Third, by helping supply safe, effective, and affordable family planning and other basic health services focused particularly on the poor in both urban and rural areas; and

Fourth, by responding to growing demand for family planning services, especially in urban areas.

Fifth, by supporting the activities of NGOs in the field of family health.

The Bank views population assistance as a top priority in Africa. Nevertheless, the Bank had by 1982 committed only $35 million in population and health assistance to Sub-Saharan Africa in two population projects in Kenya. In 1983 and 1984, the Bank; however, committed more than $52 million to health projects in Senegal, Malawi, Comoros, Mali, and Botswana; and by early 1986, the Bank had committed an additional $71 million in population and health lending in Lesotho, Nigeria, Rwanda, and Ivory Coast. In the next four years, the Bank intends to begin or expend project in over 20 African countries, amounting to roughly $500 million.

But even this increased level of commitment on the part of the World Bank will not be enough. Given the magnitude of the problem, the increasing requests for population assistance in Sub-Saharan Africa, much more needs to be done—by the Bank, by the African countries themselves, and by the donor community generally. Africans, public and private authorities and NGOs must support and in fact design any specific interventions so that they conform to local cultural and moral values.

The entire donor community must help. And its experience has shown that such services cost relatively little. If more donors and more African countries were each to make minimal adjustments in their budget allocations, the resources would be there to make such services available to more people who want them and need them.

Mr. Chairman, all of us in this chamber today—African parliamentarians and national and international civil servants such as myself—occupy positions of privileged, yet crucial, public trust. In the final analysis our obligation, our duty, is to help lift the yoke of deprivation and poverty that grips far too many people in this part of the world. Excessive population growth makes the task horrendous, if not impossible.

Let us renew our commitment to work together to deal with this awesome problem. It is of human origin and can yield to human remedy. The people have hope but they look to you for leadership and help. Let us work together to provide it.

Thank you.

## WESTLANDS WATER DISTRICT AND DEPARTMENT OF THE INTERIOR SETTLEMENT

### HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. COELHO. Mr. Speaker, I rise today to address a matter which has received considerable press attention and comment in recent days. This matter is the proposed settlement of litigation which is pending before the Federal district court between the United States and the Westlands Water District, which lies within my congressional district.

As many of the Members of the House, and the Senate, will no doubt recall, an agreement was reached during the consideration and formulation of the Continuing Resolution during the first session of this Congress which assured congressional oversight of any settlement. The provision within that Act required that Congress, prior to the submission of the proposed settlement to the Court, have the opportunity to full review the settlement for 30 days. A tremendous amount of negotiation and compromise took place regarding this provision, and I believe that we are now upholding the position of Congress.

In particular, the proposed settlement which was sent to Congress on Thursday, July 24, 1986, by Secretary of the Interior Donald Hodel, is the result of the Court's direction to the parties to attempt to resolve the legal disputes and prevent further lengthy court proceedings, which are costly to the taxpayers, as well as to the other parties in such lawsuits. The proposed settlement, after 30 days before Congress, as required by law, must be submitted to, reiewed by, and approved by the Court. My constituents clearly acted in response to the specific directions of the Court. At the same time, Congress does have the opportunity to fully review the impact and intent of this proposed agreement.

The past several days have been filled with a flurry of newspaper articles and editorials concerning the proposed settlement, as well as an intense lobbying campaign against approval of the proposed settlement. Unfortunately, many of these press accounts and the related statements have either distorted or omitted relevant facts as to the background of this complicated dispute, the legal issues involved, the applicable law, the realities of litigation, and the proper legal process in which to settle such disputes. It is apparent that many have misinterpreted the substance of the proposed settlement. Therefore, Mr. Speaker, I feel compelled to set the record straight.

It should first be noted that this proposed settlement is only a recommendation to the Court to resolve the pending litigation. It still must be accepted by the Court, after additional public input is allowed in the court proceedings. After the determination on the ultimate

settlement and the final decree, as issued by the Court, Congress will again have the opportunity to review the court ruling, just like it would on any other court case. I believe it is appropriate for Congress to review such settlements; however, at the same time, I believe it to be inappropriate to interfere in the judicial process by not allowing a settlement negotiated between two parties to be presented to a judge. In particular, I feel that such legislative directives raise a number of questions regarding separation of powers. It is unjust to mandate that an individual be prohibited from following a court directive. More importantly, such action would result in denying an individual the same rights that are available to any American citizen. The arguments on the proposed settlement should be on the merits of this settlement, which I believe are sound for U.S. taxpayers. But, consideration of this case should also be on the merits for the U.S. Constitution, and the rights of American citizens to use the system of checks and balances between the branches of government.

Mr. Speaker, the proposed settlement which resolves this complex litigation is actually quite straightforward, and more importantly is a benefit to the U.S. Treasury, not the boondoggle, as some proclaim it to be. The proposed settlement contains the following six major terms:

The United States would agree to perform the water service contract that it has had with Westlands since 1963, a contract whose validity has not been challenged. This contract has been approved by the President, by Congress, and by the Court. This contract requires the United States to deliver 900,000 acre-feet of firm water supply at a rate of $7.50 per acre-foot plus the additional drainage service change of 50 cents per acre-foot.

The Interior Department, subject to all requirements of the law, would agree to negotiate a contract with an improvement district created within Westlands, as allowed by the Reclamation Reform Act. This contract will address one of the issues included in the lawsuit and requires that 250,000 acre-feet of water supply be paid for at the current cost of service rate. This provision in the settlement will result in the U.S. Treasury recovering both capital as well as operation and maintenance costs. As a result of this provision in the settement, Westlands agreed to drop its claim within their countersuit that it has a contractual right to this water at the lower fixed price within the 1983 contract.

The method provided for in the 1963 contract for repaying Federal costs for building the San Luis Drain, namely, the 50 cents per acre-feet drainage service charge paid on all water delivered would continue, despite the fact that the United States has not provided such services. This method of repayment was approved in 1963 by President Kennedy, and Secretary of Interior Udall. The Department of Interior Solicitor in mid 1978, however, suddenly reversed Interior's long standing policy and legal position on repayment, thus, changing a 15-year policy. The settlement reaffirms the previous longstanding policy.

As a result of the proposed settlement, Westlands will immediately create a $100 million fund to cost share in future drainage facilities if they are built. In addition, the district is required to put $5 million annually into this fund. More significantly, the proposed settlement in no way obligates the U.S. to build drainage facilities. The settlement only requires the Department of the Interior to prepare a plan for such drainage facilities.

The proposed settlement defines Westlands contractual obligation (which arose well before the enactment of the Reclamation Reform Act of 1982) to fulfill its financial obligations to the United States on moneys spent on the San Luis Unit authorized by Congress in 1977. The settlement requires Westlands to repay this expenditure over a 20-year period, rather than the traditional 40-year repayment period for facilities of this type.

Although I have provided a review of the major provisions of the settlement, I also would like to clarify and correct the incorrect statements that have been made on the settlement and assure that the record is set straight. Opponents of the settlement have maintained that the proposal is a bad bargin for the U.S. Treasury, taxpayers, water and power users. This is a complete misrepresentation of the facts on the settlement, and nothing could be further from the truth.

The Interior Secretary has released economic data clearly indicating that the U.S. Treasury benefits by hundreds of millions of dollars through the adoption of the proposed settlement. In particular, the settlement will produce more revenue for the Treasury than would be generated if the Court ruled in favor of the Department of the Interior on every provision in the pending litigation. This is due to the fact that the settlement results in the Department of the Interior selling water at the full cost of service, therefore assuring the Treasury not only of receiving all operation and maintenance costs associated with the San Luis Unit, but also increased and accelerated recovery of capital costs. It is the result of the proposed settlement that the finanical benefit has been achieved.

The other benefits which favor the Department of Treasury include the requirement that Westlands give up its contractual right to water at $7.50 per acre-foot, and as a result, pay the cost of service (now $16.07) for such water. Westlands also surrendered any claim to an additional water supply at the 1963 contract rate. As outlined in the six major provisions, Westlands is committed to cost sharing for future drainage facilities. This commitment was made despite the fact that there is no legal, binding obligation for Interior to build any additional drainage facilities. Furthermore, the settlement requires Westlands to pay full operation and maintenance costs, if any drainage facilities are eventually constructed. Most importantly to the taxpayer, after long and tedious negotiations, Westlands will be required to continue to pay the drainage service charge even though the San Luis Drain is useless and the United States is not supplying Westlands with any drainage service whatsoever.

Mr. Speaker, in my view, the proposed settlement is an excellent deal for the United States. If there is any objection, it should be from the farmers who have paid for drainage service that no longer exists. The Department of the Interior has failed to provide such drainage facilities, and most recently, prohibited the use of the existing facilities without providing any drainage alternative. Unfortunately, you do not hear the opponents of this proposal citing these facts.

Let me assure my colleagues that nothing in the proposed settlement would violate the Reclamation Reform Act. The facts are that the settlement fully conforms with both the letter and spirit of this act. As a Member of Congress who was a conferee during the formulation of this law, I can report to you that as the law intended, those persons who will receive new benefits, will now be compelled to come under the Reclamation Reform Act, when they receive such benefits.

Mr. Speaker, it has also been contended that the proposed settlement would shift the payment of drainage costs to other water and power users within the State of California. I can fully assure my colleagues that this is not the case. The classification of a project facility as a major project feature or otherwise has nothing whatsoever to do with who bears the burden of paying for it. The features that serve irrigation are paid for by irrigation users who benefit by them. Therefore, Central Valley Project facilities which benefit all water users, such as Shasta Dam, are repaid by all users. Those facilities that benefit only a portion of CVP water users are repaid by those users alone. It is for this reason that the San Luis Unit within the CVP (which includes Westlands Water District, as well as other irrigation districts) has one of the highest water rates in the Central Valley Project. These facilities are costly, and include the cost of the San Luis Drain. However, they only benefit those districts within the San Luis Unit and must be paid for exclusively by those districts. Under long established reclamation law, the costs of those facilities can only be shifted to other water or power users only if the users in the San Luis Unit do not have the ability to repay such costs. Without a doubt this scenario will not occur, Westlands has the ample repayment ability and is able to cover all costs assigned to it.

Mr. Speaker, I know that some of my colleagues have expressed their particular concern that the proposed settlement would result in providing for preferential treatment to the Westlands Water District for the allocation of additional CVP project water. Again, this is not true. The proposed settlement does not recognize any additional water right for Westlands. Consistent with law and prevailing Bureau of Reclamation water marketing policy, the settlement only acknowledges that the Bureau may negotiate for additional water service at full cost of service rates, in the same manner that they would for any other water district.

Recently, newspaper editorials criticizing the settlement were circulated to House Members. I think it is important that we recognize that there are two sides to this story. I believe my comments will clarify the provisions of the settlement. However, I would also like to provide the response to those editorials for your additional information, and have them reprinted in the RECORD.

Finally, as I am sure my colleagues will agree, a settlement by its very nature cannot be an all or nothing proposition. If either side received all that they wanted, there would be

little incentive to reach an agreement. Such is the case with this litigation. Neither the United States nor Westlands will get all that they want through this settlement, but both parties will receive far more than they would if the litigation continued. The settlement is a good deal for all concerned, and it should be approved.

WESTLANDS WATER DISTRICT
*Fresno, California, August 2, 1986.*

Editor,
*The Washington Post,*
*1150 15th St. N.W.,*
*Washington, DC 20006.*

SIR: Your editorial "Carrying Water" (July 30, 1986), simply doesn't hold water. It ignores a number of salient facts, and even contradicts itself. It's small wonder your conclusions are so far off base.

You acknowledge, correctly, in the first paragraph that Westlands "was long ago given the right to buy 900,000 acre-feet of federal water a year at a low price." Moreover, the validity of that 1963 water contract has never been disputed in this litigation.

In view of this long-standing contractual right, how can you logically complain that the proposed settlement would require Westlands to pay "a higher price only for the rest" of its water? As a matter of fact, if this issue had to be settled in a lengthy and costly court trial, it is entirely possible that Westlands would pay that same "low" price for all its water. This leads to a second fallacy in your editorial.

Westlands did not simply expand and "claim" the right to buy additional water at the same price of $7.50 per acre-foot plus 50-cents for drainage service. In 1964, former Assistant Interior Secretary Kenneth Holum, in a memorandum approved by then Secretary Stewart Udall, proposed that Westlands, which consisted of about 400,000 acres, merge with an adjoining district, the 200,000-acre Westplains Water Storage District. This memorandum became the blueprint for actions by both Westlands and Interior over a 14-year period, from 1964 to 1978.

The Holum memorandum said that if the two districts merged and took over the costs of operating and maintaining the Pleasant Valley Pumping Plant and Canal, the United States would commit the remaining yield of the San Luis Unit of the Central Valley Project to serve the former Westplains area and provide that additional water at the same price charged in the 1963 contract.

The two districts were merged in 1965, the United States proceeded to build water distribution facilities throughout the 600,000-acre area and deliver water on those terms. Landowners with holdings in excess of the federal acreage limitations entered into formal contracts with the United States to sell their excess acreage under the requirements of the law in return for the right to use project water. However, the terms of the Holum memorandum were never formalized in a specific contract.

In 1978, the United States for the first time repudiated the commitments of the Holum memorandum and began to demand higher prices for water based on two novel legal theories by the Interior Solicitor at that time, Leo Krulitz: First, he said that only the area designated on a map attached to the 1955 feasibility report on the San Luis Unit could receive project water, despite the fact that the 1962 definite plan report and the 1963 contract provided otherwise, and despite the fact that the United States itself had constructed water distribution facilities, delivered water and entered into excess land contracts throughout the larger area. (The 156,000 acres Krulitz would have eliminated is not the former Westplains area; it consisted of land along the eastern and western portions of Westlands.)

Second, Krulitz said that the method of repaying the costs of the San Luis Drain was not valid, despite the fact that it had been approved by his predecessors. (It was not a matter of *whether* Westlands repaid its share of Drain costs, but only *how*.) Consequently, Interior took the position that the 1963 contract, while valid, could not be implemented until it was amended in these two respects, and demanded a higher price for all the water delivered to Westlands. Where was the "fairness" in all this? Needless to say, these actions led to litigation, commencing in 1979.

It's easy to sneer at a price of $7.50 per acre-foot, but it's a fact that this is among the half dozen highest agricultural water rates in the entire Central Valley Project. A handful of contracts have a price of $8.10. By way of contrast, the Contra Costa Water District pays only 50-cents to $2.00 for its agricultural water. (Some 220 CVP contracts covering nearly 5.5 million acre-feet specify rates of $3.50 or less.)

Furthermore, Westlands has accounted for better than 90 percent of the total capital repayment of the entire CVP ($36 million out of $39 million) as of the end of the last fiscal year, even though Westlands receives only 25 percent of the CVP water. Again by way of contrast, the Contra Costa Water district has accumulated a capital repayment deficit of more than $750,000 and is adding to that deficit at the rate of $5.32 on each acre-foot it receives. Would you like to comment on the "fairness" of this situation?

In regard to application of the 1982 Reclamation Reform Act, your editorial fails to distinguish between future or renegotiated water contracts, on the one hand, and settlement of disputes over existing contracts, on the other. The 1982 Act specifically provides that the new pricing requirements do not apply to existing contracts. This isn't language invented by Westlands, this was the collective judgment of Congress. Isn't it a little unfair for you to insinuate that the proposed settlement, by some convoluted reasoning, is a new contract? Or have you adopted the rationale of some of Westland's critics that regardless of the facts, the law and "fairness," a way must be found to punish Westlands for its alleged misdeeds?

You may be interested to know that some 120 farmers and landowners in Westlands already have made individual elections to become subject to the acreage and pricing provisions of the 1982 Act. This means that more than 90,000 acres are subject to the higher prices required by that law, including about 9,000 acres for which the subsidy is removed by the "full cost" formula. We expect, based on our contracts with farmers, that 70 percent of the District will be subject to the 1982 Act within the next year. This would mean that about a third of the 900,000 acre-feet of 1963 contract water would be subject to a rate sufficient to cover full operation and maintenance costs.

Speaking of fairness, Congress in 1982 also decided that the "large commercial users" who you feel do not need or deserve a subsidy, should be treated the same as others; that is, that they are entitled to the subsidy on water for the first 960 (in some cases, 320) acres. Bear in mind that the U.S. Supreme Court, in its landmark decision on the constitutionality of acreage limitations, justified acreage limitations because of the subsidy.

Your editorial also makes the sweeping generalization that "among agricultural water users particularly, a lot of water is also wasted." We can agree this is the case in specific instances, but we resent the implication this is the case in Westlands. For your information, the average irrigation efficiency (a comparison of the amount of water required by the crops with the amount applied) ranges from 80 to 88 percent in Westlands, depending upon the vagaries of weather. This is considerably above the 50 to 70 percent considered normal for agriculture.

Finally, is it really "fair" to complain that the proposed settlement does not address specific solutions to the drainage problems? If you had done your homework, you would know that there are no ready-made answers, but both Westlands and the Interior Department, as well as other agencies, are devoting an immense amount of time, effort and money to find solutions which are both environmentally acceptable and economically feasible. Since there are no pat answers, how can the subject be addressed in the proposed settlement?

By asking a few simple questions you also would have learned that in addition to the $5 million per year contribution to the trust fund for upfront cost-sharing for any future federal drainage projects, Westlands is developing its own $6.6 million program to construct and operate prototype facilities for drainage water treatment and disposal.

We would have preferred to give you all this information before you published your editorial. We hope, in all fairness, that you will give us an opportunity to discuss your questions and concerns before you do any further editorializing.

Sincerely,

JERALD R. BUTCHERT,
*Manager.*

## SAVED BY THE BELT

### HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. DINGELL. Mr. Speaker, there is no doubt that increased use of seatbelts by the driving public has prevented thousands of fatalities and injuries on our Nation's highways. The rate of highway fatalities per 100 million vehicle miles traveled appears to be the lowest in history. Had highway deaths occurred in 1985 at the rate as in 1966, when the U.S. Department of Transportation was established, more than 97,000 lives would have been lost in 1985, instead of the estimated 43,800.

A significant factor contributing to reducing highway deaths and injuries is increased seatbelt use. More people are buckling up than ever before. This is because of a growing public awareness of the benefits of seatbelt use and the fact that 26 States, plus the District of Columbia, have passed mandatory seatbelt use laws.

The State of Michigan approved a mandatory seatbelt law a little over a year ago. As a result, more Michigan citizens are wearing seatbelts and fewer people are dying on roads and highways. Because of the success of Michigan's seatbelt use program, the Detroit Free Press initiated a "Saved by the Belt" contest to encourage individuals saved by seatbelts to let the public know the circumstances of how seatbelts have saved their lives. The five most inspiring of these accounts were published in the July 28 edition of the Free Press. In fact, the Free Press includes a "saved by the belt" story submitted by one of my constituents, David Shrewsbury, of Trenton, MI, who—because he was wearing seatbelts—lived through a collision where his vehicle was rear-ended by another car traveling over 100 miles per hour. I urge my colleagues to review these revealing accounts and to consider the critical need to "buckle up" and to encourage others to do the same.

GRATEFUL TALES OF SURVIVAL—FOR MANY, "SAVED BY THE BELT" REPRESENTS ADVICE THEY LIVE BY

"Saved by the belt."

The phrase has been used so many times for traffic safety campaigns that some people believe it is worn out.

No doubt it's a tired line to the 56 percent of Michiganders who refuse to buckle up.

But for the 102 people who sent seat belt stories to our "Saved by the Belt" contest this month, those words are anything but trite. Instead, the words have taken on an unforgettably visceral meaning, tinged with remembered fear, shock, and eventual relief, after the letter writers were saved from death or serious injury is some truly horrendous traffic accidents.

In each case, writers gained life-long respect for seat belts—and in many cases, lifelong memories of others involved who weren't wearing belts, and weren't so lucky.

This month marks the one-year anniversary of Michigan's seat-belt law, a fitting time to approach those who continue to ignore it, not with cold statistics or safety cliches, but with real-life experiences of readers across the state. Here's hoping their words will inspire all of us to drive safely and to buckle up kids, companions and ourselves.

It was a tough job choosing the best from among so many gripping tales, many with police reports, news stories and dramatic photos attached. My cojudge was Connie Soma, executive director of the Lansing-based Michigan Coalition for Safety Belt Use, which led the drive for passage of Michigan's seat-belt law.

Soma's group is awarding $100 to the first-place winner, $50 to second-place. The Free Press is providing third, fourth, and fifth-place plaques. And we're mailing to every entrant a "Saved by the Belt" certificate signed by Secretary of State Richard Austin.

Did Austin really sit down and sign all those certificates? "Oh, yes I did," he told me last week, adding, "I don't send this type of thing over to the signature machine. I take it very seriously. I've believed in belts as long as I've been in office. It's just what you do in an airplane. Why not in your car?"

Why not, indeed? The following winning stories, edited for space and clarity, answer the question well.

FIRST PLACE

Janice Davies, 36, Utica

Buckling up in our household is automatic. We hope that by this testimony, it becomes so in yours.

On a sunny autumn day, Oct. 2, I had worked in the morning and picked up Matthew, age 5½, from kindergarten. Matthew kept undoing his seat belt so that he could stand up behind me and talk from the back seat as we drove to a friend's home to drop off a basket. At our stop, the lady gave Matthew a small bag of cookies. We set off for home to get our lunch, both wearing seat belts. Matthew was now sitting quietly, munching away.

I was driving my first new car, which I'd received for my birthday the previous spring. A mile from home, I entered an intersection. I had a green light but slowed down a bit, so I must have been traveling 35 or 40 miles an hour. Out of the corner of my eye, I saw a car picking up speed and coming right at me. I tried to hit the brakes, but I don't know if I ever did. I remember thinking, "Oh, no! This can't be happening to me!" I never lost consciousness, but the next thing I remember was looking out the shattered windshield with the hood of our car right up against it.

Matthew was screaming. My door wouldn't work, so I crawled across to the passenger side and we managed to get out. We sat down in the dirt on the curb and I checked Matthew over: no blood and nothing obviously broken, but a very hysterical child.

Matthew was crying and pointing to our car, saying, "Mommy, it's all broken." The impact had moved the entire engine over to the passenger side. The back end was smashed up where we were hit a second time. Even the roof above my seat was dented in.

Within minutes a police car and ambulance arrived. I watched a paramedic look into the other car. When he opened the door, Matthew and I could see a white-haired lady lying on the floor. She was taken to Crittenton Hospital in Rochester and died shortly afterward. She had not been wearing a seat belt.

The paramedics came over to us next. My left arm was sore but moving. There was a raw, red mark on Matthew's stomach where the seat belt had held him. I had raw marks on my neck and across both hips, and a bit of a shiner in the corner of my left eye—Matthew said he remembered seeing me fly forward and just catch the edge of the rear-view mirror.

I'd had a coffee cup sitting on the floor. We later found it jammed up under the dash. My husband had to pry it out, but it came free in one piece.

If that had been Matthew or me, I don't believe we would've come out in one piece. My husband and I thank God and believe that without seat belts my accident would have resulted in death or very serious injuries to Matthew or myself.

SECOND PLACE

David Shrewsbury, 23, Trenton

On April 2, while traveling near Wyandotte, I was hit in the rear by a car traveling about 100 m.p.h. (verified by police).

I heard the crash and realized I had been hit. My car, which was so new I hadn't even gotten the payment book for it, began to spin and left the ground. I was buckled up, so I gripped the steering wheel and held on.

Witnesses said I was four to five feet off the ground, flipping end over end. The car came down on the top, still spinning and sliding.

About a block from the initial impact, it hit the curb and began flipping over again, coming down this time on the grass and across the sidewalk.

I opened my eyes to see all the glass shattered, the dash collapsed and my space very restricted. I unbuckled my seat belt and forced the driver's door open with my shoulder. I fell out face down, trying to get away in case there was an explosion.

People who had gathered advised me not to move. The police took a report, then I was taken by ambulance to Riverside Hospital in Trenton, where I was treated for a concussion, minor cuts and bruises, and released. The next day, the doctors determined that I had neck, back and wrist injuries for which I am still being treated, and I expect to fully recover.

My new car was totaled. Had I not been wearing my safety belt, there is little doubt it would have been a fatal accident. It's a good law!

THIRD PLACE

Kristin Long, 17, Midland

On March 8, I swerved to miss a car which stopped suddenly in front of me. I hit the curb, lost control of my dad's car and hit another vehicle head-on.

At first, I didn't know what was going on. I thought I was bleeding, because I could feel liquid running down my face. The "blood" turned out to be tears. I can hardly recall what went on, but I figured that people in the other car must have been hurt badly.

(In fact, the other car held two other teenagers, both wearing seat belts. Both walked away from the accident.)

Several witnesses stopped to help us. Soon, the police and an ambulance arrived. On the way to the hospital, a paramedic said the only reason I wasn't dead was the seat belt I had been wearing.

Doctors found no serious injuries, so I was released from the hospital. For several days, every bone in my body hurt, and the same message kept coming back to me—if my parents hadn't been kind of fanatical about seat belts, I probably wouldn't have worn them.

My parents come up with some pretty strange ideas sometimes . . . but I know that their insistence on seat belts saved my life.

FOURTH PLACE

Miriam Duffy, 37, Romulus

Several weeks before the state law went into effect, my husband, Joseph (57), and I decided to start wearing our belts, to "get used" to the feel.

On Aug. 20, wearing belts saved our lives. It was only 12 days after my husband's release from Oakwood Hospital after suffering a heart attack. He wasn't allowed to drive, so I was driving at the time.

We were less than a mile from our destination. As we approached (an intersection), I observed the light turning green and three vehicles ahead going through the intersection. I continued through.

Suddenly I heard the most horrible sound I've ever heard. I never even saw the car that hit us until it was over. I remember hitting the steering wheel and then being pulled back as the seat belt locked. I remember the car being moved around like a bumpy carnival ride.

When we finally came to a stop, I noticed there were two other cars besides mine in-

volved. I remember the driver of the car that hit us climbing out of his sunroof (opening). The cover had flown off.

To my surprise, he picked up the sunroof and started coming at me, calling me names that are unprintable. From somewhere else came a man who was yelling for him to stop—that he was the one who ran the red light. At this point, the driver turned to his girlfriend, who was lying on what was left of the front seat. She was bleeding from her forehead. She had hit the windshield. Neither of them had been wearing a belt.

The young girlfriend (age 18) was taken to the hospital, where she died from a closed-head injury. The driver and passenger of the third car were both wearing belts and had no visible injuries. My husband and I had no visible injuries either.

The police verified that the driver who hit us was traveling 50 m.p.h., and we were traveling 35 at impact.

That night, my husband was seen by a physician who pronounced him "fine and damn lucky." After many tests, I learned that I had ruptured a disc in my back—a painful reminder but very small price for wearing the belt that saved my life!

FIFTH PLACE

Rheuby Carmichael, 58, Detroit

I'm (a) 58-year-old grandmother who did not wear a seat belt until it became law. I hated the idea. But I am a law-abiding citizen, so when it became law I started buckling up.

On Nov. 8, I was in an accident involving two other cars that totaled my car. One car ran a stop sign, hit another car and knocked it head-on into me, as I had come to a complete stop at the intersection. Two people were injured, including myself.

The assisting officers said if I had not had my seat belt on, I would have been thrown through the windshield. I only received a fractured left wrist, shoulder and side bruises.

God is so good to touch my mind to wear the seat belt. It has become as important to me as turning on the ignition or buying gas for the car.

## THEODORE ROOSEVELT MESSAGE ON FEDERAL RESPONSIBILITY RECALLED

### HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. FLORIO. Mr. Speaker, occasionally it is desirable to step back from the turmoil of current events and view them in historical perspective.

Some 80 years ago, in his fifth annual message to Congress, President Theodore Roosevelt set forth a philosophy regarding the responsibility of private economic power to the public that still deserves study. He was particularly forceful in advocating the responsibility of the Federal Government because, he said, "Experience has shown conclusively that it is useless to try to get any adequate regulation and supervision of these great corporations," operating on an interstate basis, "by State action." Later in his message, the President elaborated this point in the context of the insurance business. In light of the current crisis in the availability of insurance and the renewed debate regarding the adequacy of State regulation to deal with the crisis, President Roosevelt's comments take on renewed relevance.

Mr. Speaker, while today's problems are not the same as yesterday's and while there are few today in positions of authority who would deal with this subject in the manner of Theodore Roosevelt, his approach provides food for thought and I commend it to the attention of the House.

FIFTH ANNUAL MESSAGE

WHITE HOUSE, *December 5, 1905.*

The great insurance companies afford striking examples of corporations whose business has extended so far beyond the jurisdiction of the States which created them as to preclude strict enforcement of supervision and regulation by the parent States. In my last annual message I recommended "that the Congress carefully consider whether the power of the Bureau of Corporations cannot constitutionally be extended to cover interstate transactions in insurance."

Recent events have emphasized the importance of an early and exhaustive consideration of this question, to see whether it is not possible to furnish better safeguards that the several States have been able to furnish against corruption of the flagrant kind which has been exposed. It has been only too clearly shown that certain of the men at the head of these large corporations take but small note of the ethical distinction between honesty and dishonesty; they draw the line only this side of what may be called law-honesty, the kind of honesty necessary in order to avoid falling into the clutches of the law. Of course the only complete remedy for this condition must be found in an aroused public conscience, a higher sense of ethical conduct in the community at large, and especially among business men and in the great profession of the law, and in the growth of a spirit which condemns all dishonesty, whether in rich man or in poor man, whether it takes the shape of bribery or of blackmail. But much can be done by legislation which is not only drastic but practical. There is need of a far stricter and more uniform regulation of the vast insurance interests of this country. The United States should in this respect follow the policy of other nations by providing adequate national supervision of commercial interests which are clearly national in character. My predecessors have repeatedly recognized that the foreign business of these companies is an important part of our foreign commercial relations. During the administrations of Presidents Cleveland, Harrison, and McKinley the State Department exercised its influence, through diplomatic channels, to prevent unjust discrimination by foreign countries against American insurance companies. These negotiations illustrated the propriety of the Congress recognizing the National character of insurance, for in the absence of Federal legislation the State Department could only give expression to the wishes of the authorities of the several States, whose policy was ineffective through want of uniformity.

I repeat my previous recommendation that the Congress should also consider whether the Federal Government has any power or owes any duty with respect to domestic transactions in insurance of an interstate character. That State supervision has proved inadequate is generally conceded. The burden upon insurance companies, and therefore their policy holders, of conflicting regulations of many States, is unquestioned, while but little effective check is imposed upon any able and unscrupulous man who desires to exploit the company in his own interest at the expense of the policy holders and of the public. The inability of a State to regulate effectively insurance corporations created under the laws of other States and transacting the larger part of their business elsewhere is also clear. As a remedy for this evil of conflicting, ineffective, and yet burdensome regulations there has been for many years a widespread demand for Federal supervision. The Congress has already recognized that interstate insurance may be a proper subject for Federal legislation, for in creating the Bureau of Corporations it authorized it to publish and supply useful information concerning interstate corporations, "including corporations engaged in insurance." It is obvious that if the compilation of statistics be the limit of the Federal power it is wholly ineffective to regulate this form of commercial intercourse between the States, and as the insurance business has outgrown in magnitude the possibility of adequate State supervision, the Congress should carefully consider whether further legislation can be had. What is said above applies with equal force to fraternal and benevolent organizations which contract for life insurance.

## DISTRIBUTION OF SURPLUS CHEESE

### HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. VENTO. Mr. Speaker, I would like to call the attention of my colleagues to a bill which I introduced the last week of June, H.R. 5145. This legislation would provide for a substantial reduction in Government storage costs while at the same time, release cheese to feed hungry people.

Currently there are approximately 600 million pounds of surplus cheese being stored, transported, and reprocessed, all at the expense of the U.S. taxpayer. For storage alone, this amount nears the $50 million mark. In April, along with over 60 of my colleagues, I sent a letter to Secretary of Agriculture Richard Lyng requesting that he increase the distribution of surplus cheese to needy individuals. I received a response from the Department stating that the current distribution level is balancing the needs of the hungry with the possible occurrence of commercial displacement.

Mr. Speaker, the fact of the matter is, that in Minnesota as well as in a number of other States, the needs of the hungry are simply not being met under the current distribution level. When we have 600 million pounds of surplus cheese sitting in Government warehouses, we should not be turning away hungry people from empty commodity distribution sites.

We have before us an opportunity to accomplish a dual good. In adopting my legislation, we assure struggling dairy farmers a market for their product, and at the same time, we assure struggling poor families of a quality source of protein. The Commodity

Credit Corporation [CCC] has received strong support in the past from both rural and urban Members of Congress because of the dual purpose it serves—providing a guaranteed market for the farmer's product, while at the same time, generating commodities for schools, institutions, food banks and food shelves.

I understand the need to spend Federal dollars to purchase these commodities. What I do not understand is spending taxpayer dollars to store 600 million pounds of cheese for a number of years and I do not understand spending taxpayer dollars to reprocess the cheese to prevent it from rotting because it is stored for an average of 2.5 years. All of this, while food banks and commodity distribution sites run out of cheese by month's end as the long lines continue at food banks across the Nation.

H.R. 5145 would amend the Temporary Emergency Food Assistance Act by requiring that excess cheese held by the CCC be made available to States at the request of the Governor of that State. There is general agreement that if the individuals receiving these commodities are truly in need, commercial sales will not be displaced. This legislation requires that this need be documented before the commodities are released.

Under the Food Security Act of 1985, it is hoped that CCC inventories will be reduced. However, the advent of bovine somatotropen, or bovine growth hormone, means that the Nation's already overproductive cows will soon be able to produce from 10 percent to 40 percent more milk at little extra cost to the farmer. Until dairy production is brought into line with demand, let us reduce Government storage costs and feed hungry people.

In these days of ever tightening Federal budgets, it is mandatory that we carefully spend every Federal dollar. This should include reducing Government storage costs and supplementing our food assistance programs by releasing cheese that by law must be purchased by the Federal Government.

I invite your cosponsorship of H.R. 5145. The text of the bill follows:

H.R. 5145

A bill to amend the Temporary Emergency Food Assistance Act of 1983 to require that excess cheese held by the Commodity Credit Corporation be made available, at the request of the chief executive officer of a State, upon a showing of need, and without charge, for distribution by eligible agencies in the State

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by inserting after section 202 the following new section:

"AVAILABILITY OF CCC CHEESE

"SEC. 202A. Notwithstanding any other provision of law, cheese acquired by the Commodity Credit Corporation that is in excess of quantities needed for the fiscal year to carry out a payment-in-kind acreage diversion program, maintain United States share of world markets, and meet international market development and food aid commitments, shall be made available by the Secretary of Agriculture (hereinafter in this Act referred to as the 'Secretary'), at the request of the chief executive officers of the various States, upon a showing of need by such officers, and without charge or credit in such fiscal year, in a useable form, for use by eligible recipient agencies in such States.".

## DR. JOHNNIE MAE BROWN HONORED FOR COMMUNITY SERVICE

### HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. CONYERS. Mr. Speaker, I would like to call my colleagues attention to the work Dr. Johnnie Mae Brown, ordained minister of the Joseph Compeau Avenue Church of God in Detroit, MI, where she serves as associate pastor alongside her husband, Rev. Otis F. Brown. I had the occasion to present her with a proclamation on Sunday the third of August 1986, during a service at the church, at which time, Dr. Brown was recognized for her many accomplishments as both a religious and community leader. I would like the text of that proclamation to be included in the RECORD.

U.S. HOUSE OF REPRESENTATIVES, FIRST CONGRESSIONAL DISTRICT OF MICHIGAN, PROCLAMATION IN RECOGNITION OF DR. JOHNNIE MAE BROWN

Whereas, Dr. Johnnie Mae Brown is honored today for her untiring dedication to the Church community and the community-at-large; and

Whereas, Dr. Brown began her ministry in 1953, was ordained ten years later, and with her husband the Reverend Otis F. Brown organized the first black Churches of God in the states of Washington and Oregon; and

Whereas, Dr. Brown currently serves as the Associate Pastor of the Joseph Campau Avenue Church of God in Detroit but is also in great demand as an evangelist throughout the United States and Canada; and

Whereas, Dr. Brown has broken new ground in the Church of God by being elected to the Presidency of the Detroit Metropolitan Area Ministerial Fellowship in 1985, the first woman to serve the Church in this position; and

Whereas, Dr. Brown's work has emphasized the education of young people in the Church, leading her to participate in numerous youth camps and conventions, as well as rearing five children of her own; and

Whereas, Dr. Brown strongly believes in the importance of the family unit, not only with her children but in doing God's work alongside of her husband, who is the Pastor of the Joseph Campau Avenue Church of God.

Therefore, be it resolved, that Dr. Johnnie Mae Brown be commended this third day of August, 1986 for her devotion to her family, her Church, and her world.

JOHN CONYERS, Jr.,
*Member of Congress.*

## THE TEXTILE AND TRADE ENFORCEMENT ACT

### HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. SYNAR. Mr. Speaker, I have tried my best to stay out of the fight over the Textile and Trade Enforcement Act. But I'm afraid my best just wasn't good enough.

I voted today to override President Reagan's veto of H.R. 1562 because empty rhetoric will not solve our trade deficits. I regret that we fell a few votes short of the two-thirds majority that is necessary for a veto override.

I'll be honest: This is bad legislation. But the alternative is worse. What is the alternative? It is more of the rollover-and-die trade policy of the Reagan administration.

I voted against H.R. 1562 when the House approved it in October 1985. Free trade is the best trade policy. I believed the administration when they assured us that we'd see improvements in the trade deficit.

As early as 1980 President Reagan told us he would "pursue a vigorous export promotion policy, remove barriers to U.S. investment, provide expanded incentives for export, and renegotiate outmoded and obsolete trade agreements."

On Tuesday—6 years after the President promised action—U.S. Trade Representative Clayton Yeutter called and promised essentially the same.

We can't wait any longer. We face the largest trade deficits in history. The administration has talked a good game, but the results aren't there.

Textile imports have doubled since 1981 and now comprise more than 50 percent of the market. Nearly 400,000 jobs have been lost—equivalent to the population of Tulsa, the largest city in northeastern Oklahoma—280 textile plants have closed as a result of foreign imports.

These numbers paint a picture that is disturbingly similar to my district. Plants have closed because of imports in the tire and glasswares industries; oil industry workers are unemployed and unable to find work.

Mr. Speaker, I cannot continue to rely on the empty rhetoric of the administration. We need action. And it's important to stress that the textile industry is only one of many that is hurting. In Oklahoma, the world economy has severely undercut our two major industries, agriculture and oil and gas.

We can no longer pretend there is no trade problem. American industry needs immediate relief.

## ROB SCRIBNER'S "WORKING TOGETHER IN CALIFORNIA"

### HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. DANNEMEYER. Mr. Speaker, one of the most heartening new developments that I

have seen in a long time has been underway all this year in southern California. It is a practical program that meets community needs without raising taxes and it sets a precedent that could be profitably emulated elsewhere.

In the fall of 1984, Rob Scribner, a man experienced in tackling tough problems as a former Los Angeles Rams player, and a successful businessman, decided it was time to demonstrate the practicality of private alternatives to costly government programs. He set up Working Together in California as a private nonprofit corporation, gathered around him a core group of enthusiastic volunteers, and set out to show what can be accomplished by organized voluntary action.

Within a few months, Working Together volunteers were reaching out from suburbs such as Pacific Palisades and Santa Monica and pouring into Los Angeles innercity teaching literacy skills, feeding the hungry, and recruiting people to serve the whole array of innercity nonprofit human care agencies. Mr. Scribner has the energy to undertake this enormous effort because of his conviction that America must rely less on government programs and more on volunteer action to cope with social problems.

WORKING TOGETHER LITERACY WORKSHOPS

The Working Together literacy workshops focus on the need to reemphasize the teaching of basic literacy skills, reemphasize parental responsibility in this process, and return to a truly phonetic teaching method. They have done this with a remarkably effective method called sing, spell, read, and write, which was developed by a talented school teacher named Sue Dickson, and promoted by Pat Robertson of the 700 Club and CBN University. The sing, spell method makes phonics fun with songs and games and teaches independent reading ability in 36 beautifully coordinated steps.

Working Together is offering a 3-hour videotaped "Literacy Training Workshop" to teachers, parents, and would be volunteer tutors at schools, churches, and social agencies all over southern California. It's always presented free of charge, always accompanied by a Working Together volunteer, and often promoted via flyers which are printed in both English and Spanish. The program has proven to be successful. By the time students from Selma, CA, had completed the 36 steps in the Sing, Spell Program, average student scores shot from 84 percent below the national norm in reading to an astonishing 96 percent on or above it.

FEEDING THE HUNGRY

Since 20 percent of all food produced in this country is wasted—enough to feed 49 million people, there is enough food already being produced to eliminate hunger in the U.S.A. This nutritious food, however, cannot find its way from the farmer to the hungry without an effective food bank organization staffed by volunteers. Working Together is seeking to speed up the process to mobilize and organize more people to get involved in food distribution. The Working Together Program asks recipients to pay $15 a week, which covers the actual costs of operating the food bank, for $60 to $70 worth of food. Rob Scribner is helping to build a network of southern California pastors who believe the church should assume responsibility for helping to feed the poor in their communities.

RECRUITING 5,000 VOLUNTEERS

While Working Together has attracted the most attention for its feeding and literacy programs, it is just as committed to stepping up the recruiting of volunteers for the whole array of some 3,000 nonprofit human care agencies in southern California. While working with other volunteer organizations in the southern California area to disseminate information about volunteer job opportunities, Working Together has set a goal of recruiting 5,000 new volunteers to serve the nonprofit agencies in southern California.

Rob Scribner, as president of Working Together, should be enthusiastically commended for all that he has done to increase human services without cost to the taxpayer. In addition, Charles Hull Wolfe and Rev. Luther B. Keith, the cofounders of Working Together, and Working Together's administrator, Monique Schmidt, deserve recognition for their outstanding contribution. But most of all, the hundreds of Working Together volunteers deserve special thanks for their commitment to the tradition of voluntarism that made this country great.

## ADMIRAL ALAN SHEPARD: A SPACE PIONEER

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. KEMP. Mr. Speaker, I want to call attention to the accomplishments of a man who helped catapult the United States into the space age 25 years ago, Adm. Alan B. Shepard, Jr. As the first American in space, he proved that the United States could send a man into space and bring him back to Earth safely. Ten years later, Alan Shepard, as commander of the Apollo 14 mission, became only the fifth man to walk on the Moon.

Since his retirement from NASA in 1974, Alan has staunchly supported America's space program and our efforts to generate new technological breakthroughs, such as SDI. I applaud and support his hard work and commitment to space exploration, so vital to our Nation and the free world.

The following article deserves the attention of the Congress and I ask that it be included in today's RECORD for all Members to see. We owe Admiral Shepard and all our astronauts a great deal of gratitude.

Mr. Speaker, I'm proud to be a friend of Alan, his dear wife Louise, and their wonderful family.

SHEPARD SKY HIGH ON NASA

(By Jim Watson)

Adm. Alan B. Shepard Jr., sporting a braided gold necklace and a golfer's tan, leans back in his chair and takes another gulp from a bottle of St. Pauli Girl beer. Then he remembers the camera. "Oops, better hide this," he says, flashing a half-grin and sliding the bottle under the table. Wouldn't look good, he explains, for a former Coors distributor to be sipping on the competition. An import at that.

It's a sweltering summer afternoon, and the hospitality suite at the Wyndham Bristol Hotel is abuzz with former Apollo astronauts, 18 veterans of the program that landed a dozen men on the moon from July 1969 to December 1972. They have come to Washington to join their fellow "Apollonauts" in what is billed as their first-ever reunion—itself a remarkable feat, according to ex-astronaut and former Sen. Harrison "Jack" Schmitt.

"I'll tell ya," says Mr. Schmitt, scientist for Apollo 17 and the last man to walk on the moon. "I've never met a bunch of guys who were harder to get to do anything together. We are not organizable."

Voices booming, they stream in and out in various stages of preparation for the evening's reception, some in tuxedos, some in suits, some more casually attired. As they filter in, they take a few minutes to slap each other on the back, swap tall tales and autograph a stack of posters commemorating the 17th anniversary of the July 1969 moon landing. None lingers long. None, that is, except Alan Shepard, who is enjoying the parade.

Dressed in a bright-pink knit shirt and tassel loafers, he sits back and watches as the former spacemen file by. "I'm the old man of the bunch, he says, acknowledging his age, 62, with a pained expression.

He looks up as a tall, sturdily built, gray-haired man walks through the door.

"There's Duke!" he shouts. Pausing for a moment, he exchanges a few friendly insults with Charles Duke, lunar module pilot for Apollo 16 and the 10th man on the moon.

Enter a group of other former flyboys—all square jaws, chiseled cheekbones and firm handshakes, It's the first time many of them have seen each other in years. Automatically they lapse into the fraternal ribbing common among astronauts and athletes. "Hey, Al, what'cha doooin' over there?" hollers one playfully.

"Tryin' to tell this fella here everything I know," he says, nodding toward an earthling with a notepad. Says the other, looking at his watch, "Oooo, that oughta take a coupla minutes, at least."

Another one shouts from across the room something about Mr. Shepard being late for the party if he doesn't hurry up and dress. But the man who ushered the United States into the space age, the man who started it all, merely shrugs his shoulders and takes another sip. "I got plenty of time," he says.

Twenty-five years ago, a Redstone rocket catapulted Mr. Shepard and his Mercury capsule, Friendship 7, 115 miles into the black void of space high over Cape Canaveral, Fla. Fifteen minutes later he plunged into the Atlantic 302 miles away. Although he didn't orbit the Earth—John Glenn did that a year later—Mr. Shepard proved that America could put a man in space and bring him down alive.

His May 5, 1961 flight came just 23 days after Soviet cosmonaut Maj. Yuri Gagarin became the first man to orbit Earth, a fact that still nags the American to this day.

"It was disappointing, yeah, sure," says Mr. Shepard, with a slow nod. But, he reasons, "you don't make engineering decisions based on emotion." He finds some consolation knowing that the Soviet was essentially a passenger aboard his spacecraft—just so much living baggage—while Mr. Shepard actually controlled the flight of his capsule.

After his first flight Mr. Shepard was grounded because of an ear problem which required corrective surgery. "I hung around

and trained and everything," he says. But by the time he was assigned another mission, so much time had passed "they were calling me a rookie."

Tne years after his first flight, he commanded the Apollo 14 mission to the lunar highlands. On that flight he became the fifth man to walk on the moon and the only one to play golf there.

That he was not the first man in space never seemed to diminish America's regard for Mr. Shepard, the wholesome, hardworking and likable kid from East Derry, N.H., who helped shape the image of the modern space hero. Three days after his first flight, 250,000 people lined Pennsylvania Avenue in Washington to welcome the man whose feat helped restore American self confidence after the Russian venture.

Now, no longer officially associated with the Navy or with the National Aeronautics and Space Administration, Mr. Shepard is scarcely the public personality he once was. But in many ways he's still the quintessential astronaut. The buzz-cut hair, toothy grin and baggy space suit of his glory days stand in the minds of many as the image of the modern American hero, the embodiment of the American spirit.

A quarter-century after his record-breaking flight and 12 years after his retirement as a rear admiral, he still seems to have a full measure of what author Tom Wolfe called "The Right Stuff."

The severe crew cut has given way to soft waves of sand-colored hair which swoop down from his high forehead and flow over the tops of his long ears. His eyes are a deep, piercing blue, his physique hardly the worse for the passage of time. In fact, the living symbol of the American space program is only beginning to show signs of mortality, a reminder that the space age itself is still in its infancy.

In 1974, when he retired from NASA and the Navy, Mr. Shepard launched a new career as a beer distributor and real estate investor. Now he owns his own real estate company, is a commissioner for the Port of Houston and has a hand in a number of other business ventures. He is also president of the Mercury 7 Foundation, a scholarship organization set up two years ago by six of the original seven astronauts and the widow of Lt. Col. Virgil Ivan (Gus) Grissom, who died in a launchpad fire 19 years ago.

He didn't follow now-Sen. John Glenn, an Ohio Democrat, into politics because, as he puts it, "I'm just not a political animal."

While it seems an odd departure for someone who devoted most of his life to more lofty pursuits, he says his entry into the business world was natural, just another in a lifelong series of challenges.

"I've been the world's greatest test pilot. I've been to the moon. I mean, what else is there?" he says, pulling the corner of his mouth into a quizzical grin. "I wanted to change and try something I've never done before." He adds, "When you've been to the moon, where else are you going to go?"

Mr. Shepard and the other six Mercury astronauts, including Mr. Glenn, were among the main characters in Mr. Wolfe's novel "The Right Stuff' and a movie by the same name.

When the subject of the movie comes up, a group of eavesdropping astronauts suddenly breaks into loud laughter, as if reminded of an inside joke.

"What movie?" says Mr. Shepard, trying to squirm out of the question. Then he explains that the film, though entertaining, was littered with inaccuracies. One example, he jokes, was the casting of actor Scott Glenn in the role of Alan Shepard.

"Yeah, he played a pretty tough character, but he was nowhere near as tough as I was. And he was nowhere near as good-looking as I am," he adds, to the whoops and howls of his impromptu audience.

Now a Houston resident, Mr. Shepard says he frequently visits NASA to track the progress of the space program—"and to tell them how tough it was in the old days."

Since his retirement, he has lost none of his interest in America's place in the space race. Over the years he, like most of the former astronauts assembled here, has not wavered from his belief that the country should do everything in its power to hang onto the lead.

For one thing, the country needs the technological fallout that comes from advances in the space program and that would come from development of programs such as the Strategic Defense Initiative, the proposed "star wars" missile defense system.

"We need that kind of technology for transmission of energy, intelligence and so on," he says. "That level of technology has to be generated and has to continue to be generated. Otherwise we can't be world leaders anymore."

Mr. Schmitt, long an outspoken advocate of strong congressional support for manned spaceflight, agrees. Beginning with the demise of Apollo during the Nixon administration, he says, NASA has not been given the funding necessary to carry out the government's goals, among them a permanent, manned space station such as the Soviets already have.

"Commitment!" shouts Mr. Schmitt from across the room. "If we'd had commitment, we wouldn't have killed those astronauts," referring to the Jan. 28 explosion of the shuttle Challenger which killed its crew of seven. He adds, "Anybody with any sense predicted that [the shuttle program] was underfunded by a factor of three or four and that you were going to run into these kinds of risks."

Edwin E. "Buzz" Aldrin Jr., who flew with Neil Armstrong on Apollo 11 and was the second man to set foot on the moon, laments that America has lost ground in the race for a permanent presence in space, and that the whole program is under such intense scrutiny.

"We have another challenge before us right now," he says. "If the people, the Congress, do not choose to follow this challenge and put us on the right track for the second time, all of what I did by being an astronaut was really a waste of time."

Despite the recent attacks on the space agency following the shuttle explosion, Mr. Shepard remains a loyal son. "NASA has been one of the best government agencies to come down the road in many, many years," he says.

He strongly rejects the notion that the agency has fallen from grace in the eyes of the public. In fact, he points out, NASA has weathered other disasters, including the January 1967 flash fire that killed Mr. Grissom and two other astronauts designated to fly the first Apollo mission.

Moreover, even from the beginning NASA has had image problems. "Going back to day one, when I was involved, NASA was not a popular organization," says Mr. Shepard. "Half the people thought we were crazy and the other half thought that man should not go into space."

That skepticism even found its way into his home, he recalls. In 1959, when he phoned his parents to tell them he had been chosen from 110 military test pilots to become one of the first seven astronauts, "My mother was delighted and my father thought I had made a bad decision. It was even splittin' up the family!

"I'm tellin' ya, I'm tellin' ya," he says, "A lot of folks looked at us like Evel Knievel and the Snake River Canyon deal: 'Man's not supposed to fly in space!' "

Nevertheless, he did, and "NASA survived with flying colors." It will take some time, but he predicts that the agency will overcome its current crisis and get on with its job.

Since the shuttle disaster, the agency has come under fire from several fronts, including Congress, the Reagan administration and a special presidential commission investigating the accident. Poor communication, negligence, mismanagement, arrogance and overall "system failure" are among the causes cited, leading some lawmakers to push for privatization of the space program and tightening NASA's purse strings.

"I don't think they need to change a thing," argues Mr. Shepard. "I think they just need to kick 'em . . . tell them that they were laid-back and to get back to work. . . . Say, 'Look, you guys. You're laid-back. Get off your heels, get back on your toes and go for it.' "

The culprit? Years of outstanding performance. "I think basically the problem is that there's a sense of complacency which has permeated not only NASA but also the major contractors who supply hardware for them," he says. "It's a very insidious thing, and it happens in any business where a person has a number of successes and feels he is sort of infallible.

"It's just that hidden, and that's tough for people to realize . . . I don't see any need to reorganize NASA. I think the people are still good and still dedicated."

He continues, "People don't make bad decisions deliberately. There's a lot of Monday-morning quarterbacking, a lot of finger-pointing going on, which is very unfortunate. . . I was there. I feel sorry for them." Once the smoke clears—"once they clean up their act," he adds hopefully—"they're going to be better than ever."

Throughout the history of manned flight, accidents have claimed the lives of aviation pioneers. The Challenger, for all its sophisticated technology and the previous successes of the shuttle program, was still an experimental craft, its crew well aware of the danger, these ex-astronauts say.

The reason the explosion has drawn so much attention, says Mr. Shepard, is not that it represents a breakdown within NASA, or that public opinion of the space agency has soured. Rather, it is because of the heightened fascination with space, and increasing awareness that the era of space travel has dawned.

For today's young people, he says, "Television is ho-hum, computers are ho-hum, radio is ho-hum, automobiles ho-hum. [Space] is their excitement, their challenge. Their future."

## REFORMING THE BUDGET PROCESS

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, August 6, 1986, into the CONGRESSIONAL RECORD:

REFORMING THE BUDGET PROCESS

The Congressional budget process is not working well. I refer not only to our well-publicized difficulties in failing to reduce the federal deficit, but also to the way that the budget process itself has become so unwieldy and complex that consideration of the budget now dominates and upsets the Congressional agenda. This equally serious problem is getting much less attention by policymakers.

The problems are several. The percentage of budget-related votes in the House and Senate has doubled in recent years, comprising almost half of all recorded votes. Congress sometimes takes six months to pass the budget resolution, which is only a guideline and is often ignored by the appropriations and authorization committees. Congress increasingly engages in budget "micromanagement", immersing itself in the details of programs instead of using the resolution to deal with major policy issues. Budget rules are frequently waived and deadlines are missed, often leading to enormous and incomprehensible spending packages at the end of the fiscal year. Significant duplication of effort occurs as the same issue, such as funding for the MX missile, might come before various budget, authorization, and appropriations committees. Budget calculations are routinely based upon overly-optimistic economic assumptions, making reconsideration of program funding at year's end almost certain. The budget process has become such an overriding preoccupation for the Congress that it has become difficult to consider other major legislation. We end up debating numbers rather than policy. For example, we debate exhaustively how much should be spent on defense, rather than what is purchased, why it is needed, and how well funds are spent. To a large extent, numbers are driving policy.

Certainly there are many positive aspects to the budget process. People are better informed about the budget than they were a few years ago, and Members are more aware of the fiscal impact of their decisions. Congress now gives more attention to the relative merits of different programs, and takes a more comprehensive overview of its spending and taxing decisions, rather than haphazardly approving programs one by one as they happen to come up. The Congressional Budget Office helps Congress to base its budget decisions on more realistic economic assumptions than those used in presidential budgets. Unprecedented budget "reconciliation" procedures make it easier to curb entitlements and other programs. The scope of the budget resolution was recently broadened to include federal lending activities, and the budget timetable was advanced in an attempt to get the budget settled earlier. Yet despite improvements the budget process has become cumbersome under normal circumstances, and almost paralyzed under stress. The time has come for drastic simplification and reform.

Complexity in the process is to be expected. Setting out the trillion-dollar federal budget each year is inherently difficult for the Congress, as budgeting is for any other enterprise. There are never enough resources to carry out all the desired activities, and tough choices must be made on the most controversial issues of the day. Moreover, developing a consensus on how to reach various budget goals is a slow and painful process. If wide divisions exist over basic spending and taxing decisions, no process will make them magically disappear. Under the new procedures of the complex Gramm-Rudman-Hollings deficit reduction law, some confusion and delay can be expected. Yet my strong sense is that the process has become more complex and burdensome than necessary.

Those dissatisfied with the process take either of two approaches. Some suggest revising the budget mechanism and instituting various Congressional reforms, including shifting the budget to a two-year cycle (a system used successfully by many states); making the budget resolution have the force of law rather than be only a general guideline for future decisions; drastically reducing the number of budget accounts and items; making it more difficult to miss deadlines; and simplifying the Congressional committee system, such as by combining authorization and appropriations committees or replacing the House and Budget Committees with a joint House-Senate committee. Such suggestions deserve consideration.

Others say that the fault lies more with political will than with the process. They say that all the reforms in the world do not guarantee success, since deadlines can be waived, figures can be manipulated, and painful decisions can be finessed. Instead, they feel that almost any system could be made to work if Members really want it to work, and if Congress and the White House begin serious negotiations on the budget right away, rather than engage in drawn-out political posturing. They feel that overhaul of the process is unnecessary.

There is some truth on both sides. We clearly must strengthen our political will to move the budget through more quickly, but we also need to simplify and improve the basic budget mechanism. We need to look at the minor changes that can be made right away, to make the process now dominated by Gramm-Rudman-Hollings less of a burden. But we must also begin to systematically evaluate the more substantial and more politically-charged proposals for longer-term reform, such as switching to a two-year budget cycle or simplifying our committee system. At the least, we should set up a joint House-Senate task force on the budget process to propose simplifications and improvements.

Reform cannot save us from making the tough policy decisions, but it can help ensure that we are focusing our major attention on the key policy issues, are not bringing up the same issues over and over again, and are no longer forced into making major decisions in the last few frantic hours of the session. Reforming the onerous budget process will be hard, unglamorous work, but it is essential to improve the functioning of Congress.

## BIKE-AID: PEDALING FOR PROGRESS

### HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. DORGAN of North Dakota. Mr. Speaker, the U.S. Congress today hosted an extraordinary delegation of young people: riders in the cross-country Bike-Aid project.

This dedicated group of students committed their summers for the purpose of raising funds for self-help projects in developing nations and Appalachia. The proceeds from pledges will enable the Overseas Development Network—a coalition of college students working to end world hunger—to fund projects in poor nations. These local projects target food self-reliance, village education, and small enterprise.

I join with such Bike-Aid patrons as Senators BILL BRADLEY, PAUL SIMON, and EDWARD KENNEDY, Representative MICKEY LELAND, and Tour de France champion, Greg LeMond, in commending these outstanding young Americans for pedaling from 1,900 to 3,000 miles on behalf of the poor, the hungry, and the illiterate.

HOW WILL BIKE-AID PROCEEDS BENEFIT DEVELOPMENT?

Funds raised by Bike-Aid '86 will benefit development in three ways:

First, Bike-Aid proceeds will be used to create a special fund from which ODN will award grants to small-scale organizations who themselves sponsor locally-initiated self-help development projects. Four examples of such organizations are described below.

*Ashoka Society*—is an organization devoted to supporting entrepreneurs in Third World development. The Society awards fellowships to imaginative and committed individuals in the Third World who might not otherwise have the resources to try new approaches to solving critical social problems. Presently, Ashoka Fellows work in India and Indonesia. They have been credited for breakthrough achievements in addressing problems of illiteracy, environmental decline, food production, and small-scale industry.

*International Development Exchange (IDEX)*—links U.S. communities and civic organizations with small-scale self-help projects in developing countries. The projects are modest in scale and goal, and are characterized by a high degree of local initiative. IDEX serves as the intermediary organization. Any portion of Bike-Aid proceeds allocated to IDEX will be used to supplement and leverage additional community support.

*Bikes Not Bombs*—is a constructive response to the current disruption of education and medical care caused by war in Central America. Bikes Not Bombs sends used and new bicycles, spare parts and tools to health workers and teachers who might otherwise have no means of transportation in these war-torn countries.

*Trickle Up*—is a small organization which serves as a resource and a catalyst for Third

World groups to develop their own economic development programs. Trickle Up supports enterprises that demonstrate creativity and realistic planning. Trickle Up awards grants in two stages. The first installment is awarded to the recipient group after it has completed and presented a detailed plan of its progress; the second installment is awarded after the recipient group has invested at least 1,000 man-hours in the project itself. Projects "catalyzed" by Trickle Up are marked by their near complete reliance on local initiative and resources.

Second, a portion of the Bike-Aid proceeds will be added to ODN's Partnership in Development "Revolving Fund," which has been established to expedite the implementation of ODN-sponsored projects. ODN chapters borrow money from this fund as start-up money for the projects they have chosen to support. As the chapters conduct their own fundraising progress for the projects, they reimburse the Revolving Fund for the earlier loan. Three of the typical projects are listed below.

*Nyafaru Boarding School Food Production Project, Zimbabwe.* This school in the rural Tangwena region services 1,200 square miles of villages consisting of 3,000 residents. Project leaders hope to eliminate their food shortage and to raise money for essential educational materials by establishing a self-sufficient chicken cooperative and vegetable garden.

*Project for the Small Enterprise of Tricycle Making, Dominican Republic.* The organizers of this project hope to create jobs and stimulate the local economy by establishing a tricycle shop in this marginal neighborhood in Santo Domingo. Tricycles will be used for transportation and by traveling vendors, who will be able to cover a larger area. Initially, the shop will manufacture the tricycles and sell them for a profit. After six months, the shop will sell the tricycles to members of the community on credit. With new tricycles, villagers will be able to start or improve their own businesses and eventually repay the shop.

*The Sudhiranjan Lahiri College, India.* This school, founded in 1967, serves the extremely poor and often illiterate agricultural workers of India's Harijan (Untouchable) caste, whom tradition has long denied a decent living and an education. ODN support will help the college expand and obtain essential materials for its 600 students who now share only 8 classrooms.

Third, ODN will use the remainder of the Bike-Aid proceeds to strengthen the ongoing projects it sponsors under the Development Education Program and the Development Opportunities Program.

One of these, the *Appalachia Project,* is planned to begin this summer at ODN's summer leadership training center located in Dungannon, Virginia. This program offers thirty students from the U.S. and the Third World an opportunity to learn about development issues first-hand. The students will work together with local volunteer agencies on literacy programs, farming cooperatives and other development projects in Appalachia. This experience will help students to better understand the everyday aspects of development. With direct experience and new insight, these students will return to their campuses as more effective and more knowledgeable organizers.

## PAUL J. BURNSKY AND BILL PHILLIPS FIGHT FOR A STRONGER MERCHANT MARINE

### HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. DYSON. Mr. Speaker, I rise today in tribute of two men who have remained passionately committed to the revitalization of our Nation's merchant marine. I speak of Paul J. Burnsky, president of the AFL–CIO Metal Trades Department, and Bill Phillips, legislative consultant for the AFL–CIO Metal Trades Department, who have eloquently and repeatedly defended the rebirth of our merchant marine in the name of national security and improved domestic economic conditions.

Indeed, it would be prudent to listen closely to Paul Burnsky's plea that we not foresake domestic shipbuilders in favor of cheaper foreign competition. While free-market principles suggest the advantages of competition, it is imperative that we must first acknowledge, in Paul Burnsky's words, "that the overriding national interest of the United States should determine our shipbuilding and maritime policies." What is clearly in the long-range interest of our Nation is a policy that protects the domestic shipbuilding industry and not, as the present administration proposes, one that promotes incentives for the acquisition and maintenance of ships from foreign nations.

Historically, two criteria have served for assessing the value of our merchant marine. In general terms, these are the industry's commercial viability and its capability for serving as a naval or military auxiliary in times of emergency. However, the Reagan administration's maritime strategy, as embodied in the Merchant Marine Act Amendments of 1986 (H.R. 4024 and H.R. 3141), disregards national security and domestic economic concerns.

There should be no doubt that attainment of President Reagan's proposed 600 ship Navy is essential if we are to have a Navy that can carry out the missions assigned to it. There is certainly no question that achieving this goal will require continuing large shipbuilding programs. But support for naval ship construction programs is not in itself sufficient to maintain a strong national maritime posture. The maritime interests of our country require that we maintain a strong merchant marine, with modern ships manned by skilled American crews, and a strong shipbuilding and repair industry to support both the Navy and the merchant marine.

Accordingly, it is important that we ask ourselves whether the United States could furnish the requisite number and variety of ships to sustain a long term sealift should a protracted conflict occur. The answer to that is, firmly, no. The inescapable conclusion of any survey of our present sealift resources is that there exists no surplus of militarily useful vessels. This is not any less true after taking into account the addition to these resources that may come from encouraging the repatriation of foreign-flag vessels. Given this situation, any policy threatening to liquidate our shipyards takes on the appearance of the absurd. Should such a policy in fact have this effect, the Department of Defense may soon add ships and components to its list of strategic imports. Not only will we not be a reliable military ally, we will not even be militarily self-sufficient.

I share with Paul Burnsky and Bill Phillips an unwillingness to concede the commercial viability of a U.S. merchant marine. Clearly, it's possible and desirable that a way be found to bring a greater percentage of our cargo under our own flag. This must be the foundation of any plan that will preserve the shipbuilding components of our merchant marine. But this alone will not assure the prosperity of U.S. shipyards and their suppliers. Mr. Speaker, beyond cargo preference legislation, two additional elements are essential to a revitalized merchant marine: One, a thoughtful and effective alternative upon which a comprehensive, long-range policy can be constructed that comes from the industries themselves; and two, and perhaps most significantly, their message must find a safe harbor in the Congress where it may be delivered time and time again.

So, Mr. Speaker, I proudly salute Paul J. Burnsky and Bill Phillips, for their contributions toward the revitalization and, indeed, the survival of America's merchant marine.

## A SALUTE TO BRUCE P. FOSTER

### HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. STOKES. Mr. Speaker, I rise today to pay tribute to Bruce P. Foster, on the occasion of his retirement after 42 years of public service and labor affiliation.

Bruce is a veteran of the U.S. Air Force, and for 24 years was a bus operator with the Cleveland Transit System. For 3 years he served as president of the Amalgamated Transit Union Local 268 and was then elected international vice president of the Amalgamated Transit Union.

Mr. Speaker, through his untiring efforts in civic involvements and as a labor leader, Bruce Foster has improved the quality of life for many citizens in Cleveland and throughout the Nation. In recognition of his many contributions and accomplishments, Bruce has received many awards and in addition, will be saluted at a dinner in his honor on August 23, 1986, hosted by his coworkers and superiors who have held him in high esteem for many years.

In addition to his work as a labor leader, Bruce Foster has served on a number of different boards, commissions, and organizations including: The Ohio Lottery Commission; member of P.I.C.K. Council; Advisory Commission on Cleveland City School Finances; member of Work in Northeast Ohio Council; Cleveland Community Relations Board; president of Black Labor Leaders Caucus; Advisory Commission Federation of Family Planning; president and vice president of Cleveland Federation of Labor, and past president of city of Cleveland Civil Service Commission. He is currently serving as: executive board member,

NAACP; member of Greater Cleveland Roundtable; member of Operation Alert; executive board of Cuyahoga County Republican Party; member of National Labor Advisory Council; alumnus of Leadership Cleveland Class of 1982 of the Greater Cleveland Growth Association; trustee of United Way Services; member of City Wide Development Corp.; member of Dome Corp.; member of U.S. Department of Transportation section 15; president of F.H.R. Services Inc.; vice president and secretary to board of North Coast Cable Co.; president of Bruce P. Foster Construction Co.

On behalf of the residents of the 21st Congressional District of Ohio, I would like to offer my most sincere congratulations to Bruce on his retirement, with best wishes for continued health and happiness in the many more productive years to come.

## VETERANS' HEALTH CARE AMENDMENTS OF 1986

### HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. DERRICK. Mr. Speaker, earlier today under suspension of the rules, the House of Representatives approved the Veterans' Health Care Amendments of 1986 (H.R. 4623). I strongly support this measure and wish to take this opportunity to commend the Chairman of the Veterans' Affairs Committee for his outstanding leadership in bringing the bill to the floor.

I am particularly interested in section 8 of the legislation which makes revisions in the State veterans' home program. Over the past year and a half, I have discussed with Chairman MONTGOMERY the need for a change in the law and have urged the committee's attention to this matter. I am grateful that the chairman has allowed me to work with him and his fine staff on addressing this specific provision.

Under the amendment, priority will be given for the construction of State veterans' homes to States that have already appropriated their share of the funding. The State veterans' home program represents a joint effort between Federal and State Governments, and has long been regarded as a cost-effective way of providing care for our veterans.

In light of limited construction grant funds, this provision would offer a fair and equitable solution to the problems we face in addressing the health care needs of these men and women. Our Nation's veteran population is rapidly aging. While every State will be affected to some degree, those States with the larger veteran populations will certainly feel the strain of caring for the aged veteran.

To put this situation in a local perspective, South Carolina has over 350,000 veterans residing in the State. Approximately 53,000 of them are now over 65 years old. However, by the year 2000 this number is expected to more than double. The State's sole veterans' nursing home is a 150-bed facility which continuously operates at full capacity.

An application is currently pending before the Veterans' Administration for a 210-bed State veterans' home to be built in Anderson County, located in my district. This nursing home will serve all of western South Carolina and relieve the pressure being felt at the present facility. I would note that 50 percent of all South Carolina veterans reside in the 8 counties adjacent to the Piedmont area of Anderson.

Because the State shares in the cost of construction of these homes, it is only fair that we give them this chance to compete for the limited Federal moneys. By appropriating their share of the funds, the States are demonstrating their need for and commitment to the project. Earlier this year, the Governor of South Carolina aproved the money for the construction of the Anderson nursing home, and I can attest that this project is being given top priority on the State level. I believe that the Federal Government should demonstrate this same commitment.

I appreciate the support given to this measure today by my colleagues. This legislation goes a long way in insuring that the health care needs of our veterans who so ably served our country will be adequately met in my district and all across the Nation.

## LEGISLATION TO REINSTATE THE LIMITED CIRCULATION RATE POSTAL SUBSIDY

### HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. SKELTON. Mr. Speaker, today along with my colleague from Iowa, [Mr. TAUKE], I am introducing a bill which would reinstate the limited circulation rate postal subsidy for small publications which mail their publications to adjoining counties. As chairman of the Congressional Rural Caucus and chairman of a Small Business Subcommittee I am extremely concerned about the hardships our rural businesses are facing; one group in particular is our small rural newspapers. The purpose of our bill is to provide postal rate relief for small rural newspapers with an out-of-county circulation of less than 5,000.

In April, this body passed the Budget Reconciliation Act which eliminated the limited circulation rate—limited circulation rate is the subsidy newspapers receive to defray mailing costs if they have less than 5,000 out-of-county subscribers. The elimination of this subsidy has imposed financial burdens on our small rural newspapers that I am sure the conferees to the Reconciliation Act did not foresee. I am certain, they too have heard from newspapers owners in their districts describing the dismal financial conditions the owners face.

Since 1970 small newspapers have seen their in-county rates skyrocket up to 1,600 percent, and their limited circulation rates up to 822 percent. Since December of last year alone, in-county rates have increased by up to 80 percent and limited circulation rates by up to 180 percent.

It is important to remember that rural newspapers provide the most significant source of local information, and perhaps more importantly, unite the community and provide a firm sense of identity—which oftentimes extends beyond county lines. That is why the limited circulation rate subsidy is so important. This bill restores the subsidy for mailings to adjoining counties only. It provides targeted relief yet does not require additional appropriations to the revenue forgone fund. All that is needed is a shift within the fund of $7.3 million of the $9.3 million currently estimated to be required. The difference is made up due to the cap that our proposal would place on the in-county rate subsidy at 20,000 pieces, which results in a net savings of $2 million.

Preserving these small rural newspapers is important to the fabric of these rural communities and deserves our attention and support.

## RURAL NEWSPAPER PRESERVATION ACT

### HON. THOMAS J. TAUKE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. TAUKE. Mr. Speaker, I am today introducing with my colleagues Congressmen GENE TAYLOR, FRANK HORTON, DON YOUNG, BERKLEY BEDELL, COOPER EVANS, JIM LEACH, JIM LIGHTFOOT, NEAL SMITH, HAROLD VOLKMER, BOB WHITTAKER, DOUG BEREUTER, PAT ROBERTS, ARLAN STANGELAND, CHARLIE STENHOLM, GEORGE WORTLEY, and IKE SKELTON legislation to aid many rural newspapers struggling to survive under the burdens of a depressed rural economy and sharp increases in postal rates.

A provision of the Consolidated Omnibus Budget Reconciliation Act eliminating the limited circulation rate revenue foregone postal subsidy for out-of-county mailings under 5,000 has had an unintended, disproportionately hard impact upon rural newspapers located near county lines, jeopardizing the free flow of information in rural areas. The depressed rural economy rules out the ability of many smaller newspapers to offset the significant increase in their postal rates by attracting more advertising or by raising subscription rates.

To ensure and support the free flow of information in rural areas, Congress established an in-county subsidized mail rate 135 years ago. Congress added the limited circulation rate in 1962 in recognition of the impact upon smaller newspapers, and particularly newspapers located near county lines, of increases in postal rates. These newspapers serve the public through subscriptions, as opposed to direct delivery.

The Rural Newspaper Preservation Act will restore the limited circulation rate subsidy for mailings of under 5,000 to adjacent counties (as established, the limited circulation rate subsidy had no adjacent county requirement). In addition, the act caps the in-county postal subsidy at 20,000 copies of each issue of an eligible publication, refocusing this subsidy on its original purpose of assisting smaller rural newspapers.

The Rural Newspaper Preservation Act neither authorizes nor requires an appropriation. The National Newspaper Association has indicated that this modest proposal will provide

substantial relief to struggling small newspapers. Please join my colleagues and me in supporting this proposal to ensure the continuing free flow of information in rural areas.

A companion bill is being introduced in the other body by the Honorable TED STEVENS.

## PRESERVING OCEAN WILDERNESS AREAS

### HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Ms. MIKULSKI. Mr. Speaker, today I am introducing a bill to provide for the establishment of national ocean wilderness areas in order to protect and preserve parts of the vast expanse of ocean waters under the jurisdiction of the United States.

As chairwoman of the Oceanography Subcommittee, I have become alarmed at the lack of planning in this country concerning the appropriate use of the oceans.

The U.S. ocean area is 1½ times as large as its landmass. We already know it contains large deposits of mineral and energy resources, productive fisheries, and habitats for great populations of marine mammals and seabirds. It provides wonderful recreational opportunities, but is also beginning to be used as a site for waste disposal.

A significant portion of our food and energy resources already come from the ocean. Without a doubt, we will make greater use of these ocean resources in the future, especially as we deplete those on the land.

At the same time, we are beginning a journey in the scientific exploration of the oceans. New technologies using satellites, sonar devices and remote-operated vehicles are surveying large ocean areas and revealing the existence of remarkable geologic features such as thermal vents and new mineral deposits.

Yet for all we know and are learning about the ocean, its resources and dynamics, our ignorance is still greater than our knowledge.

This is the reason I have introduced the "Ocean Wilderness Act". We need to discuss whether, and by what method, we can protect and preserve specific ocean areas. We need to consider how we can safeguard the ocean from often competing and contradictory purposes.

We have established programs for preserving land areas, and I believe that we have the responsibility to do so for ocean areas.

This bill would accomplish this goal by requiring the President to recommend to Congress that certain ocean areas under U.S. jurisdiction be protected as ocean wilderness areas. This would require an act of Congress, specifically addressing an area of the ocean and the resources it contains.

This bill is not intended to promote or restrict any particular use of ocean space or resources. It is premised on the recognition of the need for multiple uses of the oceans, including fishing, and on a recognition of the principles of international law, including the freedom of navigation.

I hope that this bill is the beginning of thoughtful consideration of how we can preserve our oceans so that future generations may benefit from their many resources and enjoy their recreational opportunities.

## THE TEXTILE AND APPAREL TRADE ENFORCEMENT ACT

### HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. GEKAS. Mr. Speaker, today the House of Representatives attempted to override the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act. In deciding on how to vote on this attempt, it seemed to be necessary to choose between two groups of fellow Americans who both have valid points in favor of their position. I concluded that the wise course of action to follow is to take that action which would ultimately prove to help both groups. I believe that my vote to sustain the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act, signaled support for the textile industry through the enforcement of the multifiber arrangement and bilateral agreements just reached while at the same time protecting the farmer, the retailer, and the consumer who would have suffered damage by enactment of this legislation.

By voting to sustain the President's veto I was in essence supporting the absolute enforcement and implementation of the new multifiber arrangement and the bilateral textile agreements which were just recently negotiated. Although I as well as many others are subject to some reservations about the enforcement of these agreements in the past, I believe that every effort must and will be made to see that the trade agreements are enforced to the maximum. This tough new agreement will benefit our textile and apparel industry without incurring reprisals against U.S. exports abroad. Negotiations will continue to work toward opening up markets, protecting against import surges and providing for additional fiber coverage.

This vote was one of the more difficult ones that I have made, but I am confident that the textile industry and its workers will ultimately fare better under what has taken place in these trade negotiations. Over 60 percent of my constituents, in a recent congressional poll conducted by my office, indicated to me that they also believe that the foreign trade policy of the United States should include a promotion of a higher level of exports in a free international marketplace. I do regret, however, that the shoe industry got caught up in this issue and did not receive the attention that they deserve and am hopeful that this issue will soon be addressed in Congress.

## ASAT: WE NEED TO PRESERVE THE ABILITY TO NEGOTIATE CONTROLS

### HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. COUGHLIN. Mr. Speaker, as the House debates the amendment to preserve the current moratorium on the testing of anti-satellite [ASAT] weapons against targets in space next week, I hope my colleagues will consider the importance the extension of this ban might have on negotiations toward a permanent ASAT moratorium.

There is no question that the United States is more heavily dependent on the intelligence we collect from our satellites than the Soviet Union is on the intelligence they obtain from theirs. Because of our superior technology, our satellites can tell us more than the Soviets' satellites can tell them. Because U.S. forces are more widely dispersed overseas, our communications and intelligence satellites are more important for ensuring our security and integrating military operations. Because of the closed nature of the U.S.S.R., we must rely upon our systems more heavily. Finally, because of the reliability of our satellites, the United States can afford to depend on them to a greater degree.

These facts were recognized even back in 1978 and 1979, when the United States sought to forestall the enhancement of Soviet ASAT technology through negotiations with the U.S.S.R. to control ASAT weapons. American officials understood that then-ongoing Soviet efforts to perfect a more "advanced" version of their ASAT weapon would put United States satellites in greater jeopardy. These ASAT talks were broken off in protest of the Soviet invasion of Afghanistan.

Through 1982, the Soviets continued tests of their so-called "advanced" heat-seeking ASAT, but the tests consistently demonstrated their system would not work. Out of six total tests of their "advanced" version, none were successful. Meanwhile, we continued our effort to develop the F-15 launched ASAT device, the miniature homing vehicle.

Finally, after 9 successes out of 20 test shots—a success rate of 45 percent—the Soviets announced they were abiding by a unilateral moratorium on ASAT testing. It would appear that the reality of a 45-percent success rate with their very limited capability system, coupled with the threat of an operational U.S. MHV ASAT device, persuaded them that it was in their best interest to try to prevent a runaway ASAT arms race they might not win.

Now we have the opportunity to enhance the security of America's deployed satellite technology by continuing the current moratorium on testing and providing time for a reassessment of current policies opposing negotiations to ban ASAT's. If we press on with the MHV to the point it is an operational weapon, we will never achieve a lasting ASAT moratorium. The Soviets will respond by developing their own more sophisticated ASAT hardware, which will put U.S. satellites at far greater risk.

Complicating the situation is the relatively small size of the MHV—only 18 feet long—which will create a verification problem for the Soviets now and for the United States later if the Soviets decide to proceed with a similar weapon. In fact, the United States is in the best position to achieve a negotiated ASAT test moratorium with the Soviets now—further testing of the MHV will only reduce our ability to reach an agreement to control this costly and dangerous aspect of the arms race.

If the Congress does not preserve the current ban, the Air Force may be free to resume tests of the F-15 launched ASAT after October 1, 1986. The chance for protecting our satellites and avoiding an expensive new round of the arms spiral through United States-Soviet negotiations on ASAT controls will be lost. I hope my colleagues will consider this as well as the many other reasons for extending the ASAT test ban when the Brown-Coughlin ASAT amendment comes before this body next week.

## PERSONAL EXPLANATION

### HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. WALGREN. Mr. Speaker, because of a commitment as chairman of the Subcommittee on Science, Research and Technology, I was unable to be present yesterday during the vote on the Courter amendment to H.R. 4428. Had I been able to be present, I would have voted "no" on rollcall No. 282.

## THE LASSITER HIGH SCHOOL TROJAN BAND

### HON. GEORGE (BUDDY) DARDEN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, August 6, 1986*

Mr. DARDEN. Mr. Speaker, in only 5 years the Lassiter High School Trojan Band in Marietta, GA, has established a record of excellence both as a marching ensemble and for its symphonic and jazz performances. I would like to call the attention of my colleagues to the achievements of these outstanding young musicians.

In its first year, 1981, the Lassiter Band was under the direction of George Hattendorf. The concert band earned an excellent rating at the district XII Georgia Music Educators Association Large Group Festival, class IV. Also, the jazz band was rated excellent at the G.M.E.A. Jazz Festival, Cobb County.

That tradition of excellence has continued under Alfred L. Watkins, who became director of bands at Lassiter in 1982. The band has performed all over the Nation, from the Old South Marching Festival in Newnan, GA, to the steps of the Lincoln Memorial here in Washington. The band was invited by the British Olympic Association to perform at the opening ceremonies of the visitors center for the XXIII Olympic Games at Los Angeles.

In 1984, Lassiter's Marching Band participated in the Southern Invitational Field Show Championships and was acclaimed grand champions.

In 1985, the marching band earned all superior ratings and was named grand champions at the Music Bowl VII, Spirit of the South Marching Championships and the Greater Atlanta Marching Festival. The Trojan Band has won sweepstakes awards at its last seven competitions.

Lassiter's three concert bands also are first-class performers. The symphonic I band last year earned a superior rating in performance and sightreading at the district XII G.M.E.A. Music Festival. The symphonic II band also received a superior in performance and sightreading at that G.M.E.A. Festival, and the concert band received a superior rating.

The Lassiter Jazz Band was the Georgia State University Jazz Festival winner in the high school division during 1982-83.

Mr. Speaker, I urge my colleagues to join me in saluting the bands of Lassiter High School, their director, Alfred Watkins; assistant director of bands, Gary Gribble; and orchestra director, Anna Johnson, for their achievement in bringing the joy of music to their community, State, and Nation.

## SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, August 7, 1986, may be found in the Daily Digest of today's RECORD.

### MEETINGS SCHEDULED

#### AUGUST 11

9:30 a.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 2635, to protect the integrity and quality of certain reaches of the Henry's Fork of the Snake River, Idaho.
SD-366

10:00 a.m.
Energy and Natural Resources
To hold joint hearings with the Select Committee on Indian Affairs on S. 2676, to provide for the settlement of water rights claims of the La Jolla, Rincon, San Pasqual, Puama, and Pala Bands of Mission Indians in San Diego County, California.
SD-562

Foreign Relations
International Economic Policy, Oceans, and Environment Subcommittee
To hold hearings on certain provisions with regard to foreign policy of S. 2263, to protect the public's right to receive and communicate information freely beyond the American border, and to ensure the right of international travel.
SD-419

Judiciary
Juvenile Justice Subcommittee
To hold hearings on S. 2398, to make it a Federal offense with regard to the sexual exploitation of children.
SD-226

Select on Indian Affairs
To hold joint hearings with the Committee on Energy and Natural Resources on S. 2676, to provide for the settlement of water rights claims of the La Jolla, Rincon, San Pasqual Puama, and Pala Bands of Mission Indians in San Diego County, California.
SD-562

10:30 a.m.
Judiciary
To hold hearings on certain provisions of S. 1999, to provide for a uniform product liability law.
SD-106

2:00 p.m.
Foreign Relations
To hold hearings on certain treaties concerning reciprocal encouragement and protection of investments.
SD-419

#### AUGUST 12

9:00 a.m.
Armed Services
Closed business meeting, to consider pending nominations, and to review the committee's agenda for the remainder of the 99th Congress.
SR-222

Judiciary
Patents, Copyrights and Trademarks Subcommittee Business meeting, to mark up S. 2575, Electronics Communications Privacy Act.
SD-628

Veterans' Affairs
To resume hearings on the reported sightings of live military personnel missing in action in Southeast Asia.
SR-325

9:45 a.m.
Agriculture, Nutrition, and Forestry
Foreign Agricultural Policy Subcommittee
To resume hearings to review United States food aid programs and world hunger.
SR-332

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Business meeting, to consider S. 2083, to promulgate regulations for asbestos hazard abatement in the Nation's schools, S. 1696, to establish a Federally-declared floodway for the Colorado River, S. 740, to authorize funds through fiscal year 1995 to promote the conservation of migratory water-

fowl and to offset or prevent the serious loss of wetlands and other essential habitat, and other pending calendar business.
SD-406

Foreign Relations
To hold hearings on the nomination of Lynn Marvin Hansen, of Idaho, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency.
SD-419

Judiciary
Constitution Subcommittee
Business meeting, to mark up S. 2457, to grant the consent of Congress to the California-Nevada Interstate Compact which provides for equitable apportionment of water between the two States, and S. 1580, to revise federally mandated attorneys fees applicable to civil, criminal, and administrative proceedings involving the United States and civil proceedings involving State and local governments.
SD-226

Labor and Human Resources
Aging Subcommittee
To hold hearings to review certain reauthorization provisions of the Older Americans Act.
SD-430

10:30 a.m.
Judiciary
Constitution Subcommittee
To hold hearings on Senate Joint Resolution 370, and Senate Joint Resolution 364, measures proposing an amendment to the U.S. Constitution requiring the removal from office of any Federal official convicted of a felony.
SD-226

3:30 p.m.
Rules and Administration
Business meeting, to consider Senate Resolution 438, to direct the Senate Committee on Rules and Administration to study the Senate rules and precedents applicable to impeachment trials, Senate Resolution 439, to authorize the reprinting of a Senate document from the 93d Congress entitled "Procedures and Guidelines for Impeachment Trials in the United States Senate," proposed legislation to authorize funds for fiscal year 1987 for the Federal Election Commission, and other pending legislative and administrative business.
SR-301

11:00 p.m.
Foreign Relations
Business meeting, to consider pending calendar business.
SD-419

## AUGUST 13

9:30 a.m.
Energy and Natural Resources
To hold hearings on House Joint Resolution 17, to consent to an amendment enacted by the legislature of the State of Hawaii to the Hawaiian Home Commission Act, 1920.
SD-366

*Finance
To hold hearings on S. 1871, relating to imports which threaten to impair the national security (incorporated in S. 1860 as title X).
SD-215

Select on Intelligence
To hold closed hearings on intelligence matters.
SH-219

10:00 a.m.
Governmental Affairs
To hold hearings on the nomination of John Agresto, of the District of Columbia, to be Archivist of the United States.
SD-342

Judiciary
Security and Terrorism Subcommittee
To resume hearings on S. 2044, to establish the United States Marshals Service as a bureau within the Department of Justice.
SD-226

Labor and Human Resources
To resume hearings on S. 1804, to establish a program to provide development and incentive grants to States for enacting medical malpractice liability reforms.
SD-430

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
SD-226

## AUGUST 14

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Judiciary
Business meeting, to consider the nominations of William H. Rehnquist, of Virginia, to be Chief Justice of the United States, Antonin Scalia, of Virginia, to be an Associate Justice of the Supreme Court of the United States, and other pending calendar business.
SD-226

## SEPTEMBER 9

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings to review graduate medical education in ambulatory settings.
SD-430

## SEPTEMBER 10

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
To hold hearings to review the human resources impact on drug research and space technology
SD-430

## SEPTEMBER 11

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

## SEPTEMBER 16

10:00 a.m.
Labor and Human Resources
To hold hearings on pending nominations.
SD-430

## SEPTEMBER 17

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

## SEPTEMBER 18

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

## SEPTEMBER 24

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

## SEPTEMBER 25

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

## OCTOBER 1

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

## OCTOBER 2

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

# CANCELLATIONS

## AUGUST 7

4:00 p.m.
Select on Intelligence
Closed briefing on intelligence matters.
SH-219

# HOUSE OF REPRESENTATIVES—*Thursday, August 7, 1986*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

You have told us, O God, that we ought to build our spiritual lives upon firm ground in order to withstand the trials of the day. May we seek to know Your Word and Commandments, Your design for justice, and Your way of truth. May our lives be fruitful and full of grace and may our deeds reflect that strong spiritual foundation that is Your gift to us. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## HOUSE-PASSED TRADE BILL AWAITS ACTION IN OTHER BODY

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, yesterday a preponderant majority of the Members of the House of Representatives recorded our deep dissatisfaction with the lackadaisical nonpolicy of the Reagan administration on the growing trade deficit.

Two hundred and seventy-six Members of Congress—only eight votes short of the number that is necessary to override the President's veto—demonstrated our displeasure with the insensitivity in administration circles toward the closing of American factories and the systematic exporting of American jobs.

If there are those in the Senate who would do something to stop this headlong flight of American capital and American payrolls, we remind them that there is a major trade bill on the Senate Calendar, H.R. 4800, which passed the House 10 weeks ago by the overwhelming vote of 295 to 115, amply more than enough to override a veto.

Today we renew our call upon the Senate to get a sense of urgency about this debilitating trade deficit and take action on this bill. The problem is urgent. Time is wasting. The American people expect us to have iron in our blood, not lead in our posteriors.

## OUR DEFICIT IS RESPONSIBLE FOR NEGATIVE TRADE BALANCE

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANNEMEYER. Mr. Speaker, we just heard an eloquent appeal for action to the other body by the distinguished majority leader. The gentleman forgot to add one very indispensable element to the entire equation of what must happen in this Nation in order to bring this negative trade balance under control, and that is action by this body, the House of Representatives, in order to bring runaway Federal spending under control.

The deficit of $230 billion in this fiscal year is responsible for this negative trade balance because it results in high interest rates that are choking off economic growth in this country and abroad and are responsible for the inability of American exporters to sell our goods in international commerce because of the still high valued U.S. dollar.

If the Democratic Party which leads this House truly wants to do something about the negative trade balance, it would be well served to stop posturing in 1-minute speeches and begin to exercise the discipline to bring runaway spending under control. When that happens, the American people will then begin to see the benefits of, hopefully, a balanced budget, lower interest rates, the ability of exporters to sell in international commerce, and all of us will breathe a sigh of relief.

## A LONG JOURNEY OF 1,000 MILES BEGINS WITH A SINGLE STEP

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, in responding to the statement of the gentleman from California who just addressed the body from the well, I responed that I, like all of my colleagues, have heard these speeches about a balanced budget before. I, like my colleagues, have heard the President's speech about a balanced budget. I, like my colleagues and the American people, are still awaiting the President to submit to the Congress a plan for a balanced budget.

To achieve a balanced budget for our Nation would be a difficult task, but the first step toward that laudable goal is for the President to submit a plan to the Congress; then call upon the Congress to enact a budget that was in balance. If Congress failed, Congress should be condemned for its failure.

As Confucius is reported to have said: "A long journey of a thousand miles begins with a single step." I call on the President to stop talking and start walking.

## ELECTION AS MEMBER TO CERTAIN STANDING COMMITTEES

Mr. GEPHARDT. Mr. Speaker, as chairman of the Democratic caucus and by direction of the Democratic caucus, I offer a privileged resolution (H. Res. 530) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 530

*Resolved*, That Alton R. Waldon, Jr., be, and he is hereby, elected to the following standing committees of the House of Representatives:

Committee on Education and Labor, to rank following Representative Bruce; and

Committee on Small Business.

The resolution was agreed to.

A motion to reconsider was laid on the table.

## OUT OF THE MOUTHS OF BABES

(Mr. HANSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANSEN. Mr. Speaker, I was recently vividly reminded that common sense is not restricted to the older segment of our population.

I ask you to listen to a simply worded letter I received from Daniel Penrod, a 12-year-old constituent of mine from Ogden, UT, on why the deficit matters.

Please take a minute to listen to Danny's words:

I recently worked myself a budget. I found that I wanted more things than I had money to buy. I understand the government has more projects to fund than it has income to do it with. It gets much of its revenue from taxes. Taxes are already so high that many people cannot or will not pay them. I suggest that the government learn to reduce its spending rather than increasing taxes. I need to live within my income; please help the government live with theirs.

All I can say is amen to my 12-year-old constituent. Danny demonstrates an excellent grasp of the magnitude of this problem and I commend him for

taking the time to write to his Congressman.

## NATIONAL BACK TO SCHOOL—BACK OFF DRUGS MONTH

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, there is a deadly cancer spreading through our schools, and it's called drug abuse.

As a body, we are collectively working toward a comprehensive solution to our Nation's drug abuse crisis, thanks largely to your leadership, Mr. Speaker.

But even with such a determined spirit, the omnibus drug bill will not be ready for enactment until after the new school year begins.

In the meantime, we will miss a valuable opportunity to educate our young people about drug abuse. If we want them to take us seriously, we must start driving home the message as soon as they walk through the doors in September.

That is why I am introducing a resolution today to designate the month of September as "National Back to School—Back Off Drugs Month."

This resolution suggests a number of activities that should be planned in the area of drug abuse education during the month of September—activities that have been proven very effective in combating drug abuse among young people.

With such a declaration, it would be difficult for any school system to ignore the challenge of attacking the drug abuse problem headon with a full-fledged education and prevention campaign—a campaign that hopefully will set the tone for the rest of the school year and beyond.

## ONLY CONGRESS HAS THE POWER TO OVERCOME THE DEFICIT

(Mr. GOODLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOODLING. Mr. Speaker, I did not plan to take a 1-minute speech, but since we are responding to what each other has to say, I would say to the gentleman from Arkansas that we may fool a few of our constituents when we talk about the importance of the President's budget, but the masses understand that the only budget that counts is the budget that is passed by the Congress of the United States. Even the congressional budget is not very important unless the very same Congress authorizes and appropriates and spends according to the budget.

So, again, we may fool a few people, but the masses now understand the power is in the Congress of the United States, and only the Congress of the United States can do anything about the deficit.

□ 1010

## THE CLOCK IS GOING TO RUN OUT ON IMMIGRATION REFORM

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, I have taken this well before to describe the need in the United States for comprehensive immigration reform. Last year, I referred to a trip I made down to the border in the San Diego area in which I was able to see the unfortunate circumstances under which many of the illegal aliens live. They live in the so-called spider holes, burrows in the ground, several feet deep. In some locations, hundreds of people live in these communities.

Some people thought, "Well, that was just a problem of agriculture," and in fact wanted to point the finger at the owners of the land until it was revealed in some circumstances we think we have found them on U.S. Marine Corps bases.

Yesterday it was announced by the INS that they found 119 illegal aliens living in spider holes not down in San Diego, not along the border, but in the middle of Los Angeles under our freeways. The Government agents arrested 119 illegal aliens. They found 40 mattresses hidden under bushes, kerosene stoves, radios, 2 television sets plugged into a municipal power cable running under the interchange.

The illegal immigrants had dug adobes, many of them less than 4 feet high, and were living in jungle conditions according to the INS Commissioner.

How can we allow that to happen in this society? How can we year after year after year put off all the things that we have to do on this particular subject in order to take care of other things that we consider important?

I think it is a disgrace; I think it is a tragedy. I think it is something that the Congress has the obligation to turn its attention to. I hope we will do that in the remaining days left in this Congress. But, the clock is ticking and, unfortunately, it looks more and more like the clock is going to run out as it has in the last two Congresses.

## THIS ADMINISTRATION IS TOTALLY RESPONSIBLE FOR LOSS OF JOBS IN AMERICA

(Mr. COELHO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COELHO. Mr. Speaker, I did not intend to speak today, but I was intrigued with some of the comments from my colleagues from the other side about the deficit situation and what is happening.

I think the American public really knows what is going on, contrary to what one of my colleagues said. What the American public really knows is going on is that this administration is artificially manufacturing deficit numbers, artificially manufacturing what is going on with this economy and is misleading, deliberately, the American public as to what we can or cannot do in regards to budget or revenue figures.

People know that; people understand that. To have some of my colleagues stand up here and say it is this House or it is this Congress that is doing the misleading is a disservice to all of us in the Congress and a disservice to our country.

Let me tell you this: It is in the last 6 years that we have seen the debt for this country double under this administration. We have seen in the same 6-year period the trade deficit increase to figures that are disgraceful, that are causing us, as a country, to be stalemated. I find it intriguing that this administration with its Reaganomics agenda may be in effect destroying their ability to prove once and for all whether or not supply side economics can work by, in effect, practicing a free trade policy that is destroying not only us as a Nation and our ability to compete, but destroying us in regards to our economic ability to perform.

The bottom line is, is that Americans are losing jobs all over this country, and this administration is totally responsible for it.

## IT IS TIME FOR ROMANIA TO CLEAN UP ITS ACT

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Mr. Speaker, let me bring you up to date on something. Last week, by a very close vote, we failed to do anything about the persecution of Christians and Jews in Romania. Some of my colleagues said, "Well, the Romanians are making great progress; let us give them a little more time."

I want to announce that yesterday, 5 days after the vote, the Romanian repressive Government bulldozed a Seventh-day Adventists Church, forcing the parishioners to be removed from the premises. This demolition or partial demolition, and it has been hard to get the word back and forth, follows the July 21 destruction of the only Spanish synagogue in Bucharest against the agreement that they had with the Jewish community.

We did not know during the debate that they had bulldozed a Jewish syn-

agogue. I wish we did; we could have perhaps made a difference. But here we come the second time. We give them MFN and they stick it in our face by bulldozing the Seventh-day Adventists Church.

Yesterday, there were a lot of statements here on the floor of the House about trade. They have a 5-to-1 ratio benefit. They are sending petroleum products to this country. Textiles, listen to this in the South, textiles. Steel, in the Midwest, steel and shoes.

Mr. Speaker, I hope when we get another chance that we stand up and do the right thing for the Christian community and the Jewish community in Romania and we send a message and knock out that MFN.

I want to tell the Romanian Government: We are coming and we are going to get you unless you clean up your act.

## RESTORING THE PROMISES OF MEDICARE

(Mr. BONKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONKER. Mr. Speaker, last evening NBC nightly news carried a special report on medical insurance for the elderly. It found that the American elderly are not getting the kind of insurance they need. Indeed, they are paying dearly for the wrong coverage.

Last week the Department of Health and Human Services said total spending for health care in the United States rose 8.9 percent—5 percent higher than the overall Consumer Price Index of 3.9 percent. Benefit payments under the Medicare Program increased even faster than overall health spending—12.2 percent.

By 1984, health spending not paid by Medicare again equaled 15 percent of the average old person's income—almost equal to the share by the elderly prior to the enactment of the Medicare Program.

For all too many Medicare beneficiaries, the cost of an acute and serious illness has once again become catastrophic.

Mr. Speaker, last week I introduced legislation to expand Medicare by offering its beneficiaries two additional supplementary medical insurance options. The bill is primarily designed to protect the elderly from rising cost sharing requirements that have increased rapidly over the past decade. The proposal will reduce out-of-pocket costs for the elderly and eliminate much of the confusion for both consumers and providers. And it will not result in any additional costs to the Federal Government.

The time has come for Congress to address this problem and restore the health benefits they were promised under Medicare.

## SUPPORT A DELAY IN THE PRODUCTION OF THE BIGEYE BOMB

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, last month the GAO released its most complete report ever on the Bigeye nerve gas bomb. After 25 years of work, they clearly state that the Bigeye simply does not work.

After the Bigeye unexpectedly exploded in 1982, many changes were made to the bomb and its delivery tactics. After a year of analysis, the GAO stated:

> What changes in bomb design and operational tactics have done is to shift the burden * * * to the pilot by adding constraints, reducing his safety, increasing the speed of calculations * * * (he has) little assurance that the bomb, once delivered, will be effective.

I urge you to support the Fascell-Porter-Roukema-Hoyer amendment to the authorization bill to allow another year's work on the Bigeye and better alternatives. Rather than spend the billion dollars Bigeye is projected to cost, lets get to work on alternatives that do not threaten the pilot and actually work.

Mr. Speaker, the GAO says it doesn't work and the Europeans say they do not want it; let's send it back for improvements.

## NEW SCREENING AVAILABLE FOR BREAST CANCER

(Ms. OAKAR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, the No. 1 or No. 2 killer of women is still breast cancer. One out of 7 to 10 women in this country will acquire breast cancer this year. I have introduced legislation in Medicare to deal with prevention. We do not have cancer screening, let alone free physicals as part of the Medicare Program. I want to join my colleague, Mr. BONKER, in addressing this problem.

This week we have a unique opportunity in Washington to bring attention to the situation. The Benjamin Franklin Literary and Medical Society will sponsor a mammobile which will provide free breast cancer screening by mammography for women over 35 years of age.

□ 1020

This mobile unit will be parked at the Senate trolley car stop at the north end of the Capitol Plaza all this week from 8:30 to 5:30 and at the House trolley car stop at the south end of the Capitol Plaza during the week of August 11 from 8:30 to 5:30.

Mr. Speaker, I urge all women who work on the Capitol grounds and all women who are visiting Washington to take advantage of this mammography. We need to know that it is free, it is a simple treatment, and it can detect cancer at its earliest stages and save your lives.

## PROPOSED LEGISLATION WOULD COST JOBS, CRIPPLE INDUSTRY

(Mr. KINDNESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KINDNESS. Mr. Speaker, legislation which would take another step in the crippling of U.S. industry and threaten the jobs of American workers is expected to be considered on the floor of this House soon.

H.R. 1309, the High Risk Occupational Disease Notification and Prevention Act of 1986, would create a complicated, duplicative system of notifying workers of occupational risks. The subject is already regulated by OSHA.

There are many provisions in the legislation which cause great concern, but a potential increase in tort litigation is a certain result of enactment of such legislation. The U.S. Department of Justice has estimated that the cost to the Federal Government of such additional litigation could swell into hundreds of millions and perhaps even billions of taxpayer dollars, in addition to higher costs to produce U.S. goods to compete with cheaper imports.

Our U.S. courts cannot readily absorb this additional litigation burden, and U.S. taxpayers and consumers should not be burdened by this added expense.

Mr. Speaker, I want to stress that if H.R. 1309 is enacted, we are talking about a potential tidal wave of litigation, which threatens the livelihood of U.S. employers and workers. In the State of Ohio, we simply cannot afford to lose any more jobs or businesses.

The U.S. steel industry is fighting for its life against intense competition worldwide. By imposing burdensome requirements and increased costs on employers, H.R. 1309 further erodes the competitive position of steel and related industries. Given the mammoth trade deficits we are experiencing, where would this bill leave us down the road?

And the steel industry is just one example. I would encourage my colleagues to check with manufacturing businesses in their own districts to find out how H.R. 1309 will impact jobs in their areas.

Worker risk notification is a proper requirement, as already recognized by OSHA in its "Hazard Communication Standard," but this is a bad bill which

desperately needs to be ignored and forgotten.

We are under serious time constraints in this session of the Congress, Mr. Speaker, with too many important matters deserving of our careful attention to spend precious time considering this poor excuse for legislation.

I would encourage the House Democratic leadership to carefully weigh our workload and our legislative priorities, and to, at a minimum, postpone consideration of the legislation.

It would be a great mistake to assume that H.R. 1309 will pass by without significant notice, opposition, or debate.

## INCREASED WORKLOADS STRAIN VETERANS' ADMINISTRATION

(Mr. SHELBY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SHELBY. Mr. Speaker, earlier this year, the Veterans' Administration Home Loan Guaranty Program experienced a tremendous surge of activity due to the decline in interest rates to 9½ percent—their lowest point in the last 7 years.

As a result of budget cuts, however, VA regional offices lost 73 loan guaranty personnel. This workload strain on fewer personnel resulted in tremendous backlogs and lengthy processing periods.

As a result of a hearing I held on May 7 on the VA's workloads, the Administrator lifted the hiring freeze for the loan guaranty operation. In addition, S. 2416 (Public Law 99-322), which the Congress passed on May 21 and which the President signed on May 23, was amended to contain one of my provisions in H.R. 4775 to provide that fees for appraisals performed in connection with foreclosures be paid from the loan guaranty revolving fund. This made available approximately $4.2 million in the general operating expenses account to provide for additional personnel in regional offices in order to process the voluminous paperwork.

I am pleased to advise my colleagues that the VA's loan guaranty division has made significant progress in reducing backlogs since that time. Certificates of reasonable value [CRV's] pending have decreased from a high of 31,594 to the present level of 8,051. This is a reduction of 75 percent over an 11-week period. In addition, pending prior approval loan applications have declined 34 percent—from a high of 5,146 to the current 3,386 pending level.

Mr. Speaker, I am including with my remarks a status report, as follows:

LOAN GUARANTY WORKLOAD STATUS REPORT

| | Certificates of reasonable value pending | Prior approval loan applications pending |
|---|---|---|
| April 28 | 29,671 | 4,754 |
| May 5 | 30,085 | 4,509 |
| May 12 | 31,594 | 4,970 |
| May 19 | 21,593 | 5,110 |
| May 27 | 19,621 | 5,146 |
| June 2 | 15,667 | 4,293 |
| June 9 | 11,697 | 4,126 |
| June 16 | 12,146 | 4,072 |
| June 23 | 10,407 | 3,931 |
| June 30 | 9,519 | 3,855 |
| July 7 | 8,338 | 3,728 |
| July 14 | 8,565 | 3,661 |
| July 21 | 8,186 | 4,096 |
| July 28 | 8,051 | 3,386 |

As indicated in the above chart, Loan Guaranty has made significant progress in reducing backlogs in pending work. Certificates of Reasonable Value [CRV's] Pending have decreased from a high of 31,594 to the present level of 8,051, or a reduction of 75 percent over an 11-week period. Prior Approval Loan Applications Pending have declined 34 percent, from a high of 5,146 to the current 3,386 pending level.

Regional offices are making every effort to reduce backlogs and meet the needs of veterans.

## REPEAL THE 22D AMENDMENT

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, the head of the Democratic Congressional Campaign Committee made a stirring speech today attacking the President and blaming the loss of jobs on him. I guess the creation of almost 10 million jobs since 1982 is not good enough.

When we talk about Government spending and try to blame the President of the United States, we should remember that there is a nonpartisan group called the National Taxpayers Union, which rates all of us in this House on every single solitary vote—all of them. According to their rating even I can do better. But at least I am in the top good category.

All 21 of the biggest spenders in this House are Democrats—all 21. No. 21 is our distinguished majority leader, Mr. JIM WRIGHT. All of the best 20 happen to be on my side of the aisle. Thanks, fellows. Most are doing a little better than I am.

The gentleman from California [Mr. COELHO], who lays the blame of a budget deficit on the door of the President, spends more than all but about 12 percent in this House. What kind of double standard is this? I have a suggestion for Mr. COELHO. Come to the rally at Lafayette Park today. Help the Republicans get President Reagan 4 more years on top of the 2 years and 4 months he has left, and then he can create another 10 million jobs. We can do something about the big-spending Democrats in this House. We can, together with Mr. COELHO and the California delegation of Republicans, work to reward Ronald Reagan for 5½ great years of economic prosperity by giving him a total of 12 years in office.

Repeal the 22d amendment. I am with you, buddy.

## VOTE ON TEXTILE BILL VETO OVERRIDE NOT A VICTORY BUT A WARNING

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and exend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, the vote yesterday on the textile bill override is being hailed as a victory for the President, but what needs to be asked is this: How strong is a policy that can garner, despite all the Presidential pressure, only 35 percent of this House and only 60 percent of the Members of his own party?

The answer is that this Nation really has had no coherent trade policy, unless you call running from fire to fire, a policy.

Yesterday we heard the argument that we should not be too disturbed because textiles are in the same boat as everyone else, that all industry is "in transition." But the question is this: transition to what? To extinction, as is true for hundreds of industrial businesses and shops? To permanent layoff, as is true for millions of industrial workers?

There is a definite need for our Nation to craft a bipartisan trade policy which is more than reacting to the latest pressure and using Congress as a bogeyman to extract last-minute concessions from other nations.

Mr. Speaker, yesterday's vote was not a victory; it was a warning.

## RECONCILIATION LANGUISHES, LEADERSHIP FAILS TO ACT

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, I understand that a few moments ago the head of the Democratic Congressional Campaign Committee came out here on the floor and talked to us about deficits. That is very interesting because this House has failed to meet its obligations on the Budget Act on every single occasion so far this year.

We have not met one target date thus far this year, and now we are up against a target date on reconciliation. And guess what? The Democrats, the liberals in this House, do not want to do anything about reconciliation either and save the money, the $9.1 billion, we were supposed to save on reconciliation.

Why? Because when they sent reconciliation to their committees, it had nothing to do with the administration, and it has nothing to do with the other body; when they sent reconciliation to their committees, they did not meet the target.

Now we have an amendment to add an additional $6 billion of savings if they would simply bring the bill to the floor and allow us to vote. I wonder if that bill will get to the floor. I wonder if we will get a chance to offer the additional $6 billion in savings. I wonder if it will ever get out here when the liberals control the process that gets it here. I doubt it.

The gentleman from California [Mr. COELHO] is one of the Members who will not allow it to move, and yet he comes out here and talks about deficits. My guess is that it was more a political speech than a speech dealing with reality because the facts are that the Democrats are the deficit.

## THE OPTIMAL GRAIN GRADING ACT OF 1986

(Mr. BRUCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRUCE. Mr. Speaker, today I am introducing a bill to improve the quality of grain sold in the United States: "The Optimal Grain Grading Act of 1986." Our current grain standards need to be more quality-sensitive. The standards, which were designed in 1916 to facilitate marketing, have not kept pace with the demands of today's competitive markets.

The consensus for change is growing. Articles in Farm Journal, Prairie Farmer, and other publications have identified some of the key issues. Several conferences in the past year have addressed farmers' concerns about quality. In a notable series of workshops held over the last 6 months, farmers and shippers have made great strides on a broad range of quality issues. I am particularly encouraged by the fact that the workshop recommendations hinge on a new philosophy about the grain standards. The participants agreed that a major objective of the standards should be to "create the tools for the market to establish quality improvement incentives."

My concern is this. I've read those grain standards. I've read them several times. And I have to say that until there is a shift in basic policy, any tools that are created for quality improvement will be blunted by the barriers the law itself erects against quality improvement.

Current standards specify maximum levels of flawed materials permitted in each grade. This system virtually assures that all grain will be blended to maximum levels of inferior material, because farmers receive the same price for a certain amount of weeds, seeds, and broken kernels as they get for good grain. Farmers who don't blend stand to lose several cents on every bushel.

No matter what kind of moral or ethical appeals we make to improve quality, as long as our standards make it economically infeasible to provide a high-quality product, we will continue to see shipments of less-than-clean grain. Only by treating the first percentage point of damage the same as the last percentage point will we remove the economic incentive to blend low-quality grain.

With this basic economic principle in mind, I have drafted legislation to make our grain standards consistent with a focus on quality. The Optimal Grading Act has two main parts. First, it would establish a single, optimal grade containing only three pieces of information: the damage to the grain, the amount of foreign material, and the quantity of broken grain. Grain would meet the optimal grade if it had a minimal amount of any of these flaws. All other grain would be measured by its deviation from the optimal grade. Second, the bill would require the Federal Grain Inspection Service, in response to a survey of buyers, to expand the availability of information about how grain will perform for the end user—such things as soybean oil and protein content, wheat gluten quality, and corn starch content.

The emphasis in both of these changes is on more accurate and complete measurement of grain. If we are to be competitive, we must be responsive to what buyers want and need. Our current system of tolerances of a certain amount of poor-quality material—or any attempt to set rigid limits on grain trading practices—will simply reinforce the practice of blending grain until it meets those limits. Only by removing the disincentives to quality shipping can we give the market an opportunity to determine the true value of high-quality grain.

In the long run, I believe the approach in the Optimal Grading Act is the one we must take if the United States is to be a leader in quality production. I have heard it said that foreign buyers already have the option to purchase high-quality U.S. grain, but they don't want to pay the price. This statement may be true, but it addresses only one side of the issue—the foreign buyer. Our concern should be with the U.S. seller. Because our system has never encouraged quality improvements, we simply don't know if we're providing the best quality we could at a given price. Improving grain quality will be a long-term project, involving farmers, grain handlers, researchers, and even geneticists. This bill, to ensure that U.S. standards reflect our commitment to quality, is the first step.

□ 1030

## PROVIDING FOR CONSIDERATION OF H.R. 3042, DROPOUT PREVENTION AND REENTRY ACT OF 1986

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 511 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 511

*Resolved*, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3042) to amend the Elementary and Secondary Education Act of 1965 to provide grants to local educational agencies for dropout prevention demonstration projects, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. WILLIAMS). The gentleman from Michigan [Mr. BONIOR] is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Missouri [Mr. TAYLOR], pending which I yield to myself such time as I may consume.

House Resolution 511 is an open rule providing for consideration of H.R. 3042, the "Dropout Prevention and Reentry Act." The rule provides for 1 hour of general debate, to be divided equally between the chairman and ranking minority member of the Committee on Education and Labor.

After general debate, the bill shall be considered for amendment under the 5-minute rule. The rule provides that it shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor, which is now

printed in the bill, as an original bill for the purpose of amendment under the 5-minute rule. Each section shall be considered as having been read.

The rule provides for one motion to recommit, with or without instructions.

Mr. Speaker, H.R. 3042 amends the Elementary and Secondary Education Act of 1965 to provide grants to local educational agencies for dropout prevention demonstration projects. It addresses an urgent, and growing problem faced by every community in this Nation—the problem of the high school dropouts.

At present, there is no reliable source of data on the exact number of students who leave school before graduation, but our best estimates put the figure at about one out of every four. Without a high school diploma, these students lack the credentials to earn a decent wage, support a family, and become productive members of society. If we are ever to get a handle on the problems of crime and welfare dependency, it is important that we address head on the problem of school dropouts.

This legislation takes an important step forward. It provides Federal support for local school districts to develop effective programs to prevent student from dropping out, and to encourage students who have left school to return. Assistance will initially go to localities with the most severe dropout problems. The program will, however, benefit every area of the country by providing better information and better evaluation of dropout prevention projects that can be used in other areas.

Mr. Speaker, I would like to commend the chairman and members of the Committee on Education and Labor, especially the gentleman from Illinois [Mr. HAYES] for their careful work in preparing the bill. The rule is an open rule, which will allow Members to fully debate this important issue. I urge adoption of this rule.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 511 is an open rule under which the House will consider legislation creating a new $50 million grant program in an attempt to keep students from dropping out of school and to encourage dropouts to complete school.

The rule makes the amendment in the nature of a substitute reported from the Committee on Education and Labor, now printed in H.R. 3042, in order as original text for the purpose of amendment under the 5-minute rule.

The rule also provides one motion to recommit, with or without instructions.

Mr. Speaker, the proposal made in order by this rule is fairly controversial, but I want to point out that the rule is a straightforward open rule and germane amendments will be allowed.

The bill made in order by this rule establishes a new Federal aid program to help school districts, especially those with very high dropout rates, demonstrate techniques to prevent students from dropping out and to encourage those who have dropped out to return to school

Mr. Speaker, the administration is opposed to this bill. They indicate that the bill's proposed programs duplicate existing programs already authorized under chapters 1 and 2 of the Education Consolidation and Improvement Act and the Carl Perkins Vocational Education Act.

Mr. Speaker, since this is an open rule, I can see no reason to oppose its adoption.

Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I have no further requests for time, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

---

## PROVIDING FOR CONSIDERATION OF H.R. 3263—GIFTED AND TALENTED CHILDREN AND YOUTH EDUCATION ACT OF 1986

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 512 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 512

*Resolved*, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3263) to establish a Federal program to strengthen and improve the capability of State and local educational agencies and private nonprofit schools to identify gifted and talented children and youth and to provide those children and youth with appropriate educational opportunities, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. BONIOR] is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Ohio [Mr. LATTA], for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 512 is an open rule providing for the consideration of H.R. 3263, the Gifted and Talented Children and Youth Education Act of 1986.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor.

The rule makes in order the Education and Labor Committee amendment in the nature of a substitute now printed in the bill as original text for the purpose of amendment under the 5-minute rule. Each section of the substitute shall be considered as having been read.

Finally, the rule provides for one motion to recommit with or without instructions.

Mr. Speaker, I am pleased to be a cosponsor of H.R. 3263, a bill which seeks to ensure that the best and brightest of our Nation's students are effectively served and challenged by our educational system. The bill would establish a program to improve the capability of State and local educational agencies and private nonprofit schools to identify gifted and talented children and to provide them with appropriate educational opportunities.

The bill defines gifted and talented children and youth as those who show signs of high performance in areas such as intellectual, creative, artistic, or leadership capacity, or in specific academic fields, and who require services or activities not ordinarily provided by the school in order to fully develop such capabilities. About 2.5 million children have been identified as gifted and talented, but another 2 million are believed to be unidentified as being gifted and talented. This bill will provide needed Federal support for programs to identify gifted and talented children and to respond as effectively as possible to their special educational needs.

Mr. Speaker, I am not aware of any opposition to this open rule, and I urge my colleagues to adopt it.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in the Rules Committee hearing on this rule, both the Democrat and the Republican representing the Committee on Education and Labor requested an open rule.

The Rules Committee provided exactly what they requested. There are no waivers of House Rules, no waivers of the Budget Act and no restrictions on amendments in this rule, this is the kind of rule we should use more frequently.

The bill made in order by this rule the Gifted and Talented Children and Youth Education Act of 1986, was reported from the Committee on Education and Labor by a voice vote. In the Rules Committee, it recevied bipartisan support from the representatives of the Education and Labor Committee.

However, Members should be aware that there is opposition. The administration opposes this bill because the bill, the new grant program proposed by the bill, duplicates program authority already existing under the chapter 2 State Block Grant Program of the Education Consolidation and Improvement Act.

Mr. Speaker, under this open rule procedure, any necessary changes may be made in the bill. I support the rule so that the House may proceed to work its will on this legislation.

Mr. Speaker, I yield back the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

## DROPOUT PREVENTION AND REENTRY ACT OF 1986

The SPEAKER pro tempore. Pursuant to House Resolution 511 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3042.

□ 1043

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3042) to amend the Elementary and Secondary Education Act of 1965 to provide grants to local educational agencies for dropout prevention demonstration projects, with Mr. LEVIN of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from California [Mr. HAWKINS] will be recognized for 30 minutes and the gentleman from Pennsylvania [Mr. GOODLING] will be recognized for 30 minutes.

The Chair recognizes the distinguished gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 3042, the Dropout Prevention and Reentry Act. I commend Congressman HAYES from Illinois for having the foresight to write this bill and to help move it through the committee. He has done a great service for the children of this country.

The Federal Government does not presently have consistent data showing the extent of the school dropout problem. The U.S. Department of Education estimates a dropout rate of 29.1 percent.

Regardless of what estimate we use, nearly 30 percent or less, we clearly have a major problem in this country with school dropouts. A high school diploma means money in the pocket for youths. Those who drop out are destined to make less money and to make less of a contribution to society.

School dropouts also cost all of us an enormous amount of money. According to a study at Stanford University, school dropouts cost the Government $77 billion a year, every year and this estimate is only based upon people who were between the ages of 25 and 34 years old. The real costs are much greater if we were able to survey all youths who have dropped out of school.

Let me explain what this loss of $77 billion a year means. It means that the Government is receiving $71 billion less in tax revenues. It means that we are spending $3 billion more than we should for welfare and unemployment, and it means that we are spending an extra $3 billion every year for crime prevention.

These costs are handed on to all the taxpayers of this country because we as a nation are not dealing adequately with the problems of school dropouts.

These problems will become greater in the future because the demographics of our society are changing. White youngsters have a dropout rate of about 12 percent, black youth have a dropout rate of 23 percent and Hispanics are 36 percent. And most of us know that the birth rate for whites is declining in this country, while it is increasing for other groups. We will have more and more minority children in our schools and these are precisely the children who are experiencing the highest dropout rate.

We must deal with this problem today or we will deal with its consequences in the years to come. This bill proposes a modest expenditure of funds to address the problem.

The bill authorizes the Secretary of Education to make grants to local school districts for demonstration programs on preventing and correcting the school dropout problem. Thirty percent of each local grant must be used for prevention and 30 percent must be used to help youth who have already dropped out. School districts are required to match these grants with 10 percent of their own funds in the 1 year and this match grows to 40 percent of local funding in the third year.

A very important feature of this bill is that it requires any school district receiving money to begin to collect and publicize the extent of the dropout problem in that school district. We should not sweep this problem under the rug any longer. We should make local citizens aware of it and have local school districts begin to address this problem.

This bill is long overdue and it is a wise expenditure of a modest amount of Federal money. I urge its approval.

□ 1045

Mr. GOODLING. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to begin by congratulating my good friend and colleague on the Education and Labor Committee, Congressman HAYES, for his concern and involvement in addressing the dropout problem. Certainly by any estimate, students leaving school without a high school diploma is one of the major educational problems facing the Nation. In Mr. HAYES' own city of Chicago, there are schools in which less than half of those students who begin high school finish with a diploma 4 years later. I myself have become very concerned about the rate of illiteracy in America. It seems to me that the high rates of illiteracy and leaving school are not unrelated.

While I share Mr. HAYES' concern about the dropout problem, I am unable at this time to lend my full support to H.R. 3042, the Dropout Prevention and Reentry Act. Let me explain why.

I am sure that we have all been reading with great interest and concern about the projected deficits for fiscal years 1986 and 1987. It appears that the economic outlook is not as positive as it looked only months ago. There is a good chance that when CBO and OMB take their "smapshots" on August 15, the projected fiscal year 1987 deficit will be well above the allowable $144 billion. My greatest concern for educational funding is that proven programs not be subjected to

the sequestration process. Programs of proven effectiveness such as chapter 1 and Head Start would suffer serious cutbacks under this scenario.

As a member of the Budget Committee, I have worked hard to provide sufficient funding to maintain these existing programs. In my view, enacting new legislation such as H.R. 3042 not only would exacerbate the overall deficit situation making sequestration more likely, but could possibly damage those educational programs already in place.

I was unsuccessful at the committee level in amending this legislation to provide funding from an existing appropriation. It is my understanding, however, that amendments to the Job Training Partnership Act will allow for the educational set-aside each State receives to be used for dropout prevention and reentry activities.

Again, I would like to commend Mr. HAYES for his deep-felt concern, but must withhold my full-fledged support from this legislation at this time.

Mr. HAWKINS. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. HAYES], the author of this bill.

Mr. HAYES. Mr. Chairman, I rise in support of H.R. 3042, the Dropout Prevention and Reentry Act. I am pleased to have been the author of that bill and wish to thank Congressman HAWKINS for helping me move it through the Education and Labor Committee.

In my city of Chicago we have a dropout rate of 43 percent. This is disastrous for those children. In our inner city schools, including many schools in my district, we have a dropout rate of over 50 percent.

A study by the Chicago Panel on Public School Finances concludes that the lifetime costs of the 12,804 dropouts from the Chicago class of 1982 are over $2.5 billion in transfer payments, crime costs and lost taxes.

Mr. Chairman, I plead with my colleagues to consider the social costs to these people and also to consider the economic loss to our society.

H.R. 3042 is a modest bill, nonpartisan and certainly noncontroversial. It urges school districts to begin to address this national problem. Demonstration programs are authorized so that the best methods can be found to prevent school dropouts and to bring students back into school.

The General Accounting Office testified before our committee that it is not generally known what works in terms of preventing that problem. To quote the GAO: "The identification of programs that work would be very useful to local school districts, and this is called for in the Dropout Prevention and Reentry Act of 1985."

Mr. Chairman, my fellow colleagues, the greatest security our Nation can have is to have our children properly educated. We must follow the GAO's advice and enact this bill. We must also follow common sense that says that if we don't prevent school dropouts today we all will pay higher taxes to address the problem in the future.

□ 1055

Mr. GOODLING. Mr. Chairman, I yield such time as he may consume to the gentleman from Vermont [Mr. JEFFORDS] our ranking member on the Education and Labor Committee.

Mr. JEFFORDS. Mr. Chairman, I rise in support of H.R. 3042, the Dropout Prevention and Reentry Act.

A number of problems confronting the schools of this Nation were brought to the attention of the Education and Labor Committee during the 99th Congress. Perhaps none of them posed such a great threat as that of school dropouts. During this period of educational reform and renewal, nearly a quarter of all students fail to complete high school. Even more alarming is the dropout rate among minority students and students in large urban areas, the very same student groups whose numbers are expected to grow in the next decades.

It may seem unusual for me to be standing here in support of a bill which calls for new money. Now is a time when we are facing large budget deficits, when we must face the task of reordering our priorities. However, the bill, H.R. 3042, can have an important effect on our economic competitiveness. Unless we can bring dropouts back into school in order to provide them with the basic and technical skills they need, they face the likelihood of an adult life of dependency and unemployment. We have to provide a means by which these youths can become productive adults.

My interest in the issues addressed in this bill is longstanding. During my tenure as the ranking Republican of the Employment Opportunities Subcommittee, I worked hard to assure that the training programs we proposed addressed the needs of at-risk youth and dropouts. Of particular concern was that each community, education and training, could learn from the successes of the other. I think that we have barely scratched the surface regarding the issue of dropouts. That is why it is particularly gratifying to have H.R. 3042, the Dropout Prevention and Reentry Act, before us today.

I am especially appreciative of Mr. HAYES' willingness to work with those of us who represent smaller school districts and rural areas to assure that their opportunity to compete for the demonstration grants under the bill is not unnecessarily restricted. An amendment that I offered during consideration of the bill expands the base of funds within which small and rural school districts can compete for funds. Albeit, even with my amendment, over 15,000 school districts, representing over two-thirds of this Nation's students, will remain in the fourth funding tier. Additionally, there were amendments which addressed further concerns surrounding small and rural schools. These amendments provide recognition that the concern regarding dropouts is not only an inner city, urban problem.

This bill has an economic impact we cannot ignore. We know that nearly 4 out of 10 youths who drop out of school are unemployed. Even when employed, workers with less than a high school education lose twice as much work time as workers with college educations. Students who drop out have higher crime and delinquency rates, pay little in taxes, and more often become dependent on Government income maintenance programs. For corporate America, and for State and local governments, dropouts represent a $20 billion-a-year loss. It is again hard to believe that we can afford not addressing the problem. With this bill, we will begin to "define" the problem more consistently and develop methods by which the diversity of the problem can be addressed.

I urge my colleagues to support passage of this bill.

Mr. HAWKINS. Mr. Chairman, I yield 3 minutes to the gentlemam from Michigan [Mr. KILDEE].

Mr. KILDEE. Mr. Chairman, I rise in support of H.R. 3042, the Dropout Prevention and Reentry Act. We are all aware of the fact that the school reform movement has swept across the country within the last 8 to 10 years. Almost every State has increased its requirements for the attainment of a high school diploma. Additional English and math courses have been added to the curriculum and increased testing has been mandated.

I applaud all of these efforts to help young people attain a better education. But, unfortunately, there is a negative side effect to these efforts. The problem of school dropouts has not been addressed in most of these reform laws. In fact, the problem, may have been aggravated. In Texas, one of the States with a major school reform effort, 43 percent of the principals have said that the dropout rate in their schools has risen since the school reform legislation took effect.

We must address this problem of school dropouts. When a student does not attain a high school degree, many doors of opportunity are closed to him or her. Put simply, a high school diploma means economic and social improvement.

The lack of a high school diploma for millions of our youths also means a cost to our society. A study conducted by the Universiity of California, Los Angeles, estimates a loss of $200,000

per dropout and a loss of $200 billion for all dropouts from every school class in the country. This $200 billion is what both citizens and society lose in lower taxes being paid and increased Government expenditures being made for welfare and unemployment.

This bill makes sense. It helps to address a major shortcoming reform movement in this country and it also will add to the tax resources of our Government. I urge its adoption.

Mr. GOODLING. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. Mr. Chairman, let me begin by complimenting our good friend and colleague from Illinois for this particular legislation.

These are tough times fiscally in this country, and these are tough times educationally in this country. Yet I think that the legislation before us has a great deal of merit and is something that ought to be approved by this Congress.

I would suggest, and I know many education leaders in this country would suggest that the greatest challenge facing this country educationwise today is the problem of illiteracy. We are looking at probably 24 million Americans in our work force today who are in some form functionally illiterate.

It used to be that a student could drop out of school and could get a blue collar, labor type of job in our society. But in the high technology age upon which we are embarking, to be very frank about it, in an assembly line, a machine can do a heck of a lot better job of producing a good than an illiterate worker, and they can do it a heck of a lot cheaper. We do not have the luxury in American society today and into the future to tolerate an illiterate work force.

If we are going to wage a war on illiteracy, we are going to have to begin at the problem, which is those who drop out of school and decide at an early age that they do not want an education. I would suggest that the bill before us serves a vital function in that regard, because it allows us to, through the use of competitive grants, set up some pilot project.

I will suggest that we do not have $50 million to spend for this program. I think we would perhaps be wise and would have a good chance of getting this bill passed if we would reduce that $50 million rather significantly, down to perhaps a $15-million level, which is a more than credible pilot project across this country to allow us to try some pilot projects and see what works.

□ 1105

I think it is essential that we do something in this area if we are at all concerned about the question of illiteracy. The Department of Education has suggested that a number of their present programs deal with the problem of dropout prevention and reentry; but looking at their particular summary, I would suggest that it is woefully inadequate.

Chapter 1 has apparently $770 million targeted toward secondary students who are at risk of dropping out. I would suggest that those funds in chapter 1 are not for the most part geared at that local education agency at dropout prevention; they are geared at basic skills, as chapter 1 is intended for.

The Adult Education Program tries to, for the most part, deal with those who have already dropped out and are trying to come back in to the work force. A good program. It does not solve the problem of dropouts in our society; and certainly within the discretionary money which is presently available in chapter 2, there are a whole host of different uses for that money; but the fact is if you go to most of your local school districts, that money is used for computers and equipment. It is not used for dropout prevention, because there is no other program.

We at the Federal level debate often: What is the Federal role in education? I think traditionally it has been one of access to education, and it has been one of the quality in education.

In the last few years, I think we have seen the development of a third role, which is special needs. It would suggest the issue of illiteracy and the issue of dropout prevention as one of those special needs.

So I call in particular upon my Republican colleagues today. I know that we all are concerned about fiscal responsibility and budget deficits. I would suggest, however, that if we are concerned about investment and wise use of our tax dollars, that we take a good, hard look at this program. Probably not at $50 million; but certainly authorizing a program like this so that when we pass increases in education appropriations as we have done this year, that we are able to target some of that money toward this type of initiative.

Mr. HAWKINS. Mr. Chairman, I yield 1 minute to the gentleman from New York [Mr. BIAGGI].

Mr. BIAGGI. Mr. Chairman, I rise today in strong support of H.R. 3042, the Dropout Prevention and Reentry Act. This crucial education bill addresses a problem reaching crisis proportions in this Nation.

The dropout problem is particularly severe in New York City, where my own district is located. The graduation rate in New York City over a 4-year period is only 56.4 percent. Urban students are 60 percent more likely to drop out than rural students and 48 percent more likely to drop cut than rural students. As you can judge from these statistics, this bill is of critical importance to my own district and New York City as a whole.

H.R. 3042 addresses the problem of dropouts head on. It places a priority on those school districts with the most significant dropout problem. Not only does this legislation provide assistance to those students at risk of dropping out, it also helps those who have already dropped out to reenter school. It will attack the growing tragedy of illiteracy now plaguing this Nation, and work to prevent students from dropping out of school, and subsequently out of society.

The dropout rate affects children, their family, and society as a whole. Once students drop out, they are unable to find jobs, must accept a lower income, and ultimately, dig themselves deeper into the realm of poverty.

Another tragedy associated with illiteracy is the corresponding increase in crime. The majority of the incarcerated in this Nation do not have a high school diploma. Yet we, as taxpayers, spend approximately $15,000 per year to keep these dropouts incarcerated. That is more than a single year of tuition at our Nation's Ivy League schools. In addition, society must pick up the costs of welfare, unemployment, and other Government assistance programs. As you have already heard this morning, for every $1 spent on a dropout program, we are provided a return of $12—a return on the many social service programs used to support these students once they drop out.

And finally, I wish to note the correlation between the dropout rate, and another bill we will consider this morning—the need for effective programs to serve this Nation's gifted and talented children and youth. It is estimated that a large number of our high school dropouts are gifted students who were not properly identified and nurtured in school. Gifted students in this country are in classrooms approximately four grades below the level they are capable of competing in. At a hearing earlier in the year, I had students tell me they were bored, so they dropped out. That is a dangerous trend that can not that must not be allowed to continue.

As a nation, nearly 27 percent of our ninth graders will fail to receive their high school diploma. Quite simply, the dropout rate in this country is not acceptable. It should not be tolerated. It is time we address this national tragedy and work to provide an education for all. H.R. 3042 represents an investment in the future of this Nation and that of the world. It is a vehicle that will permit dropout, to re-enter the mainstream of society and give us the

contributions this Nation so desperately needs. As a cosponsor and strong supporter of this legislation, I urge my colleagues to vote in support.

At this time, I want to commend my friend and colleague from Illinois [Mr. HAYES] for his dedicated and untiring efforts on behalf of H.R. 3042. He has crafted a vehicle to address the most serious educational crisis facing this Nation. Mr. HAYES, I thank you for your work on this measure.

Mr. GOODLING. Mr. Chairman, I reserve the balance of my time.

Mr. HAWKINS. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. OWENS].

Mr. OWENS. Mr. Chairman, I want to congratulate my colleague from Illinois [Mr. HAYES] on the introduction of this dropout prevention bill.

Congressman HAYES represents the poorest congressional district in America; the congressional district which is poorest in America is the First District in Illinois, and the correlation between poverty and the dropout rate can definitely be established.

I represent the 12th Congressional District in Brooklyn, which is the 10th poorest district in America. In New York City, the second poorest district, the fourth poorest district, and the seventh poorest district can be found. So in New York City, we have four of the poorest congressional districts in the country, and in New York City we also have the highest dropout rate in the country.

There is a definite correlation, Mr. Chairman. Unfortunately, if you read the New York City statistics on dropouts, you would think our problem was not that great. They officially give a figure of between 35 and 40 percent as the high school dropout rate; but if you take it by congressional district, you will find that in my congressional district, the rate is something like between 65 and 70 percent, because there are some districts in New York where the dropout rate is between 0 and 5 percent.

So it is concentrated, just as unemployment is concentrated, just as illiteracy is concentrated. All the ills are concentrated in the areas of greatest poverty. We need this bill if for nothing else except to break out these comparisons and understand what the problem is, to get some honest statistics, to get some objective statistics.

I want to congratulate my colleagues in the New York State Legislature, because they have taken the intitiative. There have been some bills passed which provided money for a dropout prevention program.

One of the problems immediately encountered, however, was that the bureaucracy at the board of education found a way in a formula to channel the money in such a way that we ended up with a scandal. Staten Island, the area which is a predominatly middle-class area and definitely is not one of the congressional districts that is among the poorer ones in the country, received a higher amount per capita than any other district. It just so happened that the president of the board of education happened to be from Staten Island.

That kind of nonsense, that kind of local favoritism, will be lessened if there is a Federal participation. Somehow there must be an objective Federal participation; some way to compare statistics from one area to another, some way to document and compare attempted solutions and projects that are aimed at dealing with the problem from one area to another.

This is a very small amount of money we are talking about. We are talking about doing something to establish some prototypes as to how to deal with the problem?

Unfortunately, this administration does not recognize the seriousness of the problem; but when the time comes when we do recognize the seriousness of the problem we need these prototypes. We have a problem right now: Our whole education infrastructure is crumbling; from one end to the other it is crumbling, and we do not recognize that. We ought to start getting ready, at least, by having some prototypes to deal with some part of it.

Mr. Chairman, I urge all Members to vote for this very important, although tiny effort on behalf of dropouts.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky [Mr. PERKINS].

Mr. PERKINS. Mr. Chairman, my colleagues, I take this time to say that the gentleman from Illinois, my dear friend and compatriot, CHARLIE HAYES, has done a fine job of bringing a bill to the floor of the Congress of the United States that deals with one of the largest issues and most least-talked about issues that we have in this country today.

You know, we have a 29-percent average dropout rate across this country, but at the same time we do not have any adequate way of trying to deal with this problem.

What happens if we do not deal with the dropouts? They go on welfare. They go into other areas. They do not, most of the time, become productive, taxpaying citizens. You can turn your back on it, you can look at it any way you want, but that is a simple fact.

You look at the studies. What do they show you? We have one study in Chicago; that indicates that for every dollar you spend on dropout prevention you get $12 back. You look and see, do these programs work?

There are several gentleman here from New York. They had a dropout prevention program of some degree up there. You saw the rate of dropouts fall from 50 percent right on down to 35 percent. These programs work. What are the costs? You have seen the costs talked about: $77 billion, $71 in lost taxes; $3 billion in unemployment, $3 billion in welfare payments. That was a 1972 study.

What does it say today? We have a UCLA study that indicates there is a $200 billion a year cost to this country, caused by the lack of dropout prevention, and you are going to tell me that we are going to turn our backs on this problem?

□ 1115

We cannot afford to. This is something that when you talk about basic finance, the basic long-term interest of this country, my colleagues, we look at the problems; you do not look at the good side, you have to look at the problems. This one is a problem. This is a situation that we have got to move to correct. This bill goes not just into the inner cities, but it goes out to the rural areas, areas like Appalachia, which I come from, and it ensures that we are going to be able to get an informational network that we can put together that is going to try to address this most serious of problems.

I ask your support for this legislation.

I again thank the distinguished sponsor for this fine piece of legislation that he has brought to the floor today.

Mr. GOODLING. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. I thank the minority side for the time afforded to me insofar as I am proponent of this measure. I appreciate this chance.

I have come to know CHARLES HAYES since I have been here in Congress, and I know of no other Representative of a hard-pressed area that is making an effort to overcome the problems by a wholistic, comprehensive approach. We are not going to stamp out poverty, we are not going to address ourselves to unemployment until we deal with the basic fiber and the root causes of much of this, and that is under-education, the lack of educational mobility and opportunity to gain a job in our marketplace. Our young people have to be educated, they ought to have that opportunity. We cannot afford to let them continuously drop out of school while we passively sit back and watch this happen before our eyes.

I believe this is a modest measure which has been brought before the House, $50 million has been jumped on so fast as a very modest measure to attack the basic root problems. If you average it out at $1 million a year, the end result is tremendous rewards for our economy to reverse this trend of high dropout rates.

So I am just basically here today to say that a pound of prevention is

worth 10 pounds of cure, and this modest measure by Mr. HAYES should be endorsed by this House with a resounding strong voice so that in any other body it cannot be defeated or denied and it will be passed into law.

I commend the chairman of this committee, Mr. HAWKINS, for his continuous efforts to try to reverse some of the trends that are contributing to the problems that we face in districts like mine. And I again take my hat off to Mr. HAYES and hope that all the Members of this body will heed the words of Mr. PERKINS and others and pass and enact this into law.

Mr. GOODLING. Mr. Chairman, I reserve the balance of my time.

Mr. HAWKINS. Mr. Chairman, I yield 4 minutes to the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. I thank the chairman for this time.

I particularly want to commend my good colleague, Mr. HAYES, for his foresight in developing this legislation and the hard work that he has put into it along the way.

In America our freedoms cost us something, and we have such a unique view of universal freedom in America that sometimes we allow our people to be free in ways perhaps not good for them.

For example, our students at a certain age are free to drop out. Somehow we almost seem to commend ourselves for that. If our students want to drop out, so be it. And because we have extended that type of freedom to all of our citizens, we have often forgotten that we need to apply some solutions to the problems that those freedoms create.

You know, in Japan—and by the way, our educational system in America is better than that of our friends in Japan—but in Japan they do not allow their students, once having dropped out, to go without any specific help. They move immediately to capture those students and to provide them with additional counseling, social and educational assistance.

In West Germany young people are free to drop out, but then they move those young people who have dropped out immediately into an apprenticeship system that provides positive work experience which assists in their skilled labor force.

But in this country we have not yet really come to grips with this problem of our dropouts. It is a cancer, it is a social cancer and it does threaten this Nation today in ways that it has not threatened us before.

Stanford University recently did a study and estimates the costs of high school dropouts to this country, and this is just the dollar cost, not the social cost, by the time those dropouts reach the age of 25 and until they are 34 years old, they cost this Nation $77 billion, with a "b," billion dollars, $71 billion in lost taxes, $3 billion in welfare and unemployment and $3 billion for crime prevention.

Our young people should drop out into something besides our unemployment lines, our welfare rolls and our jails. This bill tries to provide a soft landing and some additional assistance to those people. Yes, it is fairly expensive. It is going to cost $50 million, with an "m," $50 million. But think of the payback because of the billions it is costing us.

If we consider the cost benefit of spending $50 million now to protect $77 billion a year in the next decade, it is a pretty good deal.

By the way, we opened the House this morning at 10 o'clock. It is now 20 after 11. If we had started the Pentagon spending clock ticking when the House went into session, we would find that the Pentagon has already spent in just this hour and 20 minutes all the money that we are talking about putting into this bill.

So let us reset America's spending clock and compass, do things that are going to pay back to this society in the coming decade so that, yes, we can reduce the deficit, but more importantly, we can continue to smooth the dropout rate and assist those who insist on dropping out because they have the freedom to do so.

I also want to note that in marking up the bill, the full committee adopted my amendment to increase opportunities for rural States and communities to benefit from the Federal assistance.

My amendment provides that the Secretary must ensure that not less than 20 percent of the amount allocated under the bottom tier, which includes school districts with an enrollment of fewer than 20,000 students, must be awarded to districts with enrollments of fewer than 2,000 students. Of course, the awards must be made to districts which propose programs of sufficient size and scope to be of value as a demonstration to other similarly situated districts.

H.R. 3042 is first and foremost a program providing assistance to districts to develop model demonstration programs designed to reduce the dropout rate. Thus, it is essential that demonstrations be funded in small rural as well as large urban districts because the problem of dropouts is not limited to urban areas. My amendment, along with the other amendments to the tier system adopted by the committee, will ensure that an adequate number of demonstrations are funded from which the smallest districts may learn how to reduce their dropout rate.

As you know, approximately 16,000 school districts fit within the bottom tier. In Montana, we have 551 school districts. Our largest district is Billings with 12,000 students; our smallest district has 2 students. Seventy percent of our districts are one-, two-, or three-room schools. Ninety-eight percent of the districts have less than 2,000 students.

The dropout rate in districts in Montana is difficult to ascertain because statewide data no longer exists. However, estimates are that in some districts, particularly those with large populations of Indian children, the dropout rate is as high as 40 percent.

Mr. GOODLING. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. DURBIN].

Mr. DURBIN. I thank the gentleman from Pennsylvania for yielding.

I want to commend the chairman of the committee, Mr. HAWKINS, and particularly the sponsor of this legislation, my colleague from Illinois, CHARLES HAYES. Illinois has a school dropout problem from one end of the State to the other, not just in Mr. HAYES' district in Chicago but across the State, downstate, in rural areas, and in small towns and villages. It is a national problem as well.

It is ironic to consider that we will probably leave our discussion of educational issues on this measure to return to our debate on the Department of Defense authorization, and I would ask all of my colleagues to listen closely as we consider some 160 amendments to the Department of Defense bill. Try to find one of them which address a question of spending as low as $50 million. In the context of a $280 billion defense bill, a $50 million amendment is considered virtually insignificant. Unless someone can address billions of dollars in defense spending they usually do not have the nerve to take to the floor when it comes to the Department of Defense.

Why is it when we come to education that the only way to initiate a valuable program like this is to reduce the expenditure to such a low level that it will incur no wrath, no controversy and no competition from other people?

I want to commend my colleague for taking this initial step. Those of us who pay lipservice to the Carnegie Report and other reports about education have a chance here to put our money where our mouth is.

And there is another aspect to this as well: Over the last several weeks we have had a heightened consciousness in America about drug abuse. Let us face it, ladies and gentlemen, we not only have to go after the supply side on drugs, interdiction and arrest, but we have to go to the demand side. The demand side suggests that many young people drop out of school, become despondent, have no job and turn to a street life that unfortunately many times involves drugs.

If those folks are arrested, we will certainly appropriate the money to build the new jails, there is no question about it. But what Mr. HAYES is

doing with this legislation is trying to prevent that problem before it occurs.

I commend him for this approach. I think it is excellent. It has a local match involved. It is a step in the right direction.

Mr. GOODLING. Mr. Chairman, I reserve the balance of my time.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentlewoman from Illinois [Mrs. COLLINS].

Mrs. COLLINS. I thank the gentleman very much for yielding.

Mr. Chairman, I want to commend the gentleman from the State of Illinois for this very fine piece of legislation. It is something that has been needed for quite a while.

What concerns me about the dropout rate in our Nation is that it seems to be increasing very rapidly rather than decreasing.

Not only that, but when we see the number of students who are dropping out, we must realize there is a developing crisis that could sap the mental strength of our Nation. The appallingly high dropout rate in our schools means that our Nation as a whole is not going to have the level of educational attainment we need to compete industrially or technologically in the future.

The really sad part about this is that many of the students who drop out have very, very good minds. For those of you who live in the inner city, you may have observed that some of these young people have all kinds of ingenius ideas and are often creative in a number of ways, some of which are accepted by society and some of which are not.

However, if given the opportunity to go back to school, to further their educational goals they can become very productive citizens. If not given the opportunity to get back into the school system, what will happen to these dropouts? Will they simply move into jobs that do not require a high school diploma? Unfortunately no. For the vast majority, the future will bring only poverty, misery, and destitution. They will become dependent on Government subsidies and will never take their proper place as taxpaying citizens. In the past, an individual who did not have an education could always find jobs in our economy, by simply using their musclebound skills, but today, in America, we are no longer musclebound. Those jobs are not there anymore. We are rapidly becoming a nation which will have to depend upon its brain in order to be productive. In fact, the new technologies demand that our students have at least a high school education and, hopefully, a college degree that they can fall back on. Therefore, the dropouts of today will be helpless in tomorrow's technological world.

The future dependence of these dropouts on the Government for their support is bad enough. There is, however, an even graver effect. America is losing the brain power of these people. As educated citizens, their minds would become a resource for the Nation. They would take their place as physicists, doctors, and lawyers. Some would become engineers, others might open small businesses. Whatever their positions, they would add their mental power, their intelligence, their knowledge to the common pool that is America. The dropout crisis is stealing this resource from the Nation. Our society is losing because young people are not receiving the proper counseling and help needed to enable them to stay in school.

Education is the vehicle by which those in poverty can break the chains that bind them and take their rightful place in our society.

I, again, commend my friend and colleague from Illinois for authorizing this bill and hope that this legislation will be passed by all of us here in the House of Representatives.

Mr. HAWKINS. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania [Mr. GAYDOS].

Mr. GAYDOS. I thank the chairman for yielding.

I take this time to spread on the RECORD my sincere appreciation, and I know I speak on behalf of my colleagues, to the sponsors or the maker of this bill, the gentleman from Illinois [Mr. HAYES]. This has always been a nagging problem. In my childhood I remember it. It has always been a problem. I think this is a very timely bill, I think it is a practical approach, and I think it is going to bring us many benefits as a nation and as a population.

I want to congratulate the gentleman on his foresight at this time.

Mr. HAWKINS. Mr. Chairman, I yield myself as much time as I may consume.

In closing, Mr. Chairman, let me merely make two points: One, I think we must face the concern expressed by the gentleman from Pennsylvania [Mr. GOODLING], the ranking minority member of the subcommittee, as to the cost of this bill. I share that concern with him and will try to work with him to meet that rather serious concern.

I think it is the overshadowing gravity of the situation, however, that makes many of us believe that this problem should be, must be faced, and it must be faced head on. And if that leads to outlays which are estimated in this bill, I think that it is a very, very insignificant amount of investment that we are making in the problem itself. The outlays are estimated to be only $4 million in 1987 fiscal year, $38 million in 1988 and by 1989 $52 million and thereafter a declining amount that it seems to me is a very, very modest amount and perhaps, I think, it includes the concern of the ranking minority member of the committee.

The other point that I would like to bring out which has not been brought out in this debate has been that during consideration of H.R. 3024 the committee took into account the findings of the Select Committee on Narcotics Abuse and Control. Therefore, we have included in this proposal an amendment which authorizes funds to be used by grantees to study the relationship between drugs and dropouts and young gangs and dropouts and to coordinate the programs under this bill with drug prevention and youth gang prevention community organizations. If that coordination takes place, it seems to me this modest outlay will be more than deserved.

Mr. RAHALL. Mr. Chairman, I rise today in support of H.R. 3042, the Dropout Prevention and Reentry Act, and commend the work of my colleague from Illinois, Mr. HAYES, in introducing this fine piece of legislation. I would also like to note the efforts of my colleagues on the Education and Labor Committee, and especially those members of the Subcommittee on Elementary, Secondary, and Vocational Education, to bring this measure to the floor of the House for a vote.

This bill, which authorizes $50 million for demonstration projects in school districts of all sizes across the Nation, addresses a critical issue of paramount concern to all communities. The national dropout rate of 26 percent is far too high to allow further delay in dealing with this problem. Indeed, the problem will grow worse as more disadvantaged youth with historically higher-than-average dropout rates enter the public schools in the coming years. Research has indicated that the dropout problem costs our Nation billions of dollars as a result of lower productivity of workers who are deficient in the basic educational and job skills needed in our economy. In addition, dropouts are greatly overrepresented in the numbers of welfare recipients, the unemployed, those in jail, and other costly social programs. H.R. 3042 will attack these problems in the early stage through a broad array of authorized program activities designed to prevent dropouts and recover those who have dropped out.

H.R. 3042 is also noteworthy because its funding allocation provisions which ensure that any school district with a serious dropout problem, whether its enrollment is 250,000 or more or 2,000 or under, has a competitive chance to obtain funding for a demonstration grant for up to 3 years. This approach gives promise that a variety of successful demonstration and pilot programs will result from the legislation with wide applicability to the differing local situations facing school boards across the Nation.

Perhaps most significantly, H.R. 3042 will offer new hope and opportunity to the millions of young people who have left school without finishing. This bill will give these young people another chance to succeed in life.

As a representative of the Fourth Congressional District of West Virginia, I have very specific reasons to be concerned with this issue. In my home State of West Virginia

101,049 students dropped out over a period of 13 years—1972–85. Overall, 45 percent of the Mountain State's adults—those over 18—have less than a 12th-grade education. That is about 570,000 persons. And, 25 percent of the State's adults have less than an eighth-grade education. That is about 321,000 persons. While efforts are being made to combat this trend, without a combined Federal, State, and local effort, we cannot successfully address this problem.

At this point, I would like to update my colleagues on a dropout prevention program in my congressional district, the Cabell County Dropout Prevention Program, which has made such an effort.

In March 1982, a task force committee was established to review the problem of students leaving school prior to the completion of their school program. The results indicated that approximately 21 percent of students in Cabell County were leaving school before the completion of their school program.

Therefore, a county educational decision was reached to address this particular problem through the utilization of ECIA chapter 2 funds for the 1982–83 school year. A preventive program was established.

The Dropout Prevention Program, initiated by Cabell County schools in 1982, involves teachers, students, parents, and other citizens in its quest to reduce the dropout rate and even to bring dropouts back to school.

The program targets potential student dropouts as early as the elementary level and attempts to instill into those students the proper habits which make school a turn-on rather than a turn-off.

It reaches out to junior high students with low grades and/or low interest in school activities by offering alternate courses of study such as prevocational courses.

The Cabell County Public School's Dropout Prevention Program zeroes in on those students who have reached the legal age 16 to leave school. JROTC, alternative vocational programs, tutor/advisers, the opening of school libraries after school hours and an overall concern from teachers, fellow students and others show the potential dropout that there are those who do care and want that student to get an education.

Each school has a parent advisory committee which offers suggestions and help in providing alternatives and added interests to students. At one school, a successful experiment was conducted with an automatic calling machine to contact homes of students who were habitually absent or tardy.

The tutor/adviser at each school is particularly helpful in getting low achievers back on track with their studies and involved with extracurricular school activities.

All teachers have been asked to join the dropout prevention team by offering suggestions or passing on information to the tutor/adviser on students they feel are leaning toward leaving school before graduation.

The overall project is funded through ECIA chapter 2 and includes staff members with assignments directly connected with the program. They include the project coordinator, tutor/advisers, an educational ombudsman and part-time tutors in libraries.

But, the success of the program also signifies the community support it receives and the overall awareness that the school system in Cabell County does care about its students and wants to go the extra mile for a student in providing a strong educational foundation.

I believe that the statistics show the success of the Cabell County Dropout Prevention Program. Tracking the number of high school and junior high school dropouts chronologically, the records show that the number of dropouts has declined from 276—20.23 percent—in 1980–81, 307—21.19 percent—in 1981–82, 197—15.15 percent—in 1982–83, and 235—19.37 percent—in 1983–84, to 192—15.14 percent—in 1984–85. Furthermore, one aspect of the program is designed to encourage dropouts to return to school. This accompanied by the above declining dropout rate, exemplifies the effort put into and the progress made by my fellow West Virginians in Cabell County.

These people care, and with the help of Federal funding, they are able to work together to do something about the dropout problem. We in Congress must not ignore this problem or the success that this type of program can achieve. We have to face the fact that 85 percent of all jobs in the next decade will require vocational or technical training. Furthermore, we must face the realization that a teen dropout has little to no chance of success in the complex world of the 1990's. As representatives of the people of this Nation, we have a responsibility to address this problem. We must not shirk this responsibility. I urge my colleagues to support the passage of H.R. 3042.

□ 1130

Mr. HAWKINS. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. GOODLING. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the committee amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the reported bill is considered as an original bill for the purpose of amendment, and each section shall be considered as having been read.

The Clerk will designate section 1.

Mr. HAWKINS. Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there any objection to the request of the gentleman from California?

There was no objection.

The text of the committee amendment in the nature of a substitute is as follows:

H.R. 3042

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Dropout Prevention and Reentry Act of 1986".

SEC. 2. PURPOSE.

The purpose of this Act is to reduce the number of children who do not complete their elementary and secondary education by providing grants to local educational agencies to establish and demonstrate—

(1) effective programs to identify potential dropouts and prevent them from dropping out;

(2) effective programs to identify and encourage children who have already dropped out to reenter school and complete their elementary and secondary education; and

(3) model systems for collecting and reporting information to local school officials on the number, ages, and grade levels of the children not completing their elementary and secondary education and the reasons why such children have dropped out of schools.

SEC. 3. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this Act $50,000,000 for fiscal year 1987 and such sums as may be necessary for fiscal years 1988 and 1989.

SEC. 4. GRANTS TO LOCAL EDUCATIONAL AGENCIES.

(a) ALLOTMENT TO CATEGORIES OF LOCAL EDUCATIONAL AGENCIES.—From the amount appropriated under section 3 for any fiscal year, the Secretary shall allot the following percentages to each of the following categories of local educational agencies:

(1) Local educational agencies administering schools with a total enrollment of 250,000 or more elementary and secondary school students shall be allotted 20 percent of the amount appropriated.

(2) Local educational agencies administering schools with a total enrollment of at least 50,000 but less than 250,000 elementary and secondary school students shall be allotted 25 percent of the amount appropriated.

(3) Local educational agencies administering schools with a total enrollment of at least 20,000 but less than 50,000 elementary and secondary school students shall be alloted 25 percent of the amount appropriated.

(4) Local educational agencies administering schools with a total enrollment of less than 20,000 elementary and secondary school students shall be allotted 30 percent of the amount appropriated. Grants may be made under this paragraph to intermediate educational units and consortia of not more than 5 local educational agencies with a total enrollment of less than 20,000 elementary and secondary students. Such units and consortia may apply in conjunction with the State educational agency. Not less than 20 percent of funds available under this paragraph shall be awarded to local educational agencies administering schools with a total enrollment of less than 2,000 elementary and secondary school students.

(b) AWARD OF GRANT.—From the amount allotted for any fiscal year to a category of local educational agencies under subsection (a), the Secretary shall award as many grants as practicable within each such category to local educational agencies whose applications have been approved by the Secretary for such fiscal year under section 5 and whose applications propose a program of sufficient size and scope to be of value as a demonstration. The grants shall be made under such terms and conditions as the Secretary shall prescribe consistent with the provisions of this Act.

(c) MAXIMUM NUMBER OF GRANTS.—A local educational agency may receive no more

than one grant for each of three fiscal years under this title.

(d) AMOUNT.—The amount of a grant awarded under this section to a local educational agency for any fiscal year, to the extent practicable, shall be proportionate to the extent and severity of the local dropout problem.

(e) MATCHING REQUIREMENT.—

(1) For the first fiscal year of assistance under this Act, a local educational agency shall provide, from other Federal, State, or local public or private sources, a cash amount which is not less than 10 percent of such grant for the purposes of projects under this Act.

(2) A local educational agency shall provide 25 percent of such grant for the second year and 40 percent for the third and each subsequent year for the purposes of projects under this Act. Such matching assistance under this paragraph shall be from other Federal, State, or local public or private sources and may be in the form of cash or of in-kind contributions (such as facilities, overhead, personnel, and equipment) fairly valued.

SEC. 5. APPLICATION.

(a) IN GENERAL.—A grant under this Act may be made only to a local educational agency which submits an application to the Secretary. Such application shall—

(1) be developed in consultation with any appropriate community-based organizations of demonstrated performance;

(2) provide the best available information concerning (A) the number of childern formerly enrolled in the applicant's schools who have not completed their elementary or secondary education, and (B) the percentage of such children in the total school-age population in the applicant's schools;

(3) include a plan for the development and implementation of a dropout information collection and reporting system for documenting the extent and nature of the dropout problem, in accordance with requirements for data collection, reporting, and evaluation established by the Secretary;

(4) include a plan for the development and implementation of a project which will—

(A) implement comprehensive identification, prevention, outreach, and reentry programs for dropouts and potential dropouts,

(B) address the special needs of pregnant minors, school-age parents, Indians, migrants, and other identified high-risk populations,

(C) disseminate information to students, parents, and the community related to the dropout problem,

(D) include coordinated activities involving at least one high school and its feeder junior high or middle schools and elementary schools for those local educational agencies having such feeder systems,

(E) as appropriate, include coordinated services and activities with programs of vocational education, adult basic education, and programs under the Job Training Partnership Act,

(F) as appropriate, provide mechanisms which focus on the importance of developing occupational competencies which link job skill preparation and training with other employee training programs and genuine job opportunities,

(G) establish annual procedures for (i) evaluating the effectiveness of the project, and (ii) where possible, determining the cost-effectiveness of the particular dropout prevention and reentry methods used and the potential for reproducing such methods in other areas of the country,

(H) establish an advisory council which is broadly representative of the entire community and the dropout populations to be served, and

(I) use the resources of the community and parents to help develop and implement solutions to the local dropout problem; and

(5) describe the objectives of the project; and

(6) contain such other information as the Secretary considers necessary to determine the nature of the local needs, the quality of the proposed project, and the capability of the applicant to carry out the project.

(b) SPECIAL CONSIDERATIONS.—For the purpose of approving applications under this section, the Secretary shall give first priority within each category under section 4(a) to applicants that have either very high numbers or very high percentages of school dropouts.

(c) REVIEW OF PROJECT.—In any application from a local educational agency for a grant to continue a project for the second or third fiscal year following the first fiscal year in which a grant was awarded to such local educational agency, the Secretary shall review the progress being made toward meeting the objectives of the project under subsection (a)(5). The Secretary may refuse to award a grant if the Secretary finds that sufficient progress has not been made toward meeting such objectives, but only after affording the applicant notice and an opportunity for a hearing.

SEC. 6. AUTHORIZED ACTIVITIES.

Grants under this Act shall be used to carry out plans in applications approved under section 5. In addition, grants may be used for the following activities:

(1) to establish systemwide or school-level policies, procedures, and plans for dropout prevention and school reentry;

(2) to provide guidance, counseling, and social work services (including peer interaction activities);

(3) to provide ombudsman or mentor services;

(4) to develop and implement activities, including extended day or summer programs, to address poor achievement, language deficiencies, or course failures, in order to assist students at risk of dropping out of school and students reentering school;

(5) to establish or expand work-study, apprentice, or internship programs;

(6) to use the resources of the community, including contracting with public or private entities or community-based organizations of demonstrated performance, to provide services to the grant recipient or the target population;

(7) to evaluate and revise program placement of students at risk;

(8) to review curriculum relevancy;

(9) to implement activities which will improve student motivation and the school learning environment;

(10) to provide training for school staff on strategies and techniques to identify children at risk of dropping out, to intervene in the instructional program with support and remedial services, to develop realistic expectations for student performance, and to improve student-staff interactions;

(11) to study the relationship between drugs and dropouts and between youth gangs and dropouts, and to coordinate dropout prevention and re-entry programs with appropriate drug prevention and youth gang prevention community organizations; and

(12) to provide other services and implement other activities which directly relate to the purpose of this Act.

SEC. 7. PROGRAM LIMITATIONS.

(a) ACTIVITIES.—Not less than 30 percent of each grant shall be used for activities related to dropout prevention, and not less than 30 percent of each grant shall be used for activities related to presuading dropouts to return to school and assisting former dropouts with specialized services once they return to school.

(b) ADMINISTRATIVE COSTS.—Not more than 15 percent of any grant may be used for administrative costs.

SEC. 8. GENERAL PROVISIONS.

(a) TIMELY AWARD OF GRANTS.—To the extent possible, for any fiscal year the Secretary shall award grants to local educational agencies under this Act not later than July 1 preceding such fiscal year.

(b) GRANTS MUST SUPPLEMENT OTHER FUNDS.—A local educational agency receiving funds under this Act shall use the Federal funds only to supplement the funds that would, in the absence of such Federal funds, be made available from non-Federal sources for activities to prevent students from dropping out of elementary and secondary school and to persuade dropouts to reenter school and complete their education.

(c) COORDINATION AND DISSEMINATION.—The Secretary shall require local educational agencies receiving grants under this Act to cooperate with the coordination and dissemination efforts of the National Diffusion Network and State educational agencies.

(d) REPORTING REQUIREMENTS.—The Secretary shall establish uniform requirements for applications, data collection, reporting, and evaluation under this Act. In developing such requirements, the Secretary shall consult with representatives of State and local educational agencies and with the General Accounting Office. The Secretary shall give special consideration to the interim and final findings of the studies concerning school dropouts of the General Accounting Office.

(e) ANNUAL REPORT.—No later than March 1 of each year, the Secretary shall submit to the appropriate committees of the Congress an annual report concerning activities under this Act during the preceding fiscal year.

(f) AUDIT.—The Comptroller General shall have access for the purpose of audit and examination to any books, documents, papers, and records of any local educational agency receiving assistance under this Act that are pertinent to the sums received and disbursed under this title.

(g) WITHHOLDING PAYMENTS.—Whenever the Secretary, after reasonable notice and opportunity for a hearing to any local educational agency, finds that the local educational agency has failed to comply substantially with the provisions set forth in its application approved under section 5, the Secretary shall withhold payments under this Act in accordance with section 453 of the General Education Provisions Act until the Secretary is satisfied that there is no longer any failure to comply.

SEC. 9. DEFINITIONS.

As used in this Act—

(1) the term "community-based organization" means a private nonprofit organization which is representative of a community or significant segments of a community and which provides educational or related services to individuals in the community;

(2) the term "Secretary" means the Secretary of Education; and

(3) the terms "State educational agency", "local educational agency", "elementary school", and "secondary school" have the same meanings given those terms in section 198 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 3381).

AMENDMENTS OFFERED BY MR. HAWKINS

Mr. HAWKINS. Mr. Chairman, I offer several amendments.

The Clerk read as follows:

Amendments offered by Mr. HAWKINS: Page 6, line 23: debate "which will" and insert in lieu thereof "which, through the provision of educational, occupational, and guidance, counseling and testing services and activities, will".

Page 9, line 9: delete "the following activities" and insert in lieu thereof "educational, occupational, and guidance, counseling and testing services and activities, including the following".

Page 10, line 20: delete "services" and all that follows on line 20 and insert in lieu thereof "educational, occupational, and guidance, counseling and testing services and".

Page 10, line 25: insert after "activities" the phrase "(authorized in section 6)".

Page 11, line 25: insert after "activities" the phrase "(authorized in section 6)".

Mr. HAWKINS (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HAWKINS. Mr. Chairman, I ask unanimous consent the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HAWKINS. Mr. Chairman, these amendments are really clarifying amendments. They simply focus the proposal more closely on educational and instructional programs for school dropouts.

During the last few days, some Members have indicated that the bill may be too open. Therefore, we are offering these amendments to tie it strictly to educational activities and instructional programs. That is all the amendments do.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Chairman, we have examined the amendments and we believe they are necessary amendments and good amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from California [Mr. HAWKINS].

The amendments were agreed to.

The CHAIRMAN. Are there any further amendments? If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. GRAY of Illinois) having assumed the chair, Mr. LEVIN of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration (H.R. 3042) to amend the Elementary and Secondary Education Act of 1965 to provide grants to local educational agencies for dropout prevention demonstration projects, pursuant to House Resolution 511, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title of the bill was amended so as to read: "A bill to authorize the Secretary of Education to make grants to local educational agencies for dropout prevention and reentry demonstration projects.".

A motion to reconsider was laid on the table.

## MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mrs. Emery, one of his secretaries, who also informed the House that on the following dates, the President approved and signed bills and joint resolutions of the House of the following titles:

On July 31, 1986:

H.J. Res. 672. Joint resolution to ratify the February 1, 1986, sequestration order of the President for fiscal year 1986 issued under section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985.

On August 1, 1986:

H.R. 4409. An act to authorize appropriations for fiscal year 1987 for the operation and maintenance of the Panama Canal, and for other purposes; and

H.R. 4985. An act to authorize the distribution within the United States of the USIA film entitled "The March."

On August 4, 1986:

H.R. 3511. An act to amend title 18, United States Code, with respect to certain bribery and related offenses.

On August 6, 1986:

H.J. Res. 623. Joint resolution to authorize the designation of a calendar week in 1986 and 1987 as National Infection Control Week.

## GIFTED AND TALENTED CHILDREN AND YOUTH EDUCATION ACT OF 1986

The SPEAKER pro tempore. Pursuant to House Resolution 512 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3263.

□ 1125

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3263) to establish a Federal program to strengthen and improve the capability of State and local educational agencies and private nonprofit schools to identify gifted and talented children and youth and to provide those children and youth with appropriate educational opportunities, and for other purposes, with Mr. LEVIN of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Michigan [Mr. KILDEE] will be recognized for 30 minutes and the gentleman from Pennsylvania [Mr. GOODLING] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Michigan [Mr. KILDEE].

Mr. KILDEE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the Gifted and Talented Children's Act, H.R. 3263. This bill was written by Congressman BIAGGI and has the strong support of Congressman JEFFORDS. Both of these gentlemen are to be highly commended for bringing this bill to our attention and helping to move it through our committee.

The gifted are the yeast of a society. They are the ones who provide the ideas, who create the art, and who fashion the politics of a people. They are also the ones who determine, to a large degree, whether a country is prosperous or not. The gifted are clearly a national treasure.

It is estimated that we have 2.5 million gifted and talented students in this country, and yet it is also estimated that 2 million of them will not be identified by educators and given the encouragement to develop their full abilities.

This bill is a modest step to rectify that problem. The Secretary of Education is being authorized to make grants to local school districts to help identify and serve gifted and talented children.

Federal funding would not be massive, but it would be enough to leverage State and local money so that

greater attention is paid to realizing the potential of gifted children.

I urge the adoption of the bill and again commend Mr. BIAGGI and Mr. JEFFORDS for their help in bringing it before the House.

Mr. GOODLING. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to commend my colleague, the gentleman from New York [Mr. BIAGGI], for his work on behalf of the gifted and talented students. As the gentleman so eloquently stated, these youngsters will transform and invigorate our culture and economy.

In the sixties, our emphasis was on those who were not receiving an equal opportunity for a good education in these United States. I think the major responsibility of the Federal Government is to make sure that each youngster, no matter where they live, what their name is, what their color may be or their language, have an opportunity for a good education. I think we were quite effective. We have a long way to go, but I think that momentum is continuing to carry forth.

In the seventies, we did shift, temporarily at any rate and in a small manner, our efforts toward the gifted and talented. In the more affluent school districts, of course, this issue is being handled and being handled very well. Unfortunately, in many districts with less ability to finance their educational programs, it is not going forth as it should.

Like the last bill, I wish I could jump wholeheartedly in support of the legislation, because the intention is good and the need is there.

□ 1140

Like the last bill, I really do not need any demonstration projects, I know what to do in relationship to dropouts. If you give me $4 billion a year, as a matter of fact, I can take care of that working with 3- and 4-year-olds and their parents at the same time, because unless we work with both, we will not succeed in that area.

Unfortunately, I must repeat what I said the last time which I said I would play that record over again. My concern is twofold: If this legislation does not get appropriated, then we have sent out false hope again. If it does get appropriated, then I have that concern of which existing programs will be cut because of that $30 billion or more that we are apparently going to be over when that snapshot is taken in this month of August.

In fact, we have been told by OMB it is over. We have been told by CBO that it is dramatically above the $144 billion. I support Mr. BIAGGI's efforts. Unfortunately, again, I had hoped we could take this money from the Secretary's discretionary fund. One of the gentlemen in the committee from Michigan always says that we want to make sure that we use all that discretionary fund and that the Secretary does not get an opportunity to use any of it. The last one I had hoped we would take from JTPA so that as a matter of fact it could go forward. This, I had hoped, would come from the Secretary's discretionary fund. Unfortunately, we are asking for new money and a new program.

The idea is proper; the idea is good; the idea is necessary. Will we be sending a false signal?

Mr. Chairman, I would like to commend my colleague from New York, Mr. BIAGGI, for his work on behalf of the gifted and talented students. As he has so eloquently stated, these youngsters will transform and invigorate our culture and economy.

The Education and Labor Committee held a number of hearings which raised Member's awareness on important educational problems. These included illiteracy, school dropouts, drug abuse, youth suicide, gifted and talented, and technology education. While all of these are important issues facing the Nation's schools, I don't feel Congress is in the position to create a new categorical program for each of these concerns. In fact, because of my role on the Budget Committee, I stated at the beginning of this fiscal year that I would not support any new program which was not contained in the budget or received its funding from an existing appropriation. In light of the projected increase in the fiscal year 1987 deficit, I feel more strongly about this now more than ever. The worst thing that could happen to Federal support for education is to allow the sequestration process to unthinkingly cut our finest programs.

So while I would like to again commend Mr. BIAGGI for his hard work and concern, I will have to withhold my wholehearted support for H.R. 3263 and work to maintain funding for existing educational programs.

Mr. KILDEE. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. BIAGGI].

Mr. BIAGGI. I thank the gentleman for yielding time to me.

Mr. Chairman, I would first like to thank the ranking minority member, the gentleman from Pennsylvania [Mr. GOODLING] for his kind remarks with relation to this legislation.

Mr. Chairman, as author of H.R. 3263, the Gifted and Talented Children and Youth Education Act, I rise today in strong support of this important education legislation.

I am pleased to note that I am joined in this effort by 89 of my colleagues on a strong, bipartisan basis. They have joined me in this effort for they beleive, as I strongly do, that the Federal Government has a responsibility to ensure that the best and brightest of our Nation's students are adequately, effetively, and more specifically served by our educational system.

This legislation will target Federal assistance to support State and local programs that address the unique and pressing needs of gifted and talented children and youth. It is certainly legislation that is long overdue.

A report issued in 1983, "a Nation at Risk," by the National Commission on Excellence in Education, noted, "over half the population of gifted students do not match their tested ability with comparable achievement in school" and "both the number and proportion of students demonstrating superior achievement in the scholastic aptitude test have also dramatically declined."

One clear recommendation emerged: "The Federal Government in cooperation with States and localities, should help meet the needs of key groups of students such as the grifed and talented."

Until 1981, the Federal Government provided for gifted and talented programs under the Gifted and Talented Children's Education Act, authorized by my distinguished former colleague from New York, Senator Jacob Javits. Until its demise, this program annually provided $6 million for these educational efforts. Today, programs for the gifted and talented can be operated by States through the chapter 2 education block grant, funding this and 29 other programs, But it is clear that under this funding method, gifted and talented programming is suffering from acute educational neglect.

Consider for example, that only 13 percent of the school districts currently receiving funds under chapter 2 allocate any money at all for gifted education.

Consider that 36 States require no certification or special coursework of any kind for teachers of gifted and talented children.

Consider that there are only 56 full-time gifted and talented consultants employed by State education agencies across the entire Nation; 56 people to serve 2.5 million of this Nation's most promising students.

And consider that at this time, we spend only $5 per child in Federal funds to support the best and brightest of our Nation's students. In addition, we are unable to serve 1½ million of these students who have been identified as gifted, but receive no special education at all.

We must provide a national program to specifically serve these particular students in need. If there is to be a reasonable response to promote quality in the classroom, we must adopt H.R. 3263.

This legislation will authorize $10 million in fiscal year 1987, and such

sums as necessary in subsequent years, to support programs at the State and local level that are designed to meet the educational needs of gifted and talented children and youth. Both identification and education of these students is emphasized. In addition, priority will be given to those students who are not easily identified and served through traditional assessment methods such as the handicapped, the economically disadvantaged, the limited English proficient, and others.

These funds will also be used for preservice and in-service training and professional development activities for teachers. If we are to continue our crusade for excellence in the classroom, then we must provide our Nation's teachers with the training, the tools, and the resources essential to any qualify gifted and talented program.

And finally, H.R. 3263 establishes a national center for research and development in the education of gifted and talented youth. The purpose of the center is to stimulate high-quality research that will assist in identifying and serving gifted students in innovative ways. The center will be a national focal point, a base for information about gifted education.

Gifted and talented children face many problems as schools fail to address their special needs. Schools have failed to provide the attention and resources these students need in order to fulfill their potential. We must dispel the myth that a gifted child will do fine on their own without the nurturing and attention received by other students. After all, we do not ask any other student in the entire school population to make it on their own in the educational system. Why do we continue to expect this of the gifted child?

I contend that every dollar we invest in a gifted and talented child will provide a return of a stronger future for our Nation. We, as a society, desperately need the contributions these children can give us. We must never ignore or forget the possibility that these gifted programs can transform and invigorate our culture by producing a supply of Mark Twains, Thomas Edisons, and Lee Iacoccas. They could build the reservoir of intellectual and creative talent that would assure the growth and fulfillment of individuals, and of the United States. Gifted and talented children are our Nation's "untapped resource," "lost treasure," and "key to the future." They represent the future of this Nation and that of the world.

This Nation is struggling with many problems—the budget deficit, the trade deficit, and the "brain drain" deficit. We must not be shortsighted in our search for solutions to these problems. Our Nation's gifted and talented children offer us the tools by which to forge a permanent solution: advanced intelligence: creative thinking: and a bold curiosity about the world in which we live.

A quality education for our best and most promising students is clearly at the very core of this legislation. But H.R. 3263 does much more than that. It gives us hope—hope that by more fully developing and utilizing the vast educational resources of this Nation, specifically its gifted and talented youth, we can overcome the present crisis that exists in this Nation and move on to gain our once undisputed preeminence in the world.

I would like to thank Chairman HAWKINS for his support and efforts to move this bill through the committee process in an expeditious manner. I would also like to thank my colleague from Michigan, Mr. KILDEE, for his long and untiring efforts on behalf of this legislation. And finally, I wish to commend my good friend and colleague from Vermont, the ranking minority member of the Education and Labor Committee, Mr. JEFFORDS, for his leadership role in the area of gifted education.

I urge all of my colleagues to vote in support of H.R. 3263, the Gifted and Talented Children and Youth Education Act.

□ 1150

Mr. GOODLING. Mr. Chairman, I yield such time as he may consume to the ranking member of the committee, the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Chairman, I rise in strong support of this bill, and I certainly thank the gentleman from New York [Mr. BIAGGI] for his very kind words.

Mr. Chairman, as an original cosponsor of H.R. 3263, the Gifted and Talented Children's Education Act, I want to congratulate Mr. BIAGGI for initiating this legislation. His interest and persistence in seeing this bill through is a credit to his abilities as a person committed to seeing that our youth are educated to the best of their capabilities.

In 1981, we did not continue the separate, albeit modest, gifted and talented program that we had at the time. At that time, the program was consolidated into chapter 2 of the Education Consolidation and Improvement Act. Through this consolidation, the emphasis that was placed on programs for our gifted and talented youth diminished.

Without a Federal commitment to gifted and talented program, efforts to meet the special needs of these youth are diminished. Because these children will succeed in school without special attention, it is easy to ignore or bypass their need for special programs. Instead of flourishing, instead of stimulating them to reach their full potential, we are allowing our best and brightest students to move through our educational system, bored and unmotivated. We can ill afford to allow over 2 million children to fall victim to classroom boredom and a debilitating sense of estrangement from their peers. Estimates are that up to 18 percent of all high school dropouts are gifted students. As a nation considered as a world leader, we are distinct among our colleague nations in not providing programs for our gifted and talented students.

I became particularly aware of the void we have in this area when I started working on a trade bill that I introduced earlier this year. The United States is experiencing recordbreaking trade deficits which do not seem to improve. The trade deficits are related to low productivity and our failure as a nation to fully develop and utilize our human resources. To be successful and competitive in the world economy means staying a step ahead of other nations with innovation and invention. Ideas, concepts, and systems are the raw materials by which economies grow and prosper.

The nations that are succeeding today in our world marketplace, are those nations that direct resources not only to those at a disadvantage, but also to those with special talents. We must be able to identify, nurture, and allow the special talents of our gifted and talented youth to grow. A modest investment in these youth today, will provide long-term benefits. It is my belief that this bill is necessary to indicate that education of our gifted and talented youth is a national priority.

My support for this proposal stems not only from my concern that we should be providing services to our gifted and talented students, but also from an economic standpoint. Providing appropriate education for these students is one means by which we can meet the challenge of reducing our trade deficit. I urge my colleagues to support this bill.

Mr. KILDEE. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. OWENS].

Mr. OWENS. Mr. Chairman, I want to congratulate my colleague, the gentleman from New York [Mr. BIAGGI] for this very necessary piece of legislation.

There is no conflict between excellence and equity in our society. There is no reason why our Government cannot take care of both equity and excellence. We must dedicate ourselves and we must use our resources and set our priorities in such a way that everybody is educated, and particularly those at the top must also get special attention.

We should subscribe to the value-added theory of education. That theory is that everybody has their value increased as they receive education. Everybody at every level can be

improved. In a complex society such as ours we need to have everybody at every level to have the maximum amount of education that they can absorb. We need good mechanics, we need good technicians, and we need good scientists and engineers. At every level we need the best that we can produce.

Whenever we get on an airplane, I am sure we are concerned about what went into that effort at every level. We know that the airline pilots get the best training in the world. They are very well trained, and I think nobody really needs to worry about them. What we must worry about is the people who do the lubrication job, the people who put the oil and gasoline in, and a few other people at various levels. Let us hope that they also got the maximum training necessary.

In our complex society we need people at every level who have the maximum amount of competence. We certainly need a pool of people at every level so that as we use up the most experienced people, there are always people to replace them. That is needed at the technician level and at the mechanics level, and it is also needed, of course, at the level of scientists and engineers.

We also need linguists. We are not just talking about scientists and engineers; we are talking about gifted youngsters in every area. If we look at the performance of some of the Soviet Union's linguists and some of their journalists and scientists and witness their knowledge of English as they perform on American television, we realize that we do not seem to have the people who are comparable at certain levels in government, the people who are scientists and who can also speak Russian as well as they speak English.

There are a number of deficiencies which can be identified in every aspect of our total national effort and which could be taken care of if we would cease doing what we are doing now. We are always on this floor talking about education as if it were a luxury. We speak about education as if it were something we can keep off to one side, as if it were not part of our national security effort or not a priority.

We cannot separate education from defense. Our defense effort is suffering greatly because of our inability to understand that first our priority must go to education. Our best line of defense is to have a population which receives the best possible education at every level.

I would ask that we examine the fact that certain arguments have been made that the money is not available to take care of the needs of a bill like this? We are asking for a fairly small amount of money, but the argument is made that we cannot afford it. But can we afford not to?

We are going to find money somehow to take care of the revitalization of our space program. We are going to find the money to build new *Challenger*, to improve our space vehicles. We are going to find money to stop our rockets from blowing up so that our satellites can be put up into space. We are going to find that money because we consider it necessary.

But what is the cost involved in a new *Challenger* program? What is the cost involved in producing rockets that do not blow up, rockets that really will produce the satellites? The highest cost is the personnel cost. The other costs are fixed. The cost of the aluminum and the various metals that are used in production, that is going to be pretty much the same, and it may even go down because the prices on the world markets are going down. The cost that is going to go up is the personnel cost.

The scientists and the engineers and the technicians are in high demand, and the supply is shrinking. One of the things that the President's Commission investigating the shuttle disaster has put a finger on is that we have a disturbing situation in our space program. In the space program, which was given the highest priority, in the space program which got our best and our brightest, we have a problem because there are not enough people there. The cost is so great that they have been skimping on personnel. One of the problems that was pointed out recently was that another *Challenger* almost blew up because a technician did not put in the right amount of fuel, and when they pinpointed why he did not put in the right amount of fuel, the answer was that he was suffering from fatigue. Fatigue? Why in a nation as great as this, in a program which has the highest priority, when lives are at stake, why should anybody suffering from fatigue in a key position like that?

Why are there not enough people? The pool of people available to deal with the space program is not being replenished, is not being replaced rapidly enough. We do not have enough people. Those are our best and brightest when it comes to scientists and engineers. That is a high priority program. We do not have the scientists and engineers and technicians and mechanics to replenish that pool, and that is a problem that a bill like this would begin to address.

Mr. Chairman, I hope that the Members will see this as a major, urgent necessity and will vote for this very important piece of legislation.

Mr. GOODLING. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Washington [Mr. CHANDLER].

Mr. CHANDLER. Mr. Chairman, I want to congratulate my friend, the gentleman from New York [Mr. BIAGGI], not only for his sponsorship and leadership in this piece of legislation but for his determination and the energy he has put into it. I have never seen anybody work as hard on behalf of a bill. He obviously believes in the bill, and I thank him for that effort.

When we talked earlier about the dropout legislation, it occurred to me, as it did to my friend, the gentleman from New York, that these bills are very much related. We all as Members of Congress have the opportunity to sponsor and to nominate young men and young women to the military academies, and that to me is, I think, probably the happiest experience I have as a Member of the U.S. Congress, to see young men and young women who are incredibly bright, highly motivated, determined, with a goal in mind, setting their sights on something they badly want and doing exceptionally well to get it. Their grade points are at the four point level, or nearly so, they are always involved in leadership activities, they are athletic, and so forth.

□ 1200

Well, those are the happy situations among the gifted and talented in this country. The unfortunate thing is, if you also went to the Washington State Prison at Walla Walla or any other facility of its kind in the country and went through the halls of that place, you will find people who are every bit as bright as those young people who we nominate and appoint to the military academy sitting in cells for whatever reason, God only knows.

Well, I know this, they are the failures, not just of our educational system, but of our entire society. For some reason, these young people go to school and instead of accepting the challenge that they have and the opportunity that is presented to them, they turn instead in a sense to the easy way out. School is not a challenge. It is easy. It is boring. It is uninteresting and they become lazy and a set of behavior pattern sets in that may not necessarily lead to prison, but certainly leads to problems in their lives. And this great potential is lost.

Now, a lot of people will tell you, "Don't worry about the gifted and talented. They will make it on their own."

Well, many of them will. Those are the kids that we are nominating to the military academies, but many of them will not make it and it is a tremendous waste and a great national tragedy that we allow that to happen in this country.

I am not sure what the answer to this is. My guess is that there probably are not a lot of educators who are not sure either; but the thing I am hoping is that legislation like this, the leadership that the gentleman from New

York [Mr. BIAGGI] has offered, is going to provide us an opportunity to study in depth on a nationwide basis the best possible ideas for taking our brightest youth, this talent, and turning it in the direction that it should naturally go.

I am very supportive of this legislation. I only wish that we had greater resources to do a greater job in behalf of these students who all over the country badly need the assistance of this kind of legislation.

Mr. Chairman, I thank the gentleman for yielding.

Mr. KILDEE. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. HAYES].

Mr. HAYES. Mr. Chairman, I, too, want to commend my colleague, the gentleman from New York [Mr. BIAGGI], for bringing this bill to the House of Representatives in regard to the problem of the gifted and talented students.

The two bills, H.R. 3042 and H.R. 3263, complement each other, for many of our high school dropouts are gifted and talented students and are being lost to our society.

Most often talented children are from families of meager means and are completely ignored and forgotten and left to become a part of that increasing number of unemployed, victims of mind-destroying and sometimes life-destroying drugs.

The suicide rate among our kids is growing.

The large number of our high school dropouts is reaching epidemic proportions across the Nation. They are gifted children who are not properly identified and nurtured in school.

Approximately 50 percent of gifted children are working at least 4 grades below the level at which they could be working if they were fortunate enough to have a job. Just over 1 million gifted and talented students are currently being served by any type of special education program. An additional 1.5 million have been identified, but are unaole to be served.

Finally, it is estimated that approximately 2 million of these students have not even been identified.

I think it is a tragic situatiion and certainly H.R. 3263 seeks to address our attention to this problem. I do hope it passes this House of Representatives.

Mr. GOODLING. Mr. Chairman, I yield such time as he may consume to the gentleman from Michigan [Mr. PURSELL].

Mr. PURSELL. Mr. Chairman, I, too, want to congratulate the sponsors of this legislation and the great leaders on the Democratic and Republican sides who worked so hard for this beginning start, all over again.

When I was on the committee under President Carter, I wrote the legislation at that time and got some modest funding. I think it was about $8.5 million. Senator CHILES helped me in the Senate and we proceeded with an attempt to begin to stimulate the encouragement of State and local school boards to develop programs.

You cannot begin to realize what that fund did in terms of triggering across the country local interest in the development of a creative program for talented and gifted children across the United States; so I think this is another start that is welcomed by me as a member of the Labor-HEW Subcommittee on Appropriations. I will make every effort to help with scarce resources, whether they are lateral transfers from other programs of lower priority or discretionary programs, as Chairman GOODLING suggests. I think we should fund this program.

Now, as a former teacher many years ago before I was in the business community, I just want to sort of give a little warning signal here. I personally differ with some people in the gifted community that say we should segregate these children who are supposedly gifted and talented. I frankly believe that the gifted and talented children of America, everyone, every child, rich or poor, and I worked with former Congresswoman Shirley Chisholm on this bill, in which she helped cosponsor my legislation with CARL PERKINS and others, that every child in America has some gift and some talent.

I just would encourage the teachers of America to recognize that everyone in the classroom, whether it is music, science, mathematics, or making model airplanes, or whatever, that there is some talent and a gift in those individual children; so we should be very careful.

There is a great debate in the gifted and talented community whether we should pull those kids out and segregate them from the mainstream children. I am not going to debate that issue today. I just want us to realize that every child in American is gifted and has some talent. If we can recognize that, this Nation can be the most creative in the world in the scientific, in the mathematic field and music and competitive fields and in the international competitive mode, as the gentleman from Vermont [Mr. JEFFORDS] indicated earlier, with our trade war going on throughout the world.

So as a member of the committee, I highly commend this bill to all the Members of Congress. I will work toward helping to assist in the funding.

Again I want to thank the subcommittee on both sides for their bipartisan effort to lead their fight for the gifted and talented. Every child in America has that gift. Let us try to bring it out and this Nation will be secure.

Mr. KILDEE. Mr. Chairman. I yield 2 minutes to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY of Illinois. Mr. Chairman, I thank my distinguished friend from Michigan for yielding me time.

Mr. Chairman, I stood in this well in 1961 when just outside the Chambers here President John F. Kennedy said, "Let us go forward to lead the land we love, knowing that here on Earth God's work is truly our own."

I stood here just a few short years later when President Lyndon Johnson signed the Elementary and Secondary Education Act and said, "The only valid passport from poverty is a good education."

When you look at these two bills, Mr. Chairman, that we are considering today, this fulfills the dreams and the aspirations of John F. Kennedy and President Lyndon Johnson, as it relates to helping those who need help because if we do not take our gifted children, if we do not take those people who go through grade school and because they get distracted or for some other reason drop out, they are not going to be able to lead the land we love. They are not going to be able to give their brain power.

Mr. Chairman, the brain is like a bank account. You can only draw out what you put in.

So I want to congratulate my dear friend, the gentleman from Illinois [Mr. HAYES] for his bill and, incidentally, the reason he is so smart, he was born in Cairo, IL, in my congressional district, and I also want to congratulate the distinguished gentleman from New York [Mr. BIAGGI] for bringing out the gifted children and youth bill, the gentleman from Michigan [Mr. KILDEE], Chairman HAWKINS, and the gentleman from Pennsylvania [Mr. GOODLING] and others who recognize that this country must have the 235 million people working strong for good education, because this country is like a chain. It is no stronger than its weakest link. If we are not pulling together from Head Start and kindergarten on up through higher education, we are not going to be able to leave a legacy to our children and generations yet unborn that we have been able to enjoy for ourselves and thereby preserve the greatest country on the face of the Earth. Thank you.

Mr. GOODLING. Mr. Chairman, I will summarize in the few minutes remaining this morning's proceedings.

It has been lonely, of course. There is no question about that.

I want to make sure that I heard one of my colleagues on the other side, I thought he was indicating that someone over here said that we could not afford it. I want to make sure that no one on this side is accused of that, because I got the impression from my colleagues on this side of the aisle that

money is no problem whatsoever, and I certainly have not indicated that we cannot afford it.

What I am trying to point out, of course, is that I do not want to send a false signal if we are not going to get an appropriation, and if we do get an appropriation, I do not want some existing programs cut when we have to make that $30 billion out.

We mentioned Head Start in the discussion. We need much more money than we presently have for Head Start. We do not serve in my area one-tenth of the youngsters who probably need service in Head Start.

We talked about chapter 1. We do not serve 50 percent of the people in need in chapter 1.

We have a problem because we do not have the appropriations to do that.

In adult education, we merely scratch the surface.

Mention was made of concern with educational reform. I have real concerns with educational reform. For all the good things they are doing, let me tell you, I always have had two problems in the business of education. One was to make teachers understand that you cannot get a quart out of a pint, and when you talk about dropouts and you try to get a quart out of a pint, I will guarantee that you will have dropouts.

The other problem I always had with teachers was on the other extreme, getting the most that that child could possibly produce.

Along with gifted and talented children, we have to get gifted and talented teachers in the field and administrators in the field. I had an algebra teacher who could take students in the same classroom through algebra 1, algebra 2, and part of geometry, at the same time that she was taking those less talented through algebra 1. She was a gifted and a talented teacher.

On the other hand, I had an administrator that told my wife that as a matter of fact she is not following the rules and regulations because she is moving her children through too many books in grade 1, and she thought she was supposed to get those who could go the extra mile to do that and those that could not, to work and reinforce their skills.

So there is no one who supports the concepts that were presented this morning any more than I do, but to get those gifted and talented teachers into the profession, and administrators, we are going to have to make it worthwhile on their part and it is going to have to be more worthwhile than the increased amount of money that they can get in the private sector or in the Congress of the United States, as a matter of fact. I have heard a lot of people saying they were teachers, who are now here.

In order to keep those young people in school, we are going to have to deal with their parents and the children themselves long before they come to a formal setting in the first grade in the school system.

In many areas throughout this country, there are no kindergarten programs. As I indicated, in my area there are very few Head Start programs. Chapter 1 only covers a small percentage.

□ 1215

So the concept of both are laudable, and I would like to have much more money so that as a matter of fact we could get beyond the demonstration process. We do that over and over and over again. I would like to get to the point where we put what we really already know into practice and bring about a better educational opportunity for all youngsters.

Education reform is moving in that direction, but as I said, I also have fears with education reform. When you set a grade average that someone must attain and you equate that youngster's ability to attain that with the person who is much more talented sitting right beside, you are looking not for young people to write on the bathroom walls, you are looking for them to burn down the bathrooms, because that is probably the only way that they will get out of that school setting.

Again let me repeat that the concepts are laudable. I congratulate all those who brought them forth. Again, my only concerns are, first, if we do not get appropriation, we have sent a false signal, and if we do get appropriation, we are going to have to deal with this priority issue in our area of Education and Labor when we start tackling that $30 billion amount that apparently we will be over the $144 billion. As I indicated before, some of our very important programs are not protected. Some are; some are not.

So again, it is not a case of whether we can afford it or whether we cannot. We should set our priorities, and if they watch my voting record, I think that they will notice that my priorities are usually in the right direction, and that direction is to, as a matter of fact, create a better way of life, not to destroy life.

So again I commend those who offered the bill. Both are very important members on the Education and Labor Committee. I hope that the day will come when jointly we can really attack the program, because we will have the private-sector funds and the public-sector funds that are needed to do this kind of job.

Mr. KILDEE. Mr. Chairman, I want to thank and commend the chairman of this committee, the gentleman from California [Mr. HAWKINS], for his tremendous and very sensitive work on this bill and on this issue.

Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Chairman, I just want to take my hat off to the sponsor of the bill, the gentleman from New York [Mr. BIAGGI] and his insight into trying to make America more competitive and accentuate the great natural resources that we have and the brilliance in the minds of our children.

You know, in the last year we have talked about trade deficits, competition, America being the great marketplace, and the technology, new initiatives, and new ideas which will make America competitive in the future.

I can look back at a time years ago when a young President by the name of John Kennedy made a statement. He said if America is going to conquer space and go to the Moon, we can't just talk about it and dream about it as a goal, we must train our children. And the President at that time, Mr. Kennedy, put money into education so that the young, brilliant minds of our children could in fact at some particular point reach those goals. And we did.

I think we talk about competition and the greatness of America, but it seems in the last 10 years that there has been somewhat of a slowing down of the commitments of priority dollar fundings toward the education of our children.

I think that this goes a step toward that direction, and I am not surprised that the sponsor of the bill is Mr. BIAGGI. I think that his bill here will nurture the brilliance of the minds of American youth and give us an opportunity as a country to move forward in the new technologies of the world marketplace and make America a better world.

I wholeheartedly endorse it. It is not even to mention the word modest; it is a play on words. I think that it should have even more money, but I commend that initiative and the Education and Labor Committee, which has given the opportunity for it to happen.

Mr. RAHALL. Mr. Chairman, I rise today in support of H.R. 3263, the Gifted and Talented Children and Youth Education Act of 1985. As an original cosponsor of this bill, I would like to commend the work of my colleague from New York [Mr. BIAGGI] in introducing this fine piece of legislation. I would also like to note the efforts of my colleagues on the Education and Labor Committee, and especially those members of the Subcommittee on Elementary, Secondary and Vocational Education, in bringing this measure to the floor of the House for a vote. As the sponsor of similar legislation, H.R. 2364, I had the privilege of submitting

testimony to the subcommittee on this issue, and of working with them in an effort to address this matter properly.

I urge my colleagues to support the passage of H.R. 3263. Furthermore, I am including in the RECORD a copy of my testimony before the Elementary, Secondary and Vocational Subcommittee earlier this year to outline the need for Federal legislative initiative in this area.

I would like to thank the distinguished chairman of the Committee on Education and Labor, and the other members of the Subcommittee on Elementary, Secondary and Vocational Education for inviting me to testify before the subcommittee with regard to H.R. 2364, a bill I introduced to address the special needs of gifted and talented students across the Nation.

The federally supported gifted and talented education program has experienced three distinct junctures in its history: First, national recognition of the special educational needs of gifted and talented children; second, development of Federal categorical programs for the education of the gifted and talented; and third, withdrawal of explicit Federal education support for the gifted and talented. H.R. 2364 would amend the Elementary and Secondary Act of 1965 to once again establish targeted programs for these individuals. It would reestablish the Office of Gifted and Talented in the Department of Education, and would authorize the Secretary of the Department of Education to begin a modest discretionary grant program which would include demonstration projects.

The special needs of the gifted and talented have been recognized for decades. In 1958, a national conference on academically talented secondary school students, sponsored by the National Education Association, drew national attention to these needs which resulted in a number of recommendations for initiating gifted and talented education programs in the public schools. However, Federal measures to address these needs have been scattered at best, and for the most part, inadequate.

Prior to the 1970's there is no evidence of any continued Federal interest or commitment to the education of gifted and talented children. In 1971, however, Sidney Marland, the U.S. Commissioner of Education, completed a congressionally mandated study on the status of the education of gifted and talented children in the United States. The report helped to stimulate Federal interest in the 1970's to develop a Federal education program for gifted and talented children culminating in the passage of a separate categorical program authorized under the Gifted and Talented Children's Education Act of 1978. However, this effort was short lived and a significant level of Federal funding has never been directed toward the education of gifted and talented children.

In 1981, with the enactment of the Educational Consolidation and Improvement Act (Public Law 97-35), the authorizations of appropriations for the gifted and talented education program, as well as 40 other categorical education programs, were repealed and consolidated into a block grant to State educational agencies. States were then authorized to use the new block grant funds for any of a number of purposes including, but not limited to, the education of gifted and talented children.

Mr. Chairman, gifted and talented students have been a neglected group within our educational system, the diversity of their abilities defy definition. Currently, they are not well served by standard educational programs. Like educationally disadvantaged and handicapped students, if responsibility for their education were left solely to State and local governments, these students would continue to be overlooked for reasons ranging from fiscal constraints to lack of interest. Until there is renewed Federal interest and specified financial support, the condition of education for the gifted and talented will remain inadequate.

The gifted and talented have special educational needs even though many do not recognize or address these needs. The Federal role in financing educational programs has generally been to direct resources to special groups of students—that is, physically and mentally handicapped, financially or underprivileged—who would otherwise be educated under a circumstance where severe disadvantage exists. The Federal role is to enhance the opportunity of these students in a public school setting. We as a nation are committed to providing the opportunity for a student to develop to the maximum of his/her abilities through a quality education. A gifted child in a regular classroom has no opportunity to develop this maximum ability level.

Someone with a 140 IQ is as different from the average student as someone with a 60 IQ. No one should ever dream of putting either person in a regular class, or at least not without a revised plan of study for that particular student. The Federal Government recognizes and authorizes funding to address the special needs of the below average student. Reason dictates that we also address the special needs of the above average student. These students must be allowed to progress at their own rate, regardless of chronological age or grade placement.

They need to be valued, challenged, and stimulated in an environment that allows children of like ability to learn with and from one another. They must have access to counseling, so they may better understand themselves and make appropriate school and career decisions. And they need a diversity of learning experiences, including instructional methods, materials, activities, and higher levels of conceptual complexity. We must provide funding and direction so that all States can identify and address these needs.

In my home State of West Virginia, there were 4,410 students enrolled in gifted and talented programs in 1980. This constituted 1.15 percent of the school-age population. These numbers increased to 8,751 students in 1985 and 2.41 percent of the school-age population. State funding for this endeavor has increased from $225,000 in 1976 to $5,670,000 in 1985. This is a growing program, however, the funds are limited. It is fortunate for West Virginia's students that our State government recognizes the needs of the gifted and talented and utilizes limited resources to address these needs. However, there are many States that do not address the needs of gifted and talented children.

A 1984 survey by the Council for Exceptional Children [CEC] revealed the following nationwide data. Thirty-eight States and the District of Columbia reported that there were 1,022,108 students participating in programs for the gifted and talented. A total of 36 States reported that $196,056,504 of State funds were spent on these programs, and 32 States and the District of Columbia reported the use of $10,419,763 of chapter 2 funds for the purpose of gifted and talented programs.

This is a national issue and the numbers are far from insignificant. I believe it is important that we address the needs of the gifted and talented. Therefore, I introduced H.R. 2364 and cosponsored, H.R. 3263, introduced by our respected colleague from New York [Mr. BIAGGI]. As you may know, Congressman BIAGGI has also cosponsored my bill, H.R. 2364. We share a common interest and commitment to this legislative effort, and I look forward to working with the gentleman further on this issue.

Mr. Chairman, gifted and talented children are among our Nation's most valuable resources, the potential leaders in our social, scientific, artistic, and humanitarian development. The Federal Government should play a role in financing an appropriate education for these students. The return on this investment to the Nation would come when these students develop their potential and use their abilities to contribute to the continued economic and social development of the Nation, and the capacity of this Nation to respond to future world needs. The appropriate target for limited resources can be determined on the basis not only of the greatest needs, but also of which programs might offer the greatest returns for educational investments. Special attention to the development of gifted and talented students cannot be neglected if we are to improve, or even maintain, our position in an increasingly competitive and technologically sophisticated world economy.

I appreciate your continued efforts in this vein, Mr. Chairman, and commend the willingness of the Education and Labor Committee to address this important issue. I look forward to working with you and the committee further on behalf of this Nation's gifted and talented students.

Mr. HAWKINS. Mr. Chairman, H.R. 3263, the Gifted and Talented Children and Youth Education Act, will ensure that the best and brightest of the Nation's students are effectively served by our educational system.

It is ironic that at a time when our country is grappling with ways to compete internationally, expand our economy, and strengthen our scientific and technological capabilities, we are neglecting a precious resource that holds the key to our preeminence in all those areas: our gifted and talented youth.

Gifted and talented children often face special barriers to quality education. Too often these children—particularly those who are disadvantaged or minority children—are not identified as being gifted and are not encouraged to fulfill their potential. Of those who are identified, over half do not match their tested abilities with comparable achievement in school.

Existing gifted programs are often insubstantial, with the average program providing 2

to 3 hours enrichment a week and no modification in the child's regular school program.

The legislation before the House will address these problems by authorizing grants to State and local education agencies, institutions of higher education, and other public and private agencies and organizations to build the capacity to serve these children. The Federal funds will be used to stimulate research, train personnel to serve gifted and talented students, demonstrate effective instructional techniques, and provide a national focal point for information and technical assistance.

The bill authorizes a modest sum of $10 million for fiscal year 1987 and such sums as necessary for the 4 succeeding fiscal years.

H.R. 3263 was authored by Congressman BIAGGI and has the support of Congressman JEFFORDS. Both of these gentlemen are to be highly commended for bringing this need to our attention and helping to move it through the committee. This is a worthy measure that deserves the support of the full House.

Mr. KILDEE. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the committee amendment in the nature of a substitute now printed in the reported bill shall be considered as an original bill for the purpose of amendment, and each section shall be considered as having been read.

The Clerk will designate section 1.

Mr. KILDEE. Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The text of the committee amendment in the nature of a substitute is as follows:

H.R. 3263

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be referred to as the "Gifted and Talented Children and Youth Education Act of 1986".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds and declares that—

(1) gifted and talented children and youth are a national resource vital to the future of the Nation and its security and well-being;

(2) unless the special abilities of gifted and talented children and youth are recognized and developed during their elementary and secondary school years, much of their special potential for contributing to the national interest is likely to be lost;

(3) gifted and talented children and youth from economically disadvantaged families and areas are at greatest risk of being unrecognized and of not being provided adequate or appropriate educational services;

(4) State and local educational agencies and private nonprofit schools often lack the necessary specialized resources to plan and implement effective programs for the early identification of gifted and talented children and youth for the provision of educational services and programs appropriate to their special needs; and

(5) the Federal Government can best carry out the limited but essential role of stimulating research and development and personnel training, and providing a national focal point of information and technical assistance, that is necessary to ensure that our Nation's schools are able to meet the special educational needs of gifted and talented children and youth, and thereby serve a profound national interest.

(b) STATEMENT OF PURPOSE.—It is the purpose of this Act to provide financial assistance to State and local educational agencies, institutions of higher education, and other public and private agencies and organizations, to initiate a coordinated program of research, demonstration projects, personnel training, and similar activities designed to build a nationwide capability in our elementary and secondary schools to identify and meet the special educational needs of gifted and talented children and youth. It is also the purpose of this Act to supplement and make more effective the expenditure of State and local funds, and of Federal funds expended under chapter 2 of the Education Consolidation and Improvement Act of 1981 and the Education for Economic Security Act of 1984, for the education of gifted and talented children and youth.

SEC. 3. DEFINITIONS.

(a) DEFINITIONS.—For the purposes of this Act the following terms have the following meanings:

(1) The term "gifted and talented children and youth" means children and youth who give evidence of high performance capability in areas such as intellectual, creative, artistic, or leadership capacity, or in specific academic fields, and who require services or activities not ordinarily provided by the school in order to fully develop such capabilities.

(2) The term "Secretary" means the Secretary of Education.

(3) The term "institution of higher education" has the same meaning given such term in section 435(b) of the Higher Education Act of 1965.

(b) DEFINITION BY REFERENCE.—Any term used in this Act and not defined by subsection (a) shall have the same meaning as that term is given under chapter 3 of the Education Consolidation and Improvement Act of 1981.

SEC. 4. AUTHORIZED PROGRAMS.

(a) ESTABLISHMENT OF PROGRAM.—From the sums appropriated under section 9 in any fiscal year the Secretary (after consultation with the advisory committee established pursuant to section 7) shall make grants to or contracts with State educational agencies, local educational agencies, institutions of higher education, or other public and private agencies and organizations (including Indian tribes and organizations as defined by the Indian Self-Determination and Education Assistance Act) which submit applications to assist them in carrying out programs or projects authorized by this section that are designed to meet the educational needs of gifted and talented children and youth, including the training of personnel in the education of gifted and talented children and youth or in supervising such personnel.

(b) USES OF FUNDS.—Programs and projects funded under this section may include—

(1) preservice and inservice training (including fellowships) for personnel (including leadership personnel) involved in the education of gifted and talented children and youth;

(2) establishment and operation of model projects and exemplary programs for the identification and education of gifted and talented children and youth, including summer programs and cooperative programs involving business, industry, and education;

(3) strengthening the capability of State educational agencies and institutions of higher education to provide leadership and assistance to local educational agencies and nonprofit private schools in the planning, operation, and improvement of programs for the identification and education of gifted and talented children and youth;

(4) programs of technical assistance and information dissemination; and

(5) carrying out (through the National Center for Research and Development in the Education of Gifted and Talented Children and Youth established pursuant to subsection (c))—

(A) research on methods and techniques for identifying and teaching gifted and talented children and youth, and

(B) program evaluations, surveys, and the collection, analysis, and development of information needed to accomplish the purposes of this Act.

(c) ESTABLISHMENT OF NATIONAL CENTER.—The Secretary shall establish a National Center for Research and Development in the Education of Gifted and Talented Children and Youth through grants to or contracts with one or more institutions of higher education or State educational agencies, or a combination or consortium of such institutions and agencies, for the purpose of carrying out clause (5) of subsection (b). Such National Center shall have a Director. The Director shall consult with the advisory committee appointed by the Secretary pursuant to section 7 with respect to the agenda of the National Center. The Secretary may authorize the Director to carry out such functions of the National Center as may be agreed upon through arrangements with other institutions of higher education, State or local educational agencies, or other public or private agencies and organizations.

(d) LIMITATION.—Not more than 30 percent of the funds available in any fiscal year to carry out the programs and projects authorized by this section may be used for the conduct of activities pursuant to subsections (b)(5) or (c).

SEC. 5. PROGRAM PRIORITIES.

In the administration of this Act the Secretary (and the advisory committee established pursuant to section 7) shall give highest priority—

(1) to the identification of gifted and talented children and youth who may not be identified through traditional assessment methods (including individuals of limited English proficiency, the economically disadvantaged, individuals with handicaps, and females) and to education programs designed to include gifted and talented children and youth from such groups; and

(2) to programs and projects designed to develop or improve the capability of schools in an entire State or region of the Nation through cooperative efforts and participation of State and local educational agencies, institutions of higher education, and other public and private agencies and organizations (including business, industry, and labor), to plan, conduct, and improve programs for the identification and education of gifted and talented children and youth.

SEC. 6. PARTICIPATION OF PRIVATE SCHOOL CHILDREN AND TEACHERS.

In making grants and contracts under this Act, the Secretary shall ensure, where appropriate, that provision is made for the equitable participation of children and teachers in private nonprofit elementary and secondary schools, including the participation of teachers and other personnel serving such children in preservice and inservice training programs.

SEC. 7 SECETARY'S ADVISORY COMMITTEE.

(a) APPOINTMENT AND MEMBERSHIP.—The Secretary shall appoint a committee composed of at least five persons who are not Federal employees to advise on the administration of this Act, including the content of regulations governing the administration of the Act. The committee shall have as members at least one person who is a director of programs for gifted and talented children and youth in a State educational agency, one person who has substantial responsibility in an institution of higher education for preparing teachers of such children and youth, one person who is nationally recognized as an authority on research in the field of special education of such children and youth, one person who is engaged as a teacher in a special program for such children and youth, and one person who is a parent of a child enrolled in an elementary or secondary school program for such children and youth.

(b) DUTIES.—The Secretary shall meet with the advisory committee at least twice during each fiscal year for which appropriations are made to carry out this Act, and shall seek the advice and counsel of the committee with respect to—

(1) identification of the most urgent needs for strengthening the capability of elementary and secondary schools nationwide to plan and operate effective programs for the identification and education for gifted and talented children and youth, and for addressing the program priorities set forth in section 5;

(2) the kinds of programs and projects authorized by this Act that are best calculated to help meet the needs identified by the Secretary and the committee pursuant to clause (1);

(3) the assessment of the effectiveness of programs and projects funded under this Act, and of progress under the Act in expanding and improving educational opportunities and programs for gifted and talented children and youth; and

(4) such other matters relating to the administration of this Act as the Secretary may find useful.

SEC. 8. ADMINISTRATION.

The Secretary shall establish or designate an administrative unit within the Department of Education to administer the programs authorized by this Act, to coordinate all programs for gifted and talented children and youth administered by the Department, and to serve as a focal point of national leadership and information on the educational needs of gifted and talented children and youth and the availability of educational services and programs designed to meet those needs. The administrative unit established or designated pursuant to this section shall be headed by a person of recognized professional qualifications and experience in the field of the education of gifted and talented children and youth.

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

There are hereby authorized to be appropriated $10,000,000 for fiscal year 1987, and such sums as may be necessary for each of the four succeeding fiscal years, for the purpose of carrying out this Act.

The CHAIRMAN (Mr. LEVIN of Michigan). Are there any amendments?

AMENDMENT OFFERED BY MR. AKAKA

Mr. AKAKA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. AKAKA: Page 5, after line 3, insert the following:

(4) The term "Hawaiian native" means any individual any of whose ancestors were natives prior to 1778 in the area which now comprises the State of Hawaii.

(5) The term "Hawaiian native organization" means any organization recognized by the Governor of the State of Hawaii primarily serving and representing Hawaiian natives.

Page 5, line 17, strike "Act)" and insert "Act and Hawaiian native organizations).

Mr. AKAKA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Hawaii?

There was no objection.

Mr. AKAKA. Mr. Chairman, I rise in support of this most worthwhile measure. As a former educator, I would like to take this opportunity to commend the chairman of the Education and Labor Committee, Mr. HAWKINS, the ranking minority member, Mr. JEFFORDS, Mr. KILDEE and Mr. GOODLING, the members of the Elementary, Secondary, and Vocational Education Subcommittee, and especially the gentleman from New York [Mr. BIAGGI], for their dedication and sensitivity to the needs of our country's gifted and talented youth.

Under this bill, Mr. Chairman, the Secretary of Education will make grants to or contracts with State and local educational agencies, institutions of higher education, and other public and private organizations, including Indian tribes and organizations.

My amendment would simply expand that authority to include organizations primarily serving or representing native Hawaiians.

I introduce this amendment, Mr. Chairman, because I am concerned about the educational status of native Hawaiians. Extensive study of the overall educational achievement of native Hawaiians in the State of Hawaii reveals that, as a group, they have substantial needs in the educational arena.

For example, Hawaiian students, overall, score below parity with national norms on standardized achievement tests. In fact, of the four major ethnic groups in Hawaii's schools, two of which score consistently well above national norms on standardized tests, Hawaiian students score lowest.

Hawaiian students, likewise, are disproportionately represented in many negative social and physical statistics, indicative of special educational needs.

Further, Hawaiian students are generally strongly overrepresented in Hawaii's special education population, and quite underrepresented in the programs for gifted and talented. Specifically, in 1980 they accounted for about 20.4 percent of the school population, but 31.8 percent of the special education group and only 6.8 percent of the gifted and talented students.

Significantly, while public and private schools both show a pattern of low percentages of Hawaiian students in the uppermost stanines of achievement tests, scores of Hawaiian students who attend private schools in Hawaii are consistently at or above national norms.

Judging from these, and a variety of other findings on Hawaiian students, it can be clearly ascertained that Hawaiian youth with special educational needs, including the gifted and talented, often fail to receive optimal educational programming.

Mr. Chairman, we can make a difference. We can, today, adopt this amendment to ensure that native Hawaiians too may benefit from the programs envisioned in this bill.

Certainly, they are in desperate need of our assistance. Indeed, we need only give them a chance.

I urge the adoption of this amendment.

Mr. KILDEE. Mr. Chairman, will the gentleman yield?

Mr. AKAKA. I yield to the gentleman from Michigan.

Mr. KILDEE. Mr. Chairman, we have looked over the gentleman's amendment, and we have no objections to the amendment. It merely makes native Hawaiian organizations eligible grantees.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. AKAKA. I yield to the gentleman from New York.

Mr. BIAGGI. Mr. Chairman, I thank the gentleman for supporting the bill, and I commend the gentleman for his amendment. I have no quarrel with it. It clearly reflects a concern that is consistent with the objective of the legislation.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. AKAKA. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Chairman, we have examined the amendment and have no problems with it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Hawaii [Mr. AKAKA].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments? If not, the question is on the committee amendment on the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. GRAY of Illinois] having assumed the chair, Mr. LEVIN of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3263) to establish a Federal program to strengthen and improve the capability of State and local educational agencies and private nonprofit schools to identify gifted and talented children and youth and to provide those children and youth with appropriate educational opportunities, and for other purposes, pursuant to House Resolution 512, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on the amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. KILDEE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the two bills just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

## REGULATORY PROGRAM OF THE UNITED STATES GOVERNMENT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Government Operations.

(For message, see proceedings of the Senate of today, Thursday, August 7, 1986.)

## CALL OF THE HOUSE

Mr. TRAFICANT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

□ 1245

The SPEAKER pro tempore (Mr. GRAY of Illinois). On this rollcall, 396 Members have recorded their presence by electronic device, a quorum. Under the rule, further proceedings under the call were dispensed with.

## SURFACE TRANSPORTATION AND UNIFORM RELOCATION ASSISTANCE ACT OF 1986

The SPEAKER pro tempore. Pursuant to House Resolution 513 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3129.

□ 1247

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3129) to authorize funds for construction of highways, for highway safety programs, and for mass transportation programs, to expand and improve the relocation assistance program, and for other purposes, with Mr. TRAXLER [Chairman pro tempore] in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee of the Whole rose on Wednesday, August 6, 1986, titles I, II, III, and IV of the commit-

tee amendment in the nature of a substitute recommended by the Committee on Public Works and Transportation, which is considered as an original bill for the purpose of amendment, were open to amendment at any point.

Pending was an amendment offered by the gentleman from Florida [Mr. SHAW].

The Chair recognizes the gentleman from Florida [Mr. SHAW] for 5 minutes in support of his amendment.

ADDITIONAL AMENDMENTS OFFERED BY MR. SHAW

Mr. SHAW. Mr. Chairman, I offer three additional amendments, and I ask unanimous consent that they be considered en bloc with the pending amendment, and that the additional amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the requests of the gentleman from Florida?

Mr. SHUSTER. Mr. Chairman, reserving the right to object, I would say to my friend that the leadership of our committee on both sides of the aisle is willing to accept this unanimous-consent request.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

For the text of the original amendment offered by Mr. SHAW, refer to pages H5609 and H5610 of the RECORD of Wednesday, August 6, 1986.

The text of the additional amendments offered by Mr. SHAW is as follows:

Amendments offered by Mr. SHAW: Page 255, strike out lines 16 through 18. Page 200, strike out line 10 and all that follows through line 13 on page 201.

Redesignate subsequent sections of title III of the bill accordingly. Conform the table of contents accordingly.

Page 33, strike out lines 1 through 23.

Redesignate subsequent sections of title I of the bill accordingly. Conform the table of contents accordingly.

Page 57, strike out line 16 and all that follows through line 4 on page 56 and insert in lieu thereof the following:

SEC. 123. HIGHWAY BEAUTIFICATION.

(a) IN GENERAL.—Title 23 of the United States Code is amended by inserting after section 131 the following new section:

"§ 131A. Control of outdoor advertising

"(a) FINDINGS.—The Congress hereby finds and declares that outdoor advertising signs, displays, and devices in rural areas adjacent to the Federal-aid primary system and the Interstate System should be controlled in order to protect the public investment in such highways, to promote the safety and recreational value of public travel, and to preserve natural beauty.

"(b) EFFECTIVE CONTROL REQUIREMENT.—The States and Federal agencies shall effectively control the erection and maintenance of outdoor advertising signs, displays, and devices in rural areas adjacent to the Federal-aid primary system and the Interstate System.

"(c) EFFECTIVE CONTROL DEFINED.—For purposes of this section, the term 'effective control' means that the States and Federal agencies shall limit signs, displays, and devices that are visible from the main traveled way of the Federal-aid primary system and the Interstate System in rural areas and erected with the purpose of their being read from such main traveled way to the following types of signs, displays, and devices:

"(1) DIRECTIONAL.—Directional and official signs, displays, and devices as permitted by such regulations as the Secretary may issue.

"(2) PROPERTY SALE.—Signs, displays, and devices advertising the sale or lease of property upon which they are located.

"(3) ON-PREMISE.—On-premise signs, displays, and devices, including those which may be changed at reasonable intervals by electronics process, advertising activities conducted on the property on which they are located.

"(4) LANDMARK.—Signs lawfully in existence on October 22, 1965, and determined by the State or Federal agency, subject to the approval of the Secretary, to be landmark signs. Such signs may include signs of historic or artistic significance on farm structures or natural surfaces the preservation of which would be consistent with the purposes of this section.

"(5) COMMERCIAL AREA.—Signs, displays, and devices in areas actually used primarily for commercial and industrial purposes. Not later than 180 days after the date of the enactment of this section, the Secretary shall issue regulations defining 'actual use' and 'commercial and industrial purposes' for purposes of this paragraph. Before allowing the erection of any sign, display, and device in any area used primarily for commercial and industrial purposes, each State, in consultation with the Secretary, shall issue statewide criteria which are consistent with such regulations and define such areas and the signs, displays, and devices to be allowed in such areas.

"(6) TOURIST-ORIENTED.—Tourist-oriented directional signs, displays, and devices in areas specifically identified by a State or Federal agency, and approved by the Secretary, as appropriate for this type of sign, display, or device and consistent with the purposes of this section. Not later than 180 days after the date of the enactment of this section, the Secretary shall issue regulations defining 'tourist-oriented directional signs, displays, and devices' for purposes of this paragraph. Each State shall control the erection and maintenance of such signs, displays, and devices by a permit system. Any such permit system must provide that no permits will be granted to any applicant owning signs in rural areas adjacent to the Federal-aid primary system or the Interstate System which do not conform to this section unless such applicant demonstrates that it has volutarily removed, without compensation or other cost to the State, at least as many nonconforming signs in such rural areas as the number of signs for which it seeks permits.

"(7) FREE COFFEE.—Signs, displays, and devices advertising the distribution by nonprofit organizations of free coffee to individuals traveling on the Federal-aid primary system and the Interstate System. For the purposes of this paragraph, the term 'free coffee' included coffee for which a donation may be made, but is not required.

"(8) FARM PRODUCE.—Temporary or seasonal signs, displays, and devices advertising locations at which consumers may harvest and purchase agricultural commodities from farmers producing such commodities which signs, displays, and devices do not exceed 150 square feet.

"(d) LIMITATION ON VEGETATION REMOVAL—For purposes of this section, a State shall be treated as failing to provide effective control of the erection and maintenance of outdoor advertising signs, displays, and devices if the State allows vegetation located on any land on which the State (or any political subdivision of the State) owns a right-of-way for any highway on the Federal-aid primary system or the Interstate System to be cut, altered, or removed for the purpose of improving the visibility of any outdoor advertising sign, display, or device which is described in paragraph (2), (5), or (7) of subsection (c).

"(e) INFORMATIONAL SIGNS.—The Secretary shall, in consultation with the States and Federal agencies, provide—

"(1) within the rights-of-way on the Federal-aid primary system, and

"(2) within the rights-of-way at appropriate distances from interchanges on the Interstate System,

for areas in which signs, displays, or devices giving specific information in the interest of the traveling public may be erected and maintained. Such signs, displays, or devices shall conform to national standards promulgated by the Secretary.

"(f) TRAVEL INFORMATION.—In order to provide information in the specific interest of the traveling public, the State highway departments and Federal agencies are authorized to maintain maps and to permit information directories and advertising pamphlets to be made available at safety rest areas. Subject to the approval of the Secretary, a State may also establish information centers at safety rest areas and other travel information systems within the rights-of-way for the purpose of informing the public of places of interest within the State and providing such other information as a State may consider desirable. The Federal share of the cost of establishing such an information center or travel information system shall be that which is provided in section 120 of this title for a highway project on that Federal-aid system to be served by such center or system.

"(g) REMOVAL OF NONCONFORMING SIGNS.—Any lawfully erected and maintained sign, display, or device in a rural area adjacent to the Federal-aid primary system or the Interstate System which does not conform to the requirements of this section on October 1, 1988, shall be removed no later than September 30, 1991. Any such sign, display, or device which becomes nonconforming after October 1, 1988, shall be removed no later than the end of the fifth calendar year after it becomes nonconforming.

"(h) REMOVAL OF ILLEGAL SIGNS.—Any illegally erected sign, display, or device adjacent to the Federal-aid primary system or the Interstate System in a State shall be removed no later than 90 days after the date on which this section takes effect with respect to such State.

"(i) STRICTER STATE AND FEDERAL CONTROLS.—Nothing in this section shall prohibit a State or Federal agency from imposing stricter controls than those set forth in this section.

"(j) FEDERAL RESPONSIBILITY.—Outdoor advertising signs, displays, and devices on all public lands and reservations of the United States, including Indian lands and reservations, in rural areas adjacent to the Federal-aid primary system and Interstate System

shall be controlled in accordance with the provisions of this section by the Federal agency with jurisdiction over, or responsibility for, such land or reservation pursuant to procedures developed by such agency in consultation with the Secretary. Procedures required by this subsection shall be in effect within 90 days after the effective date of this section.

"(k) CONTINUING REQUIREMENT.—Any State highway department which, under section 131 of this title as in effect on June 30, 1965, entered into an agreement with the Secretary to control the erection and maintenance of outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System must continue to comply with such agreement. If a State fails to continue to comply with such an agreement, such State shall return to the United States any payments received pursuant to such agreement.

"(l) ENFORCEMENT AUTHORITY.—The Secretary may withhold approvals under this chapter and take such other actions as are necessary to obtain compliance with this section.

"(m) FEDERAL PAYMENTS FOR REMOVAL.—Beginning with funds apportioned for fiscal year 1987 and for each of the fiscal years 1988, 1989, and 1990, the Secretary may approve the payment to a State out of funds apportioned to such State under section 104(b)(5)(B) of this title for costs incurred by the State for the following:

"(1) Physically removing signs, displays, and devices which are located in any area required to be effectively controlled by this section and are illegal under State law or do not conform to the requirements of this section.

"(2) Acquiring signs, displays, and devices which are located in any such area and required by this section to be removed and were lawfully erected and have been lawfully maintained under State law.

The Federal share of such costs shall be the same as that which is provided in section 120 of this title for projects on the Federal-aid system which is adjacent to such area.".

(b) CONFORMING AMENDMENTS.—(1) The analysis for chapter 1 of title 23, United States Code, is amended by inserting

"131A. Control of outdoor advertising."

after

"131. Control of outdoor advertising.".

(2) Effective September 30, 1988, section 131 of title 23, United States Code, is repealed.

(c) PENDING BONUS PAYMENTS.—Any claim for a bonus payment submitted by a State under section 131(j) of title 23, United States Code, before October 1, 1988, shall be paid in accordance with the provisions of such section as such section was in effect before such date.

(d) EFFECTIVE DATE.—This section and the amendments made by this section shall take effect on the 365th day following the date of the enactment of this Act, except that the Secretary shall issue regulations required to be issued by section 131A of title 23, United States Code, on or before such date, and such section 131A shall, before October 1, 1988, only apply with respect to a State if such State has in effect a law which the Secretary determines provides for effective control of outdoor advertising, signs, and displays in accordance with such section.

(e) LIMITATION ON APPLICABILITY OF EXISTING LAW.—Section 131 of title 23, United States Code, shall not apply to any State with respect to which the provisions of section 131A of such title apply.

Mr. SHAW. Mr. Chairman, it is indeed rare when one in this body has the opportunity to vote on any amendment or any bill that has been endorsed by the Sierra Club, the Audubon Society, and the Reagan administration, but that is precisely what is before us today. This amendment has been endorsed by just about everybody except the Committee on Public Works and Transportation and the Outdoor Advertising Association of America.

Mr. Chairman, as many of you know, I have long been an advocate of reforming the existing Federal highway beautification statute.

I regret the manner in which we had to deal with this issue last night. It was unfortunate but this is an important issue and one which must be addressed.

My interest and involvement in this matter stems from my tenure as mayor of Fort Lauderdale during which time we made comprehensive reforms in the city's billboard ordinances.

At that time, like today, our chief rival was, as you might expect, the outdoor advertisers.

For many months, now, you have heard many of the problems associated with our Federal beautification law, but the words that most aptly describe this law were those scribed by the Reader's Digest, who termed the Highway Beautification Act of 1965 "the great billboard double-cross."

What was originally enacted to visually improve the scenic beauty along our Nation's highway by controlling the erection of billboards, has created a visual blight that is now worse than ever.

The program isn't working—it just is not working.

Reports recently released by the Transportation Department's, Inspector General and the General Accounting Office have both reached similar conclusions—the program is a complete flop.

GAO has cited the failure of this program on slackening Federal enforcement, the weaknesses of the existing Federal statute, and the decline in Federal funding.

The amendment I have offered will correct these problems.

We have heard repeatedly of the committee's intent to make the beautification law tougher but I would ask tougher for who?

Certainly not the outdoor advertisers.

Let me give you an example of what is meant by tougher.

In 1965, the States were told they could no longer use amortization to remove nonconforming signs—instead the States were told that they had to pay cash.

In 1986, the States were told that if they would like to pay the full cost for removing nonconforming signs they still could not do it unless Federal funds were first made available.

In 1978, we weren't satisfied with the number of signs we had to pay to remove so we broadened the Federal statute to include even more signs for which we had to pay to take down.

Now to me, that sounds like anything but making the Federal law tougher.

I would like to give you a few arguments that have been made by the opponents of my bill.

They claim that billboard owners won't be paid compensation by the States to remove their nonconforming signs.

Now that is nothing but poppycock.

All along the only thing billboard owners have been concerned about is being paid cash for their signs.

The billboard owners know that as long as we have to pay cash to take the signs down they won't come down.

The signs will not come down because with our deficits, the States deficits, the money is just not available.

My amendment turns this program back to the States and allows them to determine the type of compensation to be paid.

It will allow the States to use their police powers and amortization if they wish.

But in every respect, the States would have to pay compensation because if they do not the billboard owners have every right and just cause to take the State to their own State supreme court.

By allowing the States to run this program and to determine the compensation to be paid will save the Federal taxpayers almost a billion dollars.

Hard to believe isn't it?

So lets give it to the States.

The administration supports doing that and they support my bill from which this amendment is taken.

The Secretary has commented that this will "simplify the complex and often unworkable highway beautification program."

Quickly, my amendment will prohibit the cutting of trees in a public right-of-way simply for the purposes of making a billboard visible.

Vegetation can continue to be cut for safety and other purposes.

In this picture I have here you can see some of the abuses that take place because of the lack of controls in this area.

My amendment allows the States 2 years in which to enact appropriate State laws which provide effective control of outdoor advertising and conform with this new Federal law.

My amendment requires that any nonconforming signs be removed in 5 years and all the current illegal signs

within 90 days of enactment of the bill.

My amendment provides the Secretary of Transporation with the flexibility to ensure the States are enforcing and providing effective control of outdoor advertising.

Members of the House, there is a great deal more I can say, I would urge you though to support this amendment, and to vote for what is right and to clean up our Nation's highways.

Mr. HUTTO. Mr. Chairman, will the gentleman yield?

Mr. SHAW. I yield to my colleague from Florida.

Mr. HUTTO. I thank the gentleman for yielding.

Mr. Chairman, I commend my colleague from Florida for his diligent efforts in this direction. I know he has been working on highway beautification, and as a cosponsor of his bill, I want to continue to say that I believe he is on the right track.

As I understand it, his amendment would give this responsibility to the States, where I think it rightfully should go. Is that not correct?

Mr. SHAW. The gentleman is correct.

Mr. HUTTO. Again I commend the gentleman and rise in support of his amendment.

Mr. SHAW. I thank the gentleman for his comments. I know of his interest, and I very much appreciate not only his comments but his cosponsoring the bill, the original bill from which this amendment is taken.

Mr. UDALL. Mr. Chairman, in 1965, the Congress passed the Highway Beautification Act to curb the proliferation of billboards along Federal highways. This new law required the Government to compensate billboard owners for the removal of signs along our highway system. Despite our good intentions, that law is so riddled with loopholes that billboards continue to go up at an astounding rate. In 1983, the Government paid for the removal of 2,235 old billboards; that same year, the billboard industry erected 18,000 new signs on the same Federal roads. So far, the Government has spent over $200 million for the removal of signs. The General Accounting Office estimates that 124,000 signs qualify for the removal program and the Federal Highway Administration claims it will cost $750 million to remove them.

It is time to put an end to this wasteful program. The Shaw amendment would ban the construction of new billboards along Federal highways, prohibit the removal of trees on public lands for billboard visibility and permit amortization so that communities can remove nonconforming signs without the need for federally appropriated funds. This is a sorely needed change to current law and I urge my colleagues to support the amendment.

Mr. ANDREWS. Mr. Chairman, I rise in strong support of the amendment of the gentleman from Florida. We have all seen the unfortunate result of the proliferation of billboards along our Nation's highways in recent years.

Clearly, billboard proliferation erodes rather than enhances the quality of life in our society. Billboards are an eyesore for all. They ruin the scenery on our highways, and detract from the beauty of our country. Columnist William F. Buckley called billboards "acts of aggression against the American landscape." Truly, they are.

At the same time, whether the number of billboards are controlled or not can affect the degree of business investment made in our communities. An overabundance of billboards discourages business investment. We know that businesses, as well as new residents, are attracted or repelled in part by a community's appearance. Attractive communities generate business, jobs, and attract homeowners. Communities which reduce the number of billboards will benefit greatly.

Presently, however, cities and States are locked in, they are unable to reduce the number of billboards along their highways to the degree many would like. Current law permits removal of "nonconforming" billboards only if cash compensation is paid. But Congress has appropriated no funds for this since 1982.

In addition, current law ties the hands of State governments. In 1978, State controls were effectively removed by disallowing the use of amortization—requiring billboards to be removed without cash compensation after allowing them to remain standing for a set number of years. Removal of nonconforming billboards along Federal highways has virtually ground to a halt. We have stopped taking nonconforming billboards down along our interstates.

According to the General Accounting Office, 197,000 billboards are currently not in compliance and require removal. The GAO has stated that this will require "either additional Federal funding, or a change in the compensation requirement of the law."

In the Houston area, there are fully 4,700 nonconforming signs. It is estimated that up to 75 percent of these line Federal highways. This amendment, if enacted, could have a dramatic and positive impact on the Houston area. It would allow the State of Texas and the city of Houston to solve the problem of billboard proliferation as they saw fit.

The GAO estimates that it would cost $760 million to comply with current law. This is in addition to the $160 million in Federal dollars which has already been spent.

As important Federal programs face cuts today, it is absurd to pay $1 billion to billboard owners when there are legally acceptable alternatives to cash compensation.

This amendment offers such an alternative. It would return the power to regulate billboards back to the States and localities that face the problem daily. Removal of nonconforming billboards could be effected by whatever means available under State and local law, including amortization.

The use of amortization is vital! Clearly, Congress is not going to appropriate money for compensation for billboard removal. Adoption of this amendment, Mr. Chairman, would save the Federal Government nearly $1 billion.

To insist on cash compensation in this time of budget austerity is to insist on inaction. But what is needed is action, not inaction. If we want to start changing direction, to start removing the thousands of billboards lining our interstate and primary highways that should properly be removed, then the amendment of the gentleman from Florida should be adopted. The amendment is a careful, studied, and forceful approach to the problem of billboard proliferation, and I urge its passage.

AMENDMENT OFFERED BY MR. SHUSTER AS A SUBSTITUTE FOR THE AMENDMENTS OFFERED BY MR. SHAW

Mr. SHUSTER. Mr. Chairman, I offer an amendment as a substitute for the amendments.

The Clerk read as follows:

Amendment offered by Mr. SHUSTER as a substitute for the amendments offered by Mr. SHAW: Page 33, strike out lines 1 through 23. Redesignate the subsequent sections of title I accordingly. Conform the table of contents accordingly.

Page 57, strike out line 17 and all that follows through line 4 on page 58 and insert in lieu thereof the following:

(a) NEW PROGRAM.—

(1) GENERAL RULES.—Section 131 of title 23, United States Code, as amended by subsections (b) and (c) of this section, is amended by striking out subsections (a) through (q) and inserting in lieu thereof the following:

"(a) FINDINGS.—The Congress hereby finds and declares that the erection and maintenance of outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System and the Federal-aid primary system should be controlled in order to protect the public investment in such highways, to promote the safety and recreational value of public travel, and to preserve natural beauty.

"(b) REDUCTION IN APPORTIONMENTS.—Federal-aid highway funds apportioned on or after January 1, 1968, to any State which the Secretary determines has not made provision for effective control of the erection and maintenance along the Interstate System and the Federal-aid primary system of outdoor advertising signs, displays, and devices which are within 660 feet of the nearest edge of the right-of-way and visible from the main traveled way of such system, and Federal-aid highway funds apportioned on or after January 1, 1975, or after the expiration of the next regular session of the State legislature, whichever is later, to any State which the Secretary determines has not made provision for effective control of the erection and maintenance along the Interstate System and the Federal-aid primary system of those additional outdoor advertising signs, displays, and devices which are more than 660 feet off the nearest edge of the right-of-way, located outside of urban areas, visible from the main traveled way of such system, and erected with the purpose of their message being read from such main traveled way shall be reduced by such amount as the Secretary determines appropriate but not less than 5 percent, and not more than 10 percent, of the amounts which would otherwise be apportioned to such State under section 104 of this title, until such time as such State shall provide for such effective control. Any amount which is withheld from apportionment to any State under this subsection shall be reapportioned to the other States.

"(c) EFFECTIVE CONTROL.—

"(1) GENERAL RULE.—Effective control means that such signs, displays, or devices after January 1, 1968, if located within 660 feet of the right-of-way, and on or after July 1, 1975, or after expiration of the next regular session of the State legislature, whichever is later, if located beyond 660 feet of the right-of-way, located outside of urban areas, visible from the main traveled way of such system, and erected with the purpose of their message being read from such main traveled way, shall, pursuant to this section, be limited to–

"(A) directional and official signs and notices which signs and notices shall include, but not be limited to, signs and notices pertaining to natural wonders, scenic and historical attractions, which are required or authorized by law, which shall conform to national standards hereby authorized to be promulgated by the Secretary under this section, which standards shall contain provisions concerning lighting, size, number, and spacing of signs, and such other requirements as may be appropriate to implement this section;

"(B) signs, displays, and devices advertising the sale or lease of property upon which they are located;

"(C) signs, displays, and devices, including those which may be changed at reasonable intervals by electronic process or by remote control, advertising activities conducted on the property on which they are located;

"(D) signs lawfully in existence on October 22, 1965, determined by the State, subject to the approval of the Secretary, to be landmark signs, including signs on farm structures or natural surfaces, of historic or artistic significance the preservation of which would be consistent with the purposes of this section;

"(E) signs, displays, and devices advertising the distribution by nonprofit organizations of free coffee to individuals traveling on the Interstate System or the Federal-aid primary system; and

"(F) temporary or seasonal signs, displays, and devices advertising locations at which consumers may harvest and purchase agricultural commodities from farmers producing such commodities which signs, displays, and devices do not exceed 150 square feet.

For the purposes of this subsection, the term 'free coffee' shall include coffee for which a donation may be made, but is not required.

"(2) ANNUAL INVENTORY.—As part of effective control, each State shall maintain an annual inventory of all outdoor advertising signs, displays and devices required to be controlled pursuant to this section. Such inventory shall identify all such signs which are illegal, which are nonconforming, and which are conforming under State law. An inventory shall not be required in States which the Secretary determines have a permit and enforcement system which requires a permit for all lawful signs required to be controlled by this section and has the capability of promptly identifying all unlawful signs.

"(3) REMOVAL DATE.—As part of effective control, each State shall assure that signs, displays and devices required to be removed by this section shall be removed within 90 days of—

"(A) if not entitled to receive just compensation pursuant to this section, the date upon which they become unlawful or October 1, 1988, whichever is later; or

"(B) if entitled to receive just compensation pursuant to this section, the date upon which such compensation is paid.

"(4) EFFECT OF UNLAWFUL ALTERATIONS.—Except as provided under guidelines issued by the Secretary, no State, as part of effective control, may allow or undertake any vegetation removal or other alteration of the highway right-of-way if the purpose of such removal or alteration is improving the visibility of any outdoor advertising sign, display, or device located outside the right-of-way. If the owner of a sign, display, or device undertakes or has undertaken vegetation removal or other alteration of the right-of-way not in accordance with such guidelines, the sign, display, or device shall, for purposes of this section, be treated as unlawful as of the date of such removal or alteration.

"(5) LIMITATION ON PERMITTING.—As part of effective control, no State may permit any person to modify any outdoor advertising sign, display, or device which does not conform with this subsection or subsection (d) of this section to improve its visibility or its useful life. Nothing in this paragraph shall be construed to prevent the owner of a sign, display, or device or a person employed by such owner from performing routine maintenance of such sign, display, or device.

"(d) COMMERCIAL INDUSTRIAL AREAS.—

"(1) GENERAL RULE.—In order to promote the reasonable, orderly, and effective display of outdoor advertising while remaining consistent with the purposes of this section, signs, displays, or devices whose size, lighting, and spacing, consistent with customary use is determined by agreement between the several States and the Secretary may be erected and maintained within 660 feet of the nearest edge of the right-of-way within areas adjacent to the Interstate System and Federal-aid primary system which are zoned industrial or commercial under the authority of State law, or in unzoned commercial or industrial areas as may be determined by the agreement between the several States and the Secretary. The States shall have full authority under their own zoning laws to zone areas for commercial or industrial purposes, and the actions of the States in this regard will be accepted for the purposes of this section. Whenever a bona fide State, county, or local zoning authority has made a determination of customary use, such determination will be accepted in lieu of controls by agreements in the zoned commercial or industrial areas within the geographical jurisdiction of such authority. Nothing in this subsection shall apply to signs, displays, or devices referred to in subparagraphs (B) and (C) of subsection (c)(1) of this section.

"(2) LIMITATION ON NEW SIGNS.—

"(A) GENERAL RULE.—Subject to the provisions of this paragraph, after January 1, 1987, no new sign, display, or device may be erected pursuant to the authority of this subsection.

"(B) APPLICABILITY OF JUST COMPENSATION REQUIREMENTS.—Except as provided in subparagraph (C), any sign, display, or device lawfully erected under State law after January 1, 1987, shall not be subject to the provisions of subsection (g), relating to just compensation.

"(C) EXCEPTION.—A State may permit a person, at his or her option, to erect in such State a sign, display, or device in accordance with the requirements of paragraph (1) upon removal without payment of just compensation under subsection (g) of a sign, display, or device lawfully erected under this subsection; except that the total number of signs, displays, and devices erected and maintained under this subsection shall not exceed the number of signs, displays, and devices lawfully erected before Janauary 1, 1987, pursuant to the authority of this subsection in such State and in existence on January 1, 1987.

"(3) LIMITATION ON UNZONED COMMERCIAL AREAS.—After January 1, 1987, no area which on such date is not designated as an unzoned commercial and industrial area for purposes of paragraph (1) may be established in such State for purposes of paragraph (1).

"(e) LIMITATION ON REMOVALS.—The Secretary shall not require a State to remove any sign, display, or device lawfully erected which does not conform to this section. Nothing in this subsection shall prevent a State from removing any sign, display, or device.

"(f) PUBLIC INTEREST SIGNS.—The Secretary shall, in consultation with the States, provide within the rights-of-way for areas at appropriate distances from interchanges on the Interstate System, on which signs, displays, and devices giving specific information in the interest of the traveling public may be erected and maintained. The Secretary may also, in consultation with the States, provide within the rights-of-way of the Federal-aid primary system for areas in which signs, displays, and devices giving specific information in the interest of the traveling public may be erected and maintained. Such signs shall conform to national standard to be promulgated by the Secretary.

"(g) JUST COMPENSATION.—

"(1) GENERAL RULE.—Just compensation shall be paid upon the removal of any outdoor advertising sign, display, or device lawfully erected under State law and not permitted under subsection (c) of this section, whether or not removed pursuant to or because of this section. The Federal share of such compensation shall be 75 percent or such lesser percentage as may be agreed upon by the Secretary and the State. Such compensation shall be paid for the following:

"(A) The taking from the owner of such sign, display, or device of all right, title, leasehold, and interest in such sign, display, or device.

"(B) The taking from the owner of the real property on which the sign, display, or device is located, of the right to erect and maintain such signs, displays, and devices thereon.

"(2) LIMITATION ON USE OF MATERIALS.—A sign, display, or device acquired with funds made available pursuant to this section may be disposed of by sale or other means to a private party only if the State receives satisfactory written assurances that the material out of which such sign, display, or device is constructed will not be used to construct or reconstruct an outdoor advertising sign, display, or device.

"(h) PUBLIC LANDS.—

"(1) GENERAL RULE.—All public lands or reservations of the United States (other than lands held in trust for Indian nations, reservations, or allotted tribal members) which are adjacent to any portion of the Interstate System and the Federal-aid primary system shall be controlled in accordance with the provisions of this section and the national standards promulgated by the Secretary.

"(2) REGULATIONS.—No outdoor advertising sign, display, or device shall be permitted on land owned or controlled by the United States (other than land held in trust for Indian nations, reservations, or allotted tribal members), unless such sign, display,

or device conforms to regulations issued by the Federal agency with jurisdiction over, or responsibility for, such land. Such regulations shall be at least as stringent as the requirements of this section and the requirements of the State in which the land is located. The regulations required by this paragraph shall be developed in consultation with the Secretary of Transportation and shall be promulgated within 12 months after the date of the enactment of the Federal-Aid Highway Act of 1986.

"(i) REST AREAS.—In order to provide information in the specific interest of the traveling public, the State highway departments are authorized to maintain maps and to permit information directories and advertising pamphlets to be made available at safety rest areas. Subject to the approval of the Secretary, a State may also establish information centers at safety rest areas and other travel information systems within the rights-of-way for the purpose of informing the public of places of interest within the State and providing such other information as a State may consider desirable. The Federal share of the cost of establishing such an information center or travel information system shall be that which is provided in section 120 for a highway project on that Federal-aid system to be served by such center or system.

"(j) BONUS PAYMENTS.—Any State highway department which has, under this section as in effect on June 30, 1965, entered into an agreement with the Secretary to control the erection and maintenance of outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System shall be entitled to receive the bonus payments as set forth in the agreement, but no such State highway department shall be entitled to such payments unless the State maintains the control required under such agreement. Permission by a State to erect and maintain information displays which may be changed at reasonable intervals by electronic process or remote control and which provides public service information or advertising activities conducted on the property on which they are located should not be considered a breach of such agreement or the control required thereunder. Such payments shall be paid only from appropriations made available to carry out this section. The provisions of this subsection shall not be construed to exempt any State from controlling outdoor adertising as otherwise provided in this section.

"(k) STRICTER STATE LAWS.—Subject to compliance with subsection (g) of this section for the payment of just compensation, nothing in this section shall prohibit a State from establishing standards imposing stricter limitations with respect to signs, displays, and devices on the Federalaid highway system and those established under this section.

"(l) PROCEDURES.—Not less than 60 days before making a final determination to withhold funds from a State under subsection (b) of this section, or to do so under subsection (b) of section 136, or with respect to failing to agree as to the size, lighting, and spacing of signs, displays, and devices or as to unzoned commercial or industrial areas which signs, displays, and devices may be erected and maintained under subsection (d) of this section, or with respect to failure to approve under subsection (g) of section 136, the Secretary shall give written notice to the State of his proposed determination and a statement of the reasons therefor, and during such period shall give the State an opportunity for a hearing on such determination. Following such hearing, the Secretary shall issue a written order setting forth his final determination and shall furnish a copy of such order to the State. Within 45 days of receipt of such order, the State may appeal such order to any United States district court for such State, and upon the filing of such appeal, such order shall be stayed until final judgment has been entered on such appeal. Summons may be served at any place in the United States. The court shall have jurisdiction to affirm the determination of the Secretary or to set aside, in whole or in part. The judgment of the court shall be subject to review by the United States court of appeals for the circuit in which the State is located and to the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code. If any part of an apportionment to a State is withheld by the Secretary under subsection (b) of this section or subsection (b) of section 136, the amount so withheld shall not be reapportioned to the other States as long as a suit brought by such State under this subsection is pending. Such amount shall remain available for apportionment in accordance with the final judgment and this subsection. Funds withheld from apportionment and subsequently apportioned or reapportioned under this section shall be available for expenditure for three fiscal years after the date of such apportionment or reapportionment, as the case may be.

"(m) FUNDING.—A State may use to carry out this section in any fiscal year beginning after September 30, 1988, not to exceed ¼ of 1 percent of—

"(1) funds apportioned in such fiscal year to such State for the Federal-aid primary system under section 104(b)(1) of this title or section 108 of the Surface Transportation Assistance Act of 1982; and

"(2) funds apportioned in such fiscal year to such State for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System under section 104(b)(5)(B) of this title.

"(n) RETENTION OF DIRECTIONAL SIGNS.—The Secretary may approve the request of a State to permit retention in specific areas defined by such State of directional signs, displays, and devices lawfully erected under State law in force at the time of their erection which do not conform to the requirements of subsection (c)—

"(1) where such signs, displays, and devices are in existence on the date of the enactment of subsection (o) of this section as this section was in effect on the day before the date of the enactment of the Federal-Aid Highway Act of 1986; and

"(2) where the State demonstrates that such signs, displays, and devices—

"(A) provide directional information about goods and services in the interest of the traveling public; and

"(B) are such that removal would work a substantial economic hardship in such defined area.

"(o) DIRECTIONAL INFORMATION PROGRAM.—

"(1) DEVELOPMENT ASSISTANCE.—During the implementation of State laws enacted to comply with this section, the Secretary shall encourage and assist the States to develop sign controls and programs which will assure that necessary directional information about facilities providing goods and services in the interest of the traveling public will continue to be available to motorists. To this end, the Secretary shall restudy and revise as appropriate existing standards for directional signs authorized under subsections (c)(1)(A) and (f) to develop signs which are functional and esthetically compatible with their surroundings. The Secretary shall employ the resources of other Federal departments and agencies, including the National Endowment for the Arts, and employ maximum participation of private industry in the development of standards and systems of signs developed for those purposes.

"(2) REMOVAL.—Among other things, the Secretary shall encourage States to adopt programs to assure that removal of signs providing necessary directional information, which also were providing directional information on June 1, 1972, about facilities in the interest of the traveling public, be deferred until all nonconforming signs are removed.".

(2) CONFORMING AMENDMENT.—Subsection (r) of section 131 of title 23, United States Code, as added by subsection (c) of this section, is redesignated as subsection (p).

(3) EFFECTIVE DATE.—The amendments made by paragraphs (1) and (2) of this subsection shall take effect October 1, 1988; except that the regulations required by subsection (h)(2) of section 131, as to be inserted by such paragraph (1), shall be promulgated within 12 months after the date of the enactment of this Act.

(b) INTERIM AMENDMENTS.—

(1) LIMITATION ON NEW COMMERCIAL ZONE SIGNS.—Section 131(d) of title 23, United States Code, is amended by inserting "(1)" before "In order to promote" and by adding at the end thereof the following new paragraphs:

"(2)(A) Subject to the provisions of this paragraph, after January 1, 1987, no new sign, display, or device may be erected pursuant to the authority of this subsection.

"(B) Except as provided in subparagraph (C), any sign, display, or device lawfully erected under State law after January 1, 1987, shall not be subject to the provisions of subsection (g), relating to just compensation.

"(C) A State may permit a person, at his or her option, to erect in such State a sign, display, or device in accordance with the requirements of paragraph (1) upon removal without payment of just compensation under subsection (g) of a sign, display, or device lawfully erected under this subsection; except that the total number of signs, displays, and devices erected and maintained under this subsection shall not exceed the number of signs, displays, and devices lawfully erected before January 1, 1987, pursuant to the authority of this subsection in such State and in existence on January 1, 1987.

"(3) After January 1, 1987, no area which on such date is not designated as an unzoned commercial and industrial area for purposes of paragraph (1) may be established in such State for purposes of paragraph (1).".

(2) FUNDING.—Section 131(m) of title 23, United States Code, is amended to read as follows:

"(m) A State may use to carry out this section in any fiscal year beginning after September 30, 1986, not to exceed ¼ of 1 percent of—

"(1) funds apportioned in such fiscal year to such State for the Federal-aid primary system under section 104(b)(1) of this title or section 108 of the Surface Transportation Assistance Act of 1982; and

"(2) funds apportioned in such fiscal year to such State for resurfacing, restoring, re-

habilitating, and reconstructing the Interstate System under section 104(b)(5)(B) of this title.".

Page 58, line 5, strike out "(b)" and insert in lieu thereof "(3)"; and page 58, line 14, strike out "(c)" and insert in lieu thereof "(4)". Conform the margins of the material on such lines accordingly.

Page 58, line 18, strike out "(d)" and insert in lieu thereof "(c)".

Page 200, strike out line 10 and all that follows through line 13 on page 201. Redesignate the subsequent sections of title III accordingly. Conform the table of contents accordingly.

Mr. SHUSTER (during the reading). Mr. Chairman, I ask unanimous consent that the substitute amendment be considered as read and printed in the RECORD so that I may explain it.

Mr. SHAW. Reserving the right to object, Mr. Chairman, I cannot help but remember what transpired in this Committee last night when the Committee rose because they said they were not prepared to go forward on my amendment. The truth was that the amendment that was being considered was the exact amendment that was put forth in the Public Works and Transportation Committee, and which has already been debated in that committee.

Now, just now, and just at this precise second I have been supplied with a copy of the amendment in the way of a substitute, and we are being asked to debate in the same manner the Committee was opposed to last night.

I will not take the time of this House in order to delay the proceedings to have a complete reading of this amendment by way of a substitute; however, I would hope that the Committee would give to the Members of this House the same courtesy as the procedures of the House allow them to impose upon us.

Mr. Chairman, I withdraw my reservation of objection.

□ 1300

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. SHUSTER. Mr. Chairman, I would say to my good friend, the gentleman from Florida [Mr. SHAW], that the final draft of this was just put in my hands as well. We sat and worked and crafted it last night. In fact, the copy the gentleman has is the copy which was handed to me. So this was not a matter of withholding anything from anybody, but rather taking the information which we debated in committee and in subcommittee over many months of hearings and putting it into final form.

Mr. Chairman, our substitute that we offer we believe is a tough but fair substitute. We believe that billboards should be controlled. Indeed, it was out of our committee that the fundamental legislation came to provide for the Beautification Act, to provide for the control of billboards, and, yes, to provide for the elimination of illegal and nonconforming billboards.

In our committee on a bipartisan basis, and I speak for the leadership of our committee on both sides of the aisle now, because the substitute which we have before us has been crafted by the bipartisan leadership of our committee, we support tough, fair control of billboards. And, yes, we support the elimination of nonconforming and illegal billboards.

Indeed, both the Congressional Research Service and the GAO indicate that as a result of the Highway Beautification Act, nearly 80 percent of all of the nonconforming and illegal billboards in America have been torn down. I suggest that that is a record to be proud of when you consider the unmet goals of other programs with which we have grappled in this Congress for many, many years.

But our committee also believes, Mr. Chairman, first there is a place for legal conforming billboards; and second, where they are to be taken down, there must be just compensation paid to the owner. That is not just compensation for his loss of business, but just compensation because of the property which is taken.

I think it is very significant, Mr. Chairman, that the amendment placed before this body by my good friend, the gentleman from Florida [Mr. SHAW], only deals with billboards in rural areas.

Now, get this, it only deals with billboards in rural areas. It does not touch billboards in urban areas.

I certainly would not be one to suggest that because Mr. SHAW comes from an urban area and not a rural area the gentleman is taking this approach. Nor would I be one to suggest and question that, for the first time ever, in the amendment put before this committee by Mr. SHAW there is a new category of billboards. Do you know what that new category is? A tourist category of billboard.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from Florida.

Mr. SHAW. Mr. Chairman, I would like to correct the gentleman on a statement just made. Tourist billboards are already in there. I did not create a new category in that area. It is already in the existing law.

Mr. SHUSTER. Mr. Chairman, I understand the gentleman has put new language in regarding tourist.

Is it true that the gentleman supports tourist billboards?

Mr. SHAW. That is not true.

Mr. SHUSTER. The gentleman has it in his amendment.

Mr. SHAW. I do not.

Mr. SHUSTER. The gentleman does not have in his amendment language that supports tourist billboards?

Mr. SHAW. These are the type that I support, the type on exits to the interstate highway and are already on the property of the State.

Mr. SHUSTER. I thank the gentleman. The gentleman has made my point. The gentleman supports tourist billboards. We know that places like Fort Lauderdale have a tremendous influx of tourists. Places like Florida have a tremendous influx of tourists. So I can understand the gentleman's interest in protecing this special category of billboards. I do not question that at all. In fact, I support that particular part of the gentleman's amendment.

But beyond that, the fundamental flaw which our committee sees with the gentleman's amendment is that it eliminates just compensation for the removal of billboards.

Now what does our substitute do? First of all, our substitute provides that signs in urban and rural areas are subject to control. Second, our substitute freezes all new construction in rural and urban areas throughout the United States.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. SHUSTER] has expired.

(By unanimous consent, Mr. SHUSTER was allowed to proceed for 5 additional minutes.)

Mr. SHUSTER. Talk about being tough on billboards, what about a substitute, our substitute, that provides for a freeze on all new construction in rural and urban areas throughout the United States?

Beyond that, our substitute provides for mandatory State vegetation control regulations with a penalty of loss of sign for violation.

Beyond that, our substitute provides that signs are permitted only in commercial and industrial zones and bona fide commercial and industrial areas.

Beyond that, our substitute provides for rural signs, identification of bona fide unzoned rural and commercial and industrial areas, and freeze on new construction.

Beyond that, Mr. Chairman, our substitute provides for a mandatory 5- to 10-percent reduction of a State's highway apportionment for violation of a billboard law.

Lastly, our substitute provides for mandatory removal of illegal and compensated signs within 90 days. You find an illegal sign, and it has got to be torn down.

That is tough billboard legislation. And we think we should have tough billboard legislation, but it should be fair legislation as well.

What is the bottom line? The bottom line on fairness is just compensation. If we are going to take somebody's property away from them, they should be compensated under the Constitution, just compensation. As the

GAO has already said, since the passage of the Beautification Act, nearly 80 percent of all the illegal and nonconforming signs in America have been torn down.

This is a program that is working, so let us be fair about it.

Indeed our bill provides for a quarter of a percent takedown from the 4R and primary program for the continued removal of illegal and nonconforming signs.

So, Mr. Chairman, we have a tough substitute, but we believe it is a fair substitute. On a bipartisan basis, speaking on behalf of the leadership of the Public Works and Transportation Committee, we would urge that this substitute be adopted.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, did the gentleman say that his substitute requires a freeze on the number of regulated billboards?

Mr. SHUSTER. It is a freeze on construction of all new billboards.

Mr. ANDERSON. That sounds like pretty strict and good control to me.

Mr. McEWEN. Mr. Chairman, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from Ohio.

Mr. McEWEN. Mr. Chairman, as I understand the gentleman's explanation of the amendment that is now before us, the Shaw amendment, it requires the removal of signs that are already built, paid for, are a source of revenue for small businesses across the country, with no guarantee, having been wiped out of business, having lost their source of doing business, there is no compensation for that?

Mr. SHUSTER. That is what the gentleman's amendment does. The substitute provides for just compensation.

Mr. BOSCO. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the substitute and in opposition to the Shaw amendment.

Mr. Chairman, this certainly is not the first time that billboards have been discussed, and I do not want to discuss whether they are good or bad or whether they should be removed faster or slower. But the Public Works Committee has considered this fully. We voted on it many times. Most of us are reasonable people. I can tell you that in my district in California, which is the redwood region of the State, we do not want trees cut down in order for people to see billboards.

□ 1310

In fact, there are a lot of people in my district that do not want billboards at all. But we have to deal with some fundamental principles of fairness. One of which is that people should be compensated when the Government literally takes their property. Our committee has offered, in the form of a substitute, a bill which will maintain the Federal Government's policy of compensating billboard owners and yet at the same time freeze the construction of new billboards and provide for orderly management of those that exist.

I think for the purposes of most Members of Congress who believe in principles of fairness, this substitute is a better provision. In fact, the Beautification Act of 1965 has caused the removal of 620,000 billboards in the Federal system. This is an extraordinary achievement. For many people it did not go fast enough; many groups around the country want it to go faster, but 620,000 billboards have been removed from the Federal system, and the substitute that we have before us today would not allow any new billboards to be constructed.

In addition, the bill would eliminate current abuses by imposing tough new limits on the cutting of trees and shrubs in order simply that people would be able to see billboards.

Finally, the bill would ensure that controls on non-Indian Federal lands are at least as strong as those required by zoning. The bill achieves all of this while still preserving the mandatory regulation on signs adjacent to the interstates and still preserving the principle of just compensation.

I feel that the substitute offered by our ranking member, Mr. SHUSTER, is a fair one. It provides for orderly management and principles of fairness. I rise in support of the substitute and against the Shaw amendment.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. BOSCO. I yield to the gentleman from Florida.

Mr. SHAW. The gentleman makes a good point. There is a statistic that I have seen before and that is that under existing law over 600,000 billboards did come down, but did the gentleman know that during that same period of time, 1,800,000 went up?

Mr. BOSCO. One of the abuses that we are eradicating in the committee substitute is to put a freeze on the construction of new billboards and I think that that will resolve the very problem that the gentleman is concerned about.

Mr. SHAW. If the gentleman will yield further, that certainly is a commendable goal, and I would compliment the gentleman frm Pennsylvania and the gentleman from California on making that observation. That certainly is a step forward.

I am very confused by the language in a bill which says, "The Secretary shall not require a State to remove any sign, display or device lawfully erected which does not conform to this section." It simply means that you may have a freeze, but it is going to work both ways because under the highway beautification law, the Secretary is prohibited from requiring the billboards to come down.

This is the biggest bunch of protectionism for the outdoor advertising that I have ever seen in my life.

Mr. BOSCO. I think a mistake can be made from reading one small part of the substitute as opposed to others. The principle that we are trying to achieve is that signs will not be required to be taken down unless just compensation is paid for them. I do not think there could be any principle more fair than that.

Mr. ANDERSON. Mr. Chairman, I move to the strike the requisite number of words.

Mr. Chairman, I rise in support of the Shuster substitute.

As I read Mr. Shaw's amendment, it would add a new section 131A to title XXIII immediately following current section 131. Section 131A would only apply in rural areas adjacent to the interstate and primary system. Generally, many of the current controls and exemptions would apply. There are, however, several major changes. There is no requirement that compensation must be paid for the removal of nonconforming signs, a mandate that we in the Congress have upheld for 21 years. Federal funds would be available for physically removing illegal signs or acquiring nonconforming signs, but these funds would come from 4-R funds, already a badly overworked source of Federal funds available to the States. The most significant change is that, if section 131 is repealed, as stated on line 22, page 8, there would be unlimited secretarial power to totally suspend the State's highway programs for failure to comply with the act's provisions. This appears to give the Secretary overly broad powers in this respect.

One final point. The Shaw amendment would abandon the control of outdoor advertising in urban areas. Millions of dollars of Federal and State funds have been spent in removing signs in urban areas, such as those located in residential zones. With the lack of control in urban areas, this money will have been wasted. We should continue the controls we now have.

Therefore, I urge support of the Shuster substitute.

Mr. SHAW. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the substitute. There are a couple of points that have been made that I think need to be clarified here in this Chamber today. The gentleman from Pennsylvania and the gentleman from California and the gentleman from Ohio have raised the point of just compensation.

I would say to the gentleman from Pennsylvania that the Constitution of the United States does apply in Pennsylvania. It applies in Ohio; it applies in California; it applies in New Jersey; it applies in New York, and it even applies in Washington, DC. The Constitution very clearly provides that the Federal Government shall not take away private property without just compensation.

Just compensation is in the Constitution, and I can assure every Member here that I am in no way trying to amend the Constitution by this particular law and this particular amendment that I have offered. The substitute itself I think is very bad law; it not only will freeze the existing level, but I think it may very well make it worse because the Secretary at that point cannot require the States to remove these nonconforming signs.

It freezes in the billboard proliferation that we have today. Yes, it is a freeze all right, and if you are pleased with the amount of billboards that we have across the country and you think it is a good level, then support the substitute. I just do not think it is.

The gentleman from Pennsylvania made a point, he called them "tourist signs"; in my bill they are called "travel information signs." They do not have, they are not big billboards advertising a hotel in Fort Lauderdale. They are small billboards that you have seen along the highways in Virginia which simply give direction at the exit points to the traveling public.

Signs for information purposes are in no way objectionable. They are needed. That is why we have provided for them. That is the type of sign that I think all of us like to see when we travel across the interstates of this country and are looking for information as to where to buy gasoline, food, or other types of things.

Another type of travel information sign is this. I do not outlaw them; I do not outlaw them at all. What I do outlaw and require to come down is this. What I preserve are the trees that have fallen down along the right-of-way. I do commend the drafters of the substitute for paying attention to the question of vegetation, but I would have to be most critical of the freeze that is actually in the substitute at this point because the freeze itself freezes both ways. It freezes the hands of the Secretary of Transportation and says that she cannot go forward in requiring the billboards to come down.

Again, I would alert this body that the amendment that I have proposed has widespread endorsement. The National League of Cities endorses it, as does the Audubon Society, as does the Sierra Club. If you think this is not an environmental vote that is going down on your scoreboard, you are sadly mistaken.

It is also endorsed by the administration, the Department of Transportation. I would urge defeat of the substitute and the passage of my amendment.

□ 1320

Mr. SNYDER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the substitute.

Mr. Chairman, if I could have the attention of the gentleman from Florida [Mr. SHAW] briefly, I want to respond to his earlier remarks, since I was the one who objected last night to his unanimous-consent request. Not having seen his amendments last night and having seen them now and having told him to renew it, that it was all right, that I thought it was a valid objection on my part. The gentleman raised that same issue today; that he just got the substitute as we convened on this bill, which, of course, was accurate. I say to the gentleman that I think it is very unfortunate to all of us that this bill is being called up under these circumstances.

We were advised as early as yesterday morning that this bill was going to come up after the recess, which is next week, so it caught all of us unprepared. To some extent I think the gentleman from Florida has expressed that feeling to me also.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. In just a second, after I have finished, I certainly will.

I think it is a terrible way to legislate, to force us to legislate upon a piece of legislation that is so important to our country and to the transportation needs of our country. But we have no control over that, and neither does the gentleman from Florida nor the gentleman from Kentucky, and apparently not too many other members of this committee have any control over it.

The gentleman's observation in regard to just getting a copy of our substitute is certainly in order. I apologize for that, but I do not know how we could have any control over that at this point in time. The legislative counsel and our staff worked virtually all night, and it was just delivered to us from the legislative counsel at the beginning of this debate.

Mr. Chairman, I will certainly yield now to the gentleman from Florida.

Mr. SHAW. Mr. Chairman, I thank the gentleman for his comments.

By saying that I had just received a copy of this substitute, I certainly was not in any way indicating that there was sleight of hand involved in this, because having been here for a number of years, I know that very often we have to not only debate but try to amend what is immediately handed to us, and it is hard to argue legislation off the seat of your pants in this way and do it in a quality manner.

If I had had extra time and had received this substitute ahead of time, I would have attempted to reform it. However, at this particular late date I think the problems of amending it are so great and the amendment offered by way of a substitute is so bad that the only thing left to us to do is just to vote it down.

Mr. Chairman, I thank the gentleman for yielding.

Mr. SNYDER. Mr. Chairman, I appreciate the gentleman's concern, and I think it is unfortunate that we did not have his amendment until late last night, and that he did not have ours until today at noon.

Mr. SHAW. You had mine in committee.

Mr. SNYDER. But we did not know until last night that it was the same amendment.

Mr. McEWEN. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. I yield to the gentleman from Ohio, and after that I will proceed to speak on this amendment.

Mr. McEWEN. Mr. Chairman, is it the gentleman's understanding that States have the option of enforcing regulations such as this, that they can deny any further outdoor advertising within the limits of their States or they can demand removal, and if the States choose to go down this road, they go on their own?

I have before me a General Accounting Office study in which, when that proposition was proposed to the various States as to whether or not they wanted to limit the repeal of the compensation requirements of the Beautification Act, more than one-half of them said, "Absolutely not," that they think we should continue this program of compensation. But if a State wanted to go further, say Florida or any other State, they have that power within their State legislatures, do they not, and do they need Washington telling them how to run the beautification program within their States?

Mr. SNYDER. Mr. Chairman, the gentleman is correct in his observatins, and the GAO report is correct.

Mr. Chairman, I rise in strong support of the committee substitute to the Shaw amendment. The committee substitute is far preferable to the Shaw amendment. Let me explain why.

First, the committee substitute retains the requirement that just compensation be paid when signs which were lawfully erected under State law are removed. The Shaw amendment would eliminate this requirement.

Second, the committee substitute would continue to control signs in urban and rural areas. The Shaw amendment would only control signs in rural areas. Thus, under the Shaw amendment, some States could have no problem in urban areas, and plaster the highways with billboards in these areas.

Third, the committee amendment would freeze all new construction in rural and urban areas throughout the United States. The Shaw amendment does not contain a comparable provision.

Fourth, the committee amendment does not include the provision in the Shaw amendment which could result in a proliferation of new "tourist-oriented" signs in rural areas.

Fifth, the committee amendment puts a cap on the amount of highway construction money which can be used for billboard removal. The Shaw amendment has no such cap and thus could result in a significant reduction in highway construction.

Sixth, the Shaw amendment gives the Secretary of Transportation unfettered discretion to take "such actions as are necessary to obtain compliance." It is unwise to give this much discretion to the Secretary. The committee substitute takes a much more reasonable approach. Each state would be subject to a mandatory 5 to 10 percent reduction of its highway apportionments. This approach should be sufficient to bring States into compliance, without running the risk of agency abuses.

And seventh, the committee substitute keeps the Federal share for billboard removal at 75 percent. The Shaw amendment would allow the Federal share to go as high as 90 or 95 percent. I see no justification for this increase.

I could go on, Mr. Chairman, but I think I have made my point.

The committee substitute is a vast improvement over the Shaw amendment.

I urge my colleagues to vote in favor of the committee substitute.

Mr. RAHALL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the committee substitute and in opposition to the Shaw amendment.

Mr. Chairman, the gentleman from Florida [Mr. SHAW] has an amendment pending before us to which we are attempting to attach a committee substitute. The committee substitute is a very strong, very effective, and very fair piece of legislation.

The Committee on Public Works and Transportation has worked for many years on the Highway Beautification Act. The major provisions of that act are just and fair provisions. They should be allowed to continue, and indeed today by this committee substitute we are reinforcing what the Congress has done for many years through the Highway Beautification Act. We are reaffirming a 21-year commitment to just compensation.

Just as any individual who has his home removed to allow a highway to be built through his property receives just compensation, so should a private individual who has his signs removed for public purposes be allowed just compensation. This committee substitute is fair in that regard.

The committee substitute is strong. It puts back in the teeth of the enforcement provisions of the Highway Beautification Act. It does not weaken those provisions in any manner whatsoever. This committee substitute, then, is very strong, and in many regards it is a bitter pill for the billboard industry to have to suffer through the provisions of this substitute amendment. But again, Mr. Chairman, that is one of the prices that we pay in this society to ensure that individuals are served and to ensure that the beauty of our environment and the beauty of our highways are maintained.

This amendment is a very environmentally sound amendment. The substitute committee amendment is environmentally sound, for it requires the expeditious removal of illegal signs and nonconforming signs for which compensation has already been paid.

Mr. Chairman, in many parts of Appalachia today, in the heartlands of America, there is an economic slump taking place. There is no economic recovery occurring in the heartlands of America today. Industrial bases are being eroded, unemployment is higher, and indeed one of the bright rays of hope for the heartlands of America today is the tourism industry.

Let no one think that the actual outcome of the amendment offered by the gentleman from Florida down the road many years from now would be the abolition of billboards and the abolition of just compensation. Tourism is on the rise in this country. It is on the rise in my home State of West Virginia. Our rugged beauty, our beautiful mountains, our whitewater rivers, our State parks, all of these are examples of our almost Heaven and wild and wonderful environment.

It is necessary that we let other people know and let all Americans know of this beauty. There is no other way that Americans can discover America's best-kept secret, and that is tourism, without the advantage of billboards to direct individuals to the campsites, to the State parks, to the ski resorts, and to the other environmentally attractive jewels that this country has to offer.

So I say, Mr. Chairman, in conclusion that the committee substitute keeps the highway beautification provisions intact, and it enforces those provisos that the Congress has agreed to over many years. The substitute is just, it is fair, and it is environmentally sound. I urge my colleagues in the House to adopt this proposal.

□ 1330

Mr. ANDREWS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the amendment of the gentleman from Florida [Mr. SHAW] and opposition to the committee substitute. We have all seen the unfortunate misuse and proliferation of billboards along our country's highways.

Clearly, billboard proliferation erodes rather than enhances the beauty and landscape of our country. They are an eyesore for all.

Columnist William F. Buckley called billboards "acts of aggression against the American landscape." Truly, they are.

At the same time, whether the number of billboards are controlled or not can affect to a large degree the ability of our urban centers and communities to attract business, to attract tourists, to attract new citizens. Attractive communities generate business and attract homeowners. Most great cities in this world are also beautiful cities. Communities which reduce the number of billboards will greatly enhance their ability to attract jobs.

Presently, however, cities and States are locked, they are unable to reduce the number of billboards along their highways and freeways to the degree that many would like. Current law permits the removal of nonconforming billboards only if cash compensation is paid; but Congress has not appropriated funds for this since 1982.

In addition, current law ties the hands of State governments. In 1978 State controls were effectively removed by disallowing the use of amortization, requiring billboards to be removed without cash compensation after allowing them to remain standing for a set number of years. Removal of nonconforming billboards along Federal highways has virtually ground to a halt. We stopped taking billboards down along our interstates.

According to the General Accounting Office, 197,000 billboards are currently not in compliance and require removal. The GAO has stated that this will require "either additional Federal funding, or a change in the compensation requirement of the law."

In my area, the city of Houston, there are fully 4,700 nonconforming billboards along our city's freeways. It is estimated that up to 75 percent of

these line Federal highways. This amendment, if enacted, would have a dramatic and positive impact on large cities like Houston.

The GAO estimates that it would cost $760 million to comply with current law. This is in addition to the $160 million in Federal funds which has already been spent.

As important Federal programs face cuts today, it is absurd to pay an additional $1 billion to billboard owners, when there are legally acceptable alternatives to cash compensation.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield on one point he made?

Mr. ANDREWS. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, as I understood, the gentleman said the Shaw amendment would enable the eliminating of 40,000, or whatever number of billboards there are in Houston. I wonder if the gentleman knows that the Shaw amendment does not deal with urban areas. It only deals with rural areas.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. I am happy to yield to the gentleman from Florida.

Mr. SHAW. Mr. Chairman, I think the gentleman was about ready to answer the question, but I will be delighted to address it.

The Shaw amendment, and I meant to do this right after the gentleman from Pennsylvania made his earlier comments with regard to urban areas, back when I was mayor of the city of Fort Lauderdale, as I did point out in my earlier remarks, we did limit the number of signs. We cut down on the number of them, but we had problems in areas next to Federal highways.

Under the Shaw amendment, cities can deal with the problem themselves and that is exactly the way I think it ought to be handled. It is a question of both States' rights and city rights, and cities do have rights in this country.

Mr. SHUSTER. Mr. Chairman, if the gentleman will yield further, the Shaw amendment changes the Federal Government's role in restricting billboards. It does not deal with the issue of billboards in urban areas.

Mr. ANDREWS. Mr. Chairman, if I may reclaim my time, what I believe it does, as the gentleman from Florida [Mr. SHAW] has stated, it unlocks the loggerhead that we are in and allows cities and local governments to handle this issue in their own way.

If we want to start changing this direction and removing some of these big billboards along our interstate Federal highways in our urban areas, then the substitute amendment should be defeated and the amendment that has been presented by the gentleman from Florida [Mr. SHAW] should be approved.

There is no doubt about it; the environmental vote on this issue is in favor of the amendment of the gentleman from Florida [Mr. SHAW] and in opposition to the substitute offered by the committee.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. I am happy to yield to the gentleman from Florida.

Mr. SHAW. Mr. Chairman, the gentleman from Ohio stated some statistics a while ago from the General Accounting Office. If the gentleman had gone one step further in the statistics, he would have found that 27 of our 50 States favor the repeal of the compensation clause of the 1978 amendment.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(At the request of Mr. MCEWEN, and by unanimous consent, Mr. ANDREWS was allowed to proceed for 2 additional minutes.)

Mr. McEWEN. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. I am happy to yield to the gentleman from Ohio.

Mr. McEWEN. Mr. Chairman, on this question of urban and rural, I would like to get it straight. Presently, there is no prohibition against the city of Houston removing all of the billboards if they choose to do so. The only requirement is that if they take a small business enterprise and destroy it, confiscate their property, under the Constitution and the provisions of the law as it now stands, they must compensate the person from whom they have destroyed the property.

Under the amendment that the gentleman from Florida [Mr. SHAW] has offered, they could wipe out the business. They could destroy the boards and give no compensation at all. Is that correct?

Mr. ANDREWS. The cities and the local communities will have the option of utilizing their discretion in disposing these billboards along the freeways.

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. I am happy to yield to the gentleman from Florida.

Mr. SHAW. Mr. Chairman, the gentleman from Texas does know and the gentleman from Ohio, I am sure, knows that the Constitution of the United States again applies and does govern the laws of the State of Texas, as it does in Ohio, and that simply requires that compensation has to be paid.

But the problem that we have and that we are trying to get away from is, the Federal law mandates cash compensation. If there is no money in the kitty as far as the Federal Government, it is not going to happen, and it does not allow for amortization of the signs, and that is exactly what we are trying to do. We are not trying to take the legal billboards down tomorrow or the next day, next year or even the year thereafter. It is phased out over a period of time, which is a just and a fair way of handling it.

Even in that regard in the city of Houston and in Ohio, compensation will have to be determined by the State courts and that will apply. There will be compensation paid in instances where there are damages and where properties are taken.

Mr. McEWEN. If the gentleman will yield further, I believe the gentleman's statement is either a non sequitur or he supports the present law.

I thank the gentleman very much.

Miss SCHNEIDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the Highway Beautification Act of 1965 enabled Americans to look forward to an improvement in safety, recreation, and the esthetic quality of our highways, very admirable purposes; however, we are finding now that there are considerable loopholes and I think that we have the potential here by supporting the Shaw amendment of recapturing the spirit of the original bill.

I am very distressed by some of the misperceptions that were articulated on the floor here today and I would very much like to make clear once and for all the provisions that we are discussing.

The 1965 act placed restrictions on the use of billboards on Federal highways in nonurban, noncommercial areas. There were three classes of billboards: Legal, illegal, and nonconforming. The nonconforming billboards were those which were legal when built, but due to the act or changes in zoning, were no longer in compliance with the law. Illegal billboards, however, could simply be torn down, but nonconforming ones required cash compensation, even though the courts had long held that there was no right to use our highways as corridors for advertising. Indeed, courts have long held that billboards do not derive their value from the private land they stand on, but rather from the public roads that they stand next to. This is a legal court decision. Today, the Federal Highway Beautification Act is a law which requires the Federal Government to pay polluters to stop polluting.

Now, in 1978, the billboard industry successfully pushed through an amendment to the original act, and this amendment required that cash compensation be paid whenever a billboard was removed anywhere along Federal highways, including those inside cities. The amendment has had drastic consequences, which have already been articulated, because in the past, the cities and towns were able to take their own city and local initiatives in billboard action. In particular,

they were able to use the traditional zoning method of amortization to provide compensation. However, now their activities are hampered by the amount of funding available to supply for billboard removal. As Federal funding for billboard removal has dried up, the cities and towns have been hamstrung. It is no wonder that the billboard industry supports the Highway Beautification Act as it is, because States are prevented from using their own laws, which makes them to be caught in a bind.

Mr. Chairman, this does not mean that our problem could be solved by once again pouring more Federal funds into the program, because current estimates suggest that it would cost over $750 million per year to remove all of the existing nonconforming billboards.

I firmly believe that given the current state of the Federal budget deficit, it would be completely irresponsible to continue subsidizing the billboard industry. Even if we had unlimited funds, this would be a very unwise course, because when billboards are to be removed, they are selected from lists that are submitted by the industry itself. The companies typically, and very wisely, list their least profitable billboards. They are paid cash for these signs, which they then reinvest in new signs.

The U.S. General Accounting Office told us that taxpayers' dollars had been used to remove 2,235 billboards along Federal highways that then were replaced with 13,522 new billboards.

This is a blatant waste of taxpayers' dollars. There are other loopholes also in the law, Mr. Chairman. But I think that any law which allows thousands of new billboards to go up while asking taxpayers to pay for the removal of any others completely offends common sense.

Now, Mr. Chairman, I would also like to make very clear that the Shaw amendment will make highway beautification a workable system once again. Not only am I of that opinion, but I would like to amplify the fact that there have been editorials throughout the United States that support the Shaw amendment, such as the Hartford Courant, the Dallas Times Herald, the Los Angeles Times, the Portland Press Herald, the Commercial Appeal from Memphis, TN, the St. Louis Post-Dispatch, the Herald from Durham, NC, the Washington Times, and the Miami Herald.

The other point I would like to make, Mr. Chairman, is that the Senate committee has already voted in support of legislation similar to the Shaw amendment.

Finally, I would like to make very clear that the administration wholeheartedly support the Shaw amendment.

I would like to be more specific in the support of the administration's indication in a letter from Elizabeth Dole to myself, and it says:

The Department supports your efforts to gain enactment of these provisions, as well as other provisions consistent with our approach. Your efforts are even more important in light of changes included in the House-reported version of H.R. 3129 which would place additional financial burdens on taxpayers and perpetuate the current unworkable program.

Mr. Chairman, I would submit that this is an issue placing taxpayers' dollars and I take issue with my colleague, the gentleman from West Virginia, who said that the substitute from the committee is environmentally sound. I would like to share with my colleague that not only does the Reagan administration and Secretary Dole support this legislation, but it is also supported by other organizations.

The CHAIRMAN. The time of the gentlewoman from Rhode Island has expired.

(By unanimous consent, Miss SCHNEIDER was allowed to proceed for 3 additional minutes.)

Miss SCHNEIDER. Mr. Chairman, it is also supported by the National Wildlife Federation, the American Institute of Architects, the National Trust for Historic Preservation, the Sierra Club, the American Planning Association, the American Farmland Trust.

I will remind my colleagues, as has already been stated, that this is a key vote on the scorecard of the League of Conservation Voters, which is a coalition of all environmental groups.

So if one is to say here on the floor of the House here that you are a fiscal conservative or that you vote in support of the environment, then there is no question that you must defeat the committee substitute and vote for the Shaw amendment.

□ 1345

Mr. RAHALL. Mr. Chairman, will the gentlewoman yield?

Miss SCHNEIDER. I am happy to yield to the gentleman from West Virginia.

Mr. RAHALL. Mr. Chairman, I appreciate the gentlewoman's yielding.

Mr. Chairman, let me say that in regard to the fact that billboard owners receive compensation and that then just use it to build new billboards, I see nothing wrong with that. These new billboards are conforming billboards that are built in line with the Highway Beautification Act as the Congress has passed it, and they are built in environmentally sound manners. The committee substitute would ensure that that practice continues.

I might say also that the impressive list of newspaper editorial support that she has read in favor of the Shaw substitute is another economic-sense matter. After all, billboard advertising competes with newspaper advertising. Why should these newspapers not take a position that is in their best economic sense?

So I say to the gentlewoman that the committee substitute is an environmentally sound substitute. It puts a freeze on, it puts back into law the enforcement provisions of the Highway Beautification Act, and the just compensation issue has been debated.

Mr. SHUSTER. Mr. Chairman, will the gentlewoman yield?

Miss SCHNEIDER. Not at this moment. I would like to respond to my colleague.

Mr. Chairman, what it still does is burden the taxpayers with a burden that they have no responsibility to be carrying. They are not willing to carry that responsibility, No. 1. So it is a fiscal imposition.

In addition to that, we are not enabling through the substitute the opportunity for State and local rights to say whether they want the billboards or not. I think that it is ludicrous for us to say here in this body that we support the New Federalism, or the opportunity for local government to have jurisdiction over their own environment.

If we support the committee substitute, we are saying, "Sorry, folks, tough luck, the Federal Government is still going to play guardian angel to the whole billboard industry; we will call the shots."

I think that that is completely inappropriate, and I think that we must understand that this is a fiscal issue—$200 million a year is a significant amount when we are talking about a $230 billion deficit this morning, States' rights is critical, and that in part it is an esthetic issue. Certainly there are no environmentalists that are supporting the committee substitute.

Mr. RAHALL. Mr. Chairman, will the gentlewoman yield?

Miss SCHNEIDER. I yield to the gentleman from West Virginia.

Mr. RAHALL. Would the gentlewoman not agree that an individual who has his private home taken for the purposes of the building of an interstate highway is due just compensation for the taking of his private property?

Miss SCHNEIDER. Absolutely, and I think that it is very misleading for the gentleman to imply otherwise, because the gentleman from Florida [Mr. SHAW], the sponsor of the amendment, has made it very clear that through amortization there will be just compensation.

Mr. Chairman, I yield back the balance of my time.

Mr. UDALL. Mr. Chairman, in 1965, the Congress passed the Highway Beautification Act to curb the proliferation of billboards along Federal highways. This new law required the

Government to compensate billboard owners for the removal of signs along our highway system. Despite our good intentions, that law is so riddled with loopholes that billboards continue to go up at an astounding rate. In 1983, the Government paid for the removal of 2,235 old billboards; that same year, the billboard industry erected 18,000 new signs on the same Federal roads. So far, the Government has spent over $200 million for the removal of signs. The General Accounting Office estimates that 124,000 signs qualify for the removal program and the Federal Highway Administration claims it will cost $750 million to remove them.

It is time to put an end to this wasteful program. The Shaw amendment would ban the construction of new billboards along stretches of rural roads, prohibit the removal of trees on public lands for billboard visibility and permit amortization so that communities can remove nonconforming signs without the need for federally appropriated funds. This is a sorely needed change to current law and I urge my colleagues to support the amendment.

Mr. BONKER. Mr. Chairman, the Highway Beautification Act of 1965 was intended to preserve the beauty of our Nation's landscape by forcing the removal of nonconforming billboards along our Federal highways. Instead, because of a number of amendments to the original act, we have come to a point where, by law, it cost the Government more to remove billboards than it does to erect new ones.

Twenty years after passage of the Highway Beautification Act, our effort to improve the scenic quality of our Nation's highways is a costly failure. The billboard industry exploited a good law and continues to plague our rural landscape with unwanted advertising that spoils the scenery and endangers motorists by distracting them from their driving.

Because of loopholes, the Federal Government actually promotes the erection of billboards. As a result, our cities and large segments of our rural areas have become dumping grounds for the billboard industry. Twenty years after passage of this legislation there are now 14 signs for every 10 miles of Federal highway. Furthermore, current law fails to protect publicly-owned trees on highway rights-of-way from destruction by billboard companies. Lastly, it mandates Federal-State cash payments to billboard owners for removal of nonconforming signs, an obligation that today amounts to almost a billion dollars.

Earlier this year, I became a cosponsor of Representatives UDALL and SCHNEIDER's bill, H.R. 5043, which addressed the major problems with the Highway Beautification Act as it exists today. Many of these key points have become part of the amendment to the surface transportation bill offered today by Representative SHAW. Among other things, it would put a hold on new billboard construction on Federal highways. It would also drop the requirement that States and the Federal Government pay cash compensation, thereby enabling States to choose the form of just compensation for removal of nonconforming signs. Lastly, the legislation prohibits the cutting of vegetation in the interstate and primary highway right-of-way strictly for the purpose of making a billboard visible.

Since the act of 1965 was passed, taxpayers have paid the billboard industry over $200 million to take down old billboards. In many cases this money was used to replace outdated signs with new ones—in effect a direct subsidy of the industry. This is a terrible waste of the taxpayers' money. In my view, a far more responsible solution would be to permit nonconforming signs to depreciate over a set period of time at which point they will be torn down at no direct expense to the Federal Government and for the considerable benefit of our Nation's highways.

In my own State of Washington, we have adopted tight restrictions on billboards without suffering the dire consequences to small businesses predicted by many of my colleagues on the floor today. Instead, these laws have enhanced the special beauty of the State which is one of the major lures for tourists and the economic activity they bring.

It is time to put an end to these loopholes, which make a mockery of the concept of highway beautification and have proved a tremendous drain on our Federal budget. I urge my colleagues to support Representative SHAW's amendment that will fulfill the original intent of the Highway Beautification Act by once and for all removing billboards from our interstate highways.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. SHUSTER] as a substitute for the amendments offered by the gentleman from Florida [Mr. SHAW].

The question was taken; and the Chairman pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. SHAW. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 251, noes 159, answered "present" 1, not voting 20, as follows:

Messrs. PRICE, MOAKLEY, DONNELLY, WHITTAKER, ACKERMAN, GILMAN, and EVANS of Iowa changed their votes from "aye" to "no."

Messrs. MOORHEAD, MORRISON of Connecticut, LENT, MADIGAN, ACKERMAN, and WEBER changed their votes from "no" to "aye."

So the amendment offered as a substitute for the amendments was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Florida [Mr. SHAW], as amended.

The question was taken; and the Chairman pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. CHANDLER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

Ms. FIEDLER. I have a point of order, Mr. Chairman.

The CHAIRMAN pro tempore. The gentlewoman will state her point of order.

Ms. FIEDLER. Mr. Chairman, I would like to ask whether or not a vote in favor of this particular amendment would require the elimination of such signs along a route for hospitals or other urgent or emergency care.

The CHAIRMAN pro tempore. The Chair would like to state to the gentlewoman that that is not a point of order.

A recorded vote has been ordered.

The vote was taken by electronic device, and there were—ayes 385, noes 28, answered "present" 1, not voting 17, as follows:

□ 1415

Mr. BURTON of Indiana and Mr. MONSON changed their votes from "aye" to "no."

Mr. DORNAN of California changed his vote from "no" to "aye."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. FIELDS. Mr. Chairman, pursuant to rule VIII, clause 1, I voted "present" on the last two votes.

Mr. Chairman, I voted "present" on the proceeding Shaw amendment and the Shuster substitute to the Shaw amendment. Both the amendment and the substitute concern the removal of billboards along Federal highways.

My family has a financial interest in several billboards. To avoid any possible conflict of interest, I voted neither "aye" nor "no." I did, however, record my presence in the House of Representatives at the time the vote was taken.

Mr. KOSTMAYER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time to thank the gentleman from New Jersey [Mr. HOWARD], chairman of the Committee on Public Works and Transpor-

tation and the ranking minority member of that committee, Mr. SHUSTER, for their support and assistance in incorporating into H.R. 3129, the Surface Transportation and Uniform Relocation Assistance Act of 1986, the provisions of H.R. 4408, legislation I introduced on March 13, 1986.

Basically, this section would amend the Interstate Compact existing between the State of New Jersey and the Commonwealth of Pennsylvania to allow the Delaware River Joint Toll Bridge Commission to use the tolls collected on its revenue generating bridges for expenses incurred on other bridges under its jurisdiction. In other words, the commission would assume full financial responsibility for the operation and maintenance of all bridges under its control, including a group of bridges which previously have been supported by State appropriations. The net effect of this legislation will be to relieve the States of a financial burden thereby making the commission the single agency responsible for these bridges.

In addition, this section would allow the Delaware River Joint Gap Bridge on Interstate 80 to impose tolls on the yet uncompleted bridge under construction on I-78. The imposition of tolls on this new bridge would only last until the commission is able to recover the funds it expends on this bridge.

Mr. Chairman, these provisions have been approved by the New Jersey Department of Transportation, Penn DOT and U.S. DOT. This legislation is extremely important to both New Jersey and Pennsylvania and again, I want to thank Mr. HOWARD and Mr. SHUSTER for their support.

PERSONAL EXPLANATION

Mr. McCAIN. Mr. Chairman, because of a longstanding previous commitment I had to address the convocation of the Industrial College of the Armed Forces, I was not able to cast my vote on the McCurdy amendment to H.R. 3129 (rollcall) No. 298) regarding the granting of flexibility to the States on the 55-mile-per-hour speed limit. Had I been present, I would have voted "yes." I ask unanimous consent that my statement appear in the permanent record immediately following that vote.

The CHAIRMAN pro tempore (Mr. TRAXLER). Is there objection to the request of the gentleman from Arizona?

There was no objection.

AMENDMENT OFFERED BY MR. DE LAY

Mr. DELAY. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. DELAY: Page 231, after line 4, insert the following new section:

SEC. 319. PROTECTION OF PRIVATE CONTRACTING RIGHTS

Section 13(c) of the Urban Mass Transportation Act of 1964 is amended by inserting after the third sentence the following new sentence: "Such arrangements may not restrict or limit the rights of the recipient of such assistance to enter into a contract or other arrangements for the provision of mass transportation services by private entities."

Conform the table of contents of the bill accordingly.

Mr. DELAY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DELAY. Mr. Chairman, this is an amendment that is just a clarifying-language amendment, which in no way attacks the intent of this Congress on section 13(c) as it provides for labor protection under the Urban Mass Transportation Act. I understand it is agreeable to both side.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I yield to the chairman of the committee, the gentleman from New Jersey [Mr. HOWARD].

Mr. HOWARD. I thank the gentleman for yielding.

I understand, Mr. Chairman, that this merely is prohibiting the application of this section in order to prevent, specifically prevent privatization of bus service, is that correct?

Mr. DELAY. That is correct.

Mr. HOWARD. And that is all the amendment does?

Mr. DELAY. That is absolutely correct.

Mr. HOWARD. It is agreeable on this side.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman for yielding.

Mr. Chairman, we are agreeable to the amendment also.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Texas [Mr. DELAY].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DONNELLY

Mr. DONNELLY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DONNELLY: Add to the end of section 412 the following new provision:

Notwithstanding any other provision of law, the Commonwealth of Massachusetts is required to assist and coordinate the salvaging of the foundation and associated structures of the historic Great House in City Square, Charlestown, Massachusetts; to store the salvaged material during the suppression and reconstruction of the interstate at Charlestown, Massachusetts; and to assist and coordinate the incorporation of the Great House's foundation and related structures into the reconstruction of City Square at Charlestown, Massachusetts.

Mr. DONNELLY (during the reading). Mr. Chairman, I ask unanimous consent the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. DONNELLY. Mr. Chairman, I am offering an amendment that will help preserve a vital archeological find in the Boston area that dates back to the early years of the 17th century, and has a direct connection to several of the key events in America's early political, religious, and social history.

The Great House was built in Charlestown, MA, in 1629 as the home of John Winthrop, the first Governor of the Massachusetts Bay Colony. In the Great House, Governor Winthrop met with the Court of Assistants, the first formal legislature in the New World. The covenants of the First Congregational Church were signed in the Great House. Tragically, on the day of the Battle of Bunker Hill on June 16, 1775, the Great House and the surrounding community were burned to the ground by the British occupying army. The archeological remains of the Great House were only recently discovered by surveyors preparing plans for the construction of a tunnel through Charlestown's City Square. Construction on the tunnel is expected to begin in the next few months. A private historic preservation organization, the Great House Foundation, Inc., has devised a plan in conjunction with the National Park Service and the Boston Landmarks Commission to salvage and preserve as much of the Great House's buried foundation and related artifacts as possible without seriously disrupting or increasing the costs of the tunnel construction.

I offer my amendment today with my Massachusetts colleague, Mr. ATKINS, to demonstrate congressional support for the salvaging of this important remnant of America's early chapter of history. My amendment is a commonsense solution that directs the agencies of the Commonwealth of Massachusetts to assist the Great House Foundation in its efforts to excavate the buried remnants of the Great House and to rebuild the site upon the completion of the traffic tunnel as a historic landmark in the newly constructed City Square. Let me point out, Mr. Chairman, that the amendment involves absolutely no cost to the Federal Government. The entire cost shall be borne by the Commonwealth of Massachusetts.

□ 1430

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. DONNELLY. I yield to the gentleman from New Jersey.

Mr. HOWARD. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, I just want to make it very clear, and we know it is not the intent of the gentleman's amendment to circumvent in any way the National Historical Preservation Act or section 4(f) of the Department of Transportation Act; am I correct on that?

Mr. DONNELLY. This amendment does not violate either of those acts.

Mr. HOWARD. Mr. Chairman, under those circumstances, we certainly will support the amendment.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. DONNELLY. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, we support the gentleman's amendment.

Mr. ATKINS. Mr. Chairman, will the gentleman yield?

Mr. DONNELLY. I yield to the gentleman from Massachusetts.

Mr. ATKINS. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I am proud to join the gentleman from Massachusetts [Mr. DONNELLY] as a cosponsor of this amendment to protect one of the most important historical finds in New England.

The amendment is needed to avoid a collision between Boston's economic future and the city's historic past. Later this fall, construction is scheduled to begin on the segment of the central artery that goes through Charlestown. The project is vital to relieving some of the most heavily congested traffic in the country.

Unfortunately, the project's design calls for it to be routed directly through the archeological site of the first governmental building in New England. Gov. John Winthrop's Great House, built in 1629, was the original seat of government for the Massachusetts Bay Colony, and the cradle of democracy in the English colonies in the New World.

This matter was brought to our attention by the members of the Great House Foundation, a private, nonprofit research and educational foundation committed to protecting America's archeological and historical heritage. After careful review and consideration, they have recommended a proposal for preserving the site and the historic value of the Great House. That recommendation forms the basis for this amendment.

The amendment, which adds no new costs to the bill, directs the Commonwealth of Massachusetts to preserve this outstanding historical monument. The State would be required to assist in salvaging the foundation of the Great House, storing the salvaged materials during highway construction, and then incorporating the Great House into the reconstruction of City Square in Charlestown after the highway project has been completed.

Restoring the Great House on its existing site will permit it to become a part of the Freedom Trail through the Boston historic park. It is an appropriate, prudent proposal that will preserve this historic landmark without imposing any undue or excessive delays in the highway construction schedule.

Mr. Chairman, as we build the future, we don't need to bulldoze the past. I urge the approval of this amendment.

The question is on the amendment offered by the gentleman from Massachusetts [Mr. DONNELLY].

The amendment was agreed to.

Mr. MONSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to take this opportunity to congratulate the committee for bringing this bill to the floor. The work done by the committee and the leadership in particular has been outstanding. Their dedication to improving the conditions of our Nation's highways is evident in this bill. I am very pleased to have participated in this multiyear reauthorization of the vital Federal Highway Program. I must, however, express opposition to section 107 of this bill which changes the allocation formula for 4R interstate repair funds. The current formula equitably allocates funds based on the two most important factors: lane miles and vehicle miles traveled. This allows both States with large usage and those with large lane miles to receive adequate funding to maintain essential highways.

The bill we are debating today dramatically changes the 4R formula. The new formula removes lane miles from consideration and replaces it with fuel—gas and diesel—usage. This means that the entire allocation is based on usage. With this formula large States with small populations will be forced to maintain enormous levels of highway miles with a greatly reduced level of funding. Many States are cut by this change by 50 percent or more. In all 28 States and the District of Columbia receive reduced funding.

It is absolutely essential to the economies of the large Western States that the interstate system be adequately maintained and in safe conditions. Reducing the level of funding to these States will make it nearly impossible for many of them to maintain the highway system in an adequate manner. The Interstate Highway System is a national system. It defeats the purpose to treat it as a regional concern. If the system does not allow for safe, efficient travel throughout the Nation then the system is not achieving one of the primary goals of the Interstate System. Reducing the funding to these States will adversely effect the usefulness of the of the whole system.

I would also like to remind the Members of the findings of the study completed pursuant to the Surface Transportation Act of 1982 which was released in December 1983 by the Federal Highway Administration. That report made three critical findings:

(T)he principle finding is that dramatic improvement over the current formula is not likely to be achieved.

In short, no compelling case could be made for endorsing any specific change in the current formula at this time."

"Statewide fuel consumption does not necessarily reflect interstate use. Often diesel bought in one State is used by trucks traveling through another State." "Reporting systems are not uniform among States (for determining fuel usage)" and "statewide consumption of gasoline does not necessarily reflect use, condition or need."

Secretary Dole stated similar concerns with the gasoline and diesel fuel factors in a letter dated September 10, 1985. It is clear that the conditions have not changed markedly since the release of the 1983 study and it would be unwise to effect a change in the formula at this time. The current formula is equitable and should be retained.

While the rest of the bill is good and necessary and should be passed, I am hopeful that before this important legislation is approved by the Congress section 107 will be changed so the current allocation formula can be maintained.

Mr. Chairman, I would like to have the attention of the gentleman from New Jersey for the purpose of entering into a colloquy.

Mr. HOWARD, I am deeply concerned about section 107 of this legislation which revises the formula for the distribution of funds for restoration, resurfacing, rehabilitating, and reconstructing the Interstate System. My State and 28 others will lose a significant amount of funding under this change. We strongly oppose this revision. But, I recognize that the votes are not favorable in the House to changing this provision. However, I also note that the Senate bill makes no change in the 4R formula. Is that the gentleman's understanding?

Mr. HOWARD. If the gentleman will yield, the gentleman from Utah is correct. The bill reported from the Senate committee does not change the formula.

Mr. MONSON. I would ask the gentleman if he would look favorably on the Senate approach when this bill goes to conference?

Mr. HOWARD. We know that compromise is always necessary in the legislative process. I assure the gentleman we will look at his concerns.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. MONSON. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, I would say that while our committee strongly supported the formula change, we recognize there is going to have to be compromise with the other body, and we will

approach this issue in the spirit of compromise.

Mr. MONSON. Mr. Chairman, I thank the gentleman from Pennsylvania, and I appreciate very much their willingness to consider this important matter, because it does affect so many States in our country and their ability to maintain the Interstate Highway System.

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take this time to discuss with the chairman of the Subcommittee on Surface Transportation and the ranking member a matter involving the study required in section 153 of the Surface Transportation Act, for a study of the bridge formula.

I just want to make it clear that as the Transportation Research Board goes forward with the study required under this legislation, that the board will consult with truck manufacturers in a very important matter that our Subcommittee on Investigations and Oversight has had under review for some time, and that is the location of the front steering axle.

I feel it is very important, and I hope the chairman and the ranking member will concur, that the report should address whether there are influences restricting vehicle maneuverability, ride quality of the truck, safe entry and exit access by operators and other related matters, rideability, and so forth.

Would it be the chairman's view that the Transportation Research Board should consult, should bring those factors into this report, so that they could be fully evaluated by the Public Works and Transportation Committee at the appropriate time.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, in listening to the gentleman's remarks and the notes I have here on the gentleman's remarks, it is certainly a possibility, what the gentleman is suggesting. I suppose I could almost say yes, but it is surely a possibility.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I certainly concur with my good friend, the gentleman from Minnesota.

AMENDMENTS OFFERED BY MR. PETRI

Mr. PETRI. Mr. Chairman, I offer several amendments.

The Clerk read as follows:

Amendments offered by Mr. PETRI: Page 223, line 9, strike out "architectural".

Page 223, line 10, strike out "and" and insert in lieu thereof ", or architectural".

Page 148, strike out line 20 and all that follows through line 13 on page 149.

Redesignate the subsequent sections of title I accordingly. Conform the table of contents accordingly.

Page 34, line 11, strike out "architectural".

Page 34, line 12, strike out "and" and insert in lieu thereof ", or architectural".

Mr. PETRI (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. SHUSTER. Mr. Chairman, reserving the right to object, and I shall not object, I would simply say that these are simply technical amendments which bring the bill in conformity, correcting some typographical errors. I understand there is no problem with them.

Mr. Chairman, I withdraw by reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. PETRI. Mr. Chairman, these are technical amendments, and I believe they are acceptable to both sides.

Mr. ANDERSON. Mr. Chairman, if the gentleman will yield, we accept the amendments.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Wisconsin [Mr. PETRI].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. WAXMAN

Mr. WAXMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WAXMAN: Page 240, strike line 8 and all that follows through line 3 on page 241 and insert:

Notwithstanding any other provision of law, the Secretary shall not enter into any contract with the Southern California Rapid Transit District to fund construction of the Minimum Operable Segment 1 until completion of a supplemental environmental impact statement for the entire Downtown Los Angeles to the San Fernando Valley Metro Rail Project and until such construction is authorized by an Act of Congress enacted after the date of enactment of this Act.

Mr. WAXMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WAXMAN. Mr. Chairman and my colleagues, I have a very unusual request to make. I am offering an amendment to strike the funds for a metrorail subway system that is 90 percent within my district.

I come to you as a former supporter of this system, because I know that a city like Los Angeles, with all the congestion and traffic we have, needs something other than relying on automobiles to get us around. We need a rapid transit system.

But I supported this subway system until one day an explosion took place in the Fairfax area of Los Angeles. And when the city looked at the reason for that explosion, they said there was a methane gas pocket, and when the methane gas got to a certain level, it became explosive.

We turned to the metrorail people and said, how can you plan a tunnel through a methane gas area? They came back and said they thought they could do it safely.

We set up a commission to look at the problems in one part of the system. We looked at the problems in others. There are some experts who say do not worry. A lot of technicians will say, we can handle it. Some of the technical people have said to us, this whole system is fraught with peril.

Now the metrorail system in Los Angeles has taken on a life of its own. People are not asking is it safe. They want to assume it is safe because they want to get started. What they are asking to do is to get started by the end of this year on the first segment, the first 4 miles of the subway. They want to start tunneling, notwithstanding they may tunnel into an earthquake fault, a methane gas pocket, an abandoned oil well, and kill the workers on that project. They want to get started.

Why do they want to get started? They want to get started so that they can come back and say, "We have already started. Continue to put money into the system."

□ 1440

That does not strike me as a responsible way for the rapid transit people in Los Angeles to act or for Members of Congress in supporting the needed authorization and appropriation for money for the project.

What we are seeking to do is to have UMTA stop moving forward with this system. It does not make sense to start a system when we do not know where it is going; they have not even completed the route. They have not done the environmental impact statement on the rest of the route. They are looking at several options.

We insisted, by the way, in the appropriations bill last year that they avoid that area where there was the explosion. So now they are avoiding that area, but they are planning to tunnel through areas that are equally as dangerous as that area. Three of the four routes they are looking at would tunnel through earthquake faults, methane gas pockets, and so forth.

Let us not throw a billion dollars into this thing and start a construc-

tion that will then take on even more of a life of its own until we have established that they have done all the environmental studies, that the whole thing makes sense and that it is going to be economically feasible.

My concerns at first were about the safety because of the explosion. Because of the earthquake faults and the methane gas. But I must tell you I have very deep misgivings about the whole system and whether they ought to go forward at all on the route they have selected in their transportation patterns, whether they are going to have the ridership to justify it.

I want to point out this system they envision is the most expensive subway system in the world. There is nothing that has been built that is as expensive as this one is projected to be. I also want to point out there has never been a subway system in as dangerous an area as they would have us tunnel if they can get these funds to go forward.

We have appropriated money for the first segment; they can continue doing their research on alternative routes; they can continue to look for safer ways and safer alternatives to what they are planning. But this bill would mandate that there must be a contract between the Urban Mass Transit Authority and the Los Angeles people, not after their environmental impact study has been approved, but only after it is filed. Six months later, no matter what the circumstances were, we would have to have a contract already signed. This bill would insist upon it and demand it of the Urban Mass Transit Authority.

I think this is premature to have a contract for the remaining part of this subway and they have not even figured out where they are going. My message to the Members is: Do not spend a billion dollars digging a hole for a subway system where we do not know where it is going, we do not know if it is going to make any sense when it is completed, and we may end up blowing up the workers and the riders in the subway system.

Many of my friends, good friends, in the Los Angeles delegation are going to come here and oppose this amendment because they are committed to it; we have a difference of views. But I do want to point out that this subway system, except for that first segment, which is Congressman ROYBAL'S district, is 90 percent in my congressional district. The people in my district are telling me: "Do not do it. Do not start it." They do not have confidence in the RTD and they do not have confidence in this metro system itself. They do not want to have the communities and neighborhoods disrupted and they are urging me to urge the Members not to start something until we know it makes sense to go forward and finish.

Mr. Chairman, I urge the adoption of this amendment.

Mr. ANDERSON. Mr. Chairman, I rise in strong opposition to the gentleman's amendment.

Mr. Chairman, Los Angeles is the only city of its size in the world that does not have a rail transit system. Yet this city has a demonstrated need for efficient rail transit.

Los Angeles, has an urbanized population of 9.4 million and is the second most populous urban area in the country. Population projections indicate that it will increase by another 2 to 3.5 million people by the year 2000. So, if you take the city of Houston, and set it on top of what we already have in Los Angeles, you'd have an idea of what the Los Angeles area is going to look like in 15 years. And a large proportion of the growing population is composed of elderly people and minority groups who are generally transit dependent.

The Wilshire corridor, where the 18.6 mile metrorail project is to be constructed, is the most densely developed corridor west of New York City in the United States. New York City has over 200 miles of subway to service its densely developed areas. Los Angeles, however, has no rail transit. And future growth in the corridor will increase densities considerably. The 15 to 20 million square feet of commercial development that is scheduled for completion by 1990 alone will bring an additional 120,000 people downtown everyday.

This concentration of population and employment has produced such severe congestion that during peak commuter periods traffic on freeways signed at 55 miles per hour travels at 15 to 25 miles per hour. By the year 2000 these speeds will be reduced to between 5 to 10 miles per hour. Three 8-lane highways would be required to handle the amount of travel that has been projected.

Phenomenal increases in the use of public transportation over the last 10 years reflect a strong demand for transit service and a willingness on the part of people to use public transportation. Annual increases of between 30,000 to 40,000 additional daily riders in recent years have resulted in a total of 200,000 daily transit riders in the Wilshire corridor today.

The Los Angeles Metrorail project provides one part of the only realistic solution to the serious transportation problems in this corridor and the demand that exists for transit service. Once metrorail is constructed 100,000 fewer cars will be required on the streets of the Wilshire corridor. The rail system will provide 275,000 rides a day with a means of transportation.

The Metrorail project has consistently been judged by the administration to be the most cost-effective rail project in the entire Nation. The project meets all the rigorous transportation and financial standards established by administration transit experts. In terms of ridership, local fiscal commitment and private sector participation, the Metrorail is superior to every other project in the country.

The consistent and widespread support that the Los Angeles Metrorail has received over the years, and throughout the continued and detailed scrutiny that it has undergone, cannot and should not be ignored. The Governor of California, George Deukmejian (see attached telegram), supports the project and remains strong in his commitment of $400 million in State funds for it. Senator CRANSTON, Senator WILSON, Mayor Tom Bradley, and most of us in our very diverse congressional delegation enthusiastically support the metrorail.

And the people in the area showed their support by voting for a special one-half cent increase in the county sales tax, a portion of which was dedicated to funding a rail transit system. Even the Reagan administration recognizes the merits of this project. On July 11 the Department of Transportation announced that an agreement had been reached to sign a full funding contract with SCRTD to begin construction of this first segment of metrorail.

Can we ignore the support of so many and well-informed groups and individuals? I urge defeat of the amendment.

Ms. FIEDLER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the gentleman's amendment. As my colleagues will recall, over the past 4 years or so I have been coming to the floor with similar amendments to oppose this project. Initially I was alone; there was no other local public official who supported my position. But the reason that I opposed it was because I had studied the route, I had taken a look at the Department of Interior maps, I had seen the underground oil wells and methane pockets, I had taken a look at the studies regarding the numbers of people that were going to be riding this route and determined along with a number of independent exports who specialize in this field that this project simply should not be built.

□ 1450

Now, initially we are talking about a project that supposedly, for an 18½-mile system, was going to cost $1.1 billion. Even though construction has not even started, over the past few years that estimate has changed radically. Today we are told the first 4 miles will cost $1.1 billion, and who knows what the balance of it is going to cost, because, very frankly, nobody knows where the system is going.

That is part of the reason why the supporters of this system believe they have got to ramrod this thing through. They have got to guarantee that millions of taxpayer dollars are being funneled into this system because they do not know what they are going to actually end up having and whether or not they are actually going to be able to persuade logical Members of the House who have to make decisions based upon Gramm-Rudman in the fiscal reality of today to support it. So they are trying to jam the entire project through, forcing approval of environmental impact reports, because they do not even have any idea of where it is going to go.

There has been some discussion about some of the additional costs that would occur as a result of the safety recommendations of the special investigative study done by a panel of experts which was put together not before the project was approved by the Congress but after the methane gas explosion, which injured 22 people. The question was asked as to what the cost of these construction changes was going to be, and I would like to quote from a colloquy that went on between one of my colleagues, the gentleman from Pennsylvania [Mr. COUGHLIN], in committee and the general manager of the RTD who was responding to a question about what some of these costs may be, and he said this: "The total estimated cost is not more than $5 to $6 million." Now, we are talking about major structural requirements.

He is saying that it is only going to cost $5 to $6 million, and that it could be less than that.

I continue to quote: "The difficulty is we don't know exactly what the cost of some of the construction ones are until we get into it."

In response to that, I talked with one of the experts who served on the panel because that seemed like an extremely low level of expenditure given the enormous challenge since they were going to go from a plastic liner to perhaps a steel liner to try to prevent any penetration of gas while the tunneling and subsequent operation of the subway was taking place.

And he said this: "While we were prohibited by mandate from discussing any questions of subway cost * * *."—they did not have the courage to let the discussion of the actual costs go on in this committee because they knew they would be prohibitive; now, they go on to say, and I quote:

> Our attention was directed to the issue of expense a number of times because of the recognition by individual committee members that our recommendations as well as those of the in house committee would have a substantial impact on the overall cost of the project, if they were implemented in the serious way we contemplated.
>
> It is therefore with some sense of surprise and chagrin that I have been informed that John Dyer, general manager of the SCRTD, testified before your committee that complete implementation of all recommendations would not exceed $6 million.
>
> That figure indicates that either the SCRTD does not take seriously our findings or that they have no intention of implementing these findings in the manner contemplated. The committee findings include several items which could affect the entire project.

In addition to that, the President has consistently opposed this project and recently was quoted on the air saying this:

> Let's face it, there's a ton of fat in this trillion dollar government. I'm talking about government spending over $2 billion for a Los Angeles transit system, about as much as government collects in revenues from all the individual income taxpayers from the State of Mississippi alone.

As far as the route itself is concerned, not only is there not agreement on where they are headed, but in the Los Angeles Times recently, on May 21, they talked about what kind of a route might go from one end of this 4-mile system to the other, and the Times heads a statement in the newspaper: "Favored Metro Rail path most attacked."

The CHAIRMAN pro tempore (Mr. TRAXLER). The time of the gentlewoman from California [Ms. FIEDLER] has expired.

(On request of Mr. WAXMAN, and by unanimous consent, Ms. FIEDLER was allowed to proceed for 3 additional minutes.)

Ms. FIEDLER. Mr. Chairman, in addition to these points, there is the fact that they do not know where they are going, and they do not really know what it is going to cost if they do not know where they are going because they are talking about its being possibly underground for part of the way and possibly above ground for part of the way, and they will find out when they get there.

In addition to that, they have already begun to waste some of our taxpayers' money on this project. I reference another article in the Los Angeles Times this week about the metrorail system. Now, remember, this project has not been finally funded and an agreement has not been made. They are talking about spending a half million dollars alone on art work for the subway system. It seems to me that if they cannot figure out what the cost is going to be for the actual construction and safety requirements that have been suggested by the special technical committee but they can spend their time figuring out how to waste a half million dollars on art work, they are really running in the wrong direction and it would be very unwise of this House to approve this system today without adopting the Waxman amendment, which, I believe, will provide the necessary protections for future approval if the House should deem it necessary.

Mr. WAXMAN. Mr. Chairman, will the gentlewoman yield to me?

Ms. FIEDLER. Yes, I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentlewoman for yielding.

The gentlewoman does speak correctly when she indicates that she alone opposed this Metrorail system several years ago and the rest of us supported it. I am pleased now that she is supporting my amendment, and perhaps she is pleased that I have come to agree with her.

Ms. FIEDLER. Absolutely.

Mr. WAXMAN. We are in agreement that there are serious questions about this whole system, enough so that we ought not to go forward.

We had a technical committee look at the first 4.4 miles. They are ready to start digging for that first 4.4 miles. The technical committee talked about abandoned oil wells. There used to be a lot of oil in the Los Angeles area. They had a lot of oil wells, and the oil was pumped out. They asked what would happen if they would hit an oil well. Well, there would be a potential explosion.

So they said, "Well, they have got to get some sensing devices."

There is no such thing as a sensing device that will alert them until they hit one of those abandoned oil wells. They are going to have to feel their way through, put bells and whistles on all the equipment and hope that they are lucky.

It is a tenet of my liberal faith to be for rapid transit, and I speak to my Democratic colleagues who heard the gentleman from California [Mr. ANDERSON] talk about why Los Angeles needs rapid transit.

We need something desperately. We have congestion, we have too much traffic and we have too much pollution from automobiles, but because we want something does not mean that this is what we ought to vote for and ram through when it does not make sense. We have got to reevaluate it even though the RTD people are not willing to step back and reevaluate their own mistakes.

I just want to point out to my colleagues that there have been times when we have voted for things that did not turn out to be what the most optimistic supporters indicated they should be. We should not repeat the mistakes of other cities.

New York City is just completing a $1 billion subway tunnel that has a leaking roof and no connection points to the subway system. Pittsburgh suffered through many years of embarrassment with a multimillion dollar bridge that went nowhere.

We do not need a tunnel in Los Angeles that is going to explode and is

going to cost more money than we can afford.

The CHAIRMAN pro tempore. The time of the gentlewoman from California [Ms. FIEDLER] has again expired.

(By unanimous consent, Ms. FIEDLER was allowed to proceed for 3 additional minutes.)

Ms. FIEDLER. Mr. Chairman, I would like to respond to a couple of the arguments that were made earlier by the gentleman from California [Mr. ANDERSON]. He talked about this city being the largest city in the entire world without a rapid mass transit system.

If you take a look at some of the projections for this particular project—and remember those projections indicated that they were going to go along a specific 18½-mile route, and we do not have that 18½-mile route any longer—you will see that they expect to have a ridership 25 percent higher than New York City. Now, right now in New York they have about 50 percent of the population using public transportation. In Los Angeles they expect to have now 2½ percent of the population using public transit and an increase of one-half of 1 percent as a result of this subway system. So they are not going to take masses of people off the road, even if every single person they project rides on the system, so I believe that the estimates are grossly inaccurate.

As far as the support of the Governor is concerned, we received in our office just today a letter from the Governor talking about this bill, and it listed about 4 provisions of this bill that the Governor thought were important. However, there was no mention whatsoever of the subway in this particular memorandum which just came in today dealing with this particular bill, which I think shows that there is not the kind of enthusiastic support from the State leadership that they are trying to project.

Mr. DREIER of California. Mr. Chairman, will the gentlewoman yield?

Ms. FIEDLER. Yes, I am happy to yield to the gentleman from California.

Mr. DREIER of California. Mr. Chairman, I just wanted to ask the gentlewoman if she believes that because the Governor did not have the subject mentioned in that interoffice memorandum, he is no longer supporting the system?

Ms. FIEDLER. No; I do not mean to say that he is no longer supporting it, but I do recall that there was an article in the Daily News which indicated that he did have some questions about the economic aspects of it.

□ 1500

I know from the beginning he has not been overly enthusiastic because of the economic implications. I am not trying to speak for him. I am simply mentioning the fact in a memorandum sent to us today on this particular bill that they do not deem the Metrorail system to be sufficiently important to them from that standpoint.

Mr. DREIER of California. Was this a memorandum that he distributed?

Ms. FIEDLER. No; this was sent by Karen Spencer. Her father is one of the lobbyists on the Metrorail, so it was rather unusual that it was not mentioned, given the amount of efforts that her family had put into it, but she is representing the administration's concern at the gubernatorial level and it was not mentioned in this memo.

Mr. ANDERSON. Mr. Chairman, will the gentlelady yield?

Ms. FIEDLER. I am happy to yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, the gentlelady earlier asked me to yield about the Governor's office. The Governor's office today, contacted us and reassured us that they fully support this project. That is just today from the Governor's office.

Ms. FIEDLER. Well, I am glad the gentleman received that communication from the Governor's office, because I, too, had communication with an important office, that of the OMB and spoke to the director, Mr. Miller, on the issue, and they continue to strongly oppose it, as the administration has consistently, in spite of the fact that they have been pushed by the House committees to come to an agreement based upon the legislative effort of the Congress.

The CHAIRMAN. The time of the gentlewoman from California has again expired.

(At the request of Mr. WAXMAN, and by unanimous consent, Ms. FIEDLER was allowed to proceed for 3 additional minutes.)

Mr. WAXMAN. Will the gentlewoman yield?

Ms. FIEDLER. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I just want to point out that while my Democratic friend, the gentleman from California [Mr. ANDERSON] appeals to the position of Republican Governor Deukmejian, I will appeal on the basis of the statement of the President of the United States when he singled this program out as one of the biggest wastes of money that he could imagine, and in one of his radio addresses condemned the whole idea of the L.A. Metrorail system.

Look, many people supported this thing, as did I, and locked themselves into it, and they are not in a position to reevaluate it.

I would be here supporting it, except for the fact that through a real explosion I started to pay attention to the matter to look at some of the details and the more I looked at some of these details, the more I am convinced that you cannot write a blank check for the RTD people in Los Angeles and tell them to go forward, here is $1 billion, add some more to it, get started. I think that is a naive way for us to proceed.

I have lost confidence in this and I urge you if you have any doubts to hold back on funding this thing until we find out and we can decide whether the whole thing makes sense for us to fund in the future.

Mr. DIXON. Mr. Chairman, will the gentlewoman yield?

Ms. FIEDLER. I am happy to yield to my colleague, the gentleman from California.

Mr. DIXON. Mr. Chairman, I was not really clear whether the memo the gentlewoman mentioned is from the Governor or is an internal memo of the office and is the opinion of some of the Governor's staff. I wonder if the gentlewoman could clarify that.

Ms. FIEDLER. No; I said very specifically that it was a memo from Karen Spencer to the California delegation.

Mr. DIXON. To the gentlewoman's knowledge, does she know if the Governor has a position on this matter?

Ms. FIEDLER. Well, I would not imagine that his staff would be taking a position on specific issues; without his authority. I do not know if he is aware of it.

Mr. DIXON. Mr. Chairman, will the gentlewoman yield further?

Miss. FIEDLER. Not at this moment, I would like to respond to the gentleman.

Mr. DIXON. The gentlewoman does not know whether the Governor has a position on this or not?

Miss. FIEDLER. No; I do understand that the Governor does have a position in support of the project, but the point that I was making, is not that he did not support it, the point I was making was that he did not deem it sufficiently important, nor did his staff deem it sufficiently important, to mention it as one or four important areas in this bill to support.

Mr. ROYBAL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to assure the Members of the House that no one wants to force this project through. I have heard that statement made several times. No one wants to force this project through because we want the project to continue because of the great need we find in Los Angeles and the surrounding areas.

We also want to make it clear that no one wants to proceed with a project that is not safe. That is as clear as it possibly can be.

The truth of the matter is just yesterday a letter was received by the gentleman from California [Mr. WAXMAN] and others that says in part:

Certainly the studies conducted in response to the March 1985, explosion and fire in the Wilshire-Fairfax area provide new information pertinent to the project. While this information prompted our careful review or reevaluation of the environmental record, it is not so significant that would find it necessary to invoke the more formal procedures associated with the filing of a supplemental EIS.

Now, let us say that is not correct. Let us go along with the request that the gentleman from California [Mr. WAXMAN] is making, but there is no need to go to the point where we delete all the funds for this project.

The truth of the matter is that the moneys that are now available for the construction of MOS-1 are moneys that will be spent for a project that is all in my district, not in the district of the gentleman from California [Mr. WAXMAN] or anyone else's district. All of that is in the district that I represent.

Now, if after that is done they do not want it to go west, I will support that contention. I will present to this House later on an amendment that will definitely, if it does pass, make it possible for a survey to be made to find out whether or not it is practical to extend this program to the east. In the eastern section of the city, we find a tremendous population that is unserved by mass transportation or any transportation at all practically, a group of people who come into the city of Los Angeles almost on a daily basis, who drive from 40 to 50 miles a day, that would need something like this. That I will do, but to strike out these funds I believe is irresponsible.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield to me?

Mr. ROYBAL. I yield to my colleague, the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I thank the gentleman for yielding.

The first segment is 4.4 miles. The whole system is supposed to be 18 miles. After the first 4.4 miles, which is in the district of the gentleman from California [Mr. ROYBAL], the present plan is to have it all go through my district for the remainder.

Now, the gentleman from California [Mr. ROYBAL] indicated that he is going to offer an amendment in a few minutes, after this one is disposed of, that would have them do a feasibility study by going east. Now, I am going to support that amendment, because one of the reasons we need rapid transit in Los Angeles is to get some of the people from the minority communities to work; but this whole system is not going through some of the communities that need the transportation the most.

I do not know whether it makes sense or not, but we ought to look at it.

The point I would make is this. We may not have anything more than a 4.4-mile subway system, at the cost of millions of dollars, and someone will pull to the east and someone else will pull to the west and we may decide to do nothing. Well, that is a tremendous waste of money to do that without knowing where the rest of it is going. If we decide to go east, that will be the decision. Then we will go with the money and then fund the whole system.

Mr. ROYBAL. The gentleman is drawing a conclusion that is not based on fact and is not based on study. The gentleman is asking for a study to the west and then deleting the money, regardless of which way that study goes.

Now, if that money is kept in place and a study is made, then whatever decision is made would be made on fact, not on fantasy. What I hear today are just merely opinions of individuals who have been against this project, no matter how good it was.

We need that project, I say to the gentleman from California [Mr. WAXMAN] in Los Angeles. The gentleman himself said that the city of Los Angeles needs transportation. Let us give it a chance. Let us leave the money in there and let us have an opportunity to get the survey the gentleman wants and have it done and then reach a conclusion.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. WAXMAN, and by unanimous consent, Mr. ROYBAL was allowed to proceed for 1 additional minute.)

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I think we need a rapid transit system in Los Angeles. I once supported this system until I saw that there are so many problems inherent in terms of safety, feasibility, and whether it makes financial sense to go forward with it.

Mr. ROYBAL. That is on the gentleman's side of the town.

Mr. WAXMAN. But let us not spend money on something until we know that there is going to be a whole system there. The gentleman would have us go to the east. It may make sense, it may not. The RTD people want it to go to the west.

Do we want to dig a hole and spend a billion dollars doing it, while we in Los Angeles decide whether we are going to have a rapid transit system or not and decide whether it is going to go east or west? It seems to me we should wait until we decide that and then spend the money on the system.

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. Mr. Chairman, I will not yield at this moment, because I think this deserves a response.

What the gentleman is saying again, sticking to his original premise, that what the gentleman wants is to delete the funds and then make a decision.

I say to the gentleman that the prudent and the smart thing to do is to leave the money in there, conduct those plans and studies and then make a recommendation and a finding based on those studies. I think that is the proper thing to do, and I urge my colleagues to vote against this amendment.

The CHAIRMAN. The time of the gentleman from California has again expired.

(At the request of Ms. FIEDLER, and by unanimous consent, Mr. ROYBAL was allowed to proceed for 1 additional minute.)

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Chairman, the gentleman read initially a letter which had been sent to my colleague and myself regarding the environmental impact study and said that there was not much relevance, given what was stated; but the truth is that from the time the explosion took place, Congressman WAXMAN held hearings regarding it. The concern was so great that they went from a fixed 18.6-mile route to a 4.4-mile route and they do not know where the balance of it is going, so the concern was rather great.

I would like to say also that I think the gentleman is right to ask for a study. The east Los Angeles area as well as other areas of the city have a very high level of need. In fact, I believe a need which is well in excess of the Wilshire quarter and ought to be first or second, rather than last, which is what is going to happen when this money has funneled down Wilshire Boulevard. It is not going to end up in east LA or in the south-central part where there is the largest group of population that needs transit the most.

Mr. ROYBAL. Mr. Chairman, I would suggest to the gentlewoman the thing to do is not to throw out the baby with the bath water, but let it live and breathe. Let us find out whether it has a future.

I do not know whether the route to the east side is feasible, I really do not. It may not be. Let us get a study and base our conclusion on that study.

The CHAIRMAN. The time of the gentleman from California has again expired.

(At the request of Mr. DREIER of California, and by unanimous consent, Mr. ROYBAL was allowed to proceed for 3 additional minutes.)

Ms. FIEDLER. Mr. Chairman, with the gentleman yield?

Mr. ROYBAL. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Chairman, just for a final closing comment, you will find I believe as you investigate the possibility of a route into east Los Angeles that there are a large number of above-ground lines in place and that for a relatively small amount of money, comparatively, and I have been told the estimates are about $8 million a mile, that it is feasible to take a route of that kind. To drain very important public transit resources on a $300-million-a-mile system is going to take away the resources that could reach a broad segment of the community, instead of funneling it into a very narrow segment with a very tiny population to be served. That is one of the reasons I opposed this project, and also would expect to support the amendment of the gentleman from California [Mr. ROYBAL] when the time comes.

Mr. DREIER of California. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from California.

Mr. DREIER of California. Mr. Chairman, I thank my friend for yielding.

I think it is important for us to realize that there is no possibility whatsoever that this could only become a 4.4-mile system. The fact of the matter is that there are tremendous packages along the New Century Freeway and other areas where light rail is being installed and it is an integral part of this whole overall package. So some who fear that it might become only a 4.4-mile system, I believe are wrong because of local funding which has continued to proceed.

Mr. ROYBAL. Mr. Chairman, just again in conclusion, my position is not set in concrete. I do not say that the only way to go is east. What I say is that a study should be made that would include the study that the gentleman from California [Mr. WAXMAN] wants and that a determination be made on those studies.

It could well be that the study will indicate that it is feasible to go both ways, but I do not know. I am not an engineer and I am not an expert in this field at all; however, there are people who are experts who can conduct these studies. We in the Congress who are not experts I think can go along with those experts who make these recommendations.

What I am asking today is that we just do not throw out the entire project simply because we have some misconceived idea that it is no good and that it cannot go any place, but let us do it right, let us do what we can to accommodate the gentleman from California [Mr. WAXMAN], as far as his study is concerned.

Let us do the same thing so far as my recommendations and let us come up with a recommendation, but let us not delete the money that is being deleted by this amendment.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield to me?

Mr. ROYBAL. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I do want the Members to know that this amendment provides for environmental impact studies to go on. We would have funds still available for them to do these other activities, to see where they want to go. We are not deleting the funds for that. We are deleting funds for them to start until we know where it is going.

I appreciate the genuine differences that I have with my good friend.

Mr. ROYBAL. Mr. Chairman, what the gentleman is doing is deleting all the funds for my district.

Mr. WAXMAN. And the rest of the program as well.

Mr. ROYBAL. No, only my district.

Mr. WAXMAN. No, all of it. The gentleman has already admitted, this is the rest of the bill.

□ 1515

Mr. DIXON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it is certainly with great reluctance that I rise in opposition to this amendment, primarily because the gentleman from California, Mr. HENRY WAXMAN, and I have joined a long time ago in political alliances, and in a close friendship. I served with him not only in the Congress but in the State legislature.

But HENRY WAXMAN is wrong on this issue, and he is wrong on this issue because he keeps repeating the same thing to himself, "It is unsafe," and he refuses to acknowledge any expertise in this matter that says that it is safe. That is the reason that he is wrong.

Let me review what happened last year. Some statements have been made here on the floor that we do not know where it is going. We know where it is going. It is going from downtown Los Angeles to the valley. But there is a gap at the present time, and that is called MOS-2. That gap was brought about by an agreement between JULIAN DIXON and HENRY WAXMAN. What did we do? We acted reasonably. Despite the preponderance of the expert testimony that it was reasonably safe—reasonably safe—to drill through the high-potential area, we said, "HENRY WAXMAN, you have a point. We'll take it out of that area," and we are now investigating three or four alternatives.

We said, "We'll go one further, HENRY WAXMAN. We'll appoint another technical committee. After the State OSHA looked at this, after RTD experts have looked at it, we'll go you one better. We'll appoint a technical committee."

We said, "We'll do better than that. This will be a committee appointed by the transportation chairman of the city council. We'll allow you two experts. Name your two experts."

HENRY WAXMAN named them. Yes, they came back with some recommendations, 12 in nature. About seven of those had already been addressed, but it is always best to dot the "i" and cross the "t" twice. The city council took a look at the recommendation.

What was the recommendation? The recommendation was, "Follow these safety guidelines, and it's safe to build."

So the State of California has looked at it, RTD has looked at it, a number of people have looked at it.

What did Mr. WAXMAN do next?

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I will yield to the gentleman after I make my entire statement. I will ask for unanimous consent and I will yield to him at that point.

What did Mr. WAXMAN do next? As Mr. ROYBAL says, he wrote and talked to the U.S. Department of Transportation, the Urban Mass Transportation Agency. On August 5, once again he received a letter. Let me read part of it:

> In our reevaluation we had the opportunity to consider the expert opinions of two independent panels who examined the safety aspects of this project. As you know—

Meaning Mr. WAXMAN—

> these reviews involve both the areas of concern which you noted in your letter and your earlier comments on the environmental documents. It is accurate to say that both panels found ways to improve the project but that they felt the project could be constructed and operated safely if the recommended precautionary measures were followed.

Now what does Mr. WAXMAN say in his "Dear Colleague"? He says that there are uncharted, abandoned oil wells. I assume that he is referring to MOS-1.

There are no uncharted abandoned oil wells in Mr. ROYBAL's district as it relates to the course of MOS-1. There is not one demographic map that shows any of them in that spot. Even if there were——

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I explained to the gentleman when I would yield. Then I will be glad to yield to him. I am going to ask unanimous consent for additional time, and at that point in time I will yield to him.

Even if there were abandoned oil wells that we are unaware of that are not on any maps, we now have the technology to discover them before we get to them.

He talks about methane gas.

The CHAIRMAN pro tempore (Mr. TRAXLER). The time of the gentleman

from California [Mr. DIXON] has expired.

(On request of Mr. DREIER of California and by unanimous consent, Mr. DIXON was allowed to proceed for 5 additional minutes.)

Mr. DIXON. He relates his concern—and a justifiable one—for an explosion that occurred in his district, and there was an explosion at a Ross Dress for Less store. But I submit that the explosion had nothing to do with the building of a subway. The explosion did have something to do with methane gas. In the foundation of that building was a gas leak. It exploded because there was no ventilation to allow the pressure to be removed. It was a lack of knowledge that the gas was leaking and there was no ventilation to allow it to escape.

It is like seeing a major accident at an intersection and saying that the intersection is unsafe. That explosion had nothing to do with technology that is available to tunnel.

The city council of Los Angeles, and in particular the same area that Mr. WAXMAN represents, the city councilman who represents that area supports this. I dare say a large number of the California delegation support it, the State legislature supports it, the mayor supports it, and the Governor supports it.

We have bent over three times to give Mr. WAXMAN every consideration on the safety issue, but Mr. WAXMAN does not want to believe any expert except his own. That is his right, but certainly we should move forward on this project.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I am glad to yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding to me.

Mr. Chairman, I do want to confirm the fact that we have been friends for many years, and I hope that we will continue to be for many years more. We have a difference of opinion on this question, which grieves me, because we have so few differences of opinion in most of the day-to-day activities before the Congress and back home in Los Angeles.

The report of the technical people who looked at this thing said, "This is a dangerous project, but we think that we can minimize the danger," and they gave 12 recommendations for the first segment to minimize the danger. That minimization is based on bells and whistles with the expectation that people will be alerted to a likely explosion, hopefully before it takes place.

There is a fellow named Wagner, who was not one of my appointees to this technical committee, who talked about the place being filled with abandoned oil wells, oil gas fields. And he said, "If you hit that metal pipe with your boring equipment, I'll guarantee you'll have a big fire down there."

I have seen gas pipes struck by construction equipment a number of times, and it starts right off. It is a point of considerable concern to me.

These people expressed their concern. We were told a year ago by Mr. DIXON, "This is the most studied project ever in terms of safety," and then we had a technical committee come up with 12 major recommendations to minimize the dangers that those people that had studied it never saw before.

One of the members of the technical committee wrote a letter to the Los Angeles Times. Unfortunately it has not yet been printed. But he talked about the tragic *Challenger* flight and compared this subway system to that.

We think in terms of progress, sending people into space, tunneling through the Earth for mass transit systems. But let us also think about the potential risks, and let us minimize those risks and minimize the expenditure of money wastefully by making sure that the project is sound.

That is all that I ask, that we make sure that this is sound in all ways before we start throwing money into it.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I yield to the gentleman from California.

Mr. ANDERSON. I thank the gentleman for yielding.

Mr. Chairman, I just want to follow up on a remark that the gentleman made a while ago about abandoned oil well casings and MOS-1. I wanted to expand on it a little bit.

It is my understanding that there is no direct evidence of any abandoned oil well casings to be encountered in the MOS-1 portion of the Metrorail project. This conclusion results from a review of all available records, including photographs of the affected area from earliest times available.

The CHAIRMAN pro tempore. The time of the gentleman from California [Mr. DIXON] has again expired.

(By unanimous consent, Mr. DIXON was allowed to proceed for 3 additional minutes.)

Mr. ANDERSON. Mr. Chairman, will the gentleman yield further?

Mr. DIXON. I yield to the gentleman from California.

Mr. ANDERSON. Nonetheless, recognizing that there could be an undetermined oil well casing in MOS-1 or elsewhere along the alignment, it has been considered prudent to provide for the unexpected. To this end, SCRTD has been studying oil well casing location techniques since 1984. More recently, SCRTD has become knowledgeable of the state-of-the-art in oil fields for locating oil well casings. These techniques have been reviewed in detail and, as a result, a similar procedure was developed to be used in the L.A. Metrorail tunnel construction.

The applied technique will require all tunnel contractors to use a magnetometer survey in advance of tunneling operations. A bored hole will be placed in advance of tunnel excavation and magnetometer readings maintained a minimum of 50 feet in front of the tunnel face to ascertain any anomalies indicating metal. The contractor will be required to mine by hand from a point 5 feet before and until 5 feet after the indicated location of the anomaly, thereby preventing the unexpected penetration of an oil well casing by a tunneling machine. Any casing could then be safely removed and tunneling would resume.

□ 1525

They have taken every precaution and they are studying this further. I think it is probably the most studied, one of the best, and will be the most safely constructed project in the country.

Mr. DIXON. I would agree.

Let me just make two points.

Whatever the gentleman from California [Mr. WAXMAN] says about the technical committee, it is a fact that all of them signed the report saying that it would be safe if, in fact, these 12 issues were addressed. RTD addressed some of these issues.

I just want to point to the kind of emotion that the gentleman from California [Mr. WAXMAN] uses in this. He talks about whistles and alarms or bells, as he calls them. I am sure that there is nothing in there that says that they are going to use whistles or bells to detect methane, but only that once it is detected by more sophisticated equipment, whistles or bells may be used to send an alarm.

Finally, the gentleman from California [Mr. ROYBAL] has handed me a note that he just received from his staff at 3:18 that the Governor's office called and said the Governor is in full support of what you are doing and wanted you to know that.

Ladies and gentleman of this House, I am saying that in this rare instance, the gentleman from California [Mr. WAXMAN] is not going to be satisfied with any safety reports by any experts except his own. We have given consideration in every form to reasonable requests of the gentleman. It is time for us to move on, on this issue.

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Chairman, I thank the gentleman for yielding.

Previously the gentleman made the comment that there were no oil wells running through the middle of that area. I asked my staff to bring back to the floor a map which I had brought

to the floor on a previous debate which in yellow marks the route, in black marks all of the underground oil wells which have been specifically charted which they know about.

But I would like to make a comment in addition to that from the technical review committee report. It says in the first item:

A rush of methane gas at higher pressures than found during the Ross explosion could be encountered during construction if an abandoned oil well is struck. Neither Metro rail nor Cal-OSHA has adequately planned for drilling into abandoned oil wells along the tunnel path. According to panel members such an event has a high probability of occurring because of the unusual number of unchartered oil wells in the area.

I thank my colleague for yielding.

The CHAIRMAN pro tempore. (Mr. COLEMAN of Texas). The time of the gentleman from California [Mr. DIXON] has again expired.

(By unanimous consent, Mr. DIXON was allowed to proceed for 3 additional minutes.)

Mr. DIXON. Mr. Chairman, I would like to respond to the gentlewoman from California [Ms. FIEDLER]. This is the kind of expertise that I am talking about. The gentlewoman brings a map onto this floor as if we are experts. The expert reports say that there are no oil wells in MOS-1's path.

As it relates to methane gas, certainly a rush of gas like that in Ross Dress for Less Stores could be a danger, and that is if it is not mitigated. This is 1986. We know there is gas there. We have the technology to mitigate that gas. So there is no question that if that gas went unmitigated, it would cause tremendous damage. We know the gas is there. We know how to correct it, or at least the scientists do, and that is the reason it is safe.

However, we are not going into that area. That was the agreement between the gentleman from California [Mr. WAXMAN] and myself.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I will be happy to yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I just must say the gentleman is incorrect in his statement.

The head of the Office of Occupational safety and Health for the State of California, Mr. Byron Iskanian was asked about this tunneling, and he was asked in the first segment: "Do you expect to hit gas oils, oil wells?"

He replied, "Yes, I think we probably will. Mr. Waggoner addressed the cutting head that's rotating—you are not going to get much warning. I don't know what we will do about that."

All of the members of the Commission signed the report, but two members indicated that they were objecting to the general conclusion of the report dealing with the project feasibility in any wording that appeared to give the project an overall stamp of approval from the committee.

The best we can say is that this thing now that has been restudied is still unsafe, and my first concern was when I read what the Metrorail's own engineers said. They said it is unsafe. They thought they could mitigate some of the damage. They thought they could handle, it, but they did not look at the alternatives.

Let us make them look at the alternatives. Why should we be committed to something that is not something minor or trivial, but an explosion that could kill people? Why do we have to go forward with that?

I beg you, let us not close our eyes to the fact that there is genuine danger.

Mr. DIXON. Mr. Chairman, first the gentleman started talking about it was unsafe. He has not proved that. Now he is talking about going to alternatives.

We have given the gentleman every reasonable doubt and more. It is time for us to move on.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment, which would prohibit the Secretary of Transportation from entering into any contract with the Southern California Rapid Transit District until a supplemental EIS is completed.

In last year's continuing resolution, the Congress approved and the President signed into law language directing the Secretary to negotiate a full-funding agreement for the initial minimum operable segment of the Metrorail project. In response to that directive, negotiations were held, and on July 11, Secretary Dole announced that agreement had been reached to proceed with Metrorail construction. Groundbreaking for the project is scheduled for this fall.

Mr. Chairman, this is one of the most cost-beneficial of the various new start transit projects currently under consideration. Approximately 45 percent of Metrorail's cost will come from non-Federal sources—a clear demonstration of the local support for this project.

In 1980, Los Angeles County taxpayers approved a sales tax increase to help fund the Metrorail project. And California Gov. George Deukmejian has pledged $400 million in State funds toward the completion of this vital transportation link.

Mr. Chairman, this project will allow Los Angeles to begin to address the intolerable traffic congestion and poor air quality that have become common in that city. Clearly when a problem has become so serious that it is the constant subject of comment in Johnny Carson's nightly monolog, something needs to be done.

This project has a long history of widespread, bipartisan support from this House. The various safety issues that were raised by the gentleman from California [Mr. WAXMAN] during last year's debate on the transportation appropriation bill, are being addressed by the blue ribbon study panel. Further delays, of the type contemplated by this amendment, would only serve to increase the ultimate cost of completing this project.

Mr. Chairman, I urge the defeat of this amendment.

□ 1535

Mr. DREIER of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. I think it is important for us to look at the history of this entire issue. Over the past several years, the nearly 6 since I have been here, we have consistently, on the floor of the House of Representatives, been debating this issue.

To me, I am sure many of our colleagues are tired of the continued discussion about the Los Angeles Metro rail. I have to tell you that when I first went to California to go to college, and that was nearly 15 years ago, we had talk about how we were going to address the problem of turning the corner on the transportation crisis that we faced.

Here we are today, 15 years later, still debating that question. I am not one who has consistently believed that every commission that looks into safety questions should be trusted. In fact, there are many examples of that in my district, where I have challenged many so-called authorities on the issue of toxic waste disposal and other items.

There is no doubt in my mind whatsoever that this issue has been discussed and discussed and discussed and studied and studied and studied and, as we have seen, our Governor calling the Democratic cloakroom, there is true bipartisan support for this issue. Now, the Governor is welcome to call us in the Republican cloakroom at any time, too, I would be happy to say, and his name is George Deukmejian.

Mr. Chairman, I also think it is important for us to realize, again, as has been said, this is the most cost-effective use of Federal taxpayer dollars. Fully 45 percent, twice the required amount, happens to be coming from non-Federal sources.

We have discussed this issue. I happen to believe that the air pollution problem which exists in my part of Los Angeles County can be benefited if we begin to get people into this kind of mass transit. It is the only game in town. We are having our taxpayers in California pay a disproportionate share into that highway commission trust fund because we certain-

ly consume a great deal of gasoline in Los Angeles.

So for that reason, this is what we are working on. UMTA has said this project has undergone a more thorough environmental review than any previous project receiving UMTA funds. We have gone back and forth.

There are certainly 12 issues which have been raised, I think. There will continue to be some questions, but that does not mean that we should not proceed; and we have voted on this continually in the House of Representatives and in the other body, and I am convinced that we will be able to defeat the amendment; and I urge my colleagues to join with us in doing just that.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent to address the Committee for 3 minutes.

The CHAIRMAN pro tempore. Without objection, the gentleman is recognized for 3 minutes.

There was no objection.

Mr. ANDERSON. Mr. Chairman, I asked for this time because I wanted to discuss the question of safety. In dicussing Metrorail's design and construction, I think it is important to note that the subway tunnels we are talking about, will be constructed in relatively short segments.

These tunnels will then connect previously constructed, open station excavations, ranging from 600 to 1,000 feet in length; and similar open excavations that may be dug for construction access. So it is not one long tunnel; it is a series of tunnels.

The construction techniques employed for these open cut excavations would be similar to the construction required for office buildings basements in this area. Remember, there are office building with basements dug into these same areas.

The open excavations will allow the construction managers, the technical engineering and regulatory persons and other experts to examine the ground in the area prior to the start of the tunnel construction, and to identify any gas concentrations at the depth of the tunnels.

The open excavations would also allow for the gas in the surrounding area to vent naturally, thus reducing the potential hazard of fire or explosion.

Mr. Chairman, there is every indication that with the information already known by the SCRDT and its engineers, plus the elaborate mitigation measures to be taken by the district, the project will be built safely. Some of these mitigation measures will include: First, installing probes to measure the gas in the field; second, providing concrete or steel lining for the tunnels; third, providing a membrane or coating to back up the concrete lining; fourth, providing ventilation to dilute and exhaust residual gas; and fifth, providing sensors to monitor gas concentrations in the tunnels.

The concentration in Metrorail tunnels and other underground facilities will involve no unprecedented hazards for either the general public or those engaged in its construction.

Mr. Chairman, I want to read from a letter written just 2 days ago by UMTA, the administration's transit agency. They said:

"In summary this project"—referring to the one we are talking about there today—"this project has undergone a more thorough environmental review than any previous project receiving UMTA funds."

Mr. DREIER of California. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman.

Mr. DREIER of California. Mr. Chairman, I would like to ask the gentleman from California a question and reaffirm a point that I think he made.

Is the gentleman saying that actually tunneling is going to release the gas which otherwise might explode?

Mr. ANDERSON. Well, there is no question that open excavations will allow natural ventings and we will have precautions and practices in this tunneling where there will be all kinds of sensors to detect latent dangers so if anything comes up even to I think it is one twentieth of the amount where it might explode——

Mr. DREIER of California. So it actually releases——

The CHAIRMAN. The time of the gentleman from California [Mr. ANDERSON] has expired.

Mr. SNYDER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. SNYDER. Mr. Chairman, it seems to me the great California debate has gone on for quite some time here. I think that most of us have enjoyed about all of it that we can stand. Therefore, I ask unanimous consent to conclude the debate on this amendment and all amendments thereto in 10 minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Kentucky?

Ms. FIEDLER. Mr. Chairman, I object.

I will accept 20 minutes.

Mr. SNYDER. I will take whatever I can get. How about 15 minutes?

Ms. FIEDLER. All right.

Mr. SNYDER. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto conclude in 15 minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. SNYDER. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from California. [Mr. WAXMAN] That amendment would prevent the timely completion of a vitally needed transit system for the greater Los Angeles area.

I understand that the gentleman from California [Mr. WAXMAN] may be reacting to some concerns of his constitutents regarding safety. They are, I understand, particularly concerned about methane gas explosions during construction and potential earthquakes after the Metrorail is in operation. It is also my understanding that these concerns may be unwarranted.

The engineers who have been engaged in the design of the Metrorail system have thoroughly investigated both potential problems.

With respect to earthquakes, engineers have examined geologic formations to determine the best design of the system. Underground structures such as subway tunnels are among the safest in an earthquake situation. It is interesting to note that during the recent Mexico City earthquake the subway shut down briefly, but only because the electrical power went off. The tunnels and stations sustained no serious damage from the quake.

The engineers also conducted a survey of available records on oil wells to ensure that the Metrorail construction will not intrude into abandoned oil wells and perhaps cause a catastrophic explosion. Furthermore, they have become knowledgeable in state-of-the-art techniques in oil fields for locating oil well casings. They have developed similar techniques to be used in the L.A. Metrorail construction. These techniques should effectively ensure that unexpected penetration of an oil well casing by a tunneling machine is avoided.

The voters of L.A. County have endorsed this project and, therefore, I urge my collagues to reject this amendment which would effectively prevent construction from proceeding on this necessary mass transit system.

The CHAIRMAN pro tempore. The Chair desires to advise the Members that the Chair intends to divide the time between the gentleman from California [Mr. WAXMAN] for 7½ minutes, and the gentleman from California [Mr. ANDERSON], the chairman of the subcommittee for 7½ minutes.

The Chair now recognizes the author of the amendment, the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Chairman, I yield myself 3½ minutes.

Mr. Chairman, I think we have heard a lot about this debate already. I just want to conclude with some things that I think are pertinent. We have been told that this is the most studied project ever; and yet when they are under greater scrutiny, they come up with 12 major problems they have never even thought about.

I think there is serious danger in construction of this subway system, and let me just give you one example: You do not have to be an expert to evaluate this.

One of the ways they want to deal with methane gas is to have the cars speeding through, and that will dissipate the accumulation of the methane gas.

Now, furthermore, there are objections to this whole system. We have an Office of Management and Budget evaluation of the cost of this system, and they talk about ridership projections overstated by at least 30 to 50 percent; costs are excessive and likely understated.

Let me point out to my friend, the gentleman from Massachusetts [Mr. CONTE], if those costs are excessive and likely understated, it is my taxpayers who are going to pay for it, and they do not want to pay for something that does not add up to a real subway system that is going to be effective for them.

I do not know whether these figures are correct or not; or these conclusions, but I must tell you: They say the demand for Federal funding is excessive, and they have other negative features of the Los Angeles proposal.

From a transportation point of view, from a safety point of view, from a cost point of view, let us hold off before we start digging a hole to find out if the system makes sense.

Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania [Mr. COUGHLIN].

□ 1545

Mr. COUGHLIN. Mr. Chairman, as the ranking member of the Transportation Appropriations Subcommittee, I certainly have been a strong supporter over the years of mass transportation. I support that for California, and I support it for Los Angeles. But I must say that over the years I have had very serious reservations about this project. Much has been said here about safety but let me just come back to cost-effectiveness for just one moment. Listen to this: these are figures from a couple of years back. Los Angeles has approximately 6,073 persons per square mile. With 6,073 persons per square mile, they project ridership of 15,278 riders per day.

In Washington, DC, with our Metro, we have 12,000 people per square mile, almost twice as many people per square mile as Los Angeles, and yet we only get 9,700 riders per day per mile. So Los Angeles is saying with half the number of people per square mile they are going to get almost twice the ridership per mile. That just is fantasy. That is absolute fantasy. We are taking money that Los Angeles could well use in other areas and putting it into something that is not going to work, it is not going to work.

The gentlewoman from California has for some time and again today called attention to the fact that the ridership projection for this project would call for a higher ridership than in New York City itself with a population density of 70,000 people per square mile. It is saying that Los Angeles, with a population of 6,000 people per square mile, would have a higher ridership on this project than New York City, with 70,000 people per square mile. It defies belief, it defies credibility; it would be a waste of taxpayers money not just in California, not just in Los Angeles but all across the United States.

I support the many new starts in the number of projects that come before us in the Transportation Appropriations Subcommittee. I support the funding for Los Angeles and funding for other cities. But this project is not a good project. On a straight cost basis Los Angeles can take this kind of money and spend it much more efficiently, much better in other forms of transportation.

Mr. ANDERSON. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania [Mr. SHUSTER].

Mr. SHUSTER. I thank the chairman.

Mr. Chairman, I started out with reservations about this project. I have no ax to grind other than my interest in sound transportation, but our committee has looked into this carefully, and we have been very much impressed with two things: first of all, that the safety investigations have been exhausted, and that they have been independent. I am persuaded that indeed, this can be built safely.

Second, I have been very much impressed with the broad range of support in California for this project, ranging from the people voting in favor of a tax to the Los Angeles City Council, to the mayor, to the Governor of the State, to both Senators and to a majority of the Members of Congress from the area.

So looking at the tremendous support and looking at what I believe are satisfactory answers to safety, I have come to the conclusion that we should support this project particularly when the Secretary of Transportation, Elizabeth Dole, announced that the administration has reached agreement on a full-funding contract for the first phase of metrorail.

Mr. ANDERSON. Mr. Chairman, I yield 1 minute to the gentleman from California [Mr. DREIER].

Mr. DREIER of California. I thank the gentleman for yielding.

Mr. Chairman, we are coming to the close here. I hope very much we will not have to consider this issue on the floor of the Congress any longer after today's debate, Mr. Chairman.

But I think it is important for us to reaffirm a few items which have come out. My friend from California, Mr. DIXON, talked about the fact that Mr. WAXMAN's concerns have been addressed over and over and over again. And I think the best thing for us to realize is the statement made by the Urban Mass Transit Agency that has been said here before: this project has undergone a more thorough environmental review than any previous project receiving UMTA funds. And there are a great many projects which have received UMTA funds which are incredibly safe.

So I can only infer from that that the safety of this, because of this letter, because of the exhaustive studies that they have done, would be greater than any system presently receiving UMTA funds. I think we should proceed with this project as expeditiously as possible, and I urge my colleagues to oppose the amendment.

Mr. ANDERSON. I yield myself such time as I may consume.

Mr. Chairman, a moment ago there was a question raised about the cost-effectiveness of this project. I wanted to answer that. UMTA studies, now these are not my studies or JULIAN DIXON's studies, this is UMTA's study, they say this is the single most cost-effective proposed subway in the country. And now if this project is not funded, the money will be spent, according to the administration, obviously then on less cost-effective projects. It is a waste of money if we do not fund this project unless we want to waste taxpayers money. I oppose the gentleman's amendment.

Mr. WAXMAN. Mr. Chairman, I yield the balance of my time to the gentlewoman from California [Ms. FIEDLER].

Ms. FIEDLER. I thank the gentleman very much.

Mr. Chairman, there have been a number of statements made here today about the cost effectiveness of this project. When my colleagues reference the cost effectiveness of the project, they are talking about what was to be a 18.6-mile system. We are not talking about the same system today. Today we are talking about a 4.4-mile system that does not have the ridership that is projected for the 18.5-mile system and therefore those comments previously made by the administration do not apply to this specific 4.4-mile system.

As far as the environmental issues are concerned, were it not for the fact that there was an underground explosion along the route of the original 18.6-mile system, there would have no further environmental investigation. The truth is, I raised many of these issues prior to that explosion, during the course of the environmental impact study, and they were simply sloughed off as nonexistent. Unfortunately, 22 people had to be injured before they began to take a second look at it and only after Congressman WAXMAN pressed the issue with a hearing on the safety of the methane gas danger.

As far as the ridership is concerned, if you do not know where the project is going, you cannot predict the ridership. But I would like to leave the Congress with this one thought on the

ridership, the same people who predicted the ridership in Miami, 90 percent of the people in the Miami system did not show up, meaning that there was only 10 percent of the ridership that actually was predicted, are the same people making the predictions in the Los Angeles system. And I believe that in Los Angeles, while it might not be 90 percent who do not show up, I think the estimates on the part of a number of important independent experts show that this project's ridership will not be what they have predicted, and they are going to be back here year after year after year asking for subsidies on the project.

Mr. WAXMAN. Mr. Chairman, will the gentlewoman yield to me?

Ms. FIEDLER. I would be happy to yield to the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. I thank the gentlewoman for yielding.

Mr. Chairman, I do want to point out to the Members that what is before us is not just that first-four segment but the bill that says notwithstanding any other provision of law after they published the environmental impact statement for the rest of the alignment, which they have not even figured out yet. This would compel UMTA to agree to it and compel us to spend $110 million for the first segment and $190 million in each fiscal year 1988, 1989, 1990, and 1991.

Do we want to commit ourselves to that kind of money before we know where this thing is going?

I thank the gentlewoman for yielding.

Mr. FIEDLER. I thank the gentleman.

Mr. Chairman, it has been repeatedly stated on the floor today that the people of the city and county of Los Angeles voted for this project. That simply is not true. What the people did do was vote to support a half-cent sales tax to be put into a fund for transportation purposes, among them rail projects but not specifically this project. In fact, every effort that I have made to bring it to the voters, through the elected bodies, has been thwarted by those people who are part of the lobby, the million-dollar-plus lobby trying to push this through the Congress.

I hope my colleagues will support the Waxman amendment.

The CHAIRMAN pro tempore (Mr. COLEMAN of Texas). The time of the gentlewoman from California [Ms. FIEDLER] has expired.

The gentleman from California [Mr. ANDERSON] has 4½ minutes remaining.

Mr. ANDERSON. I yield myself such time as I may consume.

The gentlelady said we were discussing today not an 18-mile but a 4.4-mile section. We are not. We are discussing actually a 9-mile section of what would be connected to a longer light rail system. This is a 9-mile section we are talking about today. And it will eventually be part of an 18-mile system.

But we are talking not about 4.4 miles today but actually 9 miles.

Ms. FIEDLER. Will my colleague yield?

Mr. ANDERSON. I yield to the gentlelady from California.

Ms. FIEDLER. I thank the gentleman for yielding.

Would the gentleman please tell me where those 9 miles are going?

Mr. ANDERSON. From downtown Los Angeles out 9 miles.

Ms. FIEDLER. Where? You have only a 4.4-mile system.

Mr. ANDERSON. That is the first one, we are actually in a sense almost ready for building now.

Ms. FIEDLER. What you are saying is you really do not know where it is going beyond the 4.4 miles.

Mr. ANDERSON. It is going west, we are going west following on Wilshire, yes.

Ms. FIEDLER. You would like to finance it even though you are not certain at this point whether it is going to go east, west, or through the San Fernando Valley.

Mr. DREIER of California. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Yes; I yield to the gentleman from California.

Mr. DREIER of California. I thank the gentleman for yielding. I think it is important to point out that with local funds, private sector funds, and State funds there is light rail which is going to continue to proceed along the Century Freeway. It is all designed to connect into and throughout the southern part of Los Angeles County. I think it is important for us to remember that the cost effectiveness of this system is only one aspect. But all of the proposed light rail which is going to be built with local funds and State funds and private sector funds feeds into this initial trunk of the tree which is a very important aspect of it.

Mr. ANDERSON. Yes; I want to congratulate the gentleman for focusing on the whole system. That is true, we are hopefully building a system in Los Angeles. I know the gentleman referred to the Century Freeway that is under construction now that will have light rails from almost Orange County, Norwalk actually, all the way to the Los Angeles Airport. The Long Beach/Los Angeles light rail will be going from downtown Los Angeles down to the Long Beach area. So we will have that much.

Hopefully then, we will be at that time connecting to a system, the Metrorail, which will be taking us over the valley and maybe even out west to Santa Monica and someday east, into the area that ED ROYBAL is talking about and even further than ED ROYBAL's district.

We hope to have a system so that someone in Long Beach can get on the rails to go to, say, downtown Los Angeles, transfer to someplace else, and so we will have a real system in Los Angeles. And so this is all .part of a big system that we all hope to see built.

Mr. DREIER of California. So what the gentleman is saying is there is in fact an overall plan and we do not have a system, that we do not know where it is going, is that correct?

Mr. ANDERSON. If the gentleman will come to my office, you will see a nice big map showing the whole system.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California [Mr. WAXMAN].

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

Mr. WAXMAN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore (Mr. COLEMAN of Texas). Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

□ 1610

The CHAIRMAN pro tempore (Mr. COLEMAN of Texas). Four hundred and thirteen Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN pro tempore. The pending business is the demand of the gentleman from California [Mr. WAXMAN] for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 210, noes 201, answered "present" 1, not voting 19, as follows:

□ 1620

The Clerk announced the following pair:

On this vote:

Mrs. Martin of Illinois for, with Mr. Lewis of (California) against.

Messrs. HEFNER, SPENCE, LEHMAN of California, KASTENMEIER, MRAZEK, and FLIPPO changed their votes from "aye" to "no."

Mrs. MARTIN of Illinois. Mr. Chairman, I have a live pair with the gentleman from California [Mr. LEWIS]. If he were present, he would have voted "no." I voted "aye." I withdraw my vote and vote "present."

Mrs. MARTIN of Illinois changed her vote from "aye" to "present."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1630

Mr. YOUNG of Missouri. Mr. Chairman, I move to strike the last word.

Mr. Chairman, will the distinguished chairman of the Subcommittee on Surface Transportation engage in a brief colloquy with me?

Mr. ANDERSON. I am pleased to respond to the gentleman from Missouri.

Mr. YOUNG of Missouri. Mr. Chairman, I thank the gentleman from California.

Mr. Chairman, as we have discussed in the past, I have serious concerns about the willingness of the Urban Mass Transit Administration, which clearly opposes new fixed guideway investments, to develop fair and objective new start criteria and to apply those criteria fairly, objectively, and to the benefit of a strong, effective mass transit program for this country. As you are aware, the St. Louis light rail project which, at less than $14 million per mile is one of the least costly projects currently proposed for funding, has encountered many obstacles from the administration in the alternatives analysis and preliminary engineering phases. In particular, I have been very disturbed by the apparent application, in the case of the St. Louis project, of different standards than other projects were required to meet.

For example, in developing comparative ridership figures, the St. Louis project was not permitted to include projections of increased ridership from such well-known sources as increased density of development along transit lines. I am told that other applicants were not held to such standards.

As a result of our experience thus far, I am naturally concerned that a bias on the part of UMTA against new starts may lead to the development of criteria which will ensure that there are no further fixed guideway new starts in this country, or to the discriminator application of criteria to the disadvantage of some projects which the administration does not want to be built.

Mr. Chairman, I will ask the gentleman, is it correct that the committee intends to exercise stringent oversight over the Urban Mass Transit Administration in the development and application of new fixed guideway criteria?

Mr. ANDERSON. Mr. Chairman, will the gentlemen yield?

Mr. YOUNG of Missouri. I yield to the gentleman from California.

Mr. ANDERSON. That is correct, I will inform the gentleman.

Mr. YOUNG of Missouri. It is my further understanding that it is the intent of the committee to ensure that criteria are developed and applied fairly, objectively, equally, and to advance the goal of an effective mass transit program for this country. Therefore, the committee intends to ensure, through the oversight process, that all mass transit new start applicants are held to the same standards and treated equally in the application of the standards. Is that correct?

Mr. ANDERSON. That is correct.

Mr. YOUNG of Missouri. I thank the gentleman.

Mr. PARRIS. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Missouri. I yield to the gentleman from Virginia.

Mr. PARRIS. Mr. Chairman, I thank the gentleman for yielding.

I just want to express my appreciation to the gentleman from Missouri [Mr. YOUNG] and to the chairman of the subcommittee for the various aspects of this bill which are very important. I thank the gentleman for his cooperation.

AMENDMENT OFFERED BY MR. KOLBE

Mr. KOLBE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KOLBE: To amend section 118(b) of title 23:

"(5) Notwithstanding any other provision of law, the value of unused right-of-way funded under Section 104(b)(5)(A) or Section 118(b)(2) of this title in the State of Arizona may be credited to the unobligated balance of funds apportioned under Section 104(b)(5)(B) if requested by the State and approved by the Secretary."

Mr. KOLBE. Mr. Chairman, my amendment is intended to solve a particular problem in my district, and to generally enhance the ability of State and Federal highway departments to make safety improvements on existing interstate highways in Arizona. Let me describe how this issue came to my attention, and how this change would actually work.

At the junction of Interstate 10 and Palo Verde Road in Tucson, there is an on-ramp which is considered by all highway authorities to be unsafe. The interchange requires high-speed merges in heavy traffic for vehicles leaving the interstate to travel on the city maintained road. The Arizona State Department of Transportation would like to be able to reconstruct this interchange in line with modern engineering plans that will make this interchange substantially safer by terminating the off-ramp at an intersection rather than a merge. The effect of this modification would be to make a fairly substantial plot of the right-of-way excess to the needs of the interstate. This excess right-of-way is State land that was purchased with Federal interstate construction funds, so the State is obliged to rededicate money back to the interstate construction fund should this excess land be sold.

Here's where we have a problem. Safety modifications such as this are funded through a Federal 4R modification fund. Arizona does not currently have funds available in their 4R to be able to make this particular safety modification, which is desperately needed. What they would like to do is to take the funds derived from a competitive sale of this excess land, and instead of rededicating the money to the interstate construction fund, they would transfer it to the 4R fund, which would be sufficient to allow for this important safety improvement. Current law does not allow for this sort of transfer from interstate construction funds to interstate 4R funds.

This amendment would not result in the expenditure of any new money. It does not take money away from the interstate construction funds. The land could not be sold, and the money repaid to the ICE unless sufficient funds existed for the modification. Under current law, the State would have to wait anywhere from 5 to 10 more years before they could get sufficient 4R money to even begin the reconstruction. With this amendment, such life saving changes can begin now. Therefore, the modification is dependent upon the sale of the excess right-of-way, and the sale of the right-of-way depends on the availability of sufficient money to reconstruct the interchange in order to make the land excess.

I believe this amendment represents an important improvement in the way such modifications could be funded, thus speeding the completion of necessary safety design modifications without causing harm to the progress of our interstate construction program. I urge this body to accept this amendment.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. KOLBE. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, we have looked at the gentleman's amendment, and we are willing to accept it.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield,

Mr. KOLBE. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, we support the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona [Mr. KOLBE].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BOUCHER

Mr. BOUCHER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BOUCHER: Page 141, after line 2, insert the following new section:

SEC. 147. CUMBERLAND GAP NATIONAL HISTORICAL PARK, VIRGINIA.

(a) Section 160(a) of the Federal-Aid Highway Act of 1973 (87 Stat. 278) is amended by adding the following new sentences at the end thereof: "After completion of the reconstruction and relocation of Route 25E through the Cumberland Gap National Historical Park (including construction of a tunnel and the approaches thereto), funds available for parkways, notwithstanding the definition of parkways in subsection (a) of section 101, title 23, United States Code, shall be available to finance the cost of upgrading from 2 lanes to 4 lanes a highway providing access from such route through that portion of the Cumberland Gap National Historical Park which lies within the State of Virginia. The project referred to in the preceding sentence shall not delay or affect in any way the reconstruction and relocation of Route 25E (including construction of a tunnel and approaches thereto).".

(b) Subsection (b) of section 160 of such Act is amended by inserting after "rights-of-way" the following: "including approaches in the State of Virginia".

Redesignate succeeding sections of title I accordingly and conform the table of contents accordingly.

Mr. BOUCHER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. BOUCHER. Mr. Chairman, present law authorizes a reconstruction of the highway system in proximity to the Cumberland Gap National Historical Park in the States of Tennessee, Kentucky, and Virginia for this is a very significant project which results in a relocation of the principal east-west highway in the area outside the State of Virginia into the State of Tennessee.

The project foresees a two-lane access road from the reconstructed route in Tennessee to those portions of the national park which lie within the State of Virginia.

The Virginia Highway Commission is of the opinion that a two-lane access will not be adequate to handle the volume of traffic that is expected once this project is completed.

My amendment very simply authorizes the reconstruction project to provide a four-lane access within the State of Virginia once the other elements of the project have been completed.

Mr. Chairman, this amendment has been constructed in cooperation with the other Members who are affected by it and in cooperation with the minority.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. BOUCHER. I yield to the gentleman from Kentucky.

Mr. ROGERS. Mr. Chairman, may I be assured by the gentleman that the amendment that he offers and the project that it foresees would in no way be in competition for funds for the present project now under way for digging the tunnel through the mountain to Cumberland Gap and the approaches thereto?

Mr. BOUCHER. The gentleman is correct. This amendment would in no way compete for funds for the balance of the contract, including the elements the gentleman has described.

Mr. ROGERS. And may I further be assured, if the gentleman continues to yield, that his intent is that this project that he is amending, the subject of his amendment, would not be begun until after the completion of the present project now underway, the tunnel digging under the Cumberland Gap National Park and the approaches thereto?

Mr. BOUCHER. The gentleman is correct.

Mr. ROGERS. May I further be assured by the gentleman, if he continues to yield, that his intention in this amendment would not require any delay or allow any delay under the present project of the tunnel?

Mr. BOUCHER. That is my understanding. The gentleman is correct.

Mr. ROGERS. And that there would be a separate environmental impact statement for the gentleman's project which would not in any way require any further environmental statements on the tunnel project now under way?

Mr. BOUCHER. The gentleman is correct. To the extent that an environmental impact statement would be required pursuant to this amendment, it would be separate and totally apart from any EIS that has been prepared for the balance of the project.

Mr. ROGERS. And finally, may I be assured that the gentleman's amendment would in no way delay in any fashion whatsoever under any circumstances the project now under way?

Mr. BOUCHER. That is correct.

Mr. ROGERS. Mr. Chairman, I thank the gentleman for yielding.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. BOUCHER. I am glad to yield to the distinguished minority Member, the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I thank the gentleman.

It is my understanding that the gentleman from Tennessee [Mr. QUILLEN] had worked this out with the gentleman and he supports this amendment.

Mr. BOUCHER. That is correct.

Mr. SHUSTER. Mr. Chairman, we are happy to support it also.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. BOUCHER. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, we have looked at the gentleman's amendment and are willing to accept it.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Virginia [Mr. BOUCHER].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MORRISON OF CONNECTICUT

Mr. MORRISON of Connecticut. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MORRISON of Connecticut: Page 75, lines 15 through 18 and insert the following in lieu thereof:

(2) LIMITATION ON APPLICATION.—The amendment made by paragraph (1) shall—

(A) only apply to the procurement of buses and other rolling stock manufactured or assembled at a facility at which buses or other rolling stock were not being manufactured or assembled during the first half of calendar year 1984; and

(B) not apply to procurements made pursuant to contracts entered into before June 1, 1986.

Mr. MORRISON of Connecticut (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MORRISON of Connecticut. Mr. Chairman, this legislation includes an amendment to the Buy American provision, a strong amendment. It is an amendment that I favor. It would increase Buy American percentage from 50 percent to 85 percent. I think that is the direction in which we ought to try to move; however, I have in my district and also in North Carolina there are factories that were established by foreign manufacturers specifically to comply with the 50-percent requirement that is in current law. If we do not in some fashion make an exception for these factories which are in operation and have been providing buses in the United States, we will create some very serious problems. Those problems have to do with loss of jobs for American workers who are currently employed and the loss of ability to service buses that are currently in use in the United States.

Now, I have crafted an amendment which I think will take care of this problem on the narrowest possible

basis, but I understand from the committee, from the chairman, and the ranking member, that they prefer to proceed in a slightly different way.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman from New Jersey to discuss this.

Mr. HOWARD. Mr. Chairman, I just would like to say that this discussion did come up in our committee. We certainly want to protect our American jobs. We hope that foreign manufacturers will locate in this area and do their construction at this time.

We do realize that what we put in the bill is strong language; however, the history of this legislation and our conferences with the other body show that there are some Members of the other body who are very strongly opposed to any kind of Buy American provision, so we do feel that we want to go with a very strong position into the conference. We certainly are going to compromise in the conference.

As we said in the committee, and in the RECORD, we will not come out of that conference on this Buy American issue that will in any way—and we specifically mentioned Connecticut and North Carolina and other similar areas—that will cost any jobs or deny any expansion of jobs due to what we do on Buy American. We are going in with a good negotiating position. I just wish now publicly on the record to assure the gentleman that what we said in the committee in public on this issue is what we are saying here today.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman from Connecticut.

Mr. SHUSTER. Mr. Chairman, I thank my friend. I would say to the gentleman, as the author of the Buy American language in our bill, that we indeed want to go in with a strong position to the Senate, but I recognize completely that we are going to compromise. We are very mindful of the problem in the gentleman's district and indeed in North Carolina as well. So it would be our objective to have stong Buy American language, but to do it in such a way as to compromise to protect the jobs of the industries located in the gentleman's district, in North Carolina, and all across America.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman from New Jersey.

Mr. HOWARD. Mr. Chairman, I would also like to say that we are aware of the business in the gentleman's district and in his State and any effort they are making, and they are making progress in complying with what we have, and we want to encourage, and not discourage, that effort.

Mr. MORRISON of Connecticut. Mr. Chairman, I thank both the chairman and the ranking member.

I would also like to thank my colleague, the gentlewoman from Connecticut [Mrs. JOHNSON] who worked with me and worked in the committee very strongly on this, and the gentleman from North Carolina [Mr. HEFNER] who also helped to work out this understanding.

I think it is a commendable understanding. I appreciate the commitments I have received.

Mr. Chairman, on that basis, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Connecticut to withdraw his amendment?

There was no objection.

The CHAIRMAN pro tempore. The amendment is withdrawn.

AMENDMENT OFFERED BY MR. VISCLOSKY

Mr. VISCLOSKY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VISCLOSKY: At the end of title I add the following:

SEC. 163. URBAN HIGH DENSITY PROGRAM.

Of amounts available under the urban high density program, $2,806,675 is rescinded. $2,806,675 shall be made available out of the highway trust fund by the Secretary for reconstruction of an interchange on an urban high density project designated in the State of Indiana in accordance with section 146 of title 23, United States Code (as such section was in effect on August 13, 1973).

Mr. VISCLOSKY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. VISCLOSKY. Mr. Chairman, in August 1973, three urban high-density programs were authorized. One was on Cline Avenue in East Chicago, IN. It connected I-80 and I-90. Because of a certain ambiguity in the House report language in 1973, the Federal Highway Administration has not been willing to release an unobligated balance of $2.8 million for the reconstruction of an interchange at the intersection of Cline Avenue and I-80 and I-94. The amendment would allow in statute this transfer of money to take place.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. VISCLOSKY. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, we have looked at the amendment. It does not bring about any new budget authority and we are willing to accept the amendment.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. VISCLOSKY. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, we accept the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Indiana [Mr. VISCLOSKY].

The amendment was agreed to.

Mr. GEJDENSON. Mr. Chairman, I would first like to congratulate my colleagues on the House Public Works and Transportation Committee for drafting a fine piece of legislation to reauthorize our Nation's highway transportation programs.

I am especially proud to support the passage of this legislation as it contains a provision which is derived from legislation I introduced this session of Congress. This provision seeks to ease the burdens and barriers many disabled people face everyday—finding handicapped parking spaces.

Too many handicapped drivers around the Nation find that interstate transportation is a nightmare. Many States refuse to recognize the handicapped parking stickers of other States. Thousands of handicapped persons are ticketed each year because they park in a handicapped parking place in a State in which they do not reside.

Ruby DeGiovanni, a constituent of mine from Middletown, CT, originally brought this difficulty to my attention when she and other handicapped persons in eastern Connecticut received parking tickets when they went to the doctor or went shopping in neighboring Massachusetts. As I looked into this problem further, I discovered that Ruby DeGiovanni's parking tickets were not an isolated incident: Thousands of handicapped persons nationwide receive tickets when they travel to another State and attempt to park in a specially designated parking space.

If an individual is handicapped in one State, he or she is handicapped in all States. States that deny out-of-State handicapped persons the privilege of parking close to a building need to be told that this harassment of handicapped persons is unacceptable. Our Nation has made tremendous strides in recent years to tear down the barriers to the free travel of handicapped persons, and I feel that my legislation will ensure that this progress continues.

This amendment not only asks the Secretary of Transportation to study the question of establishing parking privileges for handicapped persons which are granted to all handicapped persons regardless of State residency, but also requires the Secretary, upon determination of the extent of this problem, to draft a uniform State law to rectify this inequitable situation. This law will be submitted to all States and to Congress for consideration and action.

By further requiring the Secretary to annually report to Congress on the extent to which each State has adopted the proposed uniform State law, Congress will be able to monitor the effectiveness of this amendment and determine whether further, more stringent, action is required.

Reciprocal recognition of handicapped parking stickers is long overdue. I am pleased that my colleagues on the Public Works and Transportation Committee took action on my legislation and moved to put an end to this senseless situation.

Mr. HAMMERSCHMIDT. Mr. Chairman, I rise in strong support of H.R. 3129, the Surface Transportation and Uniform Relocation Assistance Act of 1986. Passage of the bill will provide for a 5-year continuation of the Nation's highway and transit programs.

The bill, as reported out of committee, will provide Arkansas over $100.4 million in fiscal year 1987 for highway formula programs which include the interstate resurfacing, restoration, rehabilitation, and reconstruction [4R], primary, secondary, urban, bridge, hazard elimination, and railroad highway crossing programs. The State would also get $28.8 million under the minimum allocation program, which provides States with at least 85 percent of the amounts they contribute to the highway trust fund.

This means that Arkansas would receive a total of about $129.2 million under the basic Federal-Aid Program, exclusive of demonstration projects and any discretionary grants the State may receive. Funding in each of fiscal years 1988–91 would be roughly the same.

The bill contains a provision, authorizing $45 million over the next 5 years to accelerate construction of Highway 71 as a four-lane highway, with another $45 million provided for U.S. 71 in Missouri. About one-half of the funding for the Arkansas portion would go for design and preliminary right-of-way acquisition, while the other half would go for construction.

The State would receive $5 million for the project in fiscal year 1987; $5 million in fiscal year 1988; $10 million in fiscal year 1989; $10 million in fiscal year 1990; and $15 million in 1991. The $45 million total is over and above what Arkansas received under the formula and minimum allocation programs.

Another provision would allow Arkansas to use interstate construction funds for planning, design, and construction of Highway 71. Although the State's interstate segment is complete and normally interstate funds must be used for 4–R work, the bill gives Arkansas the option of using its interstate funds for Highway 71.

Also provided in the bill is $8.5 million in fiscal year 1987 for a highway demonstration project at Fort Smith, which involves widening a segment of the highway connecting Westark Community College and the New Central Mall and improving signalization on the segment.

The bill approves $13.3 million funding for construction of four grade separations on a four-lane bypass route at Jonesboro to demonstrate methods of improving highway safety. The project would receive $2.5 million in fiscal year 1987; $3.2 million in fiscal year 1989; $2.6 million in fiscal year 1990; and $3.2 million in fiscal year 1991.

It should be noted that all of these funds come out of the highway trust fund and therefore do not add to the Federal deficit.

The legislation also directs the Secretary of Transportation, in cooperation with Louisiana, Arkansas, and Missouri, to study the feasibility of constructing a highway from Shreveport, LA, to Texarkana, Fort Smith, and Fayetteville, AR, and Carthage and Kansas City, MO. A report on the study's results is to be submitted to Congress within a year after the bill's enactment.

Arkansas would also be given the option, under the bill's provision, to utilize part of its bridge replacement funds to replace existing ferryboat service with a highway bridge, and the Federal share for the cost of that replacement would be 80 percent.

Mr. DREIER of California. Mr. Chairman, any of us who has had occasion to use Washington's Dulles Airport in the 2 years since the Dulles access road was completed, knows that the most modern airport is of little use unless passengers can reach it easily. Before Dulles had a fast, direct access road, it was an empty barn virtually ignored by most major airlines and passengers. Since then, it has quickly become the air travel hub it was first envisioned to be two decades ago.

As quickly as Dulles is expected to grow, it will not even come close to the explosion in passengers which will be experienced by Ontario International Airport near Los Angeles. The airport is expected to grow from a current 3 million passengers per year to 11 million by the year 2000. To accommodate this increase, Ontario is undergoing a $300 million facelift which will give it the capacity to handle double that number.

Unfortunately, Ontario faces the same problem which once plagued Dulles: space age airport facilities coupled with stone age access. We are fortunate that the land surrounding the airport is still relatively inexpensive; it will not always be so. That is why the $4 million contained in this bill is so crucial. If we do not begin to solve Ontario's access problem, we will soon be talking about sums far in excess of the current cost estimate.

Despite having the second largest population and the greatest surface area of any major metropolitan area, Los Angeles is still basically served by one major airport, Los Angeles International. Meanwhile, those who travel to New York have a choice of three major airports, as do travelers to the Nation's Capital. Ontario International will soon be able to provide the much needed alternative for those who fly to Los Angeles, but only if ground access is improved. This provision in this bill is the first step in this important project, and I am delighted to see it moving ahead.

□ 1645

AMENDMENT OFFERED BY MR. STENHOLM

Mr. STENHOLM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STENHOLM: Page 163, after line 12, insert the following new section:

SEC. 163. APPLICATION OF MODIFIED DAVIS-BACON AND COPELAND ACT EQUIVALENCY REQUIREMENTS TO HIGHWAY CONSTRUCTION CONTRACTS.

(a) GENERAL RULE.—Section 113 of title 23, United States Code, is amended by redesignating subsections (b) and (c) (and any reference thereto) as subsections (c) and (d), respectively and striking out subsection (a) and inserting in lieu thereof the following new subsections:

"(a) APPLICATION OF MODIFIED DAVIS-BACON REQUIREMENTS.—

"(1) GENERAL RULE.—The Secretary shall take such action as may be necessary to insure that all laborers, mechanics, and helpers employed by contractors or subcontractors on the construction work performed on highway projects on the Federal-aid systems, the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems, shall be paid wages at rates not less than those prevailing on the same type of work on similar construction in the immediate locality as determined in accordance with the Act entitled 'An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes', approved March 3, 1931 (commonly referred to as the 'Davis-Bacon Act') (46 Stat. 1494; 40 U.S.C. 276a—276a-5), with the modifications described in paragraph (2) of this subsection.

"(2) MODIFICATIONS.—The modifications referred to in paragraph (1) are as follows:

"(A) This section shall be applied to contracts with advertised specifications in excess of $1,000,000 rather than in excess of $2,000.

"(B) The area for which the prevailing wage is to be determined shall be the particular urban or rural subdivision (of the State) in which the work is to be performed rather than the city, town, village, or other civil subdivision of the State.

"(C) Helpers of a class of laborers or mechanics shall be considered as a separate class and prevailing wages for such helpers shall be determined on the basis of the corresponding class of helpers.

"(D) For purposes of this paragraph, the term 'helper' means a semi-skilled worker (rather than a skilled journeyman mechanic) who—

"(i) works under the direction of and assists a journeyman;

"(ii) under the direction and supervision of the journeyman, performs a variety of duties to assist the journeyman, such as—

"(I) preparing, carrying, and furnishing materials, tools, equipment, and supplies and maintaining them in order;

"(II) cleaning and preparing work areas;

"(III) lifting, positioning, and holding materials or tools; and

"(IV) other related semi-skilled tasks as directed by the journeyman; and

"(iii) may use tools of the trade which are under the direction and supervision of the journeyman.

"(E) In determining the prevailing wage for a class of laborers, mechanics, or helpers where more than a single wage is being paid to the corresponding class of laborers, mechanics, or helpers, the prevailing wage shall be established as—

"(i) the wage paid to 50 percent or more of the corresponding class of laborers, mechanics, or helpers employed on private industry projects of a character similar to the contract work in the urban and rural subdivision of the State in which work is to be performed, or in the District of Columbia if the work is being performed there; or

"(ii) if the same wage is not paid to 50 percent or more of the laborers, mechanics, or helpers in the corresponding class, the weighted average of the wages paid to the corresponding class of laborers, mechanics, or helpers employed on private industry projects of a character similar to the contract work in the urban or rural subdivision

of the State in which the work is to be performed, or in the District of Columbia if the work is to be performed there.

"(F) In determining the basic hourly rate of pay, data from Federal or federally assisted projects subject to the prevailing wage requirements of the Davis-Bacon Act or another Act incorporating such Act by reference shall be excluded, unless it is determined that there is insufficient wage data to determine the prevailing wages in the absence of data from such Federal or federally assisted projects. Data from Federal or federally assisted projects may be used in compiling wage rate data for heavy and highway wage determinations.

"(b) PAPERWORK REDUCTION.—Section 2 of the Act entitled 'An Act to effectuate the purpose of certain statutes concerning rates of pay for labor, by making it unlawful to prevent anyone from receiving the compensation contracted for thereunder, and for other purposes', approved June 13, 1934 (commonly referred to as the 'Copeland Act') (48 Stat. 948; 40 U.S.C. 276c), shall be applied to highway projects on the Federal-aid systems, the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized under the highway laws providing for the expenditure for Federal funds upon the Federal-aid systems, in a manner which requires that a statement concerning the weekly wages paid each employee, pursuant to a contract entered into with respect to such a project, be made only at the beginning and at the conclusion of the period covered by the contract rather than on a weekly basis.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to contracts entered into with respect to highway projects on the Federal-aid systems, the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized on or after the date of the enactment of this Act under the highway laws (including this Act) providing for the expenditure of Federal funds upon the Federal-aid systems.

Mr. FAWELL. Mr. Chairman, I urge my colleagues to support the Stenholm-Valentine-Stangeland-DeLay Davis-Bacon amendment to H.R. 3129, the Surface Transportation and Uniform Relocation Assistance Act of 1986.

This amendment is similar to the provisions of H.R. 472, the Davis-Bacon Reform Act. This amendment only applies, however, to Federal-aid highway construction and repair. Specifically, the amendment raises the contract "threshold" from $2,000—set in 1934—to $1 million. Even if Congress approves this amendment, only 12 percent of the total dollar volume for highway construction would be excluded from Davis-Bacon coverage.

In addition, the amendment makes other much needed reforms to Davis-Bacon. It codifies existing administrative regulations that make Davis-Bacon wage determinations more accurately reflect actual local prevailing wages. Thus, the minimum construction wage paid to each category of workers would be the average going private sector wage rate, and antiquated Davis-Bacon data could not be counted as part of the going private sector wage rates in that area.

Furthermore, the amendment expands the use of "helpers," such as semiskilled and unskilled workers, providing job opportunities for disadvantaged job-seekers. The amendment includes a special provision that prevents the payment of helper wages to workers performing skilled jobs.

The reforms sought by this amendment serve numerous purposes. First, a vote for this amendment is a vote for commonsense deficit reduction. The Congressional Budget Office [CBO] estimates these reforms will save $45 million in outlays in 1987 and $1 billion over the 5-year period from 1987–91. In light of the recent projections that the deficit will exceed at least $230 billion this year, this amendment provides us with the opportunity to make significant budgetary savings.

Second, Davis-Bacon is antismall business. The act pays wages to workers on Federal construction projects above those which would prevail under free market competition. This has the effect of limiting the bidding opportunities of nonunion contractors on public projects, discriminating against small businesses, and needlessly raising the cost of Federal construction. The act also has onerous paperwork and reporting requirements which preclude small businesses from bidding on Federal construction projects because they cannot meet the costs of such requirements. These inhibitions have compelled two-thirds of the 1985–86 State White House Conferences on Small Businesses to recommend the repeal of Davis-Bacon.

Third, the reforms sought by this amendment will open up job opportunities to disadvantaged adults. Semiskilled workers could be trained to perform a particular task within a craft without being qualified in all skills of a fully qualified journeyman. Contractors would be urged to utilize any classification of workers to perform tasks within their attained skill level. This provides employment opportunities for underutilized minority, female, handicapped, and young workers traditionally excluded in the construction working force.

The inability to utilize helpers on Federal projects in a manner comparable to private sector work tremendously increases Federal construction costs. CBO has estimated that insertion of a helper classification in the Davis-Bacon Act could provide Government-wide budget savings of approximately $3 billion over 5 years.

Finally, this amendment brings Davis-Bacon back to its original intent. Passed in 1931, Davis-Bacon was originally intended to place a floor under steadily falling wage rates and prevent contractors with nonlocal labor from bidding on Federal projects and undercutting local wage rates. While the original intent was laudable, the act now needs to be modified in tune with the economic realities of the 1980's. The $2,000 threshold set in 1934 is unrealistic. The prevailing wage has remained undefined since 1931, although in practice, Davis-Bacon wages tend to be at the top of industry ranges for each job classification. The amendment's reforms uphold the basic wage protection originally intended and accurately reflect the local prevailing wages.

The time for Bacon-Davis reform is now. Although this amendment does not cover Governmentwide contracts, it is a step in the right direction. Ideally, the act should be repealed. But since repeal is politically unlikely in the House, the least Congress can do is to reform this budget-busting law.

As a cosponsor of H.R. 472 and a member of the Congressional Grace Caucus, I enthusiastically support this amendment. I urge my colleagues who want to inject some fiscal responsibility into our Federal wage-setting laws to support these reforms.

Mr. PACKARD. Mr. Chairman, I rise in strong support of H.R. 3129, the Surface Transportation Act of 1986. I believe that this bill is critical to improving the surface transportation infrastructure of America. I would like to commend my colleagues on the Public Works and Transportation Committee for crafting this legislation and in particular, I wish to commend the leadership of the committee.

While there are many aspects of this bill I could comment on, I will limit my remarks to a section of the bill which is of extreme importance to my constituents. This section authorizes funding for a demonstration project in northern San Diego County, CA.

Northern San Diego County has seen a tremendous population explosion over the past decade. Unfortunately, improvements in the infrastructure have not occurred at a similar rate. The end result has been virtual rush hour gridlock along Highway 78 from sunrise to sunset.

This particular project would expand Highway 78 for the purpose of demonstrating methods of reducing traffic congestion and accidents. Another very important aspect of this project concerns the method of funding to be used. This demonstration project is unique in that the cost of this project will be shared by Federal, State, and local government entities. I believe this is an important step that needs to be taken and that this project will serve as a model for future cost-sharing efforts in improving the highways of America.

While H.R. 3129 is not a flawless bill, it has much good in it and I urge my colleagues to support this legislation. This legislation is a step in the right direction in addressing the critical infrastructure needs present in America today. Mr. Chairman, I strongly urge the House to pass H.R. 3129 as reported from committee.

Mr. HOWARD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HOWARD. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. GRAY of Illinois] having assumed the chair, Mr. TRAXLER, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3129) to authorize funds for construction of highways, for highway safety programs, and for mass transportation programs, to expand and improve the relocation assistance pro-

gram, and for other purposes, had come to no resolution thereon.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. GRAY of Illinois). The Chair is awaiting the arrival of the Committee on Rules. At this time, the Chair will be glad to entertain 1-minute speeches.

PARLIAMENTARY INQUIRIES

Mr. WALKER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WALKER. Mr. Speaker, can the Chair inform us what might be the business that is planned for the rest of the day? I see the distinguished majority whip; I wonder if we could get some idea as to what the schedule for the rest of the day is going to be.

The SPEAKER pro tempore. The Chair will state to the gentleman from Pennsylvania that the Committee on Rules is now in place, prepared to call up a rule.

Mr. STRATTON. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. STRATTON. Mr. Speaker, would the Chair advise the membership as to when we will take up the Defense bill, which has been pending since the day before yesterday?

The SPEAKER pro tempore. If the gentleman would ask unanimous consent to proceed for 1 minute, he could yield to the distinguished acting majority leader, and he can answer that question.

## LEGISLATIVE PROGRAM

(By unanimous consent, Mr. STRATTON was allowed to address the House for 1 minute.)

Mr. STRATTON. Mr. Speaker, I take this time so that I might yield to the distinguished majority leader to advise us on the very significant issue of the Defense bill. There have been 45 members of the committee who have been waiting breathlessly for the last 2 days to save the country from outside military influences, and I do not think that we can carry on much longer. I hope that the gentleman will give us some encouraging news.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Speaker, I hope that I can relieve the gentleman, at least psychologically if not in his sentry duty, by telling him that I think we have reached a substantial agreement between the majority and the minority with respect to one of the contested elements of the bill, that dealing with the Davis-Bacon amendment.

It is now, I understand, the intention of the chairman of the committee and the ranking minority member, the gentleman from Alabama [Mr. DICKINSON], to further consult on the terms of the rule which they intend to request from the Committee on Rules.

It is our hope that the Rules Committee can meet tonight and by agreement between the two parties adopt the text of a rule which would be eligible for consideration tonight.

In the meantime we intend to take up the rule and the bill on Philippine relief.

I cannot advise the gentleman at this time exactly how far we will go into the rule on DOD, but I would suggest that Members ought to assume that the session of the House will go at least until 9 o'clock tonight.

We are interested in proceeding as far as we can. The Department of Defense authorization bill is complicated and long, as the gentleman who is one of the senior experts in the House on the subject of defense is aware, and I know that he is deeply interested in the bill, as others are. I can report to him that I believe that things are moving toward an amicable resolution of the difficulties over the rule, and we hope to be able to move even further.

Mr. STRATTON. Do I understand the gentleman to say that there is going to be debate on the Philippines bill? Is that going to precede the debate getting back onto the defense bill?

Mr. FOLEY. The gentleman is correct. In order for the chairman of the Committee on Armed Services and the ranking Republican member, the gentleman from Alabama [Mr. DICKINSON] to further consult about the order of amendments and other matters, having resolved I think in principle the matter that was creating some difficulty, and for the Rules Committee to consider the rule, we have to provide some time. In the meantime, to facilitate the work of the House, we intend to bring up the rule and the bill on Philippine relief immediately.

Mr. STRATTON. I thank the gentleman.

## THE NEW GI BILL

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute.)

Mr. MONTGOMERY. Mr. Speaker, I am not sure that we are going to be able to get any type of defense bill, so I thought that I would talk about the new GI bill. All the Members voted for it, so I am glad that they recognize how well it is working for our military.

It is the same type of educational bill that we had after World War II, Korea, and Vietnam. Eighty-five percent of the Army's new recruits coming into the service now are signing up for the GI educational bill. It is the bread and the butter for the Army, and we hope that the other services will take advantage of this bill.

Because of the cost of education in college, because college education has increased 6 percent for this new fall year, people who go into the service and then come out find that the only way that they are ever going to get any type of education is to sign up for the GI bill. It is a test program. It is very important after this test period runs out, which will be in 1988, that the GI bill is renewed and carried on.

Quite frankly, having the GI bill saved the all-volunteer system. I thought that my colleagues would like to know that, and I appreciate their concern.

## PROVIDING FOR CONSIDERATION OF H.R. 5081, ASSISTANCE FOR DEMOCRACY ACT OF 1986

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 526, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 526

*Resolved*, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5081) to authorize additional economic and military assistance for the Philippines, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Foreign Affairs now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections, each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 7 of rule XVI are hereby waive. No amendment to title I or II of said substitute shall be in order except germane amendments printed in the Congressional Record by August 5, 1986. No amendment which changes, affects, or modifies title III of said substitute shall be in order. After title II has been considered for amendment in its entirety, title III shall be considered as having been read, and no further amendment to title III or to said substitute shall be in order, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute. The previous

question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

□ 1655

The SPEAKER pro tempore (Mr. GRAY of Illinois). The gentleman from Ohio [Mr. HALL] is recognized for one hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 526 is a modified open rule providing for the consideration of H.R. 5081, the Assistance for Democracy Act of 1986.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs. The bill shall be considered for amendment under the 5-minute rule.

The rule makes in order the committee amendment in the nature of a substitute now printed in the bill as original text for the purpose of amendment under the 5-minute rule. To expedite consideration, the rule further provides that the substitute shall be considered by titles, instead of by sections, and each title shall be considered as read.

It should be noted that the rule waives clause 7 of rule XVI, the prohibition against nongermane amendments, against the substitute. As introduced, H.R. 5081 provided authorization for additional economic and military assistance for the Philippines for fiscal year 1986. The substitute, however, contains other issues and amendments to the Foreign Assistance Act for fiscal year 1987. Therefore, a technical waiver of clause 7 of rule XVI is needed.

The rule further provides that amendments to titles I and II must have been printed in the CONGRESSIONAL RECORD by August 5, 1986. The rule also provides that no amendment to title III is in order.

The chairman of the Foreign Affairs Committee informed the House on the floor on July 31, 1986, that he would be requesting this modified open rule. His request was developed with the consultation and support of the minority.

Title III of the substitute is closed to amendments because opening it up to amendments could bring before the House numerous issues that are not addressed in this legislation. The chairman of the Foreign Affairs Committee advised the Rules Committee that such additional issues will be considered early in the next session when the Foreign Affairs Committee brings to the floor a reauthorization of all foreign assistance programs under its jurisdiciton.

Finally, Mr. Speaker, the rule provides for one motion to recommit with or without instructions.

The principal purpose of H.R. 5081 as reported by committee is to provide assistance to promote democracy in the Philippines and in Haiti. Title I of the committee amendment authorizes an additional $250 million in economic support fund assistance for the Philippines in fiscal year 1986. Title II earmarks $108 million in economic assistance for Haiti in fiscal year 1987 and places limitations on the provision of military assistance to that country pending the reform of Haiti's military establishment.

Since 1979, I have been actively concerned about relations between the United States and the Philippines. Under the administration of President Corazon Aquino, the Philippines are in the process of restoring democracy. The Philippines are facing tremendous economic and developmental challenges. We need to work with the new government in the Philippines to help them respond to these challenges. The funding authorized by this legislation will help contribute to this process of recovery, and begin a partnership in development between our two countries.

Mr. Speaker, I commend the Foreign Affairs Committee for including in the substitute the amendment offered by the gentleman from New Jersey [Mr. SMITH] to increase the fiscal 1987 authorization for the child survival fund to $75 million. His amendment reflects the concerns and priorities of H.R. 3894, the universal child immunization bill, of which I am the principal sponsor. It is only through such modest increases in funding that the goal of immunizing the world's children by 1990 can be met.

Mr. Speaker, I am not aware of opposition to this bipartisan rule. I urge my colleagues to adopt it.

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, this rule was reported out of the Rules Committee some time ago. The bill provides an additional $250 million authorization for the Philippines, an additional amount of foreign aid, and $108 million for Haiti.

This is a way to get under the fence to increase our foreign assistance to these countries. I think we should hit it head on.

What happened in the Philippines can be blamed partly on America itself for not monitoring the foreign assistance to that nation. I know that it is in a very critical situation now with the changeover in administration. But nevertheless we should act with caution.

However, we know both situations are critical. The rule was reported out. It is a rule which is a modified closed rule, and I urge the passage of the rule.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 303, nays 96, not voting 32, as follows:

□ 1715

Mrs. VUCANOVICH changed her vote from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I have asked for permission to address the House for 1 minute in order to learn further from the distinguished majority whip what the schedule will be for the balance of the evening and tomorrow.

Mr. Speaker, there have been a number of changes under way in the last few minutes as applies to tonight, and also the Members are very interested in knowing what the schedule will be tomorrow. I would be pleased to yield to the distinguished majority whip to give us information on that.

Mr. FOLEY. I thank the distinguished Republican whip for yielding.

As I indicated to the House before, Mr. Speaker, we are hopeful that the chairman of the Committee on Armed Services and its distinguished ranking minority member, Mr. DICKINSON, will shortly resolve all remaining differences over the proposed rule on the Department of Defense authorization bill.

The essential decisions, compromises have been agreed to in principle. What I think the two distinguished Members are now discussing are some of the finer points of the scheduling of the bill. It is anticipated that this probably can be concluded by 6 or 6:30 and that the Rules Committee—and I know I am imposing on the distinguished chairman—might meet around 7 o'clock tonight, and, if possible, conclude a rule by 8 o'clock tonight. Should that occur, this evening, we would then proceed to the first item agreed to between the chairman and the ranking minority member, which would probably deal with money levels, the levels of funding under the bill.

We would hope to conclude that debate by 11 o'clock for the evening.

Mr. LOTT. Mr. Speaker, the gentleman would expect, of course, on that rule that would require a two-thirds vote but the gentleman is assuming that that could be accomplished.

Mr. FOLEY. What I would assume is that it might be hoped unanimous consent could be obtained for the consideration of the rule tonight, and if not that a two-thirds vote could be obtained.

Mr. LOTT. And tomorrow?

Mr. FOLEY. Tomorrow the House would not meet until 10 o'clock, and subject to the agreement between the chairman and the ranking minority member, we would propose to take up the test ban issue and only that issue tomorrow, with the hope that the House would be able to conclude that business before 3 o'clock.

Mr. LOTT. It is still intended, I hate to take it 1 day further, but as long as we are having this colloquy, it is still anticipated that there would be votes on Monday and amendments to the DOD bill, is that correct?

Mr. FOLEY. The gentleman is correct. On Monday, subject again to the agreement between the chairman and the ranking minority member, and the rule—and I do not want to anticipate what that is—I assume it might be possible after suspensions that the bill would be read under the normal title I provisions. The gentleman from Alabama and the chairman can clarify that.

After that I think we should let the two principals conclude their discussions about the order, but Members should be aware if we proceed in this manner that there will be votes tomorrow, that there will be votes on Monday, we would hope to adjourn the House before 3 o'clock tomorrow. On that day we are taking up only this one matter in order to allow Members, as many have suggested, to obtain transportation to their districts before late in the afternoon.

The House would meet at noon on Monday and proceed to, probably again, late that evening.

Mr. LOTT. I would be glad to yield to the distinguished gentleman from Alabama if he has some information.

Mr. DICKINSON. I thank the gentleman for yielding.

Mr. Speaker, this is not to contradict anything that the distinguished whip has said. I would just like for the amplification and edification of the Members to try to put in perspective some of the problems that we are wrestling with. We had a loose agreement as to the rule that would be presented. The first item of business after we started would be money matters, setting the parameters, what would be the budget authority, what would be the spending outlays. That had to come first, we felt, because all else is very largely hinged on that. That would have been yesterday.

Today it was anticipated we would start off with nonmoney matters and would be principally policy matters dealing first with the test ban treaty and then with SALT, and then if we could get to it, dealing with what I would call chemical weapons.

Tomorrow, it would have been the next day, on Friday we would start with title I. As the amendments are filed, then we are open to title I, all

amendments are filed to title I, we would go through them. All the way through Friday, through Monday, working through the bill by title according to the amendments as they have been filed, on Tuesday we would get back to other policy issues such as SDI and Asat.

Then, after that was concluded, if there were any amendments not yet resolved to the regular bill under general provisions or otherwise, we would go back to that and stay with it until we concluded the bill. That was the normal procedure that we had tentatively agreed to.

Well now, yesterday, the first day, is gone; the second day has gone.

So, assuming that the impasse has been resolved to the satisfaction of this side, we still, the chairman and I still must get together now and see how much of the original agreement as to the sequencing we can salvage and go to the Rules Committee tonight and agree this is what we would suggest to be approved by way of a rule dealing with the sequence of events to occur.

I see the chairman is on the floor now. Perhaps he might want to correct any part that I have said.

Mr. LOTT. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Let me just say that I agree entirely with what the gentleman from Alabama said, and I think the situation is as he explained it.

Mr. FOLEY. If the gentleman from Mississippi would yield to me further.

Mr. LOTT. I do not think I want to know any more about this schedule. I yield to the gentleman.

Mr. FOLEY. I do not intend to burden the gentleman with any more details on that matter but to say that awaiting the conclusion of the discussions of the gentleman from Wisconsin and the gentleman from Alabama and the Rules Committee action, it is our intention to proceed with the Philippine Relief Act to passage which we think will probably take until about 8 o'clock tonight.

Mr. LOTT. Mr. Speaker, I yield back the balance of my time.

## ASSISTANCE FOR DEMOCRACY ACT OF 1986

The SPEAKER pro tempore (Mr. GRAY of Illinois). Pursuant to House Resolution 526 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 5081.

□ 1727

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5081) to authorize additional economic and military assistance for the Philippines, with Mr. ATKINS in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Florida [Mr. FASCELL] will be recognized for 30 minutes and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 5081, as amended, the Assistance for Democracy Act of 1986.

This legislation was approved by the Committee on Foreign Affairs by a recorded vote of 27 to 2, with one member voting present on July 23, 1986.

The principal purpose of the bill as reported by the committee is to provide much needed assistance to promote democracy in two countries which are extremely important to the national interest of the United States—the Philippines and Haiti.

Specifically, title I of the committee amendment authorizes an additional $250 million in ESF budget support assistance for the Philippine Government in fiscal year 1986. I would like to emphasize that the bill as reported mandates that the assistance for the Philippines be obligated before the end of this fiscal year so that it will not impact on the deficit in fiscal year 1987.

Title II earmarks $108 million in economic assistance funds for the Government of Haiti and places limitations on the provision of military assistance to that country pending the reform of Haiti's military establishment.

Specifically, title II earmarks the following amounts for fiscal year 1987: $36 million in economic support funds; $37 million in development assistance funds; $35 million in Public Law 480 (Food for Peace); and $1 million for inter-American foundation programs in Haiti.

In addition, title II sets a limit of $4 million which may be available in fiscal year 1987 for grant military assistance and military education and training. Such funds may be made available to Haiti for education, training, and other nonlethal assistance. These funds may be obligated only if:

The President certifies to the Congress that Haiti has submitted a formal request specifying a comprehensive plan to reform the Haitian armed forces consistent with the transition to democracy, the rule of law, and an elected civilian government;

The Committees on Appropriations and Foreign Affairs are notified 15 days in advance of the obligation;

Substantial efforts are being made by the Government of Haiti: to prevent human rights abuses and corruption by or in the Haitian armed forces; to insure that such assistance is not used to suppress freedom of speech and assembly; to investigate the killing of civilians in certain Haitian towns and to prosecute those responsible; to train the Haitian armed forces with respect to internationally recognized human rights and the civil and political rights essential to democracy; and to take steps to implement the policy of the Government of Haiti requiring former members of the VSN to turn in their weapons and to take the necessary actions to enforce this requirement.

Finally, with respect to Haiti, the President is required to submit a report to Congress 3 months after the date of enactment of this act, and every 3 months thereafter, on the extent to which the actions of the Government of Haiti are consistent with these conditions.

Title III of the bill contains the following fiscal year 1987 authorizations: $65,445,000 for international narcotics control as requested by the President; $75,000,000 for the child survival fund; and $18,189,000 for the operations of the Inspector General of the Agency for International Development.

The increases in authorization for international narcotics control and the child survival fund are offset by excess authorizations in the accounts for health and international organizations and programs. We have discussed these offsets and earmarkings for Haiti with the chairman of the Foreign Operations Appropriations Subcommittee, who is in agreement with the provisions in the bill which are consistent with his mark for fiscal year 1987. As such, the fiscal year 1987 authorizations contained in the substitute are within the budget authority and outlay ceilings set by the budget resolution.

Mr. Chairman, this legislation addresses important, high priority foreign policy issues for the United States—the development of democracy in the strategic Philippine Islands and in our Caribbean neighbor, Haiti. It also increases our capability to combat illegal narcotics production and trafficking, and devotes more resources to improve the well-being of the world's children. We do this by setting priorities, not by increasing the deficit in fiscal year 1987.

Mr. Chairman, I urge the unanimous adoption of this vital initiative.

Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from New York [Mr.

KEMP], who is a principal cosponsor of the legislation.

Mr. KEMP. I thank my chairman.

Mr. Chairman, I thank the gentleman for his extraordinary courtesy, and also my own ranking member from Michigan [Mr. BROOMFIELD].

Mr. Chairman, I join with our colleague from New York, Mr. SOLARZ, and others in supporting this very important project for foreign assistance to the Philippines and to Haiti in the hopes that we could at this very key moment in the life of those two countries encourage their experiment in democracy.

□ 1730

My colleagues, one of the most important areas of the world to the United States of America is the South Pacific. You cannot visit the Philippines and come away with any other conclusion than that their security and prosperity is absolutely critical to our own future and even more importantly to the future of our allies in the Pacific Basin.

Mr. SOLARZ and I, and many other Members, some conservative and some liberal but all concerned deeply about the democratic experiment in the Philippines, have wanted to express at this early time when Mrs. Aquino has become the legitimate democratic leader of the Philippines, support for the effort that she trying to make to further democratize the Philippines. Support for her effort to preserve the bases that this country has for our own strategic interests in the western Pacific.

I think the Solarz amendment helps make up for the cuts in assistance to the Philippines last year. I think it will help make up for the drop in foreign military sales and security assistance and ESF that is coming in the 1987 appropriation. I serve on the appropriation subcommittee which deals with foreign assistance, and I can tell you there is a 40- to 50-percent cut coming in security and economic assistance in those basing right countries the Philippines, Portugal, Spain, Greece, and Turkey. These countries clearly are very integral to the alliance that we are trying to build and the friendships we hope to build around the world.

Mrs. Aquino is undertaking key economic reforms. Mr. SOLARZ pointed out that Jaimi Ongpin, the new Finance Minister, is helping to privatize the economy and provide for market-oriented solutions. Mrs. Aquino herself is a true democrat in the tradition that this country needs to be supportive of.

In the Philippines they are fighting an insurgency. If this Communist insurgency were to prevail, the effect on the Filipino people would be devastating.

I would urge my colleagues to listen to the debate. I would suggest that they resist the temptation to cut. I hope that we can come out of this debate with a strong support of the bill.

I would suggest that Members who are concerned on our side of the aisle about the State Department position, should read the testimony of Secretary of State Shultz in support of providing assistance to the Philippines.

Further economic reforms are needed in the Philippines. We will be watching the new government to see whether or not it implements the economic reforms that provide incentives for entrepreneurship and growth.

Our military assistance to the Philippines is equally vital. The security of our bases depends upon the stability of the Philippines as much as on their continued prosperity of the Philippine people. Only adequate security assistance will assure security from external and internal threats. We must meet our obligations to the Philippines so that they can meet their security requirements.

I want to say to my colleague from New York that I hope we can work together to fashion a bipartisan fiscal year 1987 foreign assistance appropriation bill that is not compromised in terms of the support we want for security in the basing rights countries, our commitments in Central America and for the Camp David countries and other nations.

In short our assistance to the Philippines, as vital as it is, must not come at the expense of our other base rights countries, and our friends and allies elsewhere in the world.

I congratulate the gentleman on his efforts on behalf of this cause, and I join with all of those Members on both sides of the aisle who strongly support this urgent authorization.

□ 1740

Mr. FASCELL. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. I thank the gentleman for yielding to me.

Mr. Chairman, I will be relatively brief. What I would like to do is explain exactly what is in title I of this legislation. Title I, which authorizes supplemental assistance to the Philippines, would provide an authorization for $100 million in ESF funds, and $50 million in military assistance funds to the Philippines which has already been requested by the administration and actually has already been appropriated. There has not yet been an authorization for it, and we thought it would be appropriate, even subsequent to the appropriation, to legitimize it by authorizing the monies as well.

The supplemental, more importantly, contains an additional $250 million in authorization for the Philippines; as budgetary assistance for the 1986 fiscal year. I am pleased to say that that is strongly supported by the Secretary of State and the Department of State who feel as we do that the new government in the Philippines very much needs this additional assistance.

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from New York.

Mr. SOLOMON. I thank the gentleman for yielding to me.

Mr. Chairman, I really appreciate the strong and sincere effort of the gentleman on this issue even though we may disagree. During your comments, if you would just produce the written proof that the State Department, Secretary Shultz and the White House are in favor of this I think it will put a lot of us at ease.

Mr. SOLARZ. I thank the gentleman for that observation. I can only tell him that I do not have a written document in front of me, but I have been told by highest level——

Mr. SOLOMON. Is there one? That is all I am asking.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Florida.

Mr. FASCELL. I thank the gentleman.

Mr. Chairman, let me say that the only written document we have other than the oral assurances that have been made is simply the testimony of the Secretary of State before the committee.

Mr. SOLARZ. When I am informed by the Under Secretary of State that he and the Secretary would very much like to see this legislation approved, I take it to mean that in fact that is the Secretary's position. Because I have confidence in him, I do not demand it in writing or notarized by a notary public.

If the gentleman has some reservations about the accuracy of these representations, we will try to get a document up here before the——

Mr. SOLOMON. If the gentleman will yield, I would say that we have just gone through this over a Soviet grain sale where we thought Secretary Shultz was opposed to this and later on we found out he was in favor of it. I have called the White House and I have called the State Department and I cannot find out who is in favor of what, and that is why I asked the gentleman; I was not trying to put you on the spot.

Mr. SOLARZ. If the gentleman will stay on his feet, if we can give you credible and convincing assurances that the Secretary of State would like this legislation adopted as it is, would you then be prepared to support it?

Mr. SOLOMON. If the gentleman will yield, if he speaks for the adminis-

tration, I might give it some consideration, but let us make sure he does.

Mr. SOLARZ. Of course, I know the gentleman would not want us to be in a posture where I was more supportive of the administration than he was.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Nebraska.

Mr. BEREUTER. I thank the gentleman for yielding.

Mr. Chairman, one statement that has been made in the course of the Foreign Affairs Committee debate and hearings on this subject. The administration responded, in effect: "Well, of course we could spend the money in the Philippines, but we want you to know that we are not asking for it."

I think if the gentleman or others have some disagreement with that construction of their statement, it is important to establish that distinction here. If in fact that is what the gentleman or anyone is construing as an endorsement of this legislation by the administration such a construction would be inappropriate. Would the gentleman agree?

Mr. SOLARZ. I would agree, but that is not what I am saying. I perhaps did not make myself clear. It is my very firm impression, based on what I have been told by representatives of the State Department, including some of the highest officials in the Department, they would like to see this legislation approved. They think the money would be well spent and that it would serve America's national interests.

Mr. BEREUTER. If the gentleman would yield? So the gentleman is suggesting that in fact there has been a change from their statement in the hearing?

Mr. SOLARZ. I do not have the record of the hearing in front of me, but I am giving you what I understand that position to be now. It may be that other agencies of the Government have a different view of the matter, but that is the view of the State Department.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Iowa.

Mr. LEACH of Iowa. I thank the gentleman.

Mr. Chairman, as someone who thinks this authorization is too high, I do think it fair to say that I also have been in personal contact with senior members of the Department of State, and it is the position of senior members of the Department of State that they strongly favor this legislation.

The position reflected at the hearings on the subject was that they welcomed the initiative but they had no formal position. I have been told that the Secretary of State himself does favor this. On the other hand, as we all know, governments sometimes have a hard time getting consensus administration positions, so we are talking about one Department and one Department only.

Mr. SOLARZ. I thank the gentleman for his clarification and observations. Of the $250 million in new money which this would authorize for the Philippines for fiscal year 1986, as a result of an amendment offered in the committee by the gentleman from Iowa [Mr. LEACH], $1,050,000 of it is to be provided to Peace Corps programs in the Philippines. The remainder would be provided to the Government of the Philippines for budgetary assistance.

The legislation would also repeal various earmarks in the current legislation which would be exceeded once the supplemental went into effect and which therefore needs to be removed. Finally, the bill would repeal the prohibition in current law against the sale of lethal military equipment to the military in the Philippines. That was deemed desirable at any earlier point, but now that fundamental military reforms have taken place, it no longer seems either necessary or wise.

Mr. Chairman, I just want to say in conclusion that this is a country, the Philippines where we have enormous strategic interests at stake, they have our most important military facilities anywhere in the world outside of the continental United States. The success of democracy in the Philippines is by no means assured. Communist insurgency continues to operate. This money is clearly needed. It can be put to very good use, and I have no doubt if we do authorize it and ultimately appropriate it, that it will generate enormous good will for the United States.

We have base renegotiations coming up there. This is an investment in the future. I believe that at this critical moment, if the Congress of the United States, with the support of the administration were to make this kind of gesture, it would greatly facilitate the successful conclusion of the base negotiations when they begin in 1989, and they would go a long way toward enabling the new government of the Philippines to contain the continuing Communist insurgency.

The success or failure of democracy in the Philippines will depend more than anything else on the ability of the new government to reverse the economic deterioration which has been going on there for the last several years. In order to do that, they need to deal with the short-term economic crisis.

As the gentleman from New York [Mr. KEMP] pointed out, and as our Ambassador to the Philippines, Steve Bosworth, has said, "The agenda of the new government in the Philippines is our agenda. They have broken up the economic monopolies in sugar and coconuts and other critical sectors. They have begun to sell off inefficient, state-owned enterprises to the private sector. They have begun a massive process of trade liberalization of 1,200 barriers to trade; 600 have already been altered. Tariffs have been reduced, quotas have been removed and import licenses have been eliminated. They are making progress in other fronts also."

In the final analysis, the future of the Philippine economy will depend on the reforms made by the Philippine Government, but it is going to take time for those reforms to have an effect. In the meantime, they face a short-term budget crunch. They have got a $26 billion foreign debt, they have got a budget deficit of over $1 billion. They have got 70 percent of the people living in abject poverty. They are about to conclude a new agreement with the IMF, but they have got to further reduce that $1 billion deficit.

If they engage in additional austerity measures, they are only going to add to the political destabilization of the country given the massive degree of poverty, and it is going to be very difficult for them to borrow additional money with a $26 billion debt hanging over their heads.

So this authorization, and that is all we are talking about at this point, an authorization, is very well timed. With Mrs. Aquino scheduled to come here in September to address a joint session on September 18, I think this would be a very well-appreciated gesture on the part of the Congress and I urge my colleagues to support it. I have a little bit more to say when my very dear friend from New York [Mr. SOLOMON], offers his amendment to snatch away this money from Cory Aquino's treasury.

□ 1750

Mr. SCHEUER. Mr. Chairman, will my colleague yield?

Mr. SOLARZ. I yield to the gentleman from New York.

Mr. SCHEUER. Mr. Chairman, I congratulate my colleague, the gentleman from New York, the chairman of the Asian and Pacific Affairs Subcommittee, and I congratulate the chairman of the full committee, the gentleman from Florida, for their leadership in bringing this important bill to the floor, which I support very much.

I do have a bit of concern, not only about the short-term economic crunch in which the Philippines finds itself, but what about its long term?

Too frequently in our efforts to play the short-term game, we forget about the long-term game and never really address it properly.

The Philippines has the highest rate of population growth in Asia. From

1975 to 1980, the Philippines expanded their population at the rate of slightly over 3 percent a year, which gives them a doubling in about 17 or 18 years.

They have moderated that slightly. Whatever the faults of the Marcos regime, they did take some tentative steps toward distributing family planning information and services. From 1980 to 1985 that rate of population growth went down from a little over 3 percent to about 2½ percent.

It is essential that it be controlled further, especially in terms of employment opportunities. There is no way that the Philippines or any other country can double their jobs in the 20 or 22 years that a 2½-percent rate of population growth gives them when they are on that kind of a doubling curve.

May I ask the gentlemen whether it would be the policy of the Congress and the policy of our Government that some of the wriggle room that they are getting from this economic aid that gives them a little bit of resources to support domestic programs, whether it is our intention to work with them and pressure them and counsel with them to support a higher and more effective level of family planning services, as part of their health services and family planning education in the schools?

Mr. SOLARZ. Well, that, of course, would be a matter for the Filipino government to determine, since the money is being provided as budgetary assistance, although under the procedures under which this is handled, they would have to set aside a peso account which then presumably would be used for developmental purposes. This would certainly be an appropriate use of those peso funds. Given the problems the gentleman has referred to, I certainly hope we would encourage them to use some of it for these reasons.

Mr. SCHEUER. Mr. Chairman, I am going to put in the RECORD a letter that was addressed to the Secretary of State by myself and 17 or 18 other Members of Congress, addressed to exactly this question, the importance of family planning in the Philippines and the response that we received from his office.

Mr. Chairman, I include the following correspondence:

CONGRESS OF THE UNITED STATES,
*Washington, DC, May 9, 1986.*

Hon. GEORGE P. SHULTZ,
*Secretary of State, U.S. Department of State, Washington, DC.*

DEAR MR. SECRETARY: The Administration is to be commended for the constructive role it has played, especially during the last few critical months, in support of the peoples of Haiti and the Philippines. Attention is now directed to the enormous problems these countries face in bringing order out of chaos; and, understandably, they are looking for outside assistance, especially from the United States. But in order for any long term assistance strategy to succeed, an early examination of the fundamental problems hindering reconstruction and development is imperative.

In Haiti, catastrophic environmental devastation must be reversed. With a population growth rate of 2.3% (which means a doubling of the population in 30 years) and a predominantly rural work force, Haiti's hungry and unemployed have ravaged the land in desperate efforts to sustain themselves. The legacy of this is barren hills and an eroded landscape which have replaced once verdant forests and rich valleys. Any effort undertaken to restore Haiti's agriculture, feed its starving population, and create a viable economic resource base, must include efforts to restore the fertility of the land and to address population issues realistically and humanely. Otherwise, there can be no long term solutions to Haiti's problems; indeed they will intensify, accompanied no doubt by rising pressures for illegal immigration to our shores.

In the Philippines, rapid population growth, by far the highest in the ASEAN area, has deeply aggravated conditions of landlessness, unemployment, and extreme poverty which constitute major factors in fueling the communist insurgency. The provincial heart of the insurgency, Mindanao, is one of the poorest regions in the archipelago and, not coincidentally, one with the highest birth rate. If it is to serve as more than a bandaid, foreign aid must include population assistance as a major component of maternal and child health care programs as well as employment, education, industrial growth and agricultural development programs.

These two countries have been close to the U.S. for many years, Haiti by physical proximity and the Philippines by historical ties. The U.S. must now assist the new governments' earnest desires for development and stability. Although underdevelopment and political instability have many causes, it has been recognized that rapid population growth often impedes the best intentioned development efforts. Particularly in an era of budgetary restraint, it is more essential now than ever that scarce foreign aid dollars be spent wisely on projects that look to a sound future and foster long term growth and stability.

One final aspect deserving consideration is that of coordination with non-governmental development organizations. Care must be taken to insure that aid provided by entities such as the World Bank, the Asian Development Bank, the Inter-American Development Bank, the Organization of Economic Cooperation and Development, and various agencies of the United Nations is delivered in a coordinate fashion to avoid duplication and overlap in some sectors and large gaps and fissures in others. Given our close relationship with Haiti and the Philippines, the United States is in an ideal position to provide international leadership in the delivery of reconstruction and development assistance.

We therefore urge that population growth and other basic long term problems receive careful and coordinated attention in any program strategies to assist Haiti and the Philippines.

Sincerely,

James H. Scheuer, Jim Moody, Robert J. Mrazek, John F. Seiberling, John E. Porter, Peter H. Kostmayer, George W. Crockett, Anthony C. Beilenson, Jan Meyers, Frank Horton, Bill Green, Sander M. Levin, Patricia Schroeder, Bill Richardson, Stewart B. McKinney, Michael D. Barnes, Richard J. Durbin, and Buddy MacKay.

---

U.S. DEPARTMENT OF STATE,
*Washington, DC,*

Hon. JAMES H. SCHEUER,
*House of Representatives.*

DEAR CONGRESSMAN SCHEUER: Secretary Shultz has asked me to thank you for the positive and thoughtful letter about our policies in Haiti and the Philippines that you and your colleagues in the House sent him on May 9.

As you know, U.S. development assistance to Haiti and the Philippines, administered by the Agency for International Development (A.I.D.) has been substantial in past years. We expect to continue providing development assistance in the future and during this critical period in which important policy decisions are being made in both of these countries.

There is a need for long term assistance which addresses fundamental issues you cite, including family planning, restoration of agricultural resources, employment creation, industrial growth, and agricultural development. I want to assure you that we will place appropriate emphasis on these issues in our development assistance strategy.

Through A.I.D., the United States has strongly supported the development and institutionalization of family planning in both Haiti and the Philippines. Despite concerted efforts by many people, programs in both countries have room for improvement. A.I.D. is currently working with other donors to ensure that opportunities presented by political change are utilized to strengthen and revitalize family planning programs in these countries. U.S. population policy emphasizes the right of all couples to plan the number and spacing of their children and the importance of family planning for child survival and maternal health. Based on these principles, our population assistance can make a strong contribution to economic growth and development in Haiti and the Philippines.

Sincerely,

JAMES W. DYER,
*Acting Assistant Secretary, Legislative and Intergovernmental Affairs.*

Mr. BROOMFIELD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to join the chairman of our committee, the gentleman from Florida [Mr. FASCELL] as well as the chairman of the Subcommittee on Asian and Pacific Affairs, the gentleman from New York [Mr. SOLARZ] in support of this legislation. I think it is an extremely important piece of legislation. I think it has been very well explained by the gentleman from New York [Mr. KEMP] and the chairman of our full committee and of the subcommittee.

I would like to say that H.R. 5081, the proposed Assistance for Democracy Act of 1986 deserves the support of this House.

Its main purpose is to provide needed support for fledgling democratic governments which have come to

power in the Philippines and Haiti in the last year.

In the case of Haiti, it earmarks economic, development and food aid for fiscal year 1987, as well as a small amount of nonlethal military aid. No increase in existing authorizations for fiscal year 1987 are required, and the aid is subject to significant human rights conditions.

The bill also authorizes further economic and military assistance for the Philippines, a friendly country in which the United States has very significant long-term security interests, not the least of which are Clark Air Force Base and Subic Naval Base.

As has been noted already, H.R. 5081 authorizes $100 million in economic support funds [ESF] and $50 million in grant military assistance [MAP] already appropriated in legislation enacted last month.

More importantly, perhaps, the bill authorizes an additional $250 million in ESF for the Philippines for budget support to the new democratic government of President Aquino for fiscal year 1986. The $250 million would all outlay in fiscal year 1986, and therefore, not adversely affect the tight outlay situation anticipated in the foreign aid budget for fiscal year 1987.

As has been mentioned, democracy is trying to take firmer root in the Philippines. However, as the gentleman from New York has pointed out, the economic, security, and political situation in the Philippines is still unstable. Our economic aid, proposed in this bill, will help President Aquino's government deal with a difficult and disruptive economic situation, inherited in large part from her predecessor.

The Philippines has a staggering external debt burden, significant unemployment, and certainly as we all know, widespread poverty. Nevertheless, there is certainly hope for strengthening the democratic process, the level of prosperity, and the security situation.

For example, President Aquino's administration has a number of high-caliber people working on her economic team. They appear committed to removing stifling government controls on the economy and increasing reliance on market forces to promote economic recovery. Our assistance, together with that of multilateral and other bilateral donors, will help our Filipino friends chances of succeeding in these important reforms. In fact, as I understand from the gentleman from New York [Mr. SOLARZ], what they really need is about a billion dollars.

Another important American contribution to the growth of democratic institutions in the Philippines is the support, with United States Government assistance, which the AFL-CIO's Asian American Free Labor Institute [AAFLI] is providing to the Trade Union Congress of the Philippines [TUCP]. With that support the trade union has been able to establish innovative, income-generating projects which help demonstrate the vitality of Democratic institutions, such as a free labor movement, even in these difficult times.

Last, the bill adjusts the fiscal year 1987 authorization levels to cover proposed fiscal year 1987 foreign-aid appropriations, but there is no net increase in the overall authorization level for these programs.

I urge my colleagues to support this modest and carefully targeted legislation.

Briefly, I want to say in conclusion, Mr. Chairman, and I know there are a number of amendments being proposed on this bill, but I would hope that in the final analysis, the bill we approve tonight would be essentially the same as the bill that was reported out of our committee by a vote of 27 to 2.

Mr. Chairman, I yield 6 minutes to the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. Mr. Chairman, I thank the gentleman from Michigan for yielding. I would hope the gentleman would see fit to give me some additional time.

I oppose this legislation. Since February, we have given the Philippines over half-billion dollars. How much more can they swallow? Now we are asking that the American taxpayer given them an additional $250 million, a quarter-billion more. The Philippines Government has some responsibility, too. The American Government as I see it, is not a dairy cow to be milked, but a strong horse pulling a heavy load.

This legislation brings to mind an incident that happened here on the floor this morning. Yesterday the White House predicted that the Federal budget deficit this fiscal year is going to be $230.2 billion. I think it is an important point to make. The fiscal deficit this year is $230.2 billion.

This morning when we were talking about this on the floor, the chairman of the Democrat Congressional Campaign Committee said that it was Ronald Reagan's fault that we had the $230 billion deficit. It is not Reagan's fault. It is not the American taxpayer's fault. It is the people who vote on the floor here. The people who vote for legislation like this. That is where the fault lies. That is where the resposnsiblity lies.

Now, how much more and how many more times are we going to raid the American taxpayers? It is not the American taxapayer's fault, but the American taxpayer is going to be propagandized in these next 90 days about this huge national deficit.

We have given the Philippines over half a billion dollars. We are asked now to increase our deficit by another quarter-billion dollars so that the Philippine deficit can be less by a quarter-billion dollars. Does that make sense to you? It does not to me.

Did you ever hear of Gramm-Rudman? Gramm-Rudman says that within less than 60 days we have to find $86 billion. By spending an additional quarter-billion dollars here tonight, are we helping in that goal? I do not think so.

We've got problems right here at home with drugs, with agriculture, with trade. Let us take care of our own problems and our own people first for a change. That is something we have not done in the last 40 years.

Now, $250 million more—no, it is not the American people's fault. It is not President Reagan's fault. It is not the Defense Department. It is not the bureaucracy this time. No, it is right here in Congress, but it is not the entire Congress. It is only, those people who vote for this additional funding. Those are the people who have the onus and the responsibility.

Of all the billions of dollars we have given away since the end of the Second World War, how many friends have we bought? Where have American dollars really stopped communism?

We have these people get up here on the floor and say, "We have got to give a few billion more to stop communism."

Where has the American dollar stopped communism?

Here we have $230.2 billion in deficits and we have to find $86 billion in the next 60 days.

I will predict that 435 Congressmen are going home to their precincts within the next 90 days sayings, "We've got a terrible deficit."

A vote like this should be taken from one end of the country to the other. Let the people look at the record. Let the people know the truth about these horrendous deficits. Too many Congressmen like to play Santa Claus, with the taxpayers money. When are we going to learn that we can't buy our friends.

Now, what is one of the solutions? Well, we have had many hearings in our subcommittee. Marcos, we are told and I read in the New York Times that some people in the committee said that he absconded with $2 billion. Well, let us help the Philippines get that money back from Marcos.

But why take it out of the hides of the American taxpayer? That is what we are being asked to do here tonight.

I say, stand up for America and vote against this give away. Members do your own thinking. Read the bill and analyze it.

I heard my good friend, and friends on this floor ask you to do your own thinking, because with a bill like this

there is a lot of smoke. My good friend, the gentleman from New York [Mr. KEMP] said, "Do not cut."

Well, we are not cutting. We already gave the Philippines half a billion. Now we are asked to give them another quarter billion.

My good friend, the gentleman from New York [Mr. SOLARZ] said that the Secretary of State wants this legislation. The gentleman from New York [Mr. SOLARZ], and Mrs. Aquino wants it. We have got to give it to her. She is coming. She is going to pay us a visit.

I say to you, who do you represent, Secretary Shultz? Who do you represent? You represent the American people. Do you think the American people want to go into hock for another quarter-billion dollars? I do not think so.

I wish some of the speakers would address this issue of $86 billion deficit. I wish the speakers would address the issue of Gramm-Rudman and our deficits.

What country is going to come and help us in the next 60 days? We are looking for $86 billion. Can any of you tell me what country is going to come to us and say, "Here, you need money? We have $86 billion here for you to keep you deficits in order." What country is going to do that? What nation will give us the billions we need? What nation will come to our aid?

Let us start taking care of our own American people for a change and attend to our problems right here in our own country.

Mr. BROOMFIELD. Mr. Chairman, I yield 9 minutes to the gentleman from New York [Mr. SOLOMON], a member of our committee.

Mr. SOLOMON. Mr. Chairman, when I was just a little boy I can recall—and I can recall seeing it time and again on old news reels—that there was a fellow in the Congress, his name was Everett Dirksen, and he said, "A billion dollars here, a billion there, pretty soon you are talking about a lot of money." I have heard people stand up here today and say, "Don't worry, this $250 million we are talking about does not increase the deficit in 1987 because it is in 1986." What does it do to 1986, I would ask anybody that is here?

Mr. Chairman, a little bit later on I will be offering an amendment.

The amendment I will be offering with the gentleman from Nebraska [Mr. BEREUTER] is very straightforward. It would simply eliminate the authorization for this fiscal year of $250 million in economic support funds for the Philippines. I am convinced that authorization of additional assistance of this magnitude—for this fiscal year—is totally unwarranted. Moreover, I believe the proposal for the this additional assistance represents an attempt to make an end run around the Gramm-Rudman-Hollings process.

As I said, this bill would authorize an additional $250 million in ESF for the Philippines for the current fiscal year. But, Mr. Chairman, the House has already passed a conference report on supplemental appropriations that contained in full the administration's request for an additional $100 million in ESF and $50 million in military grants for the Philippines. On top of this amount, the administration has accelerated the flow of $200 million in ESF already in the pipeline. And another $100 million in development loans have been converted into grants.

If you add up these and all of the other initiatives launched by the administration, you get a figure of more than $500 million. We have provided the Philippines with more than $500 million this fiscal year—just since February. Given this extraordinary demonstration of American generosity over the pst 6 months—extraordinary generosity during a time of severe budgetary stringency in our own country—can we really justify another $250 million for the Philippines between now and October 1? Must we rush in with another $250 million before the International Monetary Fund has completed its study of the Philippines' budget and come to terms with that government on a stabilization program?

I am also deeply concerned about the nature of this additional assistance. This bill proposes essentially a cash transfer of $250 million from our Treasury to the Government of the Philippines. Not only does this represent the novel idea of increasing our own deficit in order to lower the Philippines' deficit, the size and timing of this additional assistance raise serious questions about the capacity of the Philippines to absorb it effectively.

Section 103 of the bill admits as much by requiring that the funds to be made available under this bill be kept by the Government of the Philippines in a separate account, not to be commingled with any other funds. I am pleased with this provision—and I believe that such a provision implicitly recognizes the unusual nature of this aid proposal. Frankly, we would be well advised to hold off on any further assistance until we can at least study how they are using the aid they are already receiving.

Finally, Mr. Chairman, I would like to make a couple of observations.

I suggested a moment ago that this aid proposal for the Philippines represents an end run around the Gramm-Rudman-Hollings process. Let me just elaborate on that to say that the extra $250 million in this bill will have to come from somewhere. In the zero-sum game that Congress is now playing, these $250 million will have to be taken from some other account somewhere—or, we can take the easy way out and just add it on to the deficit. My point is, Mr. Chairman, where and when does it all stop? Do our efforts at deficit reduction really mean something? Or have we just gone back to business as usual, throwing money at any and every problem that comes along?

We will soon have to consider a foreign assistance appropriations bill—a bill that, as every Member knows, exempts four countries from mandatory reductions in their aid programs. The Philippines is not one of those countries. Whatever may be the merits or demerits of what the Appropriations Committee is recommending, at least the members are being straightforward as to where they believe America's foreign aid priorities are. I find that approach to be much more preferable than the back-door method in this bill, which is just one more attempt to nickel and dime to death all of our attempts to get the budget under control.

One concluding observation, Mr. Chairman, would be this: We cannot do for the Philippines what the Philippines can and must do for itself. Money does not grow on trees—and the days when America can deal with any problem at home or abroad by simply writing a blank check are long gone. But getting back to the Philippines, I was interested to read in the July 22 edition of the New York Times the following news item from Manila:

> President Corazon C. Aquino castigated private enterprise today for what she said was a wait-and-see attitude that has slowed the economic recovery of the Philippines.
>
> Speaking to Philippine and foreign business leaders, who were among her strongest backers during the election last February, she said the support they had pledged to her new administration "has not been forthcoming."

Why is private enterprise, foreign and domestic, hesitating to invest in the new Philippines because the new government is making the same mistakes that the Marcos government made. They are not expeditiously making the political, military, and especially economic reforms necessary to instill confidence from the private sector, specifically, they are not strongly guaranteeing that future investments will not be nationalized, and who in their right mind would invest without that guarantee?

Second, the new government continues to refuse to say whether they will renew our base agreements and should they force us out, who in their right mind will invest without that guarantee?

Last, where are the guarantees that any of the $750 million will be spent in the United States—have you been to the Philippines lately? Did you see any American goods there? Did you see one American car there? No, but

you did see thousands and thousands of Japanese cars there.

Yes; we are about to increase our gift by $250 million totaling about $1 billion which we don't have to give and most of that money will probably end up in Japan. And if so, why isn't Japan offering to shoulder half of this gift instead of zero.

Finally, let me just ask why is this extra cash gift of $250 million being rushed through the Congress in this manner? It's because our fiscal year ends in less than 60 days and if we pass this now, the Congress can come back 60 days from now after the new year starts and give them another $250 million.

Mr. Chairman, I will say it again: We cannot do for the Philippines what the Philippines can and must do for itself. Aid is not enough. Trade and investment are equally as important. And if the Philippine economic establishment does not have enough confidence in the future of the country to be willing to put their money where their mouth is, no amount of American largesse will be sufficient to bail out the country.

□ 1805

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Nebraska [Mr. BEREUTER], a member of the Committee on Foreign Affairs.

Mr. BEREUTER. Mr. Chairman, I thank the ranking minority member of our committee for yielding me this time.

Mr. Chairman, I want to remind my colleagues who are watching this debate that this bill has three titles. The third title is one that has several provisions which are very important and quite commendable.

Title II is related to the country of Haiti.

I find title II to be extraordinarily helpful, well-constructed, and needed legislation, and I want to commend in particular Chairman FASCELL for his effort in pulling together the concerns and interests regarding Haiti and moving it into legislative form.

I think, based upon some meetings, discussions that I was involved in, that Chairman FASCELL probably also had substantial help from Members of this body like the gentleman from the District of Columbia [Mr. FAUNTROY], the gentleman from Minnesota [Mr. OBERSTAR], and others. Certainly, I am totally supportive of what title II contains.

Indeed, I am the only member of the Foreign Affairs Committee who voted "present" when this came up the three-title substitute before the Foreign Affairs Committee on very short notice because I felt so strongly that it was difficult for me to cast a vote against the aid to Haiti. That aid is desperately needed. I vote present at that stage after arguing for a cut in the increased aid for the Philippines in the hope that it might have some influence on the managers of the legislation as they considered the preparation of floor amendments.

Let us move to title I. I cannot support the legislation in its current form only because of title I. The additional $250 million "to be paid before October 1, 1986, on a grant basis for budget support" to the Philippines seems to me can only be regarded as an excessive amount of authorization.

In expressing their opposition to this additional authorization above the Administration's request I would mention that I am not a Johnny-comelately in supporting President Aquino. I have for a number of years been working in some small areas trying to move us away from the kind of bargaining position that we found ourselves in on bare rights with the Marcos regime. I am totally supportive of the effort to restore democracy to the Philippines.

□ 1815

But a cool $250 million delivered, and "to be paid before October 1, 1986," on top of the generosity of the authorizations and appropriations which we have already seen this body approve the executive branch implement, is truly excessive. It is $250 million that we cannot afford to so generously give to President Aquino and the Philippines on a silver platter at this time.

The gentleman from New York [Mr. SOLOMON] my colleague as a Member of the Foreign Affairs Committee, will be offering an amendment to eliminate that additional $250 million. I believe that the Solomon amendment is an amendment that responsible Members of this body can readily support. Members who support the presidency of President Aquino and who support a movement toward democracy in the Philippines, can also support the Solomon amendment in good conscience and thus be fair and responsible to the taxpayers, and accordingly demonstrate their concern about the deficit of this country.

We the American people have been generous to the Phillippines. We are generous. We intend to be generous. Supporting the Solomon amendment will change this legislation, all three titles, into a form that all of us can support. I urge adoption of the Solomon amendment when it is offered.

Mr. BROOMFIELD. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from New York [Mr. GILMAN] a member of the committee.

Mr. GILMAN. Mr. Chairman, I rise in support of H.R. 5081, the Assistance for Democracy Act of 1986, which provides additional assistance to the Philippines and Haiti, and which increases funding levels for the international narcotics assistance programs of the United States.

Mr. Chairman, I cannot think of more deserving objects of U.S. assistance then the fledgling democracies of Haiti and the Philippines and our efforts to combat drug cultivation and trafficking abroad.

This legislation was crafted in a bipartisan fashion in our Committee on Foreign Affairs—with special participation by the Haiti Task Force, which includes members with a special concern for Haiti even though they are not on our committee. In this connection, I would like to pay special tribute to the gentleman from the District of Columbia [Mr. FAUNTROY], who has shown special leadership in this effort. I would also like to thank the distinguished chairman of the committee the gentleman from Florida [Mr. FASCELL], and our ranking minority member, the gentleman from Michigan [Mr. BROOMFIELD], each of whom have been supportive of the move to provide new funding for these important programs. This legislation includes special provisions, recognizing the changed nature of the goverments of Haiti and the Philippines which, for example, modify or repeal some of the special strictures which we had imposed on our aid.

Both governments are facing difficult moments in the months ahead. Haiti is suffering badly from economic stagnation and erosion of its natural resources. It has almost no experience with democracy, and is now engaged in an attempt to build democratic structures so that the people can, at last, govern themselves. The transition to democracy will not be easy, and we have to be both tolerant and helpful, where ever we can, as the new government finds its way.

This bill provides $109 million in economic aid; $36 million in economic support funds, $37 million in development assistance, $35 million in Public Law 480 food aid, and $1 million for the Inter-American Foundation's program in Haiti. The bill contains conditions so that we can monitor the actions of the present provisional government in human rights, a transition for free and open elections, cooperation with the United States in establishing a development assistance program, and the like. Four million dollars will be available in grant military assistance, restricted to nonlethal items only, and subject to appropirate human rights conditions.

Our relationship with the Philippines is a strong one that goes back many years. We were deeply troubled by the actions of the former government, especially in its later years, as it increasingly showed that it was willing to ignore the wishes of the majority of the people. A revolutionary government—representing, however, the will

of the majority, as expressed in the last election—has now come to power. We have close relations with the Aquino government, and we hope those relations will continue to improve over the next months and years. We have crucial security interests in the Far East, which necessitate the continuation of our basing rights in Subic Bay and Clark Air Base. We should support today's legislation so that we can help the Philippines begin the difficult job of reconstructing its economy.

This legislation provides $150 million in economic support fund assistance and $100 million in grant military assistance already appropriated in the recently enacted supplemental appropriation. An additional $250 million in economic support fund are also authorized.

Finally, Mr. Chairman, the committee increased funding for international narcotics control to the executive branch request level. Additional resources are sorely needed to combat the rising tide of drugs from abroad that are literally drowning us. These funds will be used for narcotics interdiction and eradication efforts abroad.

This measure also increases by $50 million the budget authority for the child survival fund. That program is used, for example, for the distribution of vaccines and salts for oral rehydration.

Mr. Chairman, this is sound legislation, addressing important needs, and deserving of our votes. Accordingly, I urge my colleagues to support it.

Mr. SOLARZ. Mr. Chairman, to do battle on behalf of the legions of truth against the hosts of error, I yield 5 minutes to the very distinguished gentleman from New Jersey [Mr. TORRICELLI].

Mr. TORRICELLI. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, let me first offer my congratulations, because I see just as certainly as the miracle of Manila was a victory for the Philippine people in the struggle for their own freedom, under the leadership of the gentleman from Flordia [Mr. FASCELL], and the gentleman from New York [Mr. SOLARZ], it can be said that this Congress in formulating a foreign policy and in protecting the interests of our country has never had a prouder moment. To them we all owe our thanks and congratulations.

Before considering this bill today, however, it is important to understand just what it is that happened in Manila. You see, there was no final victory. Democracy in the Philippines was not restored for all time.

What Mrs. Aquino, what the victory of her people have given their people is a chance, a brief opportunity in time to build institutions, a belief in democracy, to restore a civil life to an embattled people. That is their chance.

No final victory over poverty. It has not ended. But a chance to reform an economy, to build a belief in a democratic system, a chance.

Finally, and most certainly, no victory in a cruel and devastating civil war where Communist insurgency threatens the future of a people and their nation. Only a chance, only a brief opportunity to win that struggle and hold democracy for another generation.

Today, perhaps, if the legislation is accepted, America joins that struggle. The people of the Philippines did their part. It was their fight on the streets of Manila, with enormous sacrifice. Today they look to us to make that democracy, prosperity and an end of war more than just a chance.

I heard the gentleman from Wisconsin [Mr. ROTH], and I know his point. This is not an American struggle.

But it is. Only a generation ago in this Congress we decided to send a quarter of a million Americans to their deaths in the Pacific in part, indeed in large part that the Philippines would be free, to end a war. Today is that struggle any less important? Would you rise any less to the challenge?

I know the sacrifices have already been great, $400 million in assistance. Much of it will not be spent for years. Most of it was committed previously to the Marcos government. That is a measure of our commitment to bases, and it is a measure of our commitment to the Marcos government. It does not begin to put Americans shoulder to shoulder with the Philippine people in their new struggle for democracy.

□ 1825

I know in a time of deficit it is a sacrifice; takes some measure of it. This bill, if taken to its full measure, is one-tenth of 1 percent of our deficit. That, for the Philippines, a nation on the very front lines of the struggle for freedom, the first nation in the Pacific confronting the Soviet fleet and air force, the only nation that can claim a colonial heritage to America, the nation that represents the greatest victory in American foreign policy in this decade. One-tenth of 1 percent.

Mr. Chairman, the people of the Philippines have met the challenge. I ask that our colleagues, that our country meet that challenge today. Claiming to be the leader of the free world is more than a title, it is a responsibility. Defense is more than weapons. Occasionally, it is a sacrifice. That is what we are called upon here today.

I urge an affirmative vote to follow the leadership of Mr. FASCELL and Mr. SOLARZ, and complement the victory of the Philippine people.

Mr. LEACH of Iowa. Mr. Chairman, I yield 3 minutes to the gentleman from New Jersey [Mr. SMITH], who has played such a crucial role in crafting out one section of this bill.

Mr. SMITH of New Jersey. Mr. Chairman, I would like to focus just for a few moments on title III, section 302 of the bill.

Mr. Chairman, one of the most heartbreaking tragedies of our time is the prevalence of sickness, malnutrition, and death of the world's children. In the developing world, more than 20 million children die each year from malnutrition and preventable, curable diseases. Looked at another way, more than 54,000 children die each day, the victims of such treatable and preventable ailments as measles, polio, diphtheria, tetanus, pertussis, and diarrheal dehydration.

But, Mr. Chairman, there is reason to have great hope that we can alleviate a tremendous amount of this suffering in the immediate future. Title III of the bill pushes the budget authority for the child survival fund to $75 million in fiscal year 1987. This increase will save thousands of lives and is totally justified.

Mr. Chairman, there can be no doubt that the work financed through the child survival fund is today helping to advance the so-called child survival revolution. For the child survival fund promotes low-cost, extremely effective health care techniques like massive immunizations and oral rehydration therapy [ORT] which help battle these debilitating diseases.

Mr. Chairman, as you may know, a feature component of the child survival fund is the promotion of immunization programs to prevent such devastating diseases as pertussis, tetanus, polio, diphtheria, and measles. Immunizations are often taken for granted by Americans. Protection from these crippling diseases, in the developing world, however, is a relatively recent phenomenon. In the last several years, many developing nations have embarked on comprehensive programs to immunize their child populations.

Mr. Chairman, another feature component of the child survival fund is the oral rehydration therapy [ORT], a revolutionary health technique which treats children who suffer from diarrheal dehydration.

Mr. Chairman, as incredible as it may sound, diarrheal dehydration is the main cause of child death—and a major cause of child malnutrition in developing countries. According to UNICEF, the average child living in a poor community in the developing world will suffer an attack of diarreal infection somewhere between two and six times per year. Every episode of diarrhea lowers the child's nutritional level and every occurrence carries with it the risk of death from dehydration. UNICEF points out that in a country like Bangladesh, diarrheal dehydra-

tion kills almost 10 percent of all children.

Mr. Chairman, oral rehydration is perhaps the simplist and most dramatic lifesaving technique promoted by the child survival fund. Previously, the only cure for children suffering from diarrheal dehydration was costly and often unavailable intraveneous therapy. Now, however, it can be treated, successfully, by orally taking a simple formula of salt and glucose with water. The mixture cost only pennies each dose and according to UNICEF, an estimated half million children were saved by oral rehydration therapy in 1984.

Mr. Chairman, other simple techniques including breast feeding and growth monitoring enhance and preserve the lives of children and are featured and promoted by the child survival fund. Boosting the child survival fund to $75 will help us better meet the needs of the world's children.

Mr. Chairman, in more than 75 countries around the world, young and helpless children have benefited from the child survival fund's support of the ORT, immunizations, growth monitoring, and breast feeding. And while so many lives have been saved, countless more are in need of our help.

Mr. Chairman, at present, only 15 percent of the world's families whose children could be saved by child survival fund methods are aware of these lifesaving procedures. UNICEF has estimated that we could bring all four phases of the child survival fund/revolution to the world's children at the low cost of $10 per child.

In closing, Mr. Chairman, I would like to remind my colleagues that there are millions of children who suffer needlessly, who daily endure nightmarish pains and physical deterioration which accompany diarrheal dehydration and malnutrition. And while we must all be mindful of our budget responsibilities and limitations, the costs of this program is modest in comparison to the benefits.

Mr. FAUNTROY. Mr. Chairman, I rise in strong support of H.R. 5081, the Assistance for Democracy Act of 1986. As chairman of the Congressional Task Force of Haiti I will confine my statement to title II—promoting democracy in Haiti. I do, however, want to congratulate our distinguished colleague, Chairman STEPHEN J. SOLARZ, whose leadership on the Subcommittee on Asian and Pacific Affairs and on our relations with the Philippines is so well reflected in title I of this bill. I enthusiastically support the authorizations provided for in title I—promoting democracy in the Philippines and the aspirations of the people of that nation for a democratic future.

I want to express my appreciation to the chairman of the Committee on Foreign Affairs, DANTE FASCELL, for the care and cooperative spirit given and tended during the process of crafting the sections of this legislation which have as their purpose assisting the courageous Haitian people in a transition to democracy. I also want to commend the staff representing the members of the Congressional Task Force on Haiti who put in many hours and proceeded carefully and artfully in their work on title II.

Section 202 earmarks $109 million in economic assistance for Haiti in fiscal year 1987, not less than $36 million in economic support funds, not less than $37 million in development assistance, not less than $35 million in Public Law 480 food assistance, and not less than $1 million for the inter-American foundation for programs in Haiti. The funds authorized in section 202 are to be used to support job creation, rural development, health care and sanitation, small scale irrigation, reforestation and land conservation, and literacy education.

I am very pleased also that the committee in its report recognizes the efforts of the interim Government of Haiti to take legal actions throughout the globe attempting to recoup funds and other properties allegedly stolen by those associated with the Duvalier dictatorship. The return of such resources in significant amounts could have a major impact on the Government of Haiti's fiscal position and on efforts to promote economic recovery and national reconstruction. With this in mind, the committee report notes that Haiti has experienced difficulty in accumulating the collateral required to attain court adjudication of its claims. Therefore, the committee in its wisdom believes that our Government should seek every appropriate method to assist Haiti with this problem including providing economic support funds to Haiti for meeting this objective.

Section 202 also reflects a proper and necessary concern for a democratic transition and human rights in Haiti by stipulating a number of important benchmarks. Funds earmarked for Haiti in economic support and development assistance may be obligated only if the President determines that the interim Government of Haiti is:

Implementing its timetable for completion of a new constitution that promotes genuine democratic reforms and guarantees the fundamental principles of democracy;

Establishing a framework for free and open elections leading to a democratically elected civilian government, which would include free and functioning political parties and associations, free labor unions, and freedom of the press;

Continuing its investigation of alleged human rights abuses and corruption by the Duvalier government and is prosecuting, in accordance with due process, those responsible for human rights abuses and corruption; and

Maintaining a free and independent judiciary system.

Additional, conditionality seeks to insure that the resources authorized in this section are used efficiently. Specifically, the President must also determine that the interim Government of Haiti is:

Cooperating fully in implementing United States development, food and other economic assistance programs in Haiti (including programs for prior fiscal years); and

Maintaining a system of fiscal accountability to ensure that all resources allocated to the development of Haiti are used in the most effective and efficient manner.

Economic support funds authorized under section 202 and provided to the Government of Haiti are required to be deposited in a segregated account and maintained separately from other financial resources of the Government of Haiti.

Section 203 seeks to promote a dramatic transformation of the Haitian Armed Forces, to define through this authorization the purposes and delineate with strict and tight conditionality the provision of any appropriations for military assistance to Haiti. Section 203 sets a ceiling of $4 million in such assistance, and restricts this assistance to international military education and training and nonlethal forms such as transportation equipment, communications equipment, and uniforms. The Congressional Task Force on Haiti's concern that such assistance only be used to reform and reorganize the security forces in a manner congruent to democratic and constitutional government is reflected in the conditions that must be satisfied prior to the allocation of such assistance.

Under these provisions assistance can be provided only if the President certifies that:

The Government of Haiti has submitted a formal request specifying a comprehensive plan for the reform and reorganization of the mission, command, and control structures of the Haitian Armed Forces consistent with a transition to democracy, the rule of law, constitutional law, and an elected civilian government. It should be noted that a considerable effort has been made by the Congressional Task Force on Haiti to analyze the Haitian Armed Forces. It has been concluded that it is imperative that such units as the Dessalines Tactical Battalion, the Leopards, the Presidential Guard, and the Service Detective be restructured to perform functions other than internal security, such as securing the borders of Haiti, and civic action, such as rebuilding the physical infrastructure of Haiti. It is also clear that such a restructuring will require new command and control and the dispersal or dismantling of these units into other newly formed units. We don't want this assistance in the wrong hands.

Additionally, and also prior to the allocation of any appropriations under section 203 the President must certify to the Congress that the Government of Haiti is making substantial effort:

To prevent the involvement of the Haitian Armed Forces in human rights abuses and corruption by removing from those forces and prosecuting, in accordance with due process, those military personnel responsible for the human rights abuses and corruption;

To ensure that freedom of speech and assembly are respected;

To conduct investigations into the killings of unarmed civilians in Gonaives, Martissant, and Fort Dimanche, to prosecute, in accordance with due process, those responsible for those killings and to prevent any similar occurrences in the future;

To provide education and training to the Haitian Armed Forces with respect to internationally recognized human rights and the political and civil rights essential to democracy, in

order to enable those forces to function consistent with those rights; and

To take steps to implement the policy of the Government of Haiti requiring former members of the Volunteers for National Security [VSN] to turn in their weapons and to take the necessary actions to enforce this requirement.

Section 203 also specifies that no allocations may be made for military assistance until the President certifies to Congress that Haiti has taken the required actions. This provision also requires that following certification, the Committee on Appropriations and the Committee on Foreign Affairs of this body and the Committee on Appropriations and the Committee on Foreign Affairs of the Senate must be notified 15 days in advance of an obligation of funds. The bill further provides that half of the assistance in section 203 be withheld from delivery until the President submits the first of a required series of reports on the Government of Haiti's compliance with the conditionality legislated in this section.

In laying down these conditions the committee reflects the view of the Congressional Task Force on Haiti that any allocation of military assistance by our Government be provided in a very cautious and careful manner that does not undermine but supports a transition to democracy. It is clearly the intent of all who worked on title II that this nonlethal assistance be disbursed only in a phased manner to encourage reform and reorganization of the security forces as set out in section 203.

It is the intent of this legislation that should the Government of Haiti fail to act in a manner consistent with the conditions on assistance to which the President has certified, military assistance will cease.

Mr. Chairman, this legislation in its authorization level of $109 million for economic assistance, in its priorities, purposes, and conditionality establishes the correct framework for our Nation's policy toward Haiti at this moment of historical significance. We all wish the Haitian people a better future, one of democratic participation, respect for human rights, economic justice, and national recovery. This legislation can help in the attainment of those objectives.

Haiti and the Philippines need our assistance, now, not later. I urge my colleagues to support this legislation, the Assistance for Democracy Act of 1986.

Mr. JEFFORDS. Mr. Chairman, as one with a longtime interest in Philippine affairs, I am very pleased that legislation was requested by the administration and swiftly acted upon by the Committee on Foreign Affairs. There was tremendous euphoria in this House and all over America when Corazon Aquino became the President of the Philippines. We must now follow through to provide the assistance that the Philippines so badly needs to help carry out her policies and reforms.

During her first 5 months in office, President Aquino has faced challenges from many sides. The broad coalition that supports Cory Aquino made her election possible, but also makes governing very complicated. The President must spend a great deal of time and energy preserving consensus and developing a unified set of goals for the future.

The Aquino government is attempting to revive the economy while providing some relief from the grave poverty in which many Filipinos live. Mrs. Aquino faces challenges from Marcos supporters on the right and communist guerrillas on the left. Fortunately, the President seems to have withstood the most serious threat to her government from the Marcos group. Not only did she handle the coup attempt with appropriate skill and calm, but the obvious disintegration of support for the Marcos group considerably strengthened her position. Developing a successful policy to curtail the Communist guerrillas will take more time, but there are promising developments already. Most importantly, the Aquino government is genuinely committed to bringing about national reconciliation and ending the strife that has plagued the nation in recent years.

America lavished its congratulations upon the Philippines when it successfully returned to democracy. Now we must back up those words with the economic aid that the nation so badly needs and the government has so urgently requested.

This legislation authorized $100 million in economic support funds and $50 million in military assistance for fiscal year 1986. These funds already have been appropriated as part of the urgent supplemental appropriations package. In addition, H.R. 5081 contains new budget authority of $250 million for budget and economic support for the Aquino government. Of these funds, $100 million would be converted from loans to grant aid.

I would also like to point out that the Aquino government has available to it $400 million in economic assistance and $50 million in military aid appropriated in prior years. Earlier this year, these funds were held back by the administration until there was a successful transfer of power to a democratic government. The Aquino government has applied for most of this funding, which is expected to be obligated in the near future. However, we are already at the end of fiscal year 1986, and little time remains for dispensing these funds.

Unfortunately, the current financial situation of our own Government prevents us from being as generous with the Philippines as we would like to be. The deficit requires cutbacks in all Federal spending and there is a growing possibility that Gramm-Rudman may force a painful sequestration order in a couple of months. Therefore, I feel compelled to support the amendment of my colleague, Mr. LEACH, which sets the new budget authority for fiscal year 1986 at $200 million and requests that $180 million for economic assistance be earmarked in fiscal year 1987. Realistically, $200 million is still more than the Aquino government will be able to assume before the end of the fiscal year. By requesting that fiscal year 1987 funds be earmarked, Mr. LEACH provides a clear assurance of continued support next year. In view of the circumstances, I believe that the gentleman's amendment is the proper course to follow.

In closing, let me briefly touch on title III of the bill, which provides for the transfer of $50 million in budget authority to the Child Survival Fund. As my colleagues know, this fund provides assistance to AID, UNICEF, and private voluntary organizations for effective health assistance to mothers and children. Through such simple measures as vaccination against common childhood diseases and oral rehydration therapy, major causes of death among Third World children can be eliminated. I am very pleased that this legislation provides much-needed funding for this very vital program.

I urge all my colleagues to support this legislation.

Mr. LEACH of Iowa. Mr. Chairman, I yield back the balance of my time.

Mr. FASCELL. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the committee amendment in the nature of a substitute, now printed in the reported bill as an original bill for the purpose of amendment, shall be considered by titles, and each title shall be considered as having been read. No amendments to title I or title II are in order except germane amendments printed in the CONGRESSIONAL RECORD by August 5, 1986.

The Clerk will designate section 1.

The text of section 1 is as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE

This Act may be cited as the "Assistance for Democracy Act of 1986".

The CHAIRMAN. The Clerk will designate title I.

The text of title I is as follows:

TITLE I—PROMOTING DEMOCRACY IN THE PHILIPPINES

SEC. 101. FINDINGS CONCERNING THE PHILIPPINES.

The Congress finds that—

(1) the restoration of democracy through the inauguration of President Corazon Aquino provides the Philippines with an opportunity to rebuild the social and economic institutions necessary to achieve growth, prosperity, and stability for the benefit of the people of the Philippines and the countries of the entire region; and

(2) the economic security issues confronting the Philippines make the task of achieving these objectives extremely difficult, depending in significant measure on—

(A) the ability of the Government of the Philippines to undertake significant economic and military reforms, and

(B) the willingness of the United States and other supporters of democracy to assist the Government of the Philippines in those efforts.

SEC. 102. AUTHORIZATIONS OF ADDITIONAL ECONOMIC AND MILITARY ASSISTANCE FOR THE PHILIPPINES.

In addition to amounts otherwise authorized to be appropriated for such purposes, the following amounts are authorized to be appropriated to the President for the fiscal year 1986 for assistance for the Philippines:

(1) ECONOMIC SUPPORT FUND: Assistance under chapter 4 of part II of the Foreign Assistance Act of 1961—

(A) $100,000,000, plus

(B) an additional $250,000,000 to be paid before October 1, 1986, to the Government of the Philippines on a grant basis for budget support, except that $1,050,000 of this amount shall be transferred to the Peace Corps for programs in the Philippines under the Peace Corps Act.

(2) GRANT MILITARY ASSISTANCE: Assistance under chapter 2 of part II of the Foreign Assistance Act of 1961, $50,000,000.

SEC. 103. REQUIREMENT FOR SEGREGATED ACCOUNT FOR ECONOMIC ASSISTANCE FUNDS.

Economic assistance funds authorized to be appropriated by paragraph (1) of section 102 of this Act may be paid to the Government of the Philippines only if the Government of the Philippines will maintain those funds in a separate account and not commingle them with other funds.

SEC. 104 PROHIBITION ON USE OF PREVIOUSLY APPROPRIATED FUNDS TO PROVIDE ADDITIONAL ECONOMIC ASSISTANCE FOR THE PHILIPPINES.

The additional appropriations for economic assistance for the Philippines authorized by paragraph (1)(B) of section 102 may not be derived (by transfer or other means) from funds previously appropriated for other purposes.

SEC. 105. REPEAL OF LIMITATIONS.

Subsections (d) and (e) of section 901 of the International Security and Development Cooperation Act of 1985 (relating to amounts of assistance and prohibiting lethal assistance for the Philippines) are repealed.

SEC. 106. FILIPINO-AMERICAN CONTRIBUTIONS OF PROFESSIONAL SERVICES TO ASSIST DEVELOPMENT EFFORTS IN THE PHILIPPINES.

The Congress urges the Administrator of the Agency for International Development to use funds allocated for development assistance purposes in the Philippines to support programs of private and voluntary organizations pursuant to which Filipino-Americans with appropriate professional expertise serve in the Philippines on a volunteer basis, using their expertise to assist economic and social development efforts in areas of the greatest need.

The CHAIRMAN. Are there any amendments to title I?

AMENDMENT OFFERED BY MR. LEACH OF IOWA

Mr. LEACH of Iowa. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEACH of Iowa: Page 5, beginning in line 1, strike out "$250,000,000 to be paid before October 1, 1986, to the Government of the Philippines on a grant basis for budget support," and insert in lieu thereof "$200,000,000 to be paid to the Government of the Philippines before October 1, 1986,"; and page 6, after line 16, add the following:

SEC. 107. EARMARKING ASSISTANCE FOR THE PHILIPPINES FOR FISCAL YEAR 1987.

Of the aggregate amounts made available for the fiscal year 1987 for assistance under chapter 2 of part II of the Foreign Assistance Act of 1961 (relating to grant military assistance), under chapter 4 of part II of that Act (relating to the economic support fund), or under the Arms Export Control Act (relating to foreign military sales financing), not less than $180,000,000 shall be available only for the Philippines.

Mr. LEACH of Iowa (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. LEACH of Iowa. Mr. Chairman, the amendment I am offering does three things. First, it would reduce the authorization for $250 million in economic support funds [ESF] for the Philippines by 20 percent—or $50 million—to $200 million. Second, it would strike the requirement from the bill that the additional ESF funds for the Philippines be used exclusively for budget support. Finally, it would add a new section to the bill to earmark certain fiscal year 1987 foreign aid funds to make clear Congress intent to abide by U.S. obligations with respect to our base rights in the Philippines.

There is no question the American people stand in awe of what the Filipino people, under the leadership of Mrs. Aquino, have done to bring about the peaceful restoration of democracy in the Philippines. Both the administration and the Congress have demonstrated strong support for the new government of this crucial ally.

By perspective, however, it should be stressed as the gentleman from New York [Mr. SOLOMON] has, that on April 23, 1986, the President announced a comprehensive package of U.S. economic and military assistance to the Aquino government, including a request to Congress for a fiscal year 1986 supplemental appropriation of $150 million—$100 million in ESF and $50 million in grant military aid [MAP]—an 83-percent increase over the average United States annual payment of ESF and military assistance to the Philippines. The President's package also included the accelerated disbursement of $200 million in already available ESF funds, the conversion of $100 million in development assistance loans to grants, an increase in Public Law 480 food assistance, and a number of other measures, including some intended to be responsive to the trade and investment problems of the Philippines.

The entire package proposed by the President represents nearly $600 million in benefits, apart from the other nonmonetary trade and investment initiatives. Of that total, over $500 million is in the form of economic-related assistance.

Subsequent to the administration's initiative, a proposal for a second fiscal year 1986 supplemental of $250 million in ESF emerged in this bill. My most serious reservations about this approach relate to the size of the new authorization as well as the manner in which U.S. assistance is mandated to be provided by H.R. 5081.

Given the budget constraints in Washington, I am particularly concerned that the prospect of House and Senate approval of an appropriation to match an authorization of this magnitude is slim. Thus, holding out the promise to the Philippines of such a substantial grant without following through with delivery, runs the risk of undercutting United States-Philippine relations by unnecessarily raising false expectations and unnecessarily causing a legislative-executive rift in foreign policy.

Unlike the President's supplemental request, for which there were offsetting rescissions in the Defense Department's budget, H.R. 5081 is explicitly intended to add $250 million to the Federal budget deficit with no offsetting rescissions. By perspective, the Philippine debt is smaller in relation to its GNP than ours is to the United States GNP. The concerns expressed earlier in the debate by the gentleman from Wisconsin [Mr. ROTH] cannot be taken lightly. Creating U.S. debt simply to reduce foreign debt is dubious monetary policy.

Furthermore, according to figures provided to the House by the Budget Committee on July 17, the Appropriations Committee is only $226 million below its allocation for budget authority for fiscal year 1986. It is doubtful the Appropriations Committee would approve the addition of a full $250 million more for the Philippines knowing it would put the House over the budget resolution ceiling. Adoption of this amendment brings proposed spending back under budget resolution guidelines.

My amendment also strikes language from section 102 which requires the administration to simply turn over this additional ESF to the Philippines as general budget support. The administration should be given the flexibility and leverage it needs to channel U.S. aid resources in the right direction and under the right terms.

Finally, the amendment I am offering would earmark, from fiscal year 1987 funds, $180 million for the Philippines in combined ESF, grant military aid, and foreign military sales financing.

This earmarking is designed to demonstrate to the Philippines at this crucial time that we will not renege on our base rights commitments.

In closing, I believe the Philippines deserves as generous support as we can afford. However, I think this bill exceeds practical limits and would urge my colleagues to support this middle ground amendment to put reasonable restraints on our foreign aid.

□ 1835

AMENDMENT OFFERED BY MR. SOLOMON TO THE AMENDMENT OFFERED BY MR. LEACH OF IOWA

Mr. SOLOMON. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. SOLOMON to the amendment offered by Mr. LEACH of Iowa: Strike out paragraph (1) of section 102 of the committee amendment and insert in lieu thereof the following:

(1) ECONOMIC SUPPORT FUNDS.—Assistance under chapter 4 of part II of the Foreign Assistance Act of 1961, $100,000,000.

Mr. SOLOMON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SOLOMON. Mr. Chairman, the amendment that I am offering amends the amendment of the gentleman from Iowa [Mr. LEACH] by reducing—let me digress for a moment. The amendment of the gentleman from Iowa reduces the amount from $250 million down to $200 million. My amendment to his amendment would reduce the figure from $250 million down to zero but would maintain all of the other language in his amendment.

Mr. Chairman, earlier we spent a great deal of time discussing the merits of the legislation. I would just like to point out a couple of things. Just to the north of my district this week, with 1 hour's notice, we were notified a General Motors plant was closing which would put 1,000 people out of work.

The CHAIRMAN. Would the gentleman withhold his amendment and move to strike out the last word until we have the correct draft of the amendment at the desk?

Mr. SOLOMON. Mr. Chairman, I ask unanimous consent that I be allowed to withdraw my amendment, and I move to strike the last word.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The gentleman withdraws his amendment and is recognized for 5 minutes to strike the last word.

Mr. SOLOMON. Mr. Chairman, as I was saying, we were notified with about 1 hour's notice that a General Motors plant was closing which would put 1,000 people out of work.

In my own district we have a Ford Motor Co. plant which is phasing out its operation. Just the other day, we had a notification from the General Electric Co. in the district next to mine, all of these being contiguous, as a matter of fact, in Congressman STRATTON's district, where they were going to lay off 1,400 employees because they had no market for their steam turbines and their gas turbines.

When I was in the Philippines not too long ago, I could not believe what I saw because I know I did not see one American car in all of Manila or anywhere else I went, I did not see any American goods on the shelves. And it bothers me that we are giving not only $500 million, which is the administration's request, but we now are going to give them an additional $250 million with no guarantees that they are going to spend any of that money on U.S. goods or with trade to the United States to help with these unbearable trade deficits that we have. I think that is wrong.

I can foresee we giving this three-quarters of a billion dollars in cash all prior to the new fiscal year starting October 1 and all of that money being spent in Japan or elsewhere. Where is Japan, and other industrialized nations with huge trade surpluses, where are they shouldering any of these loans and grants to the Philippines? They are not giving 5 cents. Why? Because the Philippine Government has not come to terms with the IMF, they have not put their house in order or agreed to put their house in order. So why are we rushing hell-bent for leather to give them this additional $250 million which they cannot even absorb in the next 45 days when we have these huge deficits?

Here we are going to give them money which is going to increase our trade deficit, increase our own deficit here in this country, push interest rates up. Is that going to help the Philippines? The answer is no. That is why I am offering this amendment today, which would reduce the three-quarters of a billion dollars down to what the administration has asked this Congress to give and what the Appropriations Committee has already appropriated to give. Then let us consider their efforts to put their house in order, and let us see if they really mean to sit down with us and negotiate those bases which mean so much to all of the free world. That is all I am asking you to do, to wait 45 days, wait for the new budget. They cannot spend this money in the next 45 days anyway. So why appropriate it?

I think all of you understand that we cannot afford to do this and therefore I would ask you support the amendment that I have at the desk which very simply reduces the three-quarters of a billion dollars down to what the administration originally asked for, the $500 million. There is $100 million in new money for the Philippines, above our treaty agreements, for economic funds; there is $50 million for military funds in new money. So why go ahead with this additional money? Let us wait, let us put our own house in order before we turn around to do this.

Mr. MURTHA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendments. I want to relate some of the experiences that I had as cochairman of the delegation to oversee the election in the Philippines. I remember flying into the Philippines and being concerned about the reception that we might receive because of the reports on television and in the newspapers that many of the people in the Philippines, many of the Filipino citizens themselves wanted to get rid of the bases, that they were holding that over our head; that President Marcos was using that as leverage; if the election went the other way, we were not sure what President Aquino was going to do with the bases. All this trepidation dissipated as soon as I got into the Philippines. The people could not have been any more friendly. I remember going out to observe various election polling places, and the people clamored to show how friendly they were, to talk about how important the support of the United States was.

They talked about the Communist insurgency, they talked about the problems they were having, and it was immediately apparent to all of us on this observation team that then-President Marcos did not have the support of the Filipino people, he did not have the support of the business people, he did not have the support of most of the officers in the armed forces, and it was obvious to us he did not have the support of the ordinary people. This stemmed from the economic situation, at least the way I saw it, the situation with sugar, for example. The people who lived out in the countryside were in absolutely desperate shape. They made something like $1 per day or $1.50 per day with the wages they received. Some of them said, "If you would increase our sugar quota, we need economic help." There was never any question in my mind in talking to military leaders, talking to the ordinary persons, talking to business people, that those bases were going to remain in the Philippines.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. MURTHA. I yield to the gentleman from Wisconsin.

Mr. ROTH. I thank the gentleman for yielding.

Maybe my good friend from Pennsylvania will have to go back to the Philippines because, I think today is Thursday, August 7, 1986, and I see in the paper here where "mass students clench fist in front of the American Embassy in Manila yesterday to protest the presence of U.S. bases." So maybe things have changed a little bit since the gentleman was there.

Mr. MURTHA. Mr. Chairman, I appreciate what the gentleman is saying. I think it is important to understand: I remember seeing a demonstration displayed in the news media—and you know how accurate the news media are about a lot of reports that we see back here in the United States—I remember seeing a demonstration after I got back which I had actually seen. And they told us they tried to hire, the Marcos people in this case, hired in order to show there were anti-Amer-

ican demonstrations. They found 25 people to demonstrate against the United States. Yet on the television and in the newspapers that appeared to be a massive demonstration.

Now I do not say that there are no people in the Philippines who want to disassociate themselves from the United States or want to castigate or be against the United States.

What I am saying is the massive number of people that I talked to appreciate the Americans and what we have done, the fact that we have liberated the Philippines during World War II, and they are anti-Communist.

There was never any concern in my mind about Mrs. Aquino. One of the assurances we received when we were over there, one of the things we told President Reagan, when Senator LUGAR and I met with him the day after we returned, was the fact that she was anti-Communist and we did not have to worry about that or about the bases.

Now obviously the Philippines have to be concerned about their own national security as well as the security of the United States. Those bases are essential to the United States, but they are also essential to the security and the economic stability of the Philippines. Thousands of Filipinos work on those bases, and that economic stability of the bases is essential to the Filipino national security and their economic stability.

So I believe we make a mistake in sending a signal to cut down the amount of money that we are willing to send to them at this point.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(By unanimous consent, Mr. MURTHA was allowed to proceed for 3 additional minutes.)

Mr. MURTHA. My personal experience and the personal experiences of all of us on that delegation, and you had people like Admiral Long, a retired four-star admiral, a CINCPAC commander, you had five House Members and five Senators on that delegation, and a cross-section of people picked by the White House.

All of us came to the ultimate conclusion that the Filipino people held the United States in the highest regard and that there were elements in the Philippines that were trying to force a wedge between the Filipino people and the United States.

But I could not have received any better reception, could not have received any warmer applause from those folks over there, and nobody wants a closer association, in my estimation, than the Filipino people.

I felt I was in the Philippines at a time when that nation was being born. It was the birth of democracy in the Philippines, and it was really something that I will never forget. But one thing, it is better for us to make this money available to them today than to let the situation get worse and then when it really becomes a problem or it gets worse than it is, if we do not make the money available, then we put ourselves in the position where we may have to spend so much more money than we are willing to spend today.

I agree with the gentleman from New York, we cannot afford some expenditures, no question about it.

I am not a person who gets up and wants to support foreign aid in many cases. Many countries, I think, should not be receiving the amount of foreign aid that they do. But the Philippines, in my estimation, need help, they are as good an ally as we can possibly have and I think we make a mistake by not authorizing the money at this point. It certainly does not appropriate the money, but authorize the money at this point so that they get a signal before Mrs. Aquino comes over here that we support them strongly.

I remember the mistake that the Soviet Union made. I remember when President Marcos was sworn in and the Soviet Union was the only country in the world that shook his hand and congratulated him openly. The United States held back and, of course, worked things out with the distinguished Senator from Nevada and the Secretary of State and the President of the United States, worked things out and Marcos finally decided that he would leave that country.

□ 1850

And certainly, in my estimation, he was not the legitimately elected President of the Philippines. Mrs. Aquino was.

But we cannot afford to allow them to get the wrong signal. With her coming to the United States, it just seems to me that now is the time for us to authorize the money and make it available, whatever amount we need, in the appropriation process when that time comes, in the continuing resolution or as the Appropriations Committee bill comes up.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. MURTHA] has again expired.

(On request of Mr. SOLOMON, and by unanimous request, Mr. MURTHA was allowed to proceed for 2 additional minutes.)

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. MURTHA. I yield to the gentleman from New York.

Mr. SOLOMON. Mr. Chairman, I just want to say that there is no one in this body whom I respect more who is on feet, the gentleman from Pennsylvania. I agree with everything the gentleman said, every word of it. The Filipino people have been our longest and strongest allies since World War II.

But my point is this, and the gentleman has made the point for us, that the Appropriations Committee, at the request of the administration appropriated $100 million in addition to all of the other moneys that are in the pipeline, which total about a half a billion dollars right now. They appropriated $100 million in economic support funds, new money. They appropriated $50 million in military assistance, new money.

I am not arguing that point. That is $650 million that they might be able to absorb into their economy.

But the argument in the committee was that we should not be sending this signal. We should not be having the Foreign Affairs Committee pulling a one-upsmanship on the Appropriations Committee. Now that the Appropriations Committee has gone ahead and appropriated the additional $150 million requested by the administration, now we come in and we authorize the $150 million and we add to it $250 million. That is wrong.

So I agree with everything the gentleman has said. The gentleman is a great American, one of my favorites. But we should not go ahead and increase this by $250 million. Let us live up to what the Appropriations Committee did. That is all that has been asked for by either the Philippines or the administration, and that is all that we should be giving at this time.

AMENDMENT OFFERED BY MR. SOLOMON TO THE AMENDMENT OFFERED BY MR. LEACH OF IOWA

Mr. SOLOMON. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. SOLOMON to the amendment offered by Mr. LEACH of Iowa: Strike out all that follows "Page" at the beginning of the amendment and insert in lieu thereof the following: "4, strike out line 22 and all that follows through line 6 on page 5 and insert in lieu thereof the following:

"(1) Economic Support Fund: Assistance under chapter 4 of part II of the Foreign Assistance Act of 1961, $100,000,000.".

Page 6, after line 16, add the following:

SEC. 107. EARMARKING ASSISTANCE FOR THE PHILIPPINES FOR FISCAL YEAR 1987.

Of the aggregate amounts made available for the fiscal year 1987 for assistance under chapter 2 of part II of the Foreign Assistance Act of 1961 (relating to grant military assistance), under chapter 4 of part II of that Act (relating to the economic support fund), or under the Arms Export Control Act (relating to foreign military sales financing), not less than $180,000,000 shall be available only for the Philippines.

Mr. SOLOMON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SOLOMON. Mr. Chairman, so that everyone knows, the amendment is the same as the Leach amendment. It has all of the earmarking language, except that it reduces the $250 million down to zero and leaves the $150 million requested by the Appropriations Committee and by the administration intact.

Mr. McHUGH. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment. But in doing so, I want to say that the gentleman from New York [Mr. SOLOMON] with his amendment raises obviously a very legitimate question. We are facing an enormous budget problem at home, and every expenditure that we consider, whether it is domestic or international, should be considered really very, very carefully. We cannot be cavalier about our budget problem.

I serve on the Appropriations Committee, and specifically as one of my subcommittees, I serve on the Foreign Operations Subcommittee. We have just recently completed writing our foreign aid bill for fiscal year 1987. That bill has been approved as we recommended it by the full Appropriations Committee, and that bill may come up on the floor shortly or may be included in the continuing resolution.

In either case, it is important for the Members to know that that foreign aid bill substantially cuts back on both the administration's request for foreign assistance next year and cuts back on the amount of money as compared with what we are doing this year in fiscal year 1986.

Specifically, our bill cuts $2.5 billion in budget authority from the President's request. It cuts $1.5 billion in budget authority as compared to the figures for fiscal year 1986, the existing fiscal year. That is in budget authority about a 10-percent cut.

If you look at the outlay ceiling with which we have to live, the cut is really much more dramatic than 10 percent. There is a substantially lower ceiling than that.

So the basic point is that in fiscal year 1987, foreign assistance is going to be substantially constricted, and many of the legitimate interests of the United States in foreign policy terms will be strained significantly. Whether you accept the President's vision of American interests or a vision which is different, perhaps shared by some of us on the Democratic side, no matter how you look at it, the financial resources available in fiscal year 1987 are going to be severely constricted and constrained.

So I think it is important to understand that if we believe that the United States interests require some additional assistance to the Philippines at a critical moment, we have a very narrow window in fiscal year 1986 in which to act, because the truth is that in fiscal year 1987, the probability is that aid to the Philippines will be cut.

The reason for that is not only the aggregate numbers which I have referred to, but as I think my friend from New York indicated earlier, within the economic support fund account, there are a number of exemptions from cuts which will impose much deeper reductions on those countries not exempted.

The most important kind of economic assistance for the Philippines, given its current economic problems, is economic support funds, because they are fast dispersing. So we are looking in fiscal year 1987 at a problem not only for the Philippines, but other countries not exempt from these cuts, which will impose upon those countries, including the Philippines, much deeper reductions than even that 10-percent figure I mentioned.

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. McHUGH. I yield to the gentleman from New York.

Mr. SOLOMON. Mr. Chairman, I have a great deal of respect for the gentleman in the well, but it brings up the question that I have had in my mind since I saw the action taken by the Appropriations Committee. If the gentleman and the Appropriations Committee as a whole feels that way about the Philippines, then why did you not exempt the Philippines along with Egypt, Israel, Pakistan, and Ireland? Why did you not exempt the Philippines along with them? That would be the same logic, and that is what should have been done if that in effect was really what you wanted to do, and which we are doing with this action today. We are exempting the Philippines.

Mr. McHUGH. Mr. Chairman, I will respond to the gentleman this way. Even if the assistance provided for in this authorization bill is enacted, and even if the Appropriations Committee follows suit and appropriates the funds as authorized, the Philippines will still be constricted looking at that 1987 appropriations bill.

The fact of the matter is that our fundamental problem in fiscal year 1987 is the Gramm-Rudman Budget Control Act. The budget resolution which we passed, which the Senate passed, and which we finally adopted in conference imposes on the foreign assistance account very substantial cuts within which we have to live in writing our appropriation bill for next year.

The CHAIRMAN. The time of the gentleman from New York [Mr. McHUGH] has expired.

(By unanimous consent, Mr. HcHUGH was allowed to proceed for 3 additional minutes.)

Mr. McHUGH. We exempted those particular countries, I would say to the gentleman, because in the judgment of the subcommittee and the full committee, these were countries which historically and in terms of current priorities, the members as a whole would want to protect.

Now if we went further and exempted the Philippines, it would simply impose even starker reductions on other accounts, other countries, where we have interests. For example, in Central America, those countries would be squeezed even more than they will otherwise be.

So I think our fundamental problem is the Gramm-Rudman Reduction Act within which we had to write our bill. And I must say as someone who is concerned about our interests abroad that we do not have a bill which reflects all of our interests satisfactorily.

The fact of the matter is we have to deal with that reality. I must say that I see no way in which we can improve the situation for fiscal year 1987 in the absence of a major change in budget policy in macroeconomic terms.

Therefore, if we think the Philippines is important to United States interests, if we think stability in that country at this particular time is critical to us, we have no alternative but to use this opportunity to provide some additional help. Now whether you think we should do it or not is, of course, a judgment each of us has to make.

I personally think that we are at a critical moment in the Philippines, that we must respond in a way which we cannot do next year, and that therefore we should support the committee authorization.

I think it is also important to emphasize that we should not unreasonably raise expectations. I think the point made by the gentleman from Iowa is important. Simply passing this authorization is not enough. We also have to follow through with an appropriation, and it will not be easy. We do not have much time left in fiscal year 1986.

So I would hope Members who vote for this authorization will be prepared when the appropriation vehicle comes along to follow suit, because it will not do us any good, and certainly will not do Mrs. Aquino any good, to vote for this authorization, say we are helping the Philippines, and then fail to pass an appropriation and make good on our promise.

□ 1900

I, of course, believe that we do have vital interests for the reasons which my friend from New York [Mr. SOLARZ] and others have mentioned. We have our most important bases in Asia in the Philippines. We have a critical test for democracy in the Phil-

ippines which is important not just to the Filipino people and us, but for democracy around the world. This is looked to as a major test of the threats to stability in the Philippines are obvious in terms of the economy, in terms of the Communist insurgency, in terms of the leftover followers from Mr. Marcos who almost daily are trying to destabilize the Aquino government.

This is a critical moment. If we believe our interests are vitally involved, now is the only time we have to follow through on our interests.

The CHAIRMAN. The time of the gentleman from New York [Mr. McHUGH] has expired.

(On request of Mr. SOLOMON and by unanimous consent, Mr. McHUGH was allowed to proceed for 2 additional minutes.)

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. McHUGH. I yield to the gentleman from New York.

Mr. SOLOMON. I thank the gentleman and I may be arguing against my amendment, but could you just answer the question: Suppose we defeat the Solomon amendment and the bill passes and the Appropriations Committee subsequently fails to appropriate the $250 million. We, in this bill, are appropriating more than the $150 million that your committee has already appropriated.

Where does that leave us? Does that kill the $150 million? It seems to me that if we pass this bill which has the $400 million in it and your committee fails to appropriate up to the $250 million, it seems to me that we lose the $150 million.

Perhaps Mr. OBEY might be able to comment on this too, as to whether or not he would intend to approve this $250 million increase.

Mr. McHUGH. I will respond first, and if Mr. OBEY wants to address that, certainly he should.

We have in the Appropriations Committee, as you indicated earlier, already acted on the $150 million. I do not think that as an appropriation that is in any question. Indeed, it is not in question in this authorization.

The only issue that we are concerned with here relates to the additional $250 million. My point is not only is it critical to us in terms of interests in Asia, but that we should understand that if we vote today to approve that $250 million, I think it is important for us to follow through with an appropriation.

That will not be easy; we have a very limited opportunity, which Mr. OBEY may be able to elaborate on to deal with that. Specifically, we only have two vehicles. One vehicle is the bill that I referred to that we have reported out of the Appropriations Committee, if it comes separately on the floor, we can adopt an amendment that the Rules Committee permits to follow through on this authorization or we can add it to the continuing resolution.

It is important if we adopt the authorization to be consistent with the appropriation or we will comprise our promise.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I did not understand the comments of the gentleman from New York when I heard them on television in my office and I do not understand them any better since I came onto the floor. That is probably my fault and not his.

I want to make one thing clear: I have no problem with the House proceeding to authorize additional funds for this fiscal year for any of the countries in question because I think that they do represent important priorities. But I want it clearly understood that I at least am not making any commitment to support additional appropriations at this time because I frankly have difficulty figuring out how additional appropriations for fiscal year 1986 are going to get plugged into a fiscal year 1987 appropriations bill.

Our committee is dealing with a 1987 appropriation bill, not a 1986 bill. If we can find some way within the confines of Gramm-Rudman to meet the needs of the Philippines or any other country for this fiscal year, I do not have a real objection to doing that. But I do want to respond, in light of the gentleman's earlier comments, about the four countries that were earmarked in the 1987 appropriation bill.

I do want to respond to the gentleman's question. We earmarked Israel, Egypt, Pakistan, and Ireland for one very simple reason. They were the same four countries that were earmarked in this existing fiscal year. We on the Appropriations Committee did not want to make any policy changes because frankly, in my judgment, the one thing Gramm-Rudman has succeeded in doing is removing the ability of many of the committees to deal with substance on this floor. We are stuck in a mindless numbers game. We have determined that the number 144 is more important than any other policy consideration, whether it be economic growth at home or dealing with America's interests abroad. I think that is a crazy judgment that we arrived at under Gramm-Rudman, but nonetheless it is the judgment that the President imposed upon the Congress and the Congress unwisely acquiesced to.

I want to make it clear that while, in contrast to the gentleman who just spoke, who indicated that if we authorize this money we had an obligation to follow through, I want to make it clear that I do not feel any commitment one way or the other on this issue. I would like to provide greater assistance to the Philippines or to Haiti if we can, but in the context of the situation in which the administration is requiring us to meet Gramm-Rudman targets, and therefore being in a situation where we have to cut $1.4 billion from last year's level just to get down to budget authority, I am not in any position to say that I can clearly commit to support or oppose appropriations for any of these items at this time.

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from New York.

Mr. SOLOMON. Really, what the gentleman in the well has said is exactly how I feel. Because philosophically, I want to support the Philippines. Philosophically, I want to give them the $250 million. But, as the gentleman in the well has said, as a practical matter, it is not possible, and he is not in a position nor are many others. Therefore, I think we are sending the wrong signal. What we are doing is we are saying to the Aquino government, "Sure, we agree with you but we are not going to give you the money." We are going to make some kind of a symbolic gesture here, and that is wrong because that is not dealing in reality.

I appreciate the gentleman's position.

Mr. OBEY. Let me simply say that I would dissent from the gentleman's opinion in this respect: I do not think it does any policy harm to indicate to the Philippines or to Haiti that we have a policy orientation toward trying to help them. I do think it is important in conveying that message, however, that we get across the point that we are not necessarily in a position economically to perform at this time because of the impositions that we are all experiencing because of Gramm-Rudman. So I do not see any harm with this legislation proceeding. I just do not want to be put in the box of having to make a commitment one way or another on actually financing it.

Mr. BEREUTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do rise in support of the Solomon amendment. The Solomon amendment, of course, affects only title I, and it would strike the $250 million of additional authorization for aid to the Philippines for the purpose of, and I quote the legislation: "To be paid before October 1, 1986 on a grant basis for budget support."

□ 1910

The gentleman from New York has also made conforming changes in his amendment to match the other aspects of the original amendment of the gentleman from Iowa [Mr. LEACH].

I certainly count myself as a strong supporter of the Philippines and the Filipino people. I felt that the exchange that took place in the well of the House just a few minutes ago was very helpful in that the gentleman from Wisconsin [Mr. OBEY], the Appropriations Subcommittee chairman, distinguished his position from that of the gentleman from New York [Mr. MCHUGH] by saying that he was making no commitment on an appropriation of this additional quarter-billion dollars in the bill for fiscal year 1986, this fiscal year I emphasize, by his support for the authorization that is contained in this legislation.

I have a very difficult time understanding, too as the gentleman from Wisconsin noted, how we can at this point plug this quarter-billion dollars into a fiscal year 1986 budget. I am concerned that it does create false expectations in the Philippines—a land where obviously we have great volatility today.

I think in fact these expectations if dashed can cause some difficulties or harm.

The gentleman from New York [Mr. MCHUGH] pointed out how our financial resources are severely restricted or restrained, and I believe he is referring specifically to the fiscal year 1987. Indeed, that seems to be the case.

I would accordingly raise two points. First, not only do I believe that the amount of authorization for the Philpines is excessive, it would bring, if appropriated, the total assistance package for the Philippines for fiscal year 1986 to approximately $641 million. That amount does not even include approximately $200 million in the prefiscal year 1986 funds still in the pipeline.

A second reason that concerns me about this authorization is the fact that it further skews our priorities. At a time when we seem to be headed for an absolute constriction in foreign assistance funds and at a time when we are protecting certain countries in a hold-harmless type of status that has been mentioned before in this debate, I am concerned that we are in reality further limiting in the amount of appropriations that the United States will be able to provide to many other important parts of this world where we have allies and other nations moving toward democracy and where we find fledgling democracies that need our assistance, I refer specifically to this hemisphere, to many parts of Africa, as well as parts of Asia, particularly Southeast Asia.

I am concerned that if we provide this authorization, indeed it will somehow result in an actual additional appropriation yet this year. Or if that does not happen it would result in additional priority for fiscal year 1987 and beyond being given to the Philippines—a higher priority we have than the one already generously assigned to the Philippines.

I have been concerned for a long period of time that former President Marcos was blackmailing this country by holding over our heads for appropriation the renewal of the base rights for the Subic Bay Naval Base and Clark Air Force Base.

Now I hear, if I can believe the press accounts, that President Aquino seems to be following that same process. I think that is very unfortunate and not a way in which to build a good relationship between our two countries.

Fortunately, we are beginning to take a few steps, and did even during the Marcos regime, to reduce our vulnerability to that kind of pressure. That kind of pressure also creates all kinds of concerns, volatility and anti-Americanism in the Philippines.

Mr. Chairman, I do not enjoy arguing against money for foreign assistance, for the Philippines, particularly for a country with which we truly have a unique and long favorable association, a nation that could obviously use the money, a country that has some desperate needs, a nation which we are trying to assist in the reestablishment of democratic institutions. It is not a pleasant task to support an amendment to reduce this proposed appropriation, but this money to be delivered, on a silver platter, if we appropriate it, one-quarter billion dollars, is excessive. I urge you to support the Solomon amendment to the Leach amendment.

Mr. FAZIO. Mr. Chairman, I move to strike the requisite number of words.

I rise in opposition to the amendment and in support of the bill of the committee.

Mr. Chairman, the gentleman from Nebraska is a man I respect greatly. He accepted this onerous task and performed it well. I sensed his heart was not in it as he indicated in his closing remarks in the sense that I think he knows as well as anyone on the floor how desperate the situation in the Philippines is at the moment.

The gentleman in the Chair [Mr. ATKINS] and the gentlewoman from California [Mrs. BOXER] and I had the privilege of meeting with Mrs. Aquino a month ago in a brief trip to the Philippines. I stand here as no expert on that country or that region of the world, but I do want to say that we were very impressed by the character and the self-confidence and the political ability of this individual, whom I am sure we will all find particularly attractive and compelling upon her appearance here in this chamber on September 18, but I think we were also impressed by the very short time frame in which she finds herself and her government in terms of turning the economy around and establishing democratic institutions.

All of us who have studied the politics of the Third World have heard about the evolution of rising expectations. If there has ever been a situation where expectations perhaps exceed all potential possibilities, it is in the Philippines today. There is no question that the economic conditions of the commodities that are indigenous to that area are in terrible shape worldwide. There is no question that no matter what we do on this floor tonight in regard to this authorization or at some future point in regard to the appropriations, we are not going to make a major dent in the lives of the 70 percent of the Filipino people who live in poverty, but if we are to do our best to further instill a very positive interrelationship between the Philippines and this country, one that goes back many years and has been reaffirmed many times, if we are going to do our best to help erase the legacy of our complicit involvement with Ferdinand Marcos, and if we are to do all we can possibly do to make the Filipino democracy live again and to help in the process of recreating a constitutional government that will have the support of the people in that country, I think we cannot fail but to vote this assistance.

I think as we look forward to the renegotiation of our bases in that area, we must be realistic. Mrs. Aquino sits on a very tightly, equally balanced cabinet. She is not in a position to move abruptly in one direction or another or she will destabilize the government that she has inherited. Hers is a coalition government. I know her position on the bases is not something that would be used in terms of blackmail against this country. I think she understands the benefits of the bases economically and militarily to both countries. I know that we will be able to bargain in good faith with the Filipino government that she heads.

We are talking about a country of over 44 million people, not the 3.5 million people who live in Nicaragua whom we have discussed in such great length on this floor over the last several years. She is in fact in a very important position for us in a very significant region of the world. I think she is counting on this Congress and this administration to put behind us our very difficult economic problems that I think have been amply debated on the floor tonight by Members on both sides of the aisle and to reassert our interest in world leadership, in having an impact on the course of events in Third World countries and reasserting our belief in democratic principles, pluralistic governments and free economies.

I am confident that this Congress will not shrink from that responsibility despite the difficulty of the economic times we find ourselves in.

So I am strongly in support of the comments made by the gentleman from New York [Mr. SOLARZ], and by the gentleman from New York [Mr. MCHUGH] and others who have spoken here tonight. I hope this Congress will live up to its responsibilities in this area of the world, as we have so often in the past.

Mr. BURTON of Indiana. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I believe, as do my colleagues, that we must do what is necessary to help the Aquino government in the Philippines. Like many of my colleagues, I have been over there and had a chance to see firsthand some of the problems.

I do believe, however, that my colleague, the gentleman from New York [Mr. SOLOMON] is on the right track in supporting what the President has advocated as a reasonable amount of money to give to the Filipino government in foreign aid at this time.

One thing that I think ought to be considered when we start talking about foreign aid, though, in general, is how these people deal with us on a day-to-day basis and year-to-year basis. One of the best gauges of this is the United Nations. Recently the State Department prepared a report that they are required to prepare once a year on how our colleagues in the United Nations support us on the critical issues facing this world.

I would like to read just a little bit of an article that was written by former Ambassador to the United Nations Jeanne Kirkpatrick:

Only 19 of the United Nations' 159 members voted on the same side as the United States even half the time. Most of the time those countries voted against the position we supported. The State Department legislatively required to prepare the report has traditionally paid little attention to U.N. votes, believing that what happened there has little or no relation to the world outside, but in fact the U.N. is a microcosm of global politics and U.N. votes reflect the real decisions of real governments about whom to stand with and against. Diplomats do not like such forced public choices. They prefer to deal in ambiguous declarations, such as, "It is not impossible," they say, or such as, "At some future time." Sometimes, however, governments must make clear decisions in public view. Italy could not avoid responding yes or no to a U.S. request to land a plane carrying the Achille Lauro hijackers, nor to our request that they hold terrorist Abu Abbas for extradition. NATO allies could not avoid responding to the U.S. request that they join in economic sanctions against Libya. Prime Minister Thatcher could not avoid granting or refusing the U.S. request to use British-stationed planes to attack Libya. The French and Spanish governments could not avoid answering U.S. requests to overfly their countries and so forth, but in relations among governments such clear questions and unequivocal answers are relatively rare, except in the United Nations.

Now, the Aquino government does not have a real track record, but in the past, the Filipino Government last year received $269,767,000 and voted with us in the United Nations 22 percent of the time.

Now, I think there is room for improvement there. I would suggest to the Aquino government and to our friends around the world who receive a great deal in foreign assistance from us that they ought to consider our position at the U.N. occasionally. They are literally biting the hands that feed them in many cases.

I know there are a lot of other considerations. There are the bases in the Philippines and so forth, but if we are giving tax payer dollars to these governments and we are trying to promote democracy around the world and trying to help bring about freedom and equality, then when we give this money to these countries, I think we ought to also, right along in the discussion on how much to give them in foreign aid, ask them the question. "Why aren't you with us just a little bit more? Why aren't you with us when we really need you? If we are really friends and you are really asking us as a friend for foreign aid to your country, then don't you think it is right that you be a little bit more charitable to us in the United Nations?"

We are opposed by 140 countries more than 50 percent of the time and they are getting our foreign aid money. They are getting American taxpayers' dollars. I think we ought to take that into consideration.

I am going to support the Solomon amendment. I urge my colleagues to do likewise.

I hope in the future when we start talking about foreign aid in the Foreign Affairs Committee and on this floor that we will start taking into consideration how our friends around the world treat us in the United Nations and in other bodies when they ask for our foreign aid and assistance.

Mr. BENNETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just want to speak briefly. I have a feeling that I should, since I was once a guerrilla leader in the Philippines. I think that the Philippine people are wonderful people, good friends of America. A lot of things are misunderstood about the Philippines and about their relationship, particularly the way in which our history books are written and the way their history books are written. I think over all it is pretty wonderful the support the Philippine people have given America through the years.

□ 1925

I do not believe that you can challenge the Aquino government on the basis of things that happened in the Marcos government. It is a perilous time for anybody to take over under the circumstances in which she took over. There are not many cases in history where a thing like that has occurred. In fact, I do not know of any that occurred precisely that way.

It is a difficult thing for anybody. Even a strong man would have difficulty, but to have a sweet, lovely lady like her, a widow, in distress, and under the circumstances of her ascending to the Presidency, it is a very difficult situation. So I think that we should be very careful about what we do here.

I do not believe in my 38 years in Congress that I have ever spoken in favor of adding any money to the foreign aid bill. I have very seldom ever voted for the foreign aid bill. I am a very pragmatic man about foreign aid. I believe in feeding people who are hungry in Ethiopia, feeding people who have a tidal wave, taking care of people when something blows up, or something like that. I believe very strongly in that.

In this particular situation you have a peculiar situation with regard to the affinity of our country with the Philippines, and you have a peculiar historic event which is occurring, almost the birth of a nation; almost the birth of a nation in real democracy.

It would be such a mistake if we were to pick at this at this particular awkward time and try to make something out of nothing of any great importance.

This is a time when we ought to be generous, this is a time when we ought to be thoughful, and this is a time that we ought to extend our arms to other people and show our affection for them. So I hope that the committee position will be sustained.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. SOLOMON] to the amendment offered by the gentleman from Iowa [Mr. LEACH].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. SOLOMON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 195, noes 203, not voting 33, as follows:

[Roll No. 306]

□ 1935

The Clerk announced the following pair:

On this vote:

Mr. Lungren, for, with Mrs. Bentley against.

Mrs. BOGGS, Messrs. GILMAN, DORNAN of California, and WEAVER, and Ms. KAPTUR, changed their votes from "aye" to "no."

Messrs. ALEXANDER, LIGHTFOOT, and LOTT, Ms. FIEDLER, Mr. RUSSO, Mr. CHAPPELL, and Ms. KAPTUR changed their votes from "no" to "aye."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1945

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. LEACH].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. LEACH of Iowa. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 320, noes 76, not voting 35, as follows:

[Roll No. 307]

□ 1955

The Clerk announced the following pairs:

On this vote:

Mrs. Bentley for, with Mr. Miller of Washington against.

Mr. Lungren for, with Mr. Martinez against.

Mr. MATSUI and Mr. PEPPER changed their votes from "aye" to "no."

Messrs. YATES, SAVAGE, and HAYES and Mrs. COLLINS changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. If there are no further amendments to title I, the Clerk will designate title II.

The text of title II is as follows:

TITLE II—PROMOTING DEMOCRACY IN HAITI

SEC. 201. FINDINGS CONCERNING HAITI.

The Congress finds that—

(1) the establishment of an interim government in Haiti committed to a resolution of democracy provides Haiti with an opportunity to build the political, social, and economic institutions necessary to promote Haiti's development, to provide a better future for the people of Haiti, and to provide the framework for more effective mutual cooperation with the United States, Haiti's neighbor in the Caribbean, and the other nations of the Hemisphere;

(2) the magnitude of the political, economic, and social tasks facing the people of Haiti will make the achievement of a better future a difficult task which will require a determined and sustained effort by the Haitian people over a long period of time and will require significant external assistance from the United States and other donors; and

(3) it is in the interest of the United States to provide appropriate support for the development of Haiti, a close neighbor which is one of the world's poorest nations and which is committed to the establishment of a democratic government.

SEC. 202. ECONOMIC ASSISTANCE FOR HAITI.

(a) EARMARKING OF FUNDS.—Of the amounts made available for economic assistance programs for fiscal year 1987, not less than $109,000,000 shall be available only for Haiti as follows:

(1) ECONOMIC SUPPORT FUND: Not less than $36,000,000 of the amount made available to carry out chapter 4 of part II of the Foreign Assistance Act of 1961 shall be for Haiti.

(2) DEVELOPMENT ASSISTANCE: Not less than $37,000,000 of the amounts available to carry out sections 103 through 106 of the Foreign Assistance Act of 1961 shall be for Haiti. These funds shall be used to support a transition to democracy in Haiti, emphasizing job creation, rural development, health care and sanitation, small-scale irrigation, reforestation and land conservation, and literacy education. Assistance provided pursuant to this paragraph should reflect the need to distribute development assistance resources more equitably among the various regions in Haiti in order to support sustainable development in all of Haiti.

(3) FOOD FOR PEACE: Not less than $35,000,000 of the amounts available to carry out titles I and II of the Agricultural Trade Development and Assistance Act of 1954 shall be for Haiti.

(4) INTER-AMERICAN FOUNDATION.—Not less than $1,000,000 of the amount available for the Inter-American Foundation shall be for Haiti.

(b) CONDITIONS ON ECONOMIC SUPPORT AND DEVELOPMENT ASSISTANCE.—Funds may be obligated for assistance for Haiti pursuant to paragraph (1) and (2) of subsection (a) only if the President determines that the interim Government of Haiti—

(1) is improving the human rights situation in Haiti;

(2) is implementing its timetable for completion of a new constitution that promotes genuine democratic reforms and guarantees the fundamental principles of democracy;

(3) is establishing a framework for free and open elections leading to a democratically-elected civilian government, which would include free and functioning political parties and associations, free labor unions, and freedom of the press;

(4) is cooperating fully in implementing United States development, food, and other economic assistance programs in Haiti (including programs for prior fiscal years);

(5) is maintaining a system of fiscal accountability to ensure that all resources allocated to the development of Haiti are used in the most effective and efficient manner;

(6) is continuing its investigation of alleged human rights abuses and corruption by the Duvalier government and is prosecuting, in accordance with due process, those responsible for human rights abuses and corruption;

(7) is maintaining a free and independent judiciary system; and

(8) is continuing to cooperate with the United States in halting illegal emigration to the United States from Haiti.

(c) REQUIREMENT FOR SEGREGATED ACCOUNT FOR ECONOMIC SUPPORT ASSISTANCE FUNDS.—Economic assistance funds earmarked by subsection (a)(1) may be paid to the Government of Haiti only if the Government of Haiti will maintain those funds in a separate account and not commingle them with other funds.

(d) CONFORMING AMENDMENT INCREASING AUTHORIZATION FOR INTER-AMERICAN FOUNDATION.—Section 401(s)(2) of the Foreign Assistance Act of 1969 is amended by striking out "$11,969,000 for fiscal year 1987" and inserting in lieu thereof "$12,969,000 for fiscal year 1987".

SEC. 203. MILITARY TRAINING AND OTHER NONLETHAL ASSISTANCE FOR HAITI.

(a) AUTHORIZATION OF ASSISTANCE.—Up to $4,000,000 of the amounts available for fiscal year 1987 to carry out chapter 2 of part II of the Foreign Assistance Act of 1961 (relating to grant military assistance) and chapter 5 of part II of that Act (relating to international military education and training) may be made available for Haiti for education, training, and other nonlethal assistance (such as transportation equipment, communications equipment, and uniforms), notwithstanding section 705(e) of the International Security and Development Cooperation Act of 1985.

(b) CONDITIONS ON MILITARY ASSISTANCE.—Funds made available pursuant to subsection (a) may be obligated only if the President certifies to the congress the following:

(1) The Government of Haiti has submitted a formal request to the United States specifying a comprehensive plan for the reform and reorganization of the mission, command, and control structures of the Haitian armed forces consistent with a transition to democracy, the rule of law, constitutional government, and an elected civilian government. Such a plan should include a publicly announced commitment by the armed forces of Haiti to abide by international human rights standards and adoption of a code of conduct to assure adherance to these standards.

(2) The Government of Haiti is making substantial efforts—

(A) to prevent the involvement of the Haitian armed forces in human rights abuses and corruption by removing from those forces and prosecuting, in accordance with due process, those military personnel responsible for the human rights abuses and corruption;

(B) to ensure that freedom of speech and assembly are respected;

(C) to conduct investigations into the killings of unarmed civilians in Gonaives, Martissant, and Fort Dimanche, to prosecute, in accordance with due process, those responsible for those killings, and to prevent any similar occurrences in the future;

(D) to provide education and training to the Haitian armed forces with respect to internationally recognized human rights and the civil and political rights essential to democracy, in order to enable those forces to function consistent with those rights; and

(E) to take steps to implement the policy of the Government of Haiti requiring former members of the Volunteers for National Security (VNS) to turn in their weapons and to take the necessary actions to enforce this requirement.

(c) REPORTS.—Not later than three months after the President submits his certification

under subsection (b) and every three months thereafter, the President shall report to the Congress on the extent to which the actions of the Government of Haiti are consistent with each of objectives specified in subsection (b). Half of the assistance provided pursuant to subsection (a) shall be withheld from delivery until the President submits the first such report.

(d) NOTIFICATION TO CONGRESS.—Funds made available pursuant to subsection (a) may be obligated only if the Committee on Appropriations and the Committee on Foreign Affairs of the House of Representatives and the Committee on Appropriations and the Committee on Foreign Relations of the Senate are notified fifteen days in advance.

AMENDMENT OFFERED BY MR. LELAND

Mr. LELAND. Mr. Chairman, I offer an amendment which was printed in the CONGRESSIONAL RECORD on August 5.

The Clerk read as follows:

Amendment offered by Mr. LELAND: Page 10, after line 14, insert the following new subsection:

(e) ADDITIONAL ASSISTANCE FOR ECONOMIC DEVELOPMENT IN HAITI.—In order to assist economic development in Haiti, a Foreign Commercial Service officer shall be assigned to the United States embassy in Haiti.

Mr. LELAND (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LELAND. Mr. Chairman, this is a very simple amendment which seeks to assist economic development in Haiti by assigning a foreign commercial service officer to the U.S. Embassy in Haiti.

This amendment will not add any additional cost to the taxpayers. It simply sets Haiti as a priority recipient for a foreign commercial service officer.

I am sure most of my colleagues will agree with me that Haiti is indeed a country that desperately needs help to improve its economic and social well-being. Requiring that a foreign commercial service officer be assigned to our embassy in Haiti, is a cost-effective means of enhancing Haiti's trade activities, leading to improved economic and social conditions for the Haitian people. Thank you.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. LELAND. I yield to the chairman of the Committee on Foreign Affairs, the gentleman from Florida [Mr. FASCELL]

Mr. FASCELL. I thank the gentleman for yielding.

I will say to the gentleman that we have examined the amendment, we think it is a good amendment, and we are prepared to accept it.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. LELAND. I yield to the gentleman from Iowa.

Mr. LEACH of Iowa. I thank the gentleman for yielding.

Mr. Chairman, the minority has no objection to this amendment.

Mr. LELAND. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. LELAND].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DIXON

Mr. DIXON. Mr. Chairman, I offer an amendment. This amendment was offered by Congressman FAUNTROY and printed in the Journal of August 5.

The Clerk read as follows:

Amendment offered by Mr. DIXON:

Page 13, after line 8, add the following:

SEC. 204. RECOVERY BY HAITI OF ASSETS STOLEN BY DUVALIER REGIME.

(a) FINDINGS.—The Congress finds that—

(1) the Government of Haiti believes that former president-for-life Jean Claude Duvalier and other individuals associated with the Duvalier regime illegally diverted to their own use substantial amounts of the assets of the Government of Haiti;

(2) the Government of Haiti is attempting to locate and recover those assets through legal means;

(3) virtually every relevant jurisdiction, both in the United States and abroad, requires the posting of some form of security to secure the issuance of orders of attachment or other judicial seizures of property;

(4) the Government of Haiti is unable, without outside assistance, to post the necessary security because of its lack of assets;

(5) Haiti's economic situation could be significantly improved, and the need for external resources reduced, if the Government of Haiti is able to pursue its legal remedies against those who are in large part responsible for the economic crisis in Haiti; and

(6) the United States has a substantial foreign policy interest in helping the Government of Haiti recover any assets which were illegally diverted by those associated with the Duvalier regime.

(b) ACTIONS TO ASSIST HAITI.—The President shall exercise the authorities granted by section 203 of the International Emergency Economic Powers Act (50 U.S.C. app. 1702) to assist the Government of Haiti in its efforts to recover, through legal proceedings, assets which the Government of Haiti alleges were stolen by former president-for-life Jean Claude Duvalier and other individuals associated with the Duvalier regime. This subsection shall be deemed to satify the requirements of section 202 of that Act.

Mr. DIXON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DIXON. Mr. Chairman, I offer an amendment today on behalf of myself and the amendment's original sponsor, Mr. FAUNTROY. (The amendment was printed in the RECORD of August 5.)

Last year, I would not have been able to stand before you today to express any optimism over the situation in Haiti. But today I rise in support of this bill that authorizes increased assistance for Haiti and to offer an amendment.

Haiti is the poorest country in the western hemisphere, and one of the poorest in the entire world. For nearly 30 years, the economy was mismanaged and Duvalier and his officials increasingly used political power to shape the economy for their own enrichment. Reversing this legacy will be a monumental task for the Haitian people and one which will require the help and understanding of people throughout the world.

When the Duvaliers fled Haiti in February, they not only left the country in millions of dollars of debt, but with less than $1 million in foreign reserves.

Without foreign exchange reserves to buy even the bare necessities, including food and fuel, the Government urgently must recover the money the Duvaliers siphoned off.

The Government of Haiti is attempting to locate and recover those assets through legal means.

But virtually every relevant jurisdiction, both in the United States and abroad, requires the posting of some form of bond to secure the issuance of orders of attachment or judicial seizures of property.

The Government of Haiti is unable, without assistance, to post the necessary security bond because of its lack of assets.

My amendment is simple and straightforward: To assist the new Government of Haiti to have its day in court in its attempt to reclaim wealth which was allegedly stolen by Haiti's former President and his associates.

The amendment would require the President to use authorities in the International Economic Powers Act to freeze assets of Duvalier and his associate so that these assets cannot be removed during the period which Haiti's claims are considered through regular legal processes.

I can understand that some do not like to see the emergency powers applied in a case such as this where the emergency is not one facing the United States but instead confronts a friend. If we can develop another way to be helpful in a timely manner, I would welcome it.

But if we wait, some of the wealth that belongs to the Haitian people may be irretrievably lost. I would hope that the Foreign Affairs Committee will look for a permanent way of providing authority to the President to help countries in Haiti's position in the future—but for Haiti the time is now.

71-059 O-87-13 (Pt. 14)

We do not know whether any of the funds skimmed off through years of corruption came from the U.S. Treasury. We should act to help assure that the moneys in the United States are given to their rightful owners and not lost forever because Haiti is too poor to press its claims effectively.

I believe that the interim Government of Haiti, under the Lieutenant General Namphy (Nam-phee), is seriously committed to a transition from a military council to a democratically elected civilian government.

A law firm—Stroock, Stroock & Lavan—has been retained by the Government of Haiti to assist in recovering these assets.

I hope you will support my amendment and help the Government of Haiti in recovering the funds.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I yield to the chairman of the Committee on Foreign Affairs, the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. I thank the gentleman for yielding.

Mr. Chairman, we have examined the amendment on this side, we think it is an excellent amendment, and we will accept it.

Mr. BROOMFIELD. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I yield to the gentleman from Michigan.

Mr. BROOMFIELD. I thank the gentleman for yielding.

Mr. Chairman, we also accept it on this side.

Mr. DIXON. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. DIXON].

The amendment was agreed to.

The CHAIRMAN. Are there any other amendments to title II?

Pursuant to House Resolution 526, title III is considered as having been read for amendment.

The Clerk will designate title III.

The text of title III is as follows:

TITLE III—AUTHORIZATION LEVELS FOR CERTAIN FOREIGN ASSISTANCE PROGRAMS

SEC. 301. INTERNATIONAL NARCOTICS CONTROL.

Section 482(a)(1) of the Foreign Assistance Act of 1961 is amended by striking out "$57,529,000 for the fiscal year 1987" and inserting in lieu thereof "$65,445,000 for the fiscal year 1987".

SEC. 302. CHILD SURVIVAL FUND.

Section 104(c)(2)(B) of the Foreign Assistance Act of 1961 is amended by striking out "$25,000,000 for fiscal year 1987" and inserting in lieu thereof "$75,000,000 for fiscal year 1987".

SEC. 303. AUTHORIZING A SEPARATE LINE ITEM APPROPRIATION FOR THE INSPECTOR GENERAL OF THE AGENCY FOR INTERNATIONAL DEVELOPMENT.

Section 667(a)(1) of the Foreign Assistance Act of 1961 is amended by inserting after "Act" the following: ", of which $18,189,000 for the fiscal year 1987 is authorized for the necessary operating expenses of the Office of the Inspector General of the Agency for International Development and the remaining amount for that fiscal year is authorized for other necessary operating expenses of that agency".

SEC. 304. OFFSETTING REDUCTIONS.

In order to provide the increased authorizations of appropriations contained in section 202(d), section 301, and section 302 without increasing the overall amount authorized to be appropriated for foreign assistance programs for fiscal year 1987—

(1) section 104(g)(1)(B) of the Foreign Assistance Act of 1961 (relating to development assistance for health programs) is amended by striking out "$205,000,000 for fiscal year 1987" and inserting in lieu thereof "$180,000,000 for fiscal year 1987"; and

(2) section 302(a)(1) of that Act (relating to international organizations and programs) is amended by striking out "$270,000,000 for fiscal year 1987" and inserting in lieu thereof "$236,084,000 for fiscal year 1987".

The CHAIRMAN. No amendments to title III are in order.

The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

□ 2010

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. MURTHA] having assumed the chair Mr. ATKINS, Chairman of the Committee on the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5081) to authorize additional economic and military assistance for the Philippines, pursuant to House Resolution 526, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. SOLOMON

Mr. SOLOMON. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. SOLOMON. I am, in its present form, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. SOLOMON moves to recommit the bill, H.R. 5081, to the Committee on Foreign Affairs.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. SOLOMON. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 219, noes 178, not voting 34, as follows:

[Roll No. 308]

□ 2020

The Clerk announced the following pair:

On this vote:

Mr. Kemp for, with Mr. Lungren against.

Mr. SHELBY changed his vote from "aye" to "no."

So the bill was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to promote democracy in the Philippines and Haiti, and for other purposes.".

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

□ 2030

## PROVIDING FOR FURTHER CONSIDERATION OF H.R. 4428, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

Mr. PEPPER, from the Committee on Rules, reported the following privileged resolution (H. Res. 531, Rept. No. 99-766) which was referred to the House Calendar and ordered to be printed:

H. RES. 531

*Resolved*, That during the further consideration of the bill (H.R. 4428) to authorize appropriations for fiscal year 1987 for the Armed Forces for procurement, for research, development, test, and evaluation, for operation and maintenance, and for working capital funds, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, no further amendment to the bill or to the committee amendment in the nature of a substitute, as modified, shall be in order except the amendments designated in section two of this resolution, and said amendments shall be considered only in order and in the manner specified. The amendments designated in this resolution which are available in a printed report by the Committee on Rules shall be considered as having been read when offered.

SEC. 2. The amendments made in order to the committee amendment in the nature of a substitute, as modified, and their order of consideration, are as follows.

(1) Before the committee substitute, as modified, is considered for amendment, it shall be in order to debate the funding levels contained in the committee substitute, as modified, for not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services. It shall then be in order to consider an amendment, if offered by Representatives Spratt of South Carolina or his designee contained in the report of the Committee on Rules on this resolution, relating to funding levels in the committee substitute, as modified. No amendment to said amendment shall be in order and said amendment shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole, but said amendment shall be debatable for not to exeed 30 minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. Following the disposition of said amendment, it shall be in order to consider an amendment, if offered by Representative Dickinson of Alabama or his designee contained in the report of the Committee on Rules on this resolution relating to funding levels in the committee substitute, as modified. No amendment to said amendment shall be in order and said amendment shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole, but said amendment shall be debatable for not to exceed 30 minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. If both of said amendments are adopted, only the last such amendment shall be considered to have been finally adopted and reported back to the House.

(2) After the disposition of the amendments designated in paragraph (1) above, it shall be in order to debate the topic of limitations on nuclear testing for not to exceed one and one-half hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services. It shall then be in order to consider an amendment, if offered by Representative Dickinson of Alabama or his designee contained in the report of the Committee on this resolution, relating to such limitations. No amendment to said amendment shall be in order and said amendment shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole, but said amendment shall be debatable for not to exceed 20 minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. Following the disposition of said amendment, it shall be in order to consider an amendment if offered by the chairman of the Committee on Armed Services or his designee printed in the report of the Committee on Rules on this resolution relating to such limitations. No amendment to said amendment shall be in order and said amendment shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole, but said amendment shall be debatable for not to exceed 20 minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. If both of said amendments are adopted, only the last such amendment shall be considered to have been finally adopted and reported back to the House.

(3) After the disposition of the amendments designated in paragraph (2) above, it shall be in order to consider amendments pursuant to this paragraph. The committee amendment in the nature of a substitute, as modified, made in order as original text for the purpose of amendment by House Resolution 523, shall be considered as having been read for amendment under the five-minute rule. It shall be in order to begin consideration of the amendments contained in the report of the Committee on Rules on

this resolution. Said amendments shall be considered only in the order listed, and said amendments may only be offered by the Members designated for each amendment in the Report of the Committee on Rules on this Resolution. Debate on each of said amendments shall not exceed the time designated in the report of the Committee on Rules on this resolution, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. Debate on any amendment offered to one of said amendments, or on any amendment offered to a substitute for one of said amendments, shall be limited to ten minutes, equally divided and controlled by the proponent of the amendment and a Member opposed thereto. During the consideration of such amendments, pro forma amendments for the purpose of debate shall be in order only if offered by the chairman or ranking minority member of the Committee on Armed Services. With respect to amendment number 114 in the category of amendments under this paragraph (the amendment by Representative Dickinson of Alabama on the application of the Davis-Bacon Act as so numbered in the report of the Committee on Rules on this resolution), it shall not be in order to consider said amendment if Representative Hawkins of California offers, at that point in the consideration of amendments under this paragraph, an amendment relating to the same subject. Before the consideration of any amendments to said amendment, it shall be in order to debate said amendment for not to exceed one hour, to be equally divided and controlled by Representative Hawkins and a Member opposed thereto. No amendment to said amendment shall be in order except a substitute if offered by Representative Dickinson consisting of the text of amendment number 114 as so numbered in the report of the Committee on Rules. Said substitute shall not be subject to amendment but shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Dickinson and a Member opposed thereto, and all points of order against said amendment for failure to comply with the provisions of clause 7 of Rule XVI are hereby waived. If Representative Hawkins does not offer such amendment, it shall be in order for Representative Dickinson to offer amendment number 114, and said amendment shall not be subject to amendment but shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Dickinson and a Member opposed thereto.

(4) After the Committee of the Whole rises on the legislative day of Monday, August 11, 1986, and resumes its sitting on H.R. 4428 on Tuesday, August 12, 1986, further consideration of the amendments provided for in paragraph (3) shall be suspended. It shall then be in order to debate the levels of funding for the Strategic Defense Initiative contained in the committee substitute for not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services. It shall then be in order to consider the amendments relating to such funding contained in the report of the Committee on Rules on this resolution, only in the following order: (A) by Representative Dornan of California or his designee; (B) by Representative Dellums of California or his designee; (C) by Representative Badham of California or his designee; and (D) by Representative Bennett of Florida or his designee. Each of said amendments shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole but shall be debatable for not to exceed 20 minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto and each of said amendments shall be in order even if changing portions of the committee substitute already changed by amendment. If more than one of said amendments is adopted, only the last such amendment which is adopted shall be considered to have been fully adopted and reported back to the House.

(5) After the disposition of the amendments designated in paragraph (4) above, it shall be in order to debate the topic of strategic nuclear arms limitations for not to exceed one and one-half hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services. It shall then be in order to consider an amendment relating to such limitations contained in the report of the Committee on Rules on this resolution if offered by Representative Dickinson of Alabama or his designee. Said amendment shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole, but shall be debatable for not to exceed 20 minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. It shall then be in order to consider an amendment relating to such limitations contained in the report of the Committee on Rules on this resolution if offered by Representative Dicks of Washington or his designee. Said amendment shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole, but shall be debatable for not to exceed 20 minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. If both of said amendments are adopted, only the last such amendment shall be considered to have been finally adopted and reported back to the House.

(6) After the disposition of the amendments designated in paragraph (5) above, it shall be in order to consider an amendment contained in the report of the Committee on Rules on this resolution relating to antisatellite weapons if offered by Representative Brown of California or his designee. Said amendment shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole, but shall be debatable for not to exceed one hour, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto.

(7) If the Committee of the Whole does not rise on the legislative day of Tuesday, August 12, 1986, immediately after the disposition of the amendment designated in paragraph (6) above, it shall be in order to continue consideration of the amendments provided for in paragraph (3) of this section, in the manner provided for in such paragraph.

(8) After the Committee of the Whole rises on the legislative day of Tuesday, August 12, 1986, and resumes its sitting on H.R. 4428 on Wedenesday, August 13, 1986, further consideration of the amendments provided for in paragraph (7) above shall be suspended. It shall then be in order to consider the amendment relating to funding levels in the committee substitute contained in the report of the Committee on Rules on this reoslution if offered by Representative Dellums of California or his designee and said amendment shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole but shall be debatable for not to exceed one hour, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto.

(9) After the disposition of the amendment designated in paragaph (8) above, it shall be in order to consider the amendment relating to chemical weapons contained in the report of the Committee on Rules on this resolution if offered by Representative Porter of Illinois or his designee, and said amendment shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole but shall be debatable for not to exceed one hour, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto.

(10) After the disposition of the amendment designated in paragraph (9) above, it shall be in order to continue consideration of the amendments provided for in paragraph (3) of this section in the manner provided for in such paragraph.

SEC. 3. At the conclusion of the consideration of the last amendment designated pursuant to paragraph (3) of section two, no further amendment to the bill or to the committee substitute, as modified, shall be in order, and the question shall occur on the committee amendment in the nature of a substitute, as modified and as amended. The Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute, as modified, subject to preceding provisions of this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 4428, it shall be in order to consider the following motions if offered by the chairman of the Committee on Armed Services: (1) to take from the Speaker's table the bill H.R. 3622, with the Senate amendments thereto, to concur in the Senate amendment to the title with an amendment inserting in lieu thereof "An act to amend title 10, United States Code, to reorganize the Department of Defense", and to concur in the Senate amendment to the text with an amendment inserting in lieu thereof the provisions contained in H.R. 3622 as passed by the House, and the provisions contained in the amendment designated in paragraph (1) of section two of House Resolution 523 offered by Representative Nichols of Alabama, as finally adopted in the Committee of the Whole during the consideration of H.R. 4428; (2) to insist on said amendments to the Senate amendments to H.R. 3622 and to request a conference with the Senate thereon; (3) to discharge the Committee on Armed Services from the further consideration of the bill (H.R. 4181) to authorize certain construction at military installations for fiscal year 1987, and for other purposes, and to consider said bill in the House; and (4) to strike out all after the enacting clause of the said bill and to insert in lieu thereof the provisions contained in Division B of H.R. 4428 as passed by the House.

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 531 and ask for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read the resolution.

□ 2045

PARLIAMENTARY INQUIRY

Mr. DICKINSON. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore (Mr. MURTHA). The gentleman will state it.

Mr. DICKINSON. Mr. Speaker, now that we have heard the reading of the rule, which I approve and which we worked through, would it be possible that it be passed by unanimous consent, or must there be a record vote?

The SPEAKER pro tempore. There does not necessarily have to be a record vote.

Mr. DICKINSON. Mr. Speaker, must there be a vote, and not by unanimous consent?

The SPEAKER pro tempore. The Chair will put the question on consideration.

Mr. DICKINSON. To put it another way, is it possible that it could pass by unanimous consent?

The SPEAKER pro tempore. Does the gentleman ask unanimous consent that the resolution be considered?

Mr. DICKINSON. Mr. Speaker, I do.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama [Mr. DICKINSON]?

Mr. WALKER. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

The question is, Will the House now consider House Resolution 531?

The question was taken.

RECORDED VOTE

Mr. WALKER. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 276, noes 118, not voting 37, as follows:

□ 2105

Messrs. HENDON, ROWLAND of Connecticut, PACKARD, JEFFORDS, CHENEY, LOEFFLER, SKEEN, BILIRAKIS, McCANDLESS, FRENZEL, LAGOMARSINO, HYDE, MOORHEAD, CHANDLER, SLAUGHTER, DENNY SMITH, and LUJAN, Mrs. VUCANOVICH, and Messrs. LEWIS of Florida, SPENCE, ROGERS, WYLIE, RITTER, LIVINGSTON, TAYLOR, EMERSON, HOPKINS, ZSCHAU, EDWARDS of Oklahoma, DORNAN of California, PORTER, and TAUZIN changed their votes from "no" to "aye."

So (two-thirds having voted in favor thereof) the House agreed to consider House Resolution 531.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. MURTHA). The gentleman from Florida [Mr. PEPPER] is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, for the purposes of debate only I yield the customary 30 minutes to the gentleman from Ohio [Mr. LATTA], pending which I yield myself such time as I may consume.

Mr. Speaker, I want to assure the membership that I am going to present a very abbreviated form of this rule, because the rule has already been read from the chair, and the Members therefore are familiar with it.

The gist of it is, the first thing I want to say, is to compliment the leadership on both sides of the aisle, the chairman and the minority of the Committee on Armed Services, the chairman of the Committee on Education and Labor, and many other Members who cooperated to come to a reconciliation of differences on this bill and who helped the Rules Committee promulgate this rule.

Basically, what this rule does is to classify the amendments that are in order and the time they are to be brought up and the time that they are to be debated. All of that will be before the membership tomorrow, so you can follow the debate as the various amendments are considered.

Mr. Speaker, this is a good rule, it is a fair rule, it is worked out on the basis of compromise, and I want to say I hope the rule will be adopted.

Mr. Speaker, this rule provides for the further consideration of H.R. 4428, the Defense Department authorization for fiscal year 1987. As my colleagues are aware, the House adopted a rule last Friday that provided for general debate on the bill and for the disposition of amendments relating to the Defense Department reorganization and procurement reform.

The rule we consider today makes special provision for the consideration of major issues and provides an orderly but complete procedure for consideration of amendments to all of the bill's titles. The rule provides that amendments to be offered to the bill must be those printed in the report of the Committee on Rules. The amendments printed in the report are essentially divided into two classes. The first class consists of those amendments pertaining to certain major issues which are to be debated under specific terms described in the rule on specific days during consideration of the bill. The second class consists of 130 amendments which were submitted by Members to the Committee on Rules.

Amendments are to be considered in a specific order. The House will conduct 1 hour of debate on funding levels contained in the bill. Mr. SPRATT of South Carolina or his designee may offer an amendment relating to the funding levels. The amendment will be debatable for 30 minutes. After the Spratt amendment is disposed of, Mr. DICKINSON of Alabama or his designee may offer an alternative relating to funding levels. The Dickinson alternative shall be debatable for 30 minutes. If both are adopted, only the Dickinson amendment shall be considered to have been finally adopted. No amendments may be offered to either of those alternatives.

Debate will then take place on the issue of nuclear testing for 1½ hours after which it will be in order to consider two amendments on that subject, one to be offered by Mr. DICKINSON and one to be offered by Mr. ASPIN. Each is debatable for an additional 20 minutes. If both are adopted by the committee, only the Aspin amendment will be considered to have been finally adopted.

On Monday of next week, the Committee of the Whole will begin its consideration of other amendments in the order of the bill's titles. The amendments may only be offered in the order listed and debate time for each is specified in the report. Some of these amendments are to be debatable for 40 minutes and some for 10 minutes. In each case the time is to be equally divided between the amendment's proponent and an opponent. Amendments may be offered to these amendments but are debatable for no more than 10 minutes. The rule states that pro forma amendments for the purposes of obtaining additional time for debate are to be in order only if offered by the chairman or ranking minority member of the Committee on Armed Services. On Monday, the amendment process will continue from where it left off on Friday.

Specific procedures are included in the rule that will allow for the consideration of two alternatives on the issue of wage level determinations for some military construction projects. Representatives HAWKINS and DICKINSON will each be allowed to offer an alternative on the issue and each of their amendments shall be debatable for 1 hour. It cannot be said on what day this debate will occur since it will come up in the normal course of the reading of the bill for amendment.

At the beginning of the bill's consideration on next Tuesday, the rule provides for 1 hour of debate on the Strategic Defense Initiative—on which four alternative amendments are to be considered. The amendments are not to be subject to amendment and each is to be debatable for an additional 20 minutes. Only the last of the four adopted by the committee will be considered to have been finally adopted.

After SDI amendments are disposed of, 1½ hours of debate will ensue on the subject of strategic nuclear arms limitations. The committee will consider a Dickinson amendment on that subject for 20 minutes, and, after disposing of the Dickinson amendment, will consider a Dicks amendment on that subject for another 20 minutes. Neither of those amendments is to be subject to amendment. If both the Dicks and the Dickinson amendments are agreed to, only the Dicks amendment will be considered to have been finally adopted.

After deliberation has concluded on the strategic nuclear arms limitation issue on Tuesday, the rule makes in order an amendment by Mr. BROWN of California relating to antisatellite weapons. The Brown amendment is to be debatable for 1 hour and is not subject to amendment.

After completion of action on the Brown amendment, the Committee of the Whole will continue from where it left off on Monday on consideration of amendments in order to the bill.

The rule then provides that when the Committee of the Whole resumes its consideration of the bill on next Wednesday, the Committee shall consider the amendment of Mr. DELLUMS of California regarding the spending priorities contained in the bill. His amendment shall be debatable for 1 hour and shall not be subject to amendment.

Once the Dellums amendment is disposed of, it shall be in order to consider an amendment by Mr. PORTER relating to chemical weapons production and deployment. The Porter amendment is to be debatable for 1 hour and shall not be subject to further amendment.

After discussion of the Porter amendment, the Committee is to proceed to consider the remaining amendments printed in the report until they have been disposed of.

Mr. Speaker, the rule also provides for one motion to recommit with or without instructions and includes a detailed procedure designed to facilitate a conference with the other body on the issue of Defense Department reorganization.

The rule provides for the discharge of the Armed Services Committee from the further consideration of H.R. 4181, the military construction Authorization for fiscal year 1987, and makes in order a motion to amend the bill to consist of the text of division B of H.R. 4288 as passed by the House. The effect of this provision would be to permit the House to pass a military construction authorization in a free-standing form.

Mr. Speaker, at this time I yield to the gentleman from Ohio [Mr. LATTA] for the purposes of debate only.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me say that I listened to every single word my chairman said, and I agree with every one of them.

Let me further say, Mr. Speaker, that believe it or not, this rule was designed to save time. The last time we debated an authorization bill on defense it took 3 weeks. We do not have 3 weeks. So this bill was designed to expedite the passage of this bill before we quit on August 15.

Mr. Speaker, I think the gentleman from Florida [Mr. PEPPER] has adequately described the rule. It has been read; everybody was listening to those four pages that were read up there, and I have one request for time.

Mr. DICKINSON. If the gentleman would yield, just let me say the rule that has been fashioned is done with the joint efforts of the chairman of the committee and myself. After reconciling some differences, this is what we agreed to. It is fair; it is the fairest rule we could make. I am pleased with it. I would urge the Members to accept it, and let us get out of here tonight and come in fresh tomorrow.

Mr. COURTER. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman.

Mr. COURTER. Mr. Speaker, I disagree with what was said. I do not think it is a fair rule. I know that probably it is the best one we are going to get, but I want to let you know why I do not think it is a fair rule.

It is not a fair rule for two major reasons. No. 1, there are two very important amendments that are highlighted by virtue of their placement in the rule. They really do not have a great deal to do with the arms area; they do not have a great deal to do with the work of the Armed Services Committee; they are really more germane to the Foreign Affairs Committee. They have to do with arms control issues.

One is a SALT II amendment, and the other is a test ban amendment. That is No. 1, No. 2, the way those two amendments are configured, it changes the open rule that has been the policy of arms control debates ever since I have been a Member of Congress.

What I mean by that is that normally when you have an amendment to the bill when the rule is open, a substitute or an amendment thereto is voted on, and then takes the place of the original amendment.

This, however, is done much differently. If the Republican substitute to the test ban amendments prevails, then there is a vote on the original test ban amendment as proffered by the majority party; it is kind of a "king of the mountain."

So in that respect it is a bad rule, it sets a bad precedent, it has never been done before on a bill coming from the Armed Services Committee, and although it might be the best we can get, it is certainly not fair. It is not right. The two issues really do not pertain to the work of our committee, and I am against it.

□ 2115

Mr. LATTA. Mr. Speaker, let me reclaim my time by saying that I quite agree with the gentleman that those subjects will be more appropriately taken up in the Committee on Foreign Affairs, but they are in this rule. There is no question about it. You will have adequate time for debate. You can vote your pleasure.

Mr. BADHAM. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from California.

Mr. BADHAM. I thank the gentleman for yielding.

In partial response to the gentleman from New Jersey, my good friend and a distinguished member of the committee, and to the rest of the Members of the House, I will simply say this, that we the members of the committee on both sides of the aisle, members of the Committee on Rules on both sides of the aisle have worked long and hard because we have a compressed amount of time in which to consider this bill.

It is an important bill. We were talking about almost $300 billion for the defense of this country.

Now having said that, it is an unusual rule, there is no question about that. But 2 years ago we had 60 amendments on the floor. Last year we had 120 amendments on the floor to this bill. This year because of time constraints, because of budget constraints we felt that it would be proper to try to craft within the rules of this House a system whereby we could have an orderly consideration of this very important legislation and we, through great cooperation, have done it.

It could be considered, I would say to the gentleman, by some degree unfair. Well, that is the way it goes because either we are going to have a bill or we are not going to have a bill. I would prefer that we did not discuss foreign affairs, arms limitations and so forth.

Mr. Speaker, I yield back.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the majority whip, the gentleman from Washington [Mr. FOLEY].

Mr. FOLEY. I thank the gentleman for yielding.

Mr. Speaker, I just take this time not to debate the rule but to see if we have an understanding on the procedure for the remainder of the evening and for tomorrow morning.

It is my understanding that if the rule is adopted, we will rise and there will be no further business tonight, and the House will reconvene tomorrow at 10 o'clock and begin debate on the money portion of the bill. Following the consideration of the two issues and votes on those two issues, we will proceed to the testing issue. Is that the understanding of the gentleman from Alabama?

Mr. DICKINSON. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Alabama [Mr. DICKINSON].

Mr. DICKINSON. I thank the gentleman for yielding.

Mr. Speaker, that is the agreement between the chairman of the full committee and myself, and we certainly want to adhere to it. We urge all the Members to approve the rule and let us rise.

Mr. FOLEY. I will only say this, Mr. Speaker, if time permits: I have been present during a great deal of discussions, and I found that everyone on both sides of the aisle has striven to be constructive in bringing forth this bill in the most effective and expeditious way, and I would particularly say that is true of the gentleman from Alabama [Mr. DICKINSON] and certainly the committee chairmen on our side who have been involved in this, the gentleman from California [Mr. HAWKINS], the distinguished chairman of the Committee on Rules [Mr. PEPPER], and the chairman of the Committee on Armed Services [Mr. ASPIN] and others. And I hope that that spirit of comity can continue, as we have, in the difficult days ahead to resolve the issues in this bill.

I thank the Speaker.

Mr. LATTA. Mr. Speaker, I yield back the balance of my time.

Mr. PEPPER. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. MURTHA). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. COURTER. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 261, noes 117, not voting 53, as follows:

□ 2130

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 99-768) on the resolution (H. Res. 532) waiving certain points of order against consideration of the bill (H.R. 5313) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1987, and for other purposes, which was referred to the House Calendar and ordered to be printed.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 4430, MINIMUM ALTITUDE REQUIREMENTS FOR AIRCRAFT OVER NATIONAL PARKS

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 99-769) on the resolution (H. Res. 533) providing for the consideration of the bill (H.R. 4430) to require the Secretary of the Interior to conduct a study to determine the appropriate minimum altitude for aircraft flying over national park system units, which was referred to the House Calendar and ordered to be printed.

□ 2140

## HOUSE RESOLUTION 531

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. HUNTER] is recognized for 5 minutes.

Mr. HUNTER. Mr. Speaker, I rise to spend just a couple of minutes to say why I have voted against the rule tonight, the rule on the Department of Defense bill, and to lodge my protest to the leadership of the House, to the Speaker of the House and the Rules Committee for the exclusion of what I thought was a very important, germane amendment to the Department of Defense authorization bill.

I had an amendment with Mr. ROBINSON of Arkansas that mandated that the President of the United States, within 30 days after enactment of the DOD authorization bill, deploy sufficient resources and personnel and particularly aircraft to the borders of the United States to substantially interdict the narcotics-carrying aircraft and vessels that are presently penetrating our border. Let me just tell my colleagues that as we sit here tonight, 1,000 pounds of cocaine will be illegally imported into the United States by these smugglers.

In my own area in California, in the California-Mexican border in the last year we have had some 588 aircraft that we know of enter the country illegally importing narcotics for our children. We have only been able to interdict 3 to 4 percent of those aircraft.

In fact, in California, we have been unable to interdict successfully by interdicting aircraft in the air only one or two. That means that about 98 percent of all the planes that are trying to get into this country with narcotics for our children are successful. The reason they are successful is because we are not deploying the one resource that we have that can stop these aircraft, and that is the U.S. military.

The posse comitatus alteration that we propose, that is altering the law that allows the President to use military forces to interdict people who are penetrating American airspace is only a modification of that same posse comitatus law that the Armed Services Committee has worked in previous DOD bills. It was well within the jurisdiction of the Armed Services markup; it was within the jurisdiction of this particular bill, and it is a travesty that the House leadership and the Speaker and the Rules Committee did not allow us to have this very important amendment before the Members of the House.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. HUNTER. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Do I understand that the gentleman is telling us that he took before the Rules Committee an amendment that was designed to stop drug trafficking by allowing our military to participate in interdiction and the Rules Committee said that he could not offer that amendment, and that the rule that was just approved was in fact a confirmation of the fact that they would not allow that drug amendment to come to the floor?

Mr. HUNTER. The gentleman is absolutely right in what he has said. They did not allow it to come to the floor, and the reason that they gave was, well, the Speaker wants to have all the so-called drug bills in a single package that will come up and be before the House before September 12.

The reason that that is not applicable to this particular amendment is because this amendment touches not only on narcotics interdiction but also on terrorism. You do not know if one of those aircraft coming in has narcot-

ics for our children or perhaps explosives. It is a terrible situation, and this amendment would have mandated that the President deploy the forces necessary to stop within 45 days this tide of illicit craft, both aircraft and vessels, coming into the U.S. territory.

Mr. GINGRICH. Mr. Speaker, will the gentleman yield?

Mr. HUNTER. I yield to the gentleman from Georgia.

Mr. GINGRICH. I just wanted to make the point, as I understand it, there were in fact 150 amendments that were made in order so it was not that this bill was not going to have amendments, it was just that the antidrug, antinarcotic amendment that you would have offered was the one that they could not get to. So the first 150 amendments were all right, but when it got to an amendment that would have helped stop drug trafficking and helped stop cocaine and heroin, that was not acceptable?

Mr. HUNTER. That is right. We have amendments on Nicaragua, on all sorts of areas that really should not have been discussed in this particular DOD bill; they were all ruled in order. This particular amendment was one of the very few that was not ruled in order.

Mr. GINGRICH. If the gentleman will yield, I just wanted to say that I think it is interesting that we have gone for a year and a half without any bipartisan effort. We have had several press conferences by the Democratic leadership about bipartisanship. We had a story in the morning paper about Mr. SCHULZE of Pennsylvania, I believe, saying flatly that there was not bipartisanship in the way that the Ways and Means Committee was drawing up. I take it the gentleman did not get bipartisan treatment in the Rules Committee for his amendment, I think it is just wrong to have all this public relations effort by the Democrats and then the Democrats and the Rules Committee block us being able to bring an antidrug amendment to the floor.

I thank the gentleman for his effort and I hope he will continue.

Mr. GEKAS. Mr. Speaker, will the gentleman yield?

Mr. HUNTER. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. I just wanted to report to the gentleman who has been in the forefront on this war on drugs that today I offered an amendment in the Crime Subcommittee of the Judiciary Committee which would append the death penalty to a drug dealer or to anyone involved in the continuing enterprise involving the sale and trafficking of drugs, was defeated in the Crime Subcommittee, not on the merits, but rather, ironically enough, because the votes that were cast were votes not against the death penalty it was said, but because they knew that it could not pass the Judiciary Committee and because of the opposition of the chairman of the Judiciary Committee, PETER RODINO.

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. PEPPER] is recognized for 5 minutes.

Mr. PEPPER. Mr. Speaker, I was unavoidably absent Tuesday evening, August 5, 1986, and again on August 6, 1986, until late afternoon.

In my absence for rollcall 282 on August 5, 1986, I was paired against the Courter amendment to H.R. 4428, the Defense Department authorization for fiscal year 1987. Had I been present for rollcall 283, I would have voted "aye" for the modified Traficant amendment and "no" for rollcall 284, the amended Courter amendment. I was paired for the amended Mavroules amendment for rollcall 285.

On Wednesday, August 6, 1986, I was absent for rollcall 286, a motion to suspend the rules and pass H.R. 4333, to improve veterans' benefits for former prisoners of war. Had I been present, I would have voted "aye." I would have voted "aye" as well for rollcall 287, to improve readjustment counseling for Vietnam-era veterans. I would have voted "aye" for rollcall 288, to provide emergency assistance to farmers and ranchers adversely affected by this year's drought. Had I been present, of course I would have responded to the quorum call on rollcall 289. On rollcall 290, I was paired for passage of H.R. 1562. I would have voted "aye" on agreeing to the Skeen amendment, rollcall 291; "aye" for rollcall 292, on agreeing to the amended Jacobs amendment; "no" for rollcall 293, on agreeing to the Morrison amendment; "aye" for rollcall 294, on motion to rise and report H.R. 5294; "aye" for rollcall 295, on agreeing to the Walker amendment and "aye" for rollcall 296, on passage of H.R. 5294.

## THE DRUG CRISIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. LUNDINE] is recognized for 5 minutes.

Mr. LUNDINE. Mr. Speaker, today, in America, we are facing a drug crisis which will not go away until important steps are taken in all aspects of our society including all levels of government. These are three areas where government can make a difference in the war against drugs: interdiction, education, and law enforcement.

Interdiction is the key to ending the flow of illegal drugs into this country. I believe we must use our Air Force, Army, Navy and Coast Guard, to assist our drug enforcement agents in their efforts to keep drugs out of this country.

Congress took an important step last year toward this goal when it agreed to an amendment to the Department of Defense authorization bill to provide for the hiring and deployment of 500 narcotics investigators for the Coast Guard. These investigators are to be deployed aboard naval vessels to assist drug enforcement officials in their efforts to stop drug trafficking. Fifteen million dollars was appropriated last year to fill these positions. I am disturbed, however, that none of these positions have yet been filled. The Coast Guard plans to fill these positions by the end of the next fiscal year.

As interdiction is the most important part of our three-pronged effort to combat drug abuse, I intend to offer an amendment to the 1987 Department of Defense authorization bill which calls upon the Secretary of Defense to work with the Coast Guard to facilitate its tactical law enforcement teams' interdiction efforts. The success of the TACLET's, which are deployed on Navy ships, has been limited. The Navy simply does not have the luxury to intercept great numbers of potential drug smugglers because of the other national security roles it must play and strict timetables it must meet. If my amendment is accepted, the Navy will be given the authority to assist the TACLET's, to the best of its ability, in intercepting drug smugglers.

Another way in which we can make a dent in the international drug trade is to conduction our foreign aid to countries with drug-dependent economies, on that country's drug eradication efforts. To help reach this goal, I am introducing the Drug Eradication Act of 1986. This legislation is aimed at using U.S. economic leverage through international lending institutions to achieve the eradication of drug crops in developing countries. My bill would require that drug eradication plans be developed within 1 year, and implemented by drug producing countries as a prerequisite for U.S. support for assistance from the multilateral development banks [MDB's].

I believe that to stem the tide of drugs into this country we need to recognize that those countries which are large drug producers, are also large debtors. These countries depend very heavily upon assistance from the World Bank, and other international lending institutions. For example, five of the largest drug producing countries received over $11.5 billion from the World Bank between June 1984 and June 1985. What my legislation will provide is a program to enable these countries to use these funds to develop nondrug related economic pursuits.

Under current law, the President has authority to use MDB's as leverage in fighting the drug problem. He has never exercised that authority. My bill will shift responsibility for certification from the President to the Drug Enforcement Agency and the State Department, thereby moving the authority to an agency of Government more likely to use it to insure that a strong drug program is carried out.

My bill will also ensure the MDB's fund crop substitution projects. As part of this effort, the U.S. executive directors of the MDB's will see that these crop substitution projects are enforced by the host country.

It is my plan to work very closely with the House leadership in the coming weeks and months in putting together a comprehensive bill to address the drug problem in this country. I feel it is important that this bill include the provisions in the legislation which I am introducing today. We need to get at the source

of the drug problem. I can think of no better way to do so than to fund projects which will help developing countries foster nondrug related economies.

I am also confident that the Speaker's drug initiative will include funding for programs to educate our Nation's young people about the horrors of drug dependency. I have two sons who will soon be teenagers so I am personally aware of the danger that youngsters can be exposed to drugs before they know enough to turn them down. We all know how powerful peer pressure can be at that age. We also know that drug dealers tend to congregate near our schools in hopes of hooking children into lives of drug dependency. It should be a top priority of the Congress to see that primary and secondary schools receive funding to include drug education classes in their curriculum before more innocent children fall victim to drugs.

To educate the general populace about drug abuse, as well as our children, it may be necessary to introduce legislation which will require the Federal Communications Commission to include in its licensing requirements, that radio and television stations devote free air time to drug education programs. In the case of drunk driving and cigarette smoking, radio and television public service announcements have proven themselves to be a very effective way to educate a great number of people. If the television and radio networks do not respond to a call for a voluntary program of drug education, it may be necessary to require it.

In addition to our educational efforts aimed at preventing drug abuse, we must provide treatment facilities for those individuals who desire it, or are susceptible to addiction. An editorial in yesterday's New York Times, reveals information which is very disturbing to me. It states that New York City's treatment programs are operating at 110 percent of capacity." In fact, the situation in New York City is so bad that these programs must wait-list volunteers for treatment.

Currently, the Federal Government spends almost eight times as much on law enforcement as on drug treatment and education. I feel it is time to review our spending priorities, and increase our commitment to durg treatment and education.

Under the broad heading of law enforcement, I feel that the Federal Government can do several things to fight a war on drugs. First, I am pleased to be a cosponsor of legislation that would make money laundering a crime and greatly expand the Federal Government's powers to fight it.

"Money laundering" is the term which is used to describe the practices through which criminals disguise the origin of money obtained through illegal activities such as drug dealing, prostitution, gambling, racketeering, or investment fraud. According to the President's Commission on Organized Crime, literally tens of billions of dollars in illegal funds are laundered through U.S. financial institutions every year. The largest portion of this money comes from drug dealing.

One of the most common ways to launder money is to simply deposit cash in a financial institution from which the money can be funneled via checks, travellers' checks, money orders or wire transfers to other financial institutions. Much of this money is channeled to foreign banking institutions that do not share financial information with the United States. In several instances, organized crime figures have attempted to buy their own banks.

Congressman FERNAND ST GERMAIN of Rhode Island, chairman of the Committee on Banking, Finance and Urban Affairs, has introduced legislation designed to prohibit both individuals and institutions from knowingly engaging in financial transactions that involve money generated by criminal activity. I am a cosponsor of this legislation, which has been reported out of the Banking Committee and is currently awaiting floor consideration.

This legislation will make it very difficult for those who deal and traffic in drugs to funnel their profits from these illegal activities into the payments system. The Banking Committee bill is an important component in our war against drugs.

A Federal money laundering bill came one step closer into being when the Senate passed its version on July 31 by an overwhelming majority of 93–0.

Second, in an effort to expedite law enforcement efforts aimed at prosecuting Federal narcotics offenses, I am introducing the Emergency Drug Control Judicial Resources Act of 1986. My bill calls on the President to appoint 2 additional district judges to each of the 10 Federal districts which have the greatest backlog of criminal cases. It is my intention that these judges be used to reduce this backlog of criminal prosecutions for offenses, under the Controlled Substances Act and other drug control laws, awaiting trial in these districts. These 10 districts include 2 in my own State of New York, three in California, two in Texas, one in Florida, one in Illinois, and one in Arizona. These are all areas of the country where the need to prosecute drug offenders is very great. I am hopeful that my legislation will help these areas of the country deal with this great problem.

Third, I am the sponsor of a concurrent resolution which encourages the Judiciary to assign Federal judges to courts in districts with large backlogs of pending criminal cases arising out of drug enforcement efforts. There are several Federal districts including the southern and eastern districts of New York, the southern district of Florida, the southern district of Texas, and southern and central districts of California where there are over 1,000 backlogged criminal cases. It is my intention in offering this resolution to inform the judiciary that Congress places a high priority on alloting judicial resources to areas where narcotics cases are backlogged.

Fourth, I am a cosponsor of my colleague from New York, Mr. RANGEL'S bill, H.R. 526, the State and Local Narcotics Control Assistance Act of 1985. I commend my colleague and friend for introducing this legislation as it is very important to provide State and local governments with the means to increase their drug enforcement activities, and to develop more effective drug abuse prevention, treatment, and rehabilitation programs. It is my hope that the substance of this bill is included in the Speaker's initiative.

Lastly, I want to express my desire to work closely with my colleagues in the remaining weeks of this session to put together a bill which will direct the Federal Government to use its resources to fight drugs in the most effective ways it can—through interdiction, education, and law enforcement.

## MEDICARE HMO/CMP QUALITY IMPROVEMENT ACT OF 1986

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. MICA] is recognized for 5 minutes.

Mr. MICA. Mr. Speaker, today I am very pleased to introduce legislation which addresses an issue with which I have been very concerned for some time now. My bill, the Medicare Health Maintenance Organization Quality Improvement Act, is a collection of reforms to improve Federal regulation of health maintenance organizations.

I have long been an advocate of HMO concept. HMO's are very popular in my home State. When, in 1982, the Health Care Financing Administration awarded demonstration project contracts to HMO's nationwide, more than half the subscribers at that time were in the State of Florida. Since that time, HMO enrollment has exploded: In one year alone, from the spring of 1984 to the spring of 1985, nearly 3.8 million were added to the national enrollment figures. HMO's now operate nationwide, often providing efficient care and a variety of services not available under other health plans at a lower cost.

At a time of escalating health care costs, the HMO concept would seem to be the answer. However, in the last few years event in Florida—particularly southern Florida, where the unique character of the population complexifies the issue of health care—have convinced me that HMO's can no longer operate under their present agreements with the Federal Government. Quite simply, the 700,000 Medicare beneficiaries who are enrolled in HMO's deserve to be better protected than they have been in the past. And the Federal investment in HMO's—$1 billion in 1985—must be safeguarded.

Therefore, I am introducing legislation to enhance Federal oversight of HMO's 13 key provisons. This bill will allow regulatory agencies to impose fines for depriving beneficiaries of medically necessary services, require annual audits of HMO's and full disclosure of the financial status of specific affiliates, restrict waivers of the requirement that HMO's maintain an equal balance of Medicare to non-Medicare enrollees, and grant the Secretary of Health and Human Services the ability to freeze further Medicare enrollment if the HMO does not make progress in meeting the requirement.

The bill would also require prompt payment of claims to service providers

outside of the system, require HMO's to fully explain patient rights and benefits, and require HMO's to contract with independent peer review organizations to monitor quality of care. I have also commissioned the Health Care Financing Administration to study both the way in which the Government reimburses HMO's for Medicare enrollees, and the quality of care and quantity of services provided by HMO's as compared to other health care provisions.

I believe that HMO's are valuable health care systems, and expect that the provisions of this legislation will shore up the cracks in Federal management of HMO operations.

First, requires that service providers who demand payment for services from HMO members they know to be under contract with the HMO will be subject to civil penalties of up to $2,000 and/or will be removed from serving Medicare beneficiaries.

Second, requires that HMO's fully explain to enrollers their rights and benefits and what services are due to them under their contract. Requires HMO's to fully inform their enrollees of their rights to air grievances.

Third, gives the Secretary of HHS the ability to freeze Medicare enrollment in HMO's. Prohibits new waivers of the requirement that 50 percent of enrollees be non-Medicare, unless the potential enrollee population is constitued of a majority of Medicare beneficiaries. Current waivers will be continued only if Department of Health and Human Services establishes a schedule to increase non-Medicare enrollment and the HMO meets the schedule.

Fourth, requires HMO's to pay properly submitted claims within 22 days of receipt. Slow payment of claims can limit enrollee's access to services and jeopardize their credit.

Fifth, authorizes the Secretary to penalize HMO's for not providing medically necessary services to enrollees. For each service or medically necessary item not provided, the HMO can be fined up to $5,000. Under current law, Federal authorities have no choice in the face of an HMO's wrongdoing other than to revoke their Federal qualification or ignore the infractions.

Sixth, require HMO's to contract and pay for independent quality review by peer review organizations. Enrollees could petition PRO's with individual grievances.

Seventh, will establish a means for State and Federal authorities to cooperate in monitoring HMO compliance with requirements, share information, and coordinate joint sanctions.

Eighth, require that HMO's give the Secretary free access to their financial records and notify the Secretary of any internal loans made to subsidiaries, affiliates, and related parties.

Ninth, the Secretary will conduct an annual audit of the finances of HMO's.

Tenth, if the HMO contracts with affiliates to provide all primary care to their members, as well as pay for specialist's services, the Secretary will require that the affiliate maintain an agreement with the parent HMO to insure that it will provide sound health care and that it is fiscally solvent.

Eleventh, the HMO must make adequate provisions against the risk of fiscal insolvency of the affiliate, provisions which are satisfactory to the Secretary.

Twelth, the debts and assets of affiliates may be taken into account in determining the financial status of an HMO.

Thirteenth, require the Secretary to study the adjusted community rates [ACR] and adjusted average per capita cost [AAPCC] in order to see if reimbursement is too low as to cause HMO members to be deprived of services, or so high as to overcharge the Government.

Fourteenth, require the Secretary to study the quality and quantity of services offered by HMO's compared to care offered by other service providers. IMC would be included in this country.

---

□ 2150

## TRIBUTE TO HON. BERKLEY BEDELL AND HON. COOPER EVANS ON THEIR RETIREMENT

The SPEAKER pro tempore (Mr. HOYER). Under a previous order of the House, the gentleman from Iowa [Mr. SMITH] is recognized for 60 minutes.

GENERAL LEAVE

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. SMITH of Iowa. Mr. Speaker, the gentleman from Iowa [Mr. LEACH] and I have asked for these special orders to show our appreciation for the distinguished service of two of our colleagues from the Iowa delegation who are retiring at the end of this year.

These Members, BERKLEY BEDELL and COOPER EVANS, have both made distinctive contributions to the Congress over several terms and their presence will be solely missed in the sessions ahead.

BERKLEY was first sworn into office in 1975 and COOPER followed 6 years later. Both were reelected to subsequent sessions by increasing margins and surprised both their constituents and their congressional colleagues when they announced their retirement plans.

After a legendary career as an independent businessman in Iowa, BERKLEY, desiring to make some contribution of public service decided in 1972 to run for Congress. Iowa's Sixth Congressional District is a large, sprawling region of northwest Iowa. That year, he was nearly elected, with 48 percent of the vote, and was elected 2 years later. He loved the grassroots organization and commuications of campaigning and when he became an incumbent, he carried on this tradition with frequent local meetings throughout his district and well-organized seminars in Washington at which his constituents had the opportunity to be briefed on their problems by high-ranking Government officials.

While BERKLEY has served actively on the Agriculture and Small Business Committees, reflecting his keen understanding of the fact that the economy of Iowa is based on farms and small businesses, his interests have included other important areas, including military procurement, arms control, and problems of the elderly. BERKLEY's approach to government, like his approach to business, is refreshingly direct, frank, and practical and he has shown independence and intensity. His independent business career began when he was 15 and used $50 he had saved from a newspaper route to start a business tying flies for fishermen. He ran an ad in a sports magazine and soon had a flourishing business going. By the time he was graduated from high school, he had seven persons working for him and moved to a downtown location. Out of these beginnings, Berkley & Co., Inc. grew—a $25 million manufacturing business, employing a 10th of the population of Spirit Lake, and producing fishing line and tackle, known worldwide, as well as marine cables and cordage.

In 1964, BERKLEY was named the Nation's "Small Businessman of the Year," and was awarded a bronze plaque by President Lyndon Johnson in a White House Rose Garden ceremony.

While still running his business, BERKLEY attended Iowa State University. However, his business was suspended during World War II when he served as an Air Force pilot.

BERKLEY and his wife, Elinor, have three grown children—Ken, Joanne, and Tom. BERKLEY has been active in innumberable community organizations and is a lay leader of the United Methodist Church.

In his three terms in Congress, COOPER EVANS has won the respect of colleagues on both sides of the aisle for his thoroughness and command of complex subjects. COOPER has brought

unique qualifications to his job as a dirt farmer and farm manager and with degrees from Iowa State University in mechanical and civil engineering and a degree in nuclear engineering from the Oak Ridge School of Reactor Technology.

In his work on the Agriculture Committee, he has influenced the language in bills adopted into law, and he has earned a reputation as a leading congressional expert on farm credit issues and commodity markets.

COOPER has been most active on the Agriculture Committee but he has also served as a member of the Technology Assessment Board of the Office of Technology Assessment, where his professional training and experience as a nuclear engineer have been unique and invaluable, and also served as a member of the Select Committee on Aging and the Select Committee on Hunger.

Prior to his election to Congress from Iowa's Third District in 1980, COOPER had served for 5 years in the Iowa State House of Representatives.

He served in the U.S. Army infantry, 1943-46, and then for years served as a lieutenant colonel in the Army Corps of Engineers with tours of duty also with the Atomic Energy Commission and NASA.

COOPER has been and remains a managing partner and active farmer. He and his wife, Jean Marie, have two sons.

Since his intention to retire was announced, COOPER has been mentioned as a possibility for a high appointment in Government, probably the Agriculture Department, and all of us feel that the Department of Agriculture would gain from securing his services.

We salute these two esteemed colleagues and good friends who are retiring from Congress at the height of their creative powers and political strength. But it is a matter of choice for them and we respect their right to make that decision that no one else can make for them. We want to say to both of them: Thanks for a job well done. We wish you and your families health and happiness in the good years ahead.

Mr. Speaker, I yield to the gentleman from Iowa [Mr. LEACH].

Mr. LEACH of Iowa. Mr. Speaker, it is with great pride as an Iowan that I rise. Two of my State's most distinguished native sons have announced their retirement from this body. Although from different sides of the aisle, they are friends who have earned the profoundest admiration and the respect of their colleagues from all philosophical persuasions.

BERKLEY BEDELL showed his mettle early. At the age of 15 he founded Berkley & Co. with money earned from a newspaper route. From this modest start, the country's most respected fishing tackle emerged.

In 1964, BERKLEY was named the small businessman of the year.

In Congress he has translated that experience into distinguished service on the Small Business and Agricultural Committees.

The citizens of Iowa's Sixth District could not have benefited more from the sound judgment and compassionate sense of problems in our agricultural economy; but what has really distinguished BERK's service in this body, its caucuses and associated institutions, like Parliamentarians for Global Action, is his capacity to rise above the hurly-burly of ordinary politics and focus on the larger issues of our times, arms control, the environment, the rule of law.

No individual has displayed more passionate or thoughtful leadership on issues of peace and environmentalism than BERKLEY BEDELL. As an environmentalist, he has led congressional efforts to reform pesticide regulations so that rural families can be assured a safer and saner life.

As an arms control advocate, he has led congressional, indeed, American efforts, to restart negotiations on a comprehensive test ban. His persistence and patience led to House passage of one of the landmark pieces of arms control legislation ever considered in this body, H.R. 3.

Like BERKLEY BEDELL, COOPER EVANS has been well prepared to deal with the real world because he cares about the ideal. Like BERK, COOP has brought to this body professional expertise in a career outside the area of politics that is of the highest distinction. An engineer and a nuclear expert in the Army, COOP retired from active service as a colonel to embark on one of the most successful farming and community service careers in our State's history.

Like BERK, COOP is an internationalist. No Member of this body has brought more expertise to international trade, especially as it relates to agricultural experts. No Member has brought more expertise to problems of our beleaguered farm credit system. No Member, it might be said, is a more careful or committed legislator than COOPER EVANS.

I am sure that BERK's wife, Eleanor, his three children, six grandchildren, COOP's wife, Jeanne, and two sons will welcome the added time with them that his leaving this House will provide.

For ourselves, we in this body will miss them and speaking personally, I will particularly.

As a State delegation, we now and again have philosophical, but never personal differences.

BERK and COOP stand out among those who stand out. I know of no individuals to whom the appellation "honorable" more truly apply. They are leaders because of commitment and moral stature, nothing more, nothing less. They have been ornaments to this body, exemplars of what being a public servant is all about.

The State of Iowa, indeed, this great country is in their debt.

Mr. SMITH of Iowa. Mr. Speaker, I yield to the gentleman from Iowa [Mr. TAUKE].

Mr. TAUKE. Mr. Speaker, I thank the distinguished gentleman for yielding.

I would take advantage, Mr. Speaker, of the request the gentleman made earlier that we have an opportunity to revise and extend our remarks, so as not to be duplicative of what my two colleagues from the State of Iowa have already said about our retiring colleague.

I have to tell you, Mr. Speaker, and Members, that I come here tonight with really mixed emotions. On the one hand, I greatly appreciate the opportunity to say thank you, I think on behalf of the people of Iowa to our colleagues who are retiring, and I certainly want to welcome the opportunity also to praise them for the outstanding work that they have done in public service.

But I am also very saddened because they are two outstanding public servants who have decided to leave this institution. I am saddened because the institution is losing two very special people, but I am also saddened because of the loss that I will personally feel by not having the friendship of COOPER EVANS and BERKLEY BEDELL so close by.

Obviously, my home State of Iowa is something that is common to all of us who represent the State of Iowa in the U.S. House of Representatives, but there is something more that we have in common than just our home State. It is almost as if this delegation has at times been something of a family. We have had our differences. We fight some fairly pitched battles occasionally, but I think that we share a commitment that is exemplified by BERKLEY BEDELL and COOPER EVANS. They are solid. They are hard working. They are committed people. They get the strengths that they bring to the House of Representatives from the people of our fine State. They were very successful men outside of Congress by whatever standard you measure success and they brought the great experience that they had acquired outside of Congress to this body. That experience gave them great insight into the issues that we face here and when matched with their giant intellects, it brought to this House a great contribution that I suspect few others can match.

I recall very well when I first came to this body in 1979. I was fortunate enough to be appointed to the subcommittee that BERKLEY BEDELL chaired in the Small Business Committee. I can

tell you that there was no one in this body who was kinder to me in those first months that I served in office than BERKLEY BEDELL. We spent a lot of time investigating the oil industry. That was the time when we had an oil crisis and the marketing practices of the major oil companies were a matter of considerable concern. The probe resulted in the drafting of "divorcement" legislation designated to prohibit the major oil companies from owning and operating retail service stations.

As is the case with much legislation that we launch around here, that bill did not come up for a vote in the House, but it did lend support in two subcommittees and in the full Small Business Committee and it made me feel as if perhaps we had some impact. That feeling was something that I received in large part because Berkley was willing to share it.

In northwest Iowa, BERKLEY BEDELL is known as the bureaucrat buster, because of his sojourns down to the halls of the halls of the various bureaucracies in and around Washington where he stops by and asks people who work for the Government, "And just what do you do?"

Of course, in doing that, he not only does what many people in Iowa and across the country would like to do, but he also finds out a great deal that I think says a great deal that helps him and all of us in formulating policy.

But if I were going to point to any area of legislative accomplishment for BERKLEY BEDELL, I would point to two. First is in the area of agriculture. Although there are philosophical differences on occasion between Congressman BEDELL and I on agricultural issues, I can think of no one who is a more committed advocate for farmers than he is. He has worked hard to advance his policies in which he believes, especially that he believes that would benefit the family farmer in Iowa, and all farmers across the Nation will miss his leadership.

□ 2205

But I also have to point to another issue: his commitment to peace. I have been struck, particularly in the last 3 or 4 years, with his dogged determination to provide leadership in this Congress and in my home State for our Nation to try to pursue peace in this world, and for that I greatly respect him.

My colleague, COOPER EVANS, I have known for a very long time, because COOPER and I did some work in Iowa politics, and then we ended up together in the Iowa legislature. We were elected in the same year to the Iowa General Assembly, and I found when I went to the Iowa General Assembly that one of the persons with whom I associated most was COOPER EVANS.

He is not an easy person to get to know, because COOPER EVANS never says much about himself. But if you probe a little bit, you find out that COOPER EVANS is more than just an Iowa farmer. He is an engineer, he is a scientist, and he is an intellectual, in the real sense of the word. I think that you find out a lot about COOPER EVANS by what he does not tell you, but you also find out quite a bit about him by what he does.

One of the things that I have found most interesting about him is that when he goes home and is not shaking hands or visiting with constituents or listening to people in the Third District of Iowa, he plants walnut trees on his farm. He plants walnut trees because that is his commitment to the next generation.

COOPER EVANS thinks in the long term. He thinks about the big picture. He thinks about the future. I think around here that he has proven that old adage that it is amazing what you can do if you do not care who gets credit for it, and he has never tried to get credit for anything. Yet he clearly has been one of the people who has been a real mover and shaker, particularly in the area of agriculture, and it is in large part because of his intellect, his towering intellect, and his experience, and also because of his perseverance. On agricultural issues ranging from commodities regulation and the farm credit problem to ensuring high-quality U.S. grain on the world market, COOPER's knowledge and leadership are second to none.

And it is not just because COOPER is a farmer and understands the needs of American agriculture. I think it is because he has an undying desire to help to make laws which truly help the agriculture community.

At any given time you can find COOPER EVANS at his desk reading reports and dissecting information that he uses to personally—not through legislative services, but personally—write legislation. He has an uncanny ability of being able to precisely draft legislation down to the last comma and final period, and as far as I know, although he has lots of titles behind his name, he has never been a lawyer.

It is this very hard work and commitment that has led COOPER to become something of the "E.F. Hutton" of this Congress on agricultural issues. When COOPER speaks, people listen.

I tell the gentleman from Iowa [Mr. SMITH] that the people not only of Iowa but the people of America, I think, will miss COOPER EVANS and BERKLEY BEDELL. I know that I personally will miss their friendship. It is always difficult to say goodbye to friends. I hope that this is not a goodbye, but a time when they will leave here to a future that will be filled with rewarding and enriching opportunities and challenges. We both wish them good health and God's blessings.

Mr. LIGHTFOOT. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Iowa.

Mr. LIGHTFOOT. Mr. Speaker, I wish to thank the gentleman from Iowa [Mr. SMITH] for having this special order this evening, and JIM also.

We prettly much, I think, touched on a lot of the academic background of our two friends who are leaving, and I would like to take a moment or two to reflect maybe upon some of the softer-type things. As the gentleman and I stand here together, we represent both ends of our delegation, he being the senior member, and I being the junior member of this group. Maybe I can offer some perspective from that point of view.

With our two friends retiring, that is one-third of our delegation, or one-third of our family, that will be leaving us here, and as I think back across the past nearly 2 years, I have to go back further than that, because the first time that I met both of these gentlemen, and I use the term "met" as symbolic, was when I was a farm reporter, and covering agricultural events and so on, and of course when we talk about agriculture in Iowa, BERKLEY BEDELL and COOPER EVANS were two people that were always in the forefront as far as agricultural issues were concerned. In that capacity I had followed both of their careers to some extent.

When I finally made the decision to get involved in this process, of course, BERKLEY is my next-door neighbor as far as his district is concerned, and COOPER is over on the other side of the State. As we were laboring over making the decision of whether to enter the realm of politics or not, one of the meetings that I happened to attend was in Winterset, and COOPER happened to be there that particular night. As TOM was saying, COOPER is a little bit difficult to get to know, but I found out that he likes a good joke, and from that point on, I think we kind of struck a note.

Mr. SMITH of Iowa. You told a good joke?

Mr. LIGHTFOOT. Well, it was not good, but COOPER thought that it was.

You see, you kind of have to go to his military background, and if you can get something between a couple different branches of the service going, why you can get a pretty good yuck out of him from time to time.

I guess the thing that struck me really about our entire delegation, and these two gentlemen in particular, was that upon arriving here as the new kid on the block, everyone in this delegation held out his hand in one shape or form and said, "Welcome, is there any-

thing that we can do to help?" And they really meant it.

As has been pointed out before, there have been some ideological differences, but I do not remember ever detecting any kind of a personal indifference amongst our group, and that I think is probably rare in this body, if not in any others.

Both of them have been a great deal of help to me. They have advised me from time to time. I have bounced ideas off of both of them from time to time, and it has always met with a great deal of cheer and a great deal of honesty, and I certainly appreciate that.

I would hope that retirement does not mean goodbye; that they will still be out there if we need to call them from time to time and ask for a piece of advice or their opinion on something, because the years of experience that they have combined together is a treasure trough that is pretty hard to put a price tag on.

I guess in conclusion that I just really—as TOM said a moment ago, it is hard to say goodbye to good friends, and we will not do that. We will just bid them Godspeed on whatever they do. I suspect that BERKLEY might have an opportunity to try out a little of that fishing line, and I am not too sure that he might not have sold a spool or two of it to COOPER, because I think that he kind of likes to go fishing as well. But to the two of them, it has been not only a great pleasure, but a great honor to have spent a term in this body with that third of our Iowa family. As far as I am concerned, you guys are still part of it, wherever you may be.

NEIL, thank you very much.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Kansas.

Mr. ROBERTS. I thank the gentleman for yielding.

Mr. Speaker, I want to thank Mr. SMITH and also Mr. LEACH for this time for all the friends and colleagues of Mr. EVANS and Mr. BEDELL, or "COOP" and BERKLEY, for all of us to pay tribute.

I will take COOPER first, if I might, I will take my Republican colleague. He is many things, as TOM TAUKE has pointed out. He is a civil engineer, and he is a scholar deluxe. My goodness, I looked at his laundry list that I got from his office today. He has been awarded every award possible by any scholastic fraternity that has been in existence.

He is a former lieutenant colonel. He was so doggone smart that they loaned him to the Atomic Energy Commission and to NASA. He is an expert on nuclear energy. At home he has run hospitals, he has been chairman of a property tax board, he ran the county soil conservation district, was in charge of the Grundy Center Development Corp., and he has been active for years in the Iowa GOP.

Others have gone down the laundry list of his legislative achievements, but that does not tell the whole story. You know, we all come here to the Congress with different roles to play. Some of us are the back-rail troops; some of us are committee people; some of us get into legislation; and some of us are fine orators and speakers on the floor of the House.

□ 2215

COOPER EVANS is the reserve utility legislative infielder of the House Agriculture Committee. He has had so many amendments passed in the House Agriculture Committee that it is hard to keep track of them, and he does it in a very low-key manner.

We were just meeting with Secretary Lyng, and we were saying, Mr. Secretary, what you ought to do is this and that to raise the income of the farmer, and to get us out of this mess and make the farm bill work in farm country, and implement it in a way that it makes some common sense in corn country, and in wheat country, I might add. Add he said, "I just don't think I have the authority to do that." And we said, "No, Mr. Secretary. You have this animal here and it is called a three-pronged antelope."

I remember the time when he put it in. We were meeting in the House Agriculture Committee, and everybody was getting tired, and he slipped in his amendment. You know, the three things that could be of the most benefit to our farmers today were the amendments offered by COOPER.

It is rare, I think, for a third-term Member of Congress to have his tracks, and very good ones indeed, on that kind of major piece of legislation.

That does not tell the whole story either. We were in subcommittee, it was BERKLEY's subcommittee, and it is called DORFA. That is the Department Operations, Research, and Foreign Agriculture Subcommittee. Everything has to have an acronym around here. We had testimony, and my chairman will remember that. We had the administration down, and they were testifying on section 416. That is the Food Assistance Program. COOPER wanted to know why we were not getting that assistance to the troubled African nations, and they were giving some testimony, and COOPER very kindly interrupted and said, "I'm sorry, that is just not the case." And do you know why he knew that was not the case? Because he had been there. He has been down all those difficult roads to travel and looked at the whole infrastructure, and looked at the whole problem, and he had come up with specific answers.

It is a little embarrassing, I can say, to say the least, when you have a legislative taskmaster that not only introduces the legislation, but he does his homework. And it is a little embarrassing to find out someone is doing the questioning who knows more than you do.

Not that COOPER EVANS would embarrass anyone. If there ever was a kind soul, a gentleman in the Congress, who persevered in trying to do the right thing, it has been COOPER EVANS, and he has done the right thing.

If we ever have the personification of Jimmy Stewart in Mr. Smith Goes to Washington, it is COOPER EVANS. He is the darndest successful nonpolitician I have ever met.

He invited me out in 1982 to Grundy Center in the dead of winter, 16 degrees below zero, to have a hearing on Federal crop insurance. Now, you go out to these hearings, and I do not think I am telling tales out of school here, but when you go out you expect to go up and down Main Street with that Congressman, and talk to the editor, and maybe you issue a press release, and you know, pat him on the back. I said, "Coop, where is the press?" He said, "Well, they will be here if they think it's worthwhile." And even then he sort of chuckled. He is the politician who is not the politician, if you will.

Instinctively people like, like COOPER EVANS, and they trust him, and I think perhaps his greatest contribution is that I believe through his example, and more important because of the man or because of the kind of man he is, he has helped to restore the trust and the faith of our people in our Government. And my colleagues, as of today, that is a mighty tall order.

But in this regard, COOP is a very tall man indeed and I am going to miss him. I associate myself with the remarks of my colleagues in this regard.

I always said he was a great legislative assistant, and I was a pretty good press assistant, and if we could just find a Congressman to work for, by golly, we would be a dynamic duo.

Maybe that Congressman should have been BERKLEY BEDELL. And I rise also to pay real tribute to BERKLEY.

Here is the personification of the American success story, 15 years old as a newspaper boy saving all of those nickels and dimes, and found Berkley & Co. of Spirit Lake, and ended up, as my colleagues have said, with the Small-Businessman-of-the-Year Award in 1964.

I have had the privilege of knowing BERK as a staffer to my predecessor, Keith Sebelius. He and Keith were great friends.

NOW BERKLEY is pattern in the finest sense of the word, and he is a fighter. I am his ranking member on DORFA, Department Operations, Research, and Foreign Agriculture Subcommit-

tee. He is my chairman, and yet he is indeed a true friend.

You know, one of the most valuable lessons I think a Member of this body can learn is that no individual, no party has an exclusive patent on right and common sense. And if you take the time to extend the hand of friendship and understanding, you will find the judgment of the American people is very sound. They send quality people to the Congress.

BERKLEY BEDELL and I vote about 140 degrees apart—well, maybe 120 degrees, BERKLEY. But in our many talks and visits and discussions we find we both want the same things, and we respect each other's points of view.

As chairman, BERK has this great saying, especially when he gets his way, which is most of the time. He says, "Pat, it's great to work with you."

BERKLEY, it has indeed been great. I do appreciate so much your friendship. Chairman KIKA DE LA GARZA of the full committee has described BERKLEY as the conscience of the House Agriculture Committee, warting to do the right thing. I think KIKA said, if my memory serves me correct now, and I am going to use an allegory if I might, BERKLEY is, indeed, the Jimminy Cricket of the House Agriculture Committee. Now I am not going to say who is Gepetto or who is Pinocchio. That might get a little bit embarrassing, I guess. But when you are about the business of doing the right thing, you naturally have the right to change your mind from time to time, and BERKLEY does do that from time to time.

In that respect, he is a Jimminy Cricket, and somewhat like a cricket, always heard, always optimistic, difficult to locate and find on occasion, but always letting you know he is there. As a matter of fact, I suppose one could get somewhat out of sorts trying to corner a cricket, as I have had to do in the past, but it has been my experience, you know, once a cricket stops you really miss him. And BERK, I am going to miss you so much. You have persevered, you have fought for your Iowa farmers and my Kansas farmers, and during a time of real adversity you carried the fight. In doing so, you have served as such a fine and splendid example, always in good spirits, never complaining, always with good humor.

Thank you, BERKLEY. It has been a privilege. And thank you, COOPER. It has been a privilege. I will truly miss both of you, both outstanding men, both fine friends, both outstanding Congressmen.

Thank you on behalf of my farmers and ranchers.

Mr. SMITH of Iowa. Mr. Speaker, I yield to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. Mr. Speaker, I thank my colleague from Iowa for giving us this opportunity to speak about two of our friends, Members of their delegation.

As Members of a body that works together on a daily basis, we are in very many ways like a family. I think it is always sad to say goodbye for substantial periods of time perhaps to a family member, and that is indeed the case with two Members of our family who are leaving us this year. It is doubly difficult when these two Members are from a neighbor State, Members with whom one works so closely on so many issues.

Nebraskans do not always say kind things about Iowans, particularly on a couple of days a year. But I want to say that these are extraordinarily fine gentlemen and Representatives for the people of the State of Iowa.

First, about BERKLEY BEDELL, because we have adjacent districts. We share, for example, parts of the Sioux City metropolitan area, and always, without exception, BERKLEY BEDELL has been a good neighbor to Nebraskans, and especially to his colleague, this Member. The people of Iowa's Sixth Congressional District sent a good and an able Representative to the Congress in 1974. BERK has very ably represented and served his constituents and his State and the Nation.

BERK is a kind man, a man of strong convictions, and a man who acts on those convictions. You have seen it again and again here on the floor, and I saw it when I served with him on the Small Business Committee.

He is a man of seemingly limitless interests in the pressing issues before the Congress, a wide diversity of issues, and his tireless efforts on behalf of his constituents are really very well known to all who have had the privilege of working with BERKLEY BEDELL.

□ 2225

I think that his record for the six terms that he served here speaks for itself. He is an extraordinarily decent person, and an energetic advocate for the people he represents and for their interests.

His service on the Agriculture and the Small Business Committee has been dedicated to the well-being of his Corn Belt constituents and to people like them all over the world.

Many of us will long remember his tireless efforts during the 99th Congress, for example, for the referendum on wheat and feed grain commodity programs. His fight for countervailing duties on the Canadian pork imports as another example, was important to all of us that have concerns and constituents in that industry.

BERKLEY BEDELL is certainly a capable and conscientious Member. He can leave this body with the satisfaction of having done his job very well, and with many accomplishments to his credit.

His service will be missed by us, by the people of Iowa, by the country and especially by his neighbor, me, as far as I am concerned. We are confident, however, of his continued service to the community, to the State, and to the Nation for years to come.

Now for the second of our Iowa colleagues that is leaving us, COOPER EVANS. COOPER has established a distinguished record that has already been well documented here, outside the Congress long before he came here. It is very diverse. I have learned things about it here tonight that I certainly did not know. I knew it was distinguished, but it is more diverse than I had known. He has served very well the people of the Third District of Iowa.

In the Congress, he very quickly established a reputation as an extraordinarily innovative legislator with the capacity for hard work. It has truly been a privilege and a pleasure to serve with him and to work with him on a day-to-day basis. He probably knows, as but one example, more than anyone else in this Congress about agricultural credit, and I have relied on him because of that.

We have seen his work, extensive and excellent work on the Farm Credit Relief Act and on provisions of the farm bill that address the credit crisis.

He has lately worked on secondary mortgage market proposals for agriculture loans that should be a big help to us.

I thought earlier how PAT ROBERTS had frequently referred to him as "everybody's idea man" or "everybody's legislative assistant" when it came to the Agriculture Committee.

I do not serve directly on that committee, but I think that is a very apt discussion and description of COOPER. We are all going to miss his wisdom, his judgment, and his unfailing good humor and his expertise as this body tackles a very wide range of problems that face us in the future.

COOPER EVANS is a remarkable man. I have enormous respect for him, and I have personally continuously benefited from his intellect, his knowledge and his attitudes.

I think if you looked at BERK and at COOPER together, you would have prototypically the best in Iowans; and they have got some great people. He has been referred to as E.F. Hutton—with respect to COOPER EVANS. I thought about Jimmy Stewart, the analogy as PAT ROBERTS brought up.

Now speaking about the two in closing together, they are two outstanding men from the Great Plains State of Iowa that have chosen to retire at the end of this Congress. They will be greatly missed here, not only for their loyal—not only will their loyal con-

stituents miss them, but this colleague in Congress will greatly miss them as well.

To COOPER EVANS and BERKLEY BEDELL I express my wholehearted wishes for well-deserved and happy retirement. I guess make that retirement to other kinds of beneficial activities and to more time with their families, because they will not retire.

COOPER and Berk, I will greatly miss the stimulating and pleasant day-to-day contact with you. Thank you for your exceptional service to the Nation through your congressional service.

Best wishes to you and your families. My thanks to my colleagues from Iowa [Mr. SMITH and Mr. LEACH] for taking out this special order.

Mr. SMITH of Iowa. Mr. Speaker, I yield to the gentleman from Michigan [Mr. SCHUETTE].

Mr. SCHUETTE. Mr. Speaker, I, too, wish to rise to pay tribute to BERK and COOP and I wish to commend the gentlemen from Iowa [Mr. SMITH and Mr. LEACH], plus the Iowa family that has spoken in appreciation and praise of the work and leadership that these two giants of Iowa—and that is what BERKLEY BEDELL and COOPER EVANS are, not just to me, a member of the House Agriculture Committee, but I think to this Congress.

These are two giants from Iowa that are leaving us, and I have had the privilege to serve with these two gentlemen on the House Agriculture Committee, and I believe that COOPER EVANS and BERKLEY BEDELL have not just served farmers and their respective districts, but I feel that COOPER and BERKLEY have served farmers throughout the State of Iowa.

COOPER EVANS and BERKLEY BEDELL frankly have served production agriculture in America and across America, because of the giants they are.

Now, the time that I have had to spend with these two gentlemen has been brief; it has just been one term. Not the years and years that others who proceeded me have talked about, but even though the time may be brief, these gentlemen have given me years of advice, and these gentlemen have given me years of assistance. Most important of all, these gentlemen have given me years of friendship.

BERKLEY and COOP, we are going to miss you. I wish you the best of luck in everything that you do, which I am sure will be successful. I thank you two gentlemen for the help you have given me.

Mr. SMITH of Iowa. Mr. Speaker, I yield to the gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. Mr. Speaker, it is difficult to follow all those people who have made these wonderful statements, but I want to thank my colleague for this opportunity to join in this grand occasion of not only paying respect, but I guess saying a heartfelt "Thank you" to two very distinguished Members of this body.

There is a card that I think every one of us has either looked at in the Hallmark shops; we have purchased it, we have given it or we have received it. It starts out to a man or to a lady and one opens the card and on the inside it says, "who is out standing in his field" and it has this lonely person in this wide field of oats or hay or whatever the case may be.

You think of the sprawling fields of Iowa. You think of these two men. You quickly think of these two men, you quickly think of two gentlemen who are truly outstanding in their many fields; in the fields of Iowa and in the fields of government.

I have had the unique opportunity, like so many of those who preceded me, to work with these gentlemen on a very close professional basis.

I came to the Congress with COOPER EVANS and had the opportunity to sit next to him in the House Agriculture Committee. So unlike anyone who has spoken thus far, I have been right there; through the 1981 farm bill, through the 1985 farm bill, through all of the legislation in between, to sit and listen to COOPER and his anecdotes, his insights, his perspectives, his mountains of amendments.

The chairman of the Ag Committee would want to know how long it was going to take to finish a bill, and the first thing you would do is look at COOPER EVANS to figure out how many amendments he had today, and that would probably give him the signal of exactly what was going to occur.

COOPER, I think, will be remembered, as my distinguished colleague Mr. ROBERTS said, for probably his legislative expertise, and the guy who says it does not matter who gets the credit as long as we do it correctly. He was the guy who, time and time again, would tell us how we could implement what we wanted to do.

In particular, I think we are going to look at him in the area of the agriculture budget, because he loved to serve on that budget task force of the House Agriculture Committee, and go over the minute details of those numbers and make recommendations.

Then I think we are going to remember him for his absolute commitment to conservation, which was such an overriding concern with him, that many have mentioned before, and I think is indicative of his long insight into where we want to go as a society.

Third, I think we are going to remember him in the area of Farm Credit Administration, for his expertise in financial matters for that legislation and what was involved in it; and

Fourth, I think we are going to remember him not only for those three areas, but we are going to remember him for the commodity futures legislation; something which is very complicated and has only probably three or four people in the entire House who can be considered experts on that. COOPER is one of them.

COOPER was able to, constantly back in 1981 and again this year when we reauthorized the futures trading legislation, to provide the kind of expertise and insight our committee needed.

COOPER also is very special in the fact that for me, unlike the rest of you, he has family as his constituents. My sister and brother-in-law and their family happen to be constituents of COOPER.

I think they put it best. It was my sister who said, "You know, COOPER grows on you. You get to know him initially and you say he's a rather quiet, reserved man. The next time you talk to him you realize there's some depth there and as you talk to him, your appreciation, your respect and your good will to this guy only continues to grow and grow."

That is really what COOPER is all about.

He has been there, he has been outstanding, he has been credible to each and every one of us, and I am going to miss that guy just to the left of me on the Ag Committee; I am going to miss his expertise; I am going to miss his counsel.

□ 2235

The other gentleman that we are saying "thank you" to and "good-bye" to today is everybody's friend, BERKLEY BEDELL. BERKLEY, if he has any enemies, I do not know who they are. He may have some opponents but I do not think he ever had an enemy.

PAT ROBERTS suggested, and I think "TOM" TAUKE suggested as well, that we know BERKLEY for his efforts first and foremost in the plight of the farmer. Whether you agree or disagree with BERKLEY'S commitment as to how you are going to raise that money, this guy and I wish the rest of you, and I wish every farmer in this country had been in that Agriculture Committee not just in 1981 but since then, last year as we fought and agonized over the 1985 farm bill, to watch the absolute total commitment of mind, body, and soul to the plight of the American farmer which BERKLEY BEDELL expressed and articulated so eloquently.

Somehow or another the farmers of this country would feel a lot better of what this Government was trying to do if they knew and realized the commitment that people like BERKLEY bring to that.

Second, though, I, too, remember BERKLEY not only for his work on the Agriculture Committee because we all have districts with particular parochial needs and we try to represent those to the best of our ability. BERKLEY went well above and beyond his com-

mittee assignments and became an expert in the area of world peace.

Time and time again in our test ban treaties, in our efforts toward moratoria, those types of issues, here was the Representative of the Iowa farmer who spent the time and became knowledgeable enough to become not only an advocate but an articulate and knowledgeable advocate in the issues of peace that come before this Congress.

Some people would tell you that peace issues and even the farm bill are kind of glorified issues. But, you know, earlier this session BERKLEY became our "Mr. Chairman" of the DORFA Subcommittee. I am honored to be on that subcommittee.

I remember that first organizational meeting that we had, and we were going through the different issues that we were going to deal with in this the 99th Congress. We got to the issue that we deliberated on every session that I have been here, which is called FIFRA, the Federal Insecticide, Fungicide, and Rodenticide Act, which means a lot of agricultural chemicals and pesticides, to put it bluntly.

We have been unable to bring the agricultural chemical industry in this country, the farm organizations, the farmers and the environmental community together in support of legislation to reauthorize the whole FIFRA act.

The question is whether or not we ought to even make the attempt this year. BERKLEY decided to take clearly one of the five most, if not the most, complicated pieces of legislation that this Congress will ever consider and one of the most controversial, and one of the most unglamorous pieces of legislation that anyone can be sentenced to deal with, and he decided as chairman of that subcommittee to undertake that as his major effort in this, the 99th Congress. While we have not completed that process, I am absolutely convinced it will be completed because we in the House Agriculture Committee have completed it, and we have sent it on its way here to the floor and we have all but brought together the kind of consensus which is necessary to pass that legislation here, and if we pass it, as a consensus bill in the House, will result in its passage in the other body.

That is the only way they will take it up.

I think that this Congress and this country and young people for generations and generations to come are going to remember BERKLEY BEDELL not only for what his efforts were to save the family farm and not only for his efforts to provide for peace among all mankind, but they are also going to remember that there was a man from Iowa who years and years ago committed himself to the proper use and regulation of pesticides and agricultural chemicals in this country and as a result has kept our soils cleaner, our waters cleaner, our air cleaner, and our lives richer.

Every once in a while we ask the question of whether or not there are good and decent men and women who serve in the Congress of the United States. I think those of us in the institution ask that question a lot less than our colleagues and friends on the outside.

I would think that the best thing we could do in 1987, which will be the anniversary of the centennial of the 100th Congress of the United States, is to take BERKLEY BEDELL and COOPER EVANS and put them on a roadshow across this country, use those two gentlemen as the examples of the men and women of this country who have risen up, who believed in their country, who have seen a problem, who have said "I will give of my time, my talent and my resources to help solve that problem."

They are Members of Congress, public servants in the highest sense of the word, as it has ever been used.

And is it not wonderful that we have an opportunity like this tonight, when they decided on their own to voluntarily retire from this body, that we have the opportunity to say "thank you."

So BERKLEY, to you and to COOPER, from all of us across this country, not just Iowa, all of us in agriculture and all of us who want the American people to believe in the American system, thank you to two men who have given them reasons to do just that.

Mr. HAMMERSCHMIDT. Mr. Speaker, I would like to add my own thanks and best wishes to the others being offered to our respected colleague, BERKLEY BEDELL, who is retiring from the House of Representatives after 12 years of dedicated service. BERKLEY has served the people of the Sixth Congressional District of Iowa since 1974, with the utmost sincerity and will be missed by all of us.

From the start of his congressional service, BERKLEY has served on both the Agriculture and Small Business Committees. As he is a respected member of the Agriculture Committee, BERKLEY was responsible for fashioning the compromise that held together a fragile coalition in support of a 4-year farm bill in 1981. His colleagues from the farming States will miss his talents as a negotiator.

In the 98th Congress, as chairman of the Small Business Committee's Subcommittee on General Oversight and the Economy, BERKLEY crusaded to open the Pentagon's spare parts procurement system to small businesses by forcing the military to stop using a "qualified bidders" list to restrict competition. Some of us may remember his tool kit, which was his companion for several weeks, as he crusaded against the spare parts procurement system.

BERKLEY BEDELL will be missed in the House as he leaves us this year. However, he will be remembered by all of us for his mild manner and willingness to challenge issues that he felt were questionable; he is not afraid to make his views known, even though he may stand alone. BERKLEY, I wish you luck and happiness for the future.

IOWA—6TH DISTRICT: BERKLEY BEDELL OF SPIRIT LAKE—ELECTED 1974

Born: March 5, 1921, Spirit Lake, Iowa.

Education: Attended Iowa State U., 1940–42.

Military Career: Air Force, 1942–45.

Occupation: Fishing tackle manufacturer.

Family: Wife, Elinor Healy; three children.

Religion: Methodist.

Political Career: Democratic nominee for U.S. House, 1972.

Capitol Office: 2459 Rayburn Bldg. 20515; 225–5476.

In Washington: Cynicism develops easily in members of Congress, but it has never taken root in Bedell, who after five terms still offers a sincerity so genuine it sometimes seems naive.

Bedell has changed little since the day in 1975 when he walked up to Wayne Hays of Ohio, the bullying House Administration chairman, and said, "Everybody tells me you're an S.O.B. Are you? But nowadays he is likely to show his personal concerns in other ways, such as visiting Agriculture Department officials to discuss crop insurance programs without mentioning that he is a member of Agriculture.

Bedell was responsible for fashioning the compromise that held together a fragile coalition in support of a four-year farm bill in 1981. His compromise brought the bill under budget mostly by cutting dairy support prices, but it still was supported by the dairy industry because it assured votes from other commodity interests. Bedell's plan passed the House overwhelmingly, and attempts to alter his dairy structure were defeated.

In 1984, Bedell found himself in a losing position in a Senate conference. He had attached language to a House farm bill calling for advance price support payments to corn growers in certain cases. But Senate Agriculture Chairman Jesse Helms opposed the amendment, and had the votes to prevail in conference. In a heated exchange, Bedell accused Helms of caving in to Agriculture Department pressure. Still, the amendment was dropped.

Bedell's major project in the 98th Congress was much different—he crusaded to open the Pentagon's spare parts procurement system to small businesses by forcing the military to stop using a "qualified bidders" list to restrict competition. As chairman of the Small Business oversight subcommittee, Bedell pursued his measure despite strong opposition from the Defense Department and House Armed Services and Government Operations.

Bedell was helped immensely by revelations of defense procurement "horror stories," such as the famous $7 hammer bought by the Navy for $436. To dramatize procurement problems, he took a repair kit that cost the Pentagon more than $10,000 and bought the 21 identical items from two local hardware stores for $92. For several weeks, Bedell could be seen lugging his tool kit through the halls of Congress, brandishing a hammer or screwdriver. Ultimately, the law was changed.

In the 99th Congress, with the procurement battle over, Bedell gave up the chairmanship of his Small Business subcommit-

tee and took over as head of the Agriculture subcommittee on Agriculture Department operations.

Mild-mannered as he often seems, Bedell has been willing to challenge the conventional wisdom on issues that most members handle simply by following the crowd. Early in his House career he chose to fight the Public Works Committee in its zeal for new water projects, siding with President Carter against new dams favored by most members.

In 1984, when President Reagan bowed to pressure from Western states and rejected a formula that would force them to share more of the cost of water projects, Bedell decried the decision. The water program, he said, "must bear its fair share" of spending cuts.

"If it came down to a vote for a flood control project for Sioux City or a vote for good government," he said in 1978, "I'd have to vote for good government." In 1980, when most colleagues were berating Democrat Bob Edgar for trying to cut money for new water projects, Bedell lectured them on courtesy and of impugning the motives of a colleague "because he has an opinion different from yours."

This kind of moralizing did not earn Bedell any chits from his fellow House members. Neither did his decision to put friendship over partisan politics by endorsing Delaware Republican Thomas B. Evans Jr.'s re-election. As a result, when Bedell tried for a seat on the Democratic Steering and Policy Committee in late 1982, his bid was defeated, 4-16.

On the Small Business Committee, Bedell has crusaded for reforms in the Small Business Administration (SBA) Disaster Loan program, arguing that too many of the loans go to businesses that are not small and whose proprietors are not poor. Many of those changes were written into an SBA bill as it cleared the House in 1979, and though some later died in conference, Bedell supported the final package.

While legislating on Agriculture and Small Business, Bedell has become enamored of foreign policy, and looked for ways to become involved in it. He was a participant in the Law of the Sea conference, and in 1978, when the House approved a bill allowing American companies to search for minerals on the ocean floor, he fought it, implying it was imperialistic. Bedell served on Foreign Affairs in 1979 and 1980 and tried to get a permanment seat the next year, but could not without giving up his Agriculture seat, which he would not do.

At Home: Bedell has enjoyed bipartisan support and five easy re-elections in a traditionally Republican area.

His quiet political style has brought him good rapport with the farmers and small-business men in a district where he grew up and started the fishing tackle business that made him wealthy. He invented and marketed a more durable, flexible fishing line, a business he sold to his children in 1984.

He said that he entered politics because "I couldn't get the satisfaction I wanted from building a bigger and bigger fishing tackle business. . . . We should concern ourselves with our fellow men and put away worship of material goods." Bedell was once a Republican himself, and the personal ties he built in the GOP were not broken after he switched to the Democratic Party to work actively in the gubernatorial and senatorial campaigns of Harold E. Hughes. Bedell's Methodist Church contacts also cut across partisan lines.

He made his first bid for office in 1972, when he took on incumbent Republican Wiley Mayne. Though Bedell's status as a political novice led many onlookers to write him off, he ended up trailing Mayne by only 9,710 votes.

Events caught up with Mayne two years later. Bedell had spent the intervening time preparing for another bid, and he used his 1972 showing to garner both financial support and attention in the small towns spread through the district. Mayne, a member of the Judiciary Committee, was hurt by his defense of President Nixon during impeachment hearings. Bedell wound up with 55 percent of the vote.

The GOP fielded credible challengers in 1976 and 1978, but neither drew more than a third of the total vote. Prior to the 1980 election, there was speculation that Bedell might be weakened by a controversy involving his fishing tackle business. A federal grand jury was investigating allegations that the company imported products from its Taiwan subsidiary at artificially low prices to avoid customs.

Bedell denied any wrongdoing and said the allegations were made by a disgruntled former employee. His constituents gave him the benefit of the doubt and a 57,594-vote plurality over state Sen. Clarence S. Carney.

Bedell never became a target of the investigation, and the matter faded from view in 1982. Charges agaist four other company officials were dropped for lack of evidence.

Republicans were convinced in 1984 that they had their best candidate yet against Bedell. Darrel Rensink, the city manager of Sioux Center, in the northwest corner of the 6th united local GOP leaders behind him, a task that his predecessors were unable to do.

But Rensink's campaign never jelled outside party circles. He could not convince many voters that Bedell was a big-spending liberal in Washington who only talked like a skinflint back home. Bedell's high profile and "just folks" personality got him 62 percent.

Mr. GILMAN. Mr. Speaker, it is a distinct pleasure to join tonight in honoring two distinguished Members of this body who have chosen to leave us at the end of this year, COOPER EVANS and BERKLEY BEDELL, both of Iowa.

Although COOPER has been one of the most respected Members on this side of the aisle, the respect for him, he has earned has been bipartisan, both in his Chamber and in his home Third District of Iowa.

COOPER EVANS is one of the few among us who have been successful not at one or two careers, but three. During 20 years of outstanding service in the Army, COOPER EVANS became conversant with the operations of the Pentagon and with matters of national defense. As an Iowan who was born and raised on a farm, and who operated his own 1,400-acre spread after his retirement from the Army, COOPER EVANS is one of this Chamber's leading specialists on agricultural matters. The Agriculture Committee, on which he has served admirably since first being elected to Congress in 1980, has been well served by his expertise.

COOPER EVANS, has been a credit to our armed services, to the farmers of our Nation and to this chamber.

COOPER still operates his fine Iowa farm. We will miss him sorely when he retires to it at the end of this year.

I have had the pleasure of serving with COOPER EVANS on our Select Committee on Hunger, where he contributed thoughtful analysis of agriculture matters. We are going to miss him greatly.

BERKLEY BEDELL, a distinguished colleague on the other side of the aisle, is highly respected by all of us because of his outspoken and dedicated expertise on a number of issues. Having operated his own manufacturing business in Iowa, BERKLEY has been an outstanding member of the Small Business Committee, on, which he has become known as the premier watchdog of the SBA, ever since his first election in 1974.

BERKLEY, like COOPER EVANS, brought a great deal of expertise and panache to the Agriculture Committee, always taking care to represent the interests of his home district.

It is a tribute to BERKLEY BEDELL that he achieved election to the House in the past six consecutive elections, despite the fact that his Sixth District of Iowa has traditionally been Republican. It can truly be said that the Iowan voters of the Sixth District are discriminating when presented with genuine talent.

I had the honor of serving with BERKLEY on the law of the sea conference in the mid-1970's and was deeply impressed with his knowledgable views on international affairs and his concern for American interests. Having been a dedicated member of the House Foreign Affairs Committee for one session of the Congress, we were disappointed that BERKLEY did not stay with us on that committee. We could have often made good use of his commonsense approach to international affairs.

Mr. Speaker, the 100th Congress is going to sorely miss the talents of our colleagues COOPER EVANS and BERKLEY BEDELL. I am pleased to join with all of our colleagues in wishing them, and their families, the best of luck, happiness, and good health, in all their future endeavors.

Mr. FORD of Michigan. Mr. Speaker, I rise today to commend my distinguished colleague from Iowa, BERKLEY BEDELL, for his fine career in Congress. BERKLEY will be retiring from the Congress at the end of this session and his presence will be sorely missed by those of us who have had the opportunity and good fortune to serve with him over the past 12 years.

When BERKLEY BEDELL first joined this body in 1974 he wisely sought and won assignments on both the Agriculture and Small Business Committees. These assignments allowed him the opportunity to work daily on the issues which impact most dramatically on his constituents. In 1981 BERKLEY was responsible for fashioning the compromise that held together a fragile coalition in support of a 4-year farm bill. In the 98th Congress he crusaded to open the Pentagon's spare parts procurement system to small businesses by forcing the military to stop using a qualified bidders list to restrict competition. In the 99th Congress, as agriculture is facing the greatest crisis since the great depression, BEDELL gave up the chairmanship of the Small Business Subcommittee and took over the agriculture Subcommittee on Agriculture department operations.

BERKLEY BEDELL has represented the people of Iowa well. I wish him well in his future and feel confident that he will use the benefits of his experience and expertise to continue to serve the public as he enters the private sector.

Mr. BOLAND. Mr. Speaker, I would like to thank NEAL SMITH and JIM LEACH for sponsoring this special order to mark the retirement from the House of Representatives of COOPER EVANS and BERKLEY BEDELL.

COOPER EVANS was first elected to the House back in 1980, following what had already been a distinguished career in public service. He served his country as an officer in the U.S. Army, as a member of the Army Corps of Engineers, the Atomic Energy Commission, and as Director of Advanced Manned Lunar Missions for NASA. He has served with honor and distinction in all those posts, and has been a source of pride to the citizens of the Third District of Iowa. We will miss his intellect and insight, and wish he and wife Jean the best of luck in their future endeavors.

Mr. Speaker, for the past 12 years the people of the Sixth District of Iowa have been fortunate to have as their Representative in Congress BERKLEY BEDELL—a man who, in his every word and deed, exemplified the qualities of a citizen legislator. He was as quiet and unassuming as he was effective and respected. BERK BEDELL shunned the limelight, preferring to work behind the scenes with his colleagues, rather than in front of the cameras. He first came to Congress as a Democrat from a district that was said to be "unwinnable" by any member of his party. Since that first election in 1974, the voters of that district have wisely returned him every term. BERK BEDELL often chose to exercise his responsibility as a Member of Congress in an usual, but effective, manner. He was known to march into the Federal agencies and departments off the Hill unannounced, for a first hand look at how they functioned. It was often an eye-opening experience for both the employees and BERK.

During his time on the Agricultural Committee, BERK always carefully weighed the needs of his constituents and that of the industry. He was recently instrumental in moving the long-stalled reformation of the Federal Insecticide, Fungicide, and Rodenticide Act. Apart from his agricultural interests, BERK has been a leading advocate of more conscientious defense spending and reducing the level of tension between the United States and Soviet Union by endorsing a nuclear test ban treaty. Regardless of the issue, BERK always cast his vote based on the most simple, but most important, criteria—whether it was the right thing to do or not.

All of us who have the good fortune to be married know how important it is to have a supportive spouse. BERK's wife, Jean, has been all that and more. She has been a constant companion throughout their 43 years of marriage, and has been a partner with BERK in his duties as Representative, to the benefit of the people of Iowa. They were, and continue to be, a great team.

Mr. Speaker, I know that COOPER EVANS and BERKLEY BEDELL will be missed, because of the concern for their Nation they exhibited daily in their work, and also because they were just good people. At this time I would like to offer these two men my congratulations and my best wishes for a long and happy retirement.

Mr. HORTON. Mr. Speaker, this body will lose a number of Members at the close of the 99th Congress. The two we are here to honor this evening are among the finest I have had the honor and privilege of working with during my 24 years in Congress. These two men, COOPER EVANS and BERKLEY BEDELL, will not be soon forgotten by those of us who know them.

COOPER joined this body in 1980, and successfully obtained a position on the Agriculture Committee. Though in the minority, his leadership role in guiding legislation through that committee was clear to all who followed his work and that committee.

In this Congress, COOPER has left his mark on such important issues as the Agriculture Credit Reserve, the Farm Credit Administration Act and the Grain Standards Act. His efforts to avoid foreclosures against family farmers and to ensure mortgage guarantees for those ailing in the agriculture sector are noteworthy. He also has helped lead the charge to improve the quality and the accuracy of Federal grain standards.

COOPER's colleague in the Iowa delegation, BERK BEDELL, will always be considered a close, personal friend. I have worked with him a great deal in the Northeast-Midwest Congressional Coalition over the past decade.

BERK, too, has been a leader in the agricultural field. Among the issues he has championed this Congress are: greater Federal assistance for farm banks; a land diversion program for feed grains; the labeling of imported meats; programs to encourage the production of ethanol; and efforts to ensure that no Federal assistance—such as subsidized irrigation loans—is provided to those who produce surplus crops.

But his efforts are not confined solely to agriculture. BERK was the prime sponsor of two noteworthy pieces of legislation this Congress. The first was a proposed constitutional amendment which lengthened the term for Members of the House from 2 to 4 years. The second was House Joint Resolution 3, which called upon the President to support a comprehensive test ban treaty between the United States and the Soviet Union. This measure, which I strongly supported, eventually passed the House by a wide margin.

Mr. Speaker, a wise man once said that "a good time to retire is before it's too late to have a good time." COOPER and BERK have chosen an ideal time. They will be sorely missed, and fondly remembered. My wife Nancy and I wish all our best to our good friends COOPER EVANS and BERKLEY BEDELL.

Mr. WOLF. Mr. Speaker, I am pleased to join with my colleagues in this special order to honor two of our outstanding colleagues in the Iowa delegation, COOPER EVANS and BERKLEY BEDELL, who will be retiring at the end of the 99th Congress.

These two Members are nearing the end of distinguished careers in Congress and will leave a void in the Iowa delegation which will be difficult to fill. It has been a pleasure to serve in this House with COOPER EVANS and BERKLEY BEDELL. Both are men of principle, integrity and sincerity and have served their Iowa constituencies and this Nation with distinction.

I came to Congress 6 years ago in the same freshman class as COOPER EVANS, a man of many talents whose work in Congress as the Representative of the Third District of Iowa is the third career for him. He's an engineer—he holds a nuclear engineering degree; he's a former Army officer—serving 20 years in the U.S. Army; and he's a farmer—after retiring from his Army career, he returned to Iowa to farm. Before launching his congressional campaign, he entered public service as a member of the Iowa House. His busy careers prior to Congress helped to establish him as an expert in agriculture and nuclear power and he has left his mark as a leader on these issues in the House.

BERKLEY BEDELL, who has served the Sixth District of Iowa for 12 years, has also established himself as an expert in agriculture issues and has well represented the interests of his agriculturally productive district and State. When we recall BERKLEY BEDELL's career in Congress, we must also include his crusading drive and fighting spirit to reform the spare parts procurement system at the Pentagon and open that system to the small businessses in our Nation. He's never been afraid to tackle an issue he believes in and work for changes to make government better, no matter what the odds. And more often than not, he's been successful and good government has been the winner.

I salute COOPER EVANS and BERKLEY BEDELL, two valued colleagues and outstanding public servants. I know I speak for all my colleagues in saying that we greatly appreciate their contributions to our Nation. My best wishes to them both in their future endeavors.

Mr. FUSTER. Mr. Speaker, I would like to join many of my colleagues this evening to express my appreciation and admiration for my colleague, BERKLEY BEDELL from Iowa, who will be retiring at the end of the year.

Although I have not known Mr. BEDELL long—just one term—I have come to appreciate his wisdom and consistency in dealing with issues that are of the essence in terms of alleviating human need, protecting the environment and enjoying the outstanding natural resources of our planet.

We will sorely miss his support for Puerto Rican issues and his untiring efforts on behalf of his constituents and these United States. Our best wishes go with him and we hope we can continue to count on his support for the causes he has long cherished.

Mr. RUSSO. Mr. Speaker, I want to join with my colleagues today in showing our appreciation and commending retiring Member Mr. BERKLEY BEDELL for the outstanding job he has done as a U.S. Congressman. I am especially pleased to have the opportunity to do this because BERKLEY and I came into the Congress at the same time, and I have enjoyed his friendship and have had great respect for his work for our 12 years here together.

It is the nature of the Congress that such interesting friendships develop—when a city boy from Chicago and an Iowa gentleman find common ground. And I can't help but feel that

in this instance—admitting to a possible bias—that the 94th Congress freshmen included some very special people, people like BERKLEY whose capacity for friendship was exceeded only by their capacity for hard work, courage, and commitment.

This commitment has been reflected in BERKLEY's work both here in the Congress and back home. With an unwavering belief in participatory democracy, he went well beyond lipservice to the cause of democracy and conducted town meetings in his 6th District to offer the people every opportunity to be a part of the effort to bring representation of their views to the Congress. This is a reflection of Berkley's humility, that despite his position, he emphasized that he was merely a member of the team, working with his constituents.

His courage has been demonstrated by his unwillingness to put special interests above the individual. His votes have reflected his conscience and you could trust that BERKLEY's actions were true and honest ones, that they were for the people and served no narrow interest or viewpoint.

His hard work has brought victories, and one achievement that stands out is the passage of House Joint Resolution 3 on the ratification of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties and the resumption of negotiations for a verifiable comprehensive test ban treaty. BERKLEY has helped educate the public to the dangers of the continuing arms race and this country and the planet have benefited from his dedication to the cause of arms control and peaceful cooperation among nations.

I admire BERKLEY. He has won the respect of those of us privileged to work with him and to call him friend. A man of honor and dignity, he will be greatly missed here in the Halls of Congress. It has been a pleasure to serve with him and I wish him all the best in the future. He well deserves it.

Mr. LATTA. Mr. Speaker it is my privilege to join today in this tribute to our colleague, the gentleman from Iowa, BERKLEY BEDELL, on the occasion of his retirement from the Congress.

BERKLEY's departure will be a significant loss for the House of Representatives which he has so ably served since January 1975. He is a man of many achievements and abilities most notably as chairman of the Subcommittee on Agriculture Department Operations, Research and Foreign Agriculture. As a member of the House Agriculture Committee and the House Small Business Committee, BERKLEY has been unfailingly attentive to the interests and concerns of our Nation's farmers and the needs of the small business communities.

He has been a true servant, using his position in this institution to serve his constitutents so faithfully. BERKLEY will be sorely missed by his colleagues, and I wish him success and happiness in all his future endeavors.

Mr. Speaker, I would like to take this opportunity today to pay tribute to our respected colleague, COOPER EVANS, who is leaving the House of Representatives after 6 faithful years of service.

COOPER is extremely knowledgeable especially on agriculture matters and as one of the outstanding members on the House Agriculture Committee, he has proven to be a capable and eloquent spokesman for agriculture and a strong and effective advocate of tending to the needs of the Nation's farmers. The American farmer has never had a better friend than the one it has in COOPER EVANS.

COOPER has been a loyal member of the Republican Party and has time and again stood up for what he believed was right. As a Member of Congress, COOPER represents the qualities which serve to enhance the image and reputation of the House of Representatives. His positions on legislative matters have been remarkably consistent, reflecting his sincere integrity and honesty.

Even though COOPER will be returning to his beloved Iowa and to private life, he leaves with us the legacy of a gentleman, a friend and a distinguished Member of Congress.

Mr. DWYER of New Jersey. Mr. Speaker, it is a distinct honor and privilege to join my colleague Mr. SMITH and other members of the Iowa delegation in paying tribute to two distinguished members of this body who are retiring at the end of this session, BERKLEY BEDELL and COOPER EVANS.

The commitment shown by both men to their districts and their constituents is unmatched, and the people of Iowa have been exceptionally well-served by their dedicated leadership and solid, working knowledge of the issues.

BERKLEY BEDELL has been a champion in this House for good government, and was instrumental in passing for more accountability and efficiency at the Pentagon. By opening up the procurement process, he achieved important inroads for the small business community and helped establish a more competitive, fair, and efficient spare parts procurement system.

One of BERKLEY's most enduring contributions is certainly his commitment to a more peaceful world through arms control. His successful effort toward House passage of a ban on nuclear explosive testing stands as a compelling reminder of his commitment to a safer future for all of us.

On the homefront, he has been tireless in his work on the Agriculture Committee in behalf of American farmers and has proven to be one of the heartland's most ardent advocates in Congress.

Representative EVANS has been equally vigorous in his support for the American farmer. Although like myself, he is a relative newcomer to this body, he has quickly established himself as one of this Chamber's foremost experts on farm policy.

He has been firm and outspoken in his support for more equitable farm policies, backed by his own experience as a farmer and engineer, and breadth of knowledge on often complex agricultural issues. He has been distinguished by his courage and tenacity in protecting the interests of farmers and has earned the respect of his colleagues on both sides of the aisle as a result.

Mr. Speaker, in their tenure here, both of these members have embodied the statesmanship that we all strive for in this body. Their knowledge and spirit of dedication will be sorely missed, but I certainly want to offer my most sincere best wishes and warmest regards as they move on to new pursuits.

Mr. FUQUA. Mr. Speaker, I appreciate this opportunity to say a few words in tribute to our colleague, BERKLEY BEDELL, who is retiring at the end of this Congress. BERKLEY, through his work on the Small Business and Agriculture Committees, has made a lasting contribution to our Nation.

Both his district and mine are predominately agricultural and he has been a staunch defender of American agriculture. I always felt I could rely on BERKLEY for sound advice on matters affecting our Nation's farmers.

BERKLEY is a dedicated and hard working individual who has served well the needs and views of the people of Iowa's Sixth Congressional District. He will be a hard act for anyone to follow.

We honor BERKLEY for his 12 years of devotion to our Nation and his outstanding contributions. My wife, Nancy, and I wish him the best of success in the future.

Mr. YATRON. Mr. Speaker, I rise today to pay tribute to our distinguished colleague from Iowa, Mr. BERKLEY BEDELL. As you know, BERKLEY will be retiring this year after serving 12 distinguished years in this Chamber. I know that BERKLEY will be sorely missed.

BERKLEY first entered the House in 1974 and was reelected each succeeding year with more than 60 percent of the vote. He currently serves on the Agirculture and Small Business Committees. As agriculture and small business form the economic base of Iowa's Sixth District, these committee assignments have provided BERKLEY an excellent opportunity to best represent the interests of his constituents. He is especially well-respected for his work on the Argriculture Committee, where he serves as chairman of the Subcommittee on Department Operations, Research, and Foreign Agriculture. He is also a member of the Subcommittees on Wheat, Soybeans and Feed Grains; and Livestock, Dairy and Poultary. Throughout his tenure on the committee, BERKLEY has worked to support the family farmer and to stimulate the further growth and development of American agriculture.

BERKLEY is also a family man. He and his wife, Elinor, have three children and six grandchildren. I know that BERKLEY is looking forward to spending more time with his family after his retirement. At the same time, I am sure that his commitment to public service will continue unabated.

BERKLEY BEDELL leaves a record of many lasting and important achievements in the House of Representatives. BERKLEY will be remembered as an outstanding Congressman and I know that he will be missed by all of his colleagues. I salute BERKLEY BEDELL for his many years of dedicated public serive and I wish him continued success and good fortune in the years to come.

Mr. MICA. Mr. Speaker, it is with mixed emotions that I come before you tonight. On one hand, I am filled with sadness at the thought of saying farewell to my esteemed colleague from Iowa, a man whose kindness and friendship has earned him bipartisan support for over a decade. On the other hand, I am honored to be given the opportunity to acknowledge his achievements.

BERKLEY BEDELL has made a visible imprint on the Nation's political scene, since his en-

trance to Congress in 1974. This mark was not only recognized by the Members of Congress, but by a district of over 400,000 American citizens, who elected him to 6 consecutive terms. In 1981, he was instrumental in the passage of the 4-year farm bill by authorizing a compromise that kept the bill within the budget. BERKLEY has served on the Agriculture Committee and several others for a number of years, most recently giving up his position as chairman of the Small Business Oversight Subcommittee in order to head the Agriculture Subcommittee on Department Operations.

Throughout his 12 years in Congress, BERKLEY BEDELL has demonstrated the type of genuine sincerity that few persons actually posess. It is this sincerity in addition to his friendship that we all shall dearly miss. I know you all join me in wishing BERKLEY a long and happy retirement. He richly deserves it.

Mr. LOWRY of Washington. Mr. Speaker, I have mixed emotions about this chance to express appreciation to our friend and colleague BERKLEY BEDELL. I always enjoy the opportunity to say nice things about someone, but I am sad that we are losing a colleague of BERKLEY's dedication and stature.

All too often, people spend some time in this city and it changes them for the worse. Not BERKLEY BEDELL. You do not have to know him for long to realize that he came here with a firmness of character that is unshakable. Throughout his service in this body, he has retained a determination to demand that our Government exhibit the qualities of honesty and integrity and decency that people in northwestern Iowa and the rest of our Nation's heartland take for granted. As a result, he had changed this town for the better.

I admire BERKLEY because he is a successful businessman who has never forgotten that Government exists to help all people, not just the wealthiest. He is a very religious person who has never forgotten that our Nation has succeeded because we respect all religious beliefs. And he is a representative who served his district thoroughly and wholeheartedly but has never forgotten that we are also here to work for the national well-being.

During my service in Congress, I have become convinced that our most important priority must be to control the nuclear arms race. Thus, while I highly respect BERKLEY's determined work on behalf of our Nation's farmers, and his equally persistent efforts to reform the Defense Department's spare parts buying process, it is his work on the arms race for which I have the deepest respect. His leadership in sponsoring the securing House passage of House Joint Resolution 3, the comprehensive test ban resolution, is just the most visible of his many efforts on this issue.

The State of Iowa has done more than its share in the cause of arms control. Many of its past and present Members of Congress have contributed much on this issue. The State is also home to the Stanley Foundation, which has done so much to work for a better world. In this company, BERKLEY BEDELL has a place of honor. I am sure that he will continue to contribute much to our Nation in the future. I wish him the best in his future endeavors.

Mr. ASPIN. Mr. Speaker, I would like to take a moment to pay tribute to Mr. BERKLEY BEDELL, our respected colleague who is retiring after six distinguished terms in Congress.

In a desperate period for the American farmer, Mr. BEDELL has been one of this group's biggest allies. He has worked tirelessly to make compromises and build coalitions in efforts to gather support for measures that have aided rural America. These efforts were instrumental in gaining passage of the farm bill in 1981. In 1984 and 1985, he was in the forefront of the action on the 1981 bill's successor.

Mr. BEDELL also has been a leading advocate of arms control. He has sponsored and won passage of legislation that calls for President Reagan to resume negotiations with the Soviet Union in order to achieve a comprehensive test ban treaty. This should be a major goal for all of us in Congress.

During his 12 years in the House, Mr. BEDELL has been an effective legislator and a good friend. I wish him the best of luck in his future endeavors.

Mr. ANNUNZIO. Mr. Speaker, I rise to join with my colleagues in paying tribute to the Honorable BERKLEY BEDELL, who is leaving the House of Representatives after 12 years of dedicated service. His efforts on behalf of his constituents of the Sixth Congressional District of Iowa, which he ably represented, and on behalf of the citizens of the United States, are most worthy of recognition.

Before coming to Congress, BERKLEY BEDELL served our country with distinction as a first lieutenant in the U.S. Army Air Force during World War II from 1942 to 1945.

Elected to the 94th Congress in 1974, BERKLEY BEDELL has served in the House of Representatives with diligence, and has distinguished himself as chairman of the Subcommittee on Department Operations, Research, and Foreign Agriculture of the House Agriculture Committee; as a member of the Subcommittee on Wheat, Soybeans, and Feed Grains, and the Subcommittee on Livestock, Dairy, and Poultry; and as a member of the Subcommittee on General Oversight and the Economy of the House Small Business Committee.

BERKLEY is a fine legislator, a dedicated and devoted American, and a Congressman of great ability and skill. He will be missed by all of us in the Congress who had the opportunity to serve with him.

Mr. Speaker, I extend to BERKLEY BEDELL my best wishes for success in all of his future endeavors.

Mr. THOMAS of Georgia. Mr. Speaker, I am pleased to have the opportunity to recognize the achievements of two of my distinguished colleagues from Iowa on the eve of their retirement from public service.

I have had the honor of serving with both the Honorable BERKLEY BEDELL and the Honorable COOPER EVANS on the House Agriculture Committee. Both gentlemen have a strong commitment to agriculture in this country and have served the committee with wisdom and integrity. Junior committee members like myself have greatly benefited from their expertise in the area of agriculture.

BERKLEY's leadership in the committee includes his chairmanship of the Subcommittee on Agriculture Department Operations, Research and Foreign Agriculture. He also serves as a member of the Subcommittees on Wheat, Soybeans and Feed Grains; and Livestock, Dairy and Poultry.

BERKLEY has also served his community with his involvement in the Spirit Lake Kiwanis Club, the Iowa United Methodist Church, the American Legion, and the Spirit Lake Board of Education.

COOPER has had a diversified tenure while serving on the House Agriculture Committee. His committee memberships have included the Subcommittees on Wheat, Soybeans and Feed Grains; Conservation, Credit and Rural Development; and Department Operations, Research and Foreign Agriculture. Additionally, COOPER has served as a member of both the Select Committees on Aging and Hunger.

In addition to his public service in Washington, COOPER served in the Iowa General Assembly for 6 years. His involvement with the community includes serving as commissioner and treasurer of the Grundy County Memorial Hospital, assistant commissioner of the Grundy County Soil Conservation District, and president of the Community Development Corporation.

Those are the facts—the record of service—for BERKLEY and COOPER. But the heart and soul of their service goes far beyond that. They are men with a deep abiding love of their state and this Nation. They know their people and their needs. They know the Congress and its mechanism.

As a result, their contribution to this Chamber is far greater than the tributes we can speak of today. They have a gift for public service, a compassion for their fellow citizens, and deep commitment to the Nation as a whole.

We do not replace men like BERKLEY BEDELL and COOPER EVANS. We use them as the benchmarks of what constitutes the highest traditions of service in the U.S. Congress.

Our loss is great, but our loss is eased somewhat by the knowledge that they will always remain leaders in this Nation. They will remain resources that we can call on when we need advice. They will remain active in their communities. Perhaps most important, they will always be our friends.

Mr. HAMMERSCHMIDT. Mr. Speaker, it is my pleasure to join my colleagues today in adding my own thanks and best wishes to our respected colleague, COOPER EVANS, who is retiring from the House of Representatives after 6 years of devoted service. COOPER has served the Third Congressional District of Iowa since 1980 and will be missed by all of us.

COOPER served in the Army for 20 years, working at the Pentagon for the Atomic Energy Commission and then with NASA. After returning to Iowa to farm he was elected to the Iowa State House of Representatives in 1975 and served there for 4 years. Then in 1980, COOPER was elected to U.S. House of Representatives.

Bringing his experience as a farmer in Iowa to the Agriculture Committee, of which he has been a member since the beginning of his congressional career, COOPER is listened to and respected by the committee as he is both precise and detailed in his expertise on agri-

culture issues. In mid-1984, he offered his own farm debt restructuring proposal to respond to the serious credit crisis.

COOPER is also a member of the Select Committee on Hunger, however, his interest and activeness are not limted to those two areas. He is outspoken in favor of educational aid programs and takes a firm stand on defense and nuclear issues as well. COOPER is the only Member of Congress with extensive practical experience in the design and construction of nuclear power plants.

After your endless contributions to the House, you will most certainly be missed. However, I wish you good fortune and much happiness.

IOWA—THIRD DISTRICT: COOPER EVANS OF GRUNDY CENTER—ELECTED 1980

Born: May 26, 1924, Cedar Rapids, Iowa.

Education: Iowa State U., B.S. 1949, M.S. 1955; Oak Ridge School of Reactor Technology, nuclear engineering degree, 1956.

Military Career: Army 1943-46, 1949-65.

Occupation: Army officer; farmer; engineer.

Family: Wife, Jean Marie Ruppelt; two children.

Religion: Methodist.

Political Career: Iowa House, 1975-79.

Capitol Office: 127 Cannon Bldg. 20515; 225-3301.

In Washington: Precision, not charm, is the basis of Evans' career. No one will accuse this tight-lipped former Army officer of being a charismatic politician or a mellifluous speaker. But on complicated issues ranging from commodities regulation to the farm credit problem, the Agriculture Committee listens to him because he is precise and detailed—qualities one would expect of someone who is not only a military man but also a farmer and an engineer.

As more and more farmers went bankrupt in Iowa in 1983 and 1984, Evans made it plain he thought the Reagan administration was lackadaisical in responding to a serious credit crisis. Evans offered his own debt restructuring proposal in mid-1984, and in September he was among the Iowans advising Reagan to postpone a planned campaign visit to their state until he announced a restructuring plan of his own. The administration cooled tensions by producing a plan before the Iowa trip, but the debt issue reheated after the election.

In the previous Congress, Evans had made a name for himself in debate on reauthorizing the Commodity Futures Trading Commission. He argued for Reagan's proposal to allow the CFTC to raise its $23 million annual budget by charging fees on individual commodities transactions. Industry objections forced the administration to settle for a more modest fee-charging authority, but Evans impressed colleagues with his detailed knowledge of the complex commodities field.

As the 99th Congress began in 1985, Evans attracted attention by lashing out at a group that normally sees eye-to-eye with the GOP—the American Farm Bureau Federation. At the federation's convention in Hawaii, the group's president said, "If you look overall at agriculture, I don't think there is any crisis." Evans shot back, "Maybe they should hold their conventions in Omaha or Des Moines. They are quite out of touch with the situation." He said the remark from Hawaii reinforced the federation's image as representing wealthy, large-scale farmers, and he said it would make it more difficult to convince Washington of the serious problems many farmers face.

Evans' willingness to criticize the Reagan administration symbolizes the remarkable ideological transformation he accomplished during his first term. Almost overnight, Evans changed from a consistent Reagan loyalist into a Midwestern "Gypsy Moth." His shift was prompted by redistricting in August 1981, which gave heavily Democractic Johnson County (Iowa City), where the University of Iowa is located.

In 1981, Evans voted with the conservative coalition of Republicans and Southern Democrats nearly 80 percent of the time. In 1982, his coalition support score plummeted to 55 percent, and it has stayed in that range ever since.

At times, it seems hard to believe that the Evans who voted for Reagan's budget and spending reductions in 1981 is the same Evans who now chafes at most of the administration's domestic priorities and foreign policy stands. In the 1984 House votes on which Reagan took a position, Evans voted against the president's wishes 49 percent of the time.

He has been a staunch critic of Reagan's attempts to trim back guaranteed student loans and other educational aid programs. He also has adopted a skeptical outlook on the defense buildup. In the 98th Congress, he voted at key junctures against the MX missile, against nerve gas production, against aid to anti-communist Nicaraguan rebels, for a nuclear weapons freeze and for a moratorium on testing of anti-satellite missiles in space. He opposed the MX again in early 1985.

Evans freely admits to having shifted to a less conservative stance on a variety of issues since redistricting. "You pay attention to your constituents," he has said. "I have different constituents."

In addition to his expertise in agriculture, Evans has a unique perspective on another technical subject—nuclear power. He is the only member of Congress with extensive practical experience in the design and construction of nuclear power plants. Evans was trained in reactor technology at Oak Ridge, Tenn., and worked for the Atomic Energy Commission.

That experience has led him to argue for nuclear power. In his first term, he supported the controversial Clinch River Breeder Reactor, saying it had been maligned by people who did not understand breeder technology. But soaring construction costs finally soured even Clinch River's staunchest defenders, and in 1983 Evans voted with a near-unanimous House to kill the project.

At Home: Politics is a third career for Evans. He served 20 years in the Army, working at the Pentagon, for the Atomic Energy Commission and with NASA. After retiring from the military in 1965, he returned to Iowa to farm, then in 1974 won a seat in the Iowa House, where he served until launching his 1980 congressional campaign. In the GOP primary that year, Evans finished comfortably ahead of three other Republicans vying for the nomination.

But in his general election campaign against Democrat Lynn Cutler, Evans often came across as stiff and aloof. His narrow victory was due mainly to the carrying power of Ronald Reagan and GOP Senate candidate Charles E. Grassley.

So when Cutler announced she would try again in 1982, prospects for Democratic victory seemed bright. Unemployment and low farm prices were worrying many of Evans' constituents, and the addition of Johnson County to the 3rd significantly increased Democratic strength.

Evans shored up his position by turning to the left. Cutler called him a devious opportunist willing to jettison principles to cling to his job, but Evans convinced voters that his shift reflected the views of his new district.

Evans also strengthened his political network, bringing in staffers who ran Grassley's successful 1980 Senate campaign, which was a model of grass-roots organizing. He accepted contributions from political action committees, a reversal of his policy in 1980, when he used his personal fortune to finance his campaign.

Evans' firsthand experience with farming gave him an important advantage over Cutler, a Chicago native who moved to Waterloo as an adult. Cutler was conversant on agricultural issues, but Evans grew up on farm and still operates 1,400 acres of Iowa farm land.

As in 1980, Evans sometimes sounded more like the former army officer he is than a congressional candidate, but his serious manner wore better over time than did Cutler's personality. Supporters saw her as eager and exuberant, but others described her as pushy and sharp-tongued, "the Bella Abzug of the Plains." The GOP insisted that Cutler's position as vice chair of the Democratic National Committee would lead her to speak in Congress for the party's liberal establishment instead of for Iowa.

Evans won by more than 20,000 votes. He took 41 percent in Johnson County—a good showing there for a Republican—and won every other county in the district, including Cutler's home base of Black Hawk County (Waterloo), which he had lost in 1980. Evans cleaned up in the farming counties, scoring better than 60 percent in most of them.

That showing guaranteed him an easier time in 1984. His opponent, lawyer and former state Rep. Joe Johnston, was unable to find much financial support for his effort, and lacked the kind of grass-roots network that Cutler had been able to draw on. Evans ended up carrying even Johnson County—although by only 660 votes.

Mr. DOWNEY of New York. Mr. Speaker. It is with a certain degree of sadness that I take this opportunity to join my colleagues in honoring BERKLEY BEDELL, a good friend and a tireless campaigner in the effort to develop a comprehensive and sane approach to arms control. I will greatly miss BERKLEY. The House of Representatives will greatly miss him. The people of Iowa's Sixth Congressional District have had a great representative here in Washington for the past 12 years.

BERKLEY BEDELL comes from the great Midwestern populist tradition which has so enriched our political life. He and I came to Congress together in 1975, a year of great change for the Congress and the country.

We have worked closely together to restore some sanity to American arms control policy. BERKLEY has served as a member of the executive board and treasurer of Parliamentarians Global Action, an international organization of legislators devoted to promoting arms control and development reforms. BERKLEY has been instrumental in promoting the Five Continent Peace Initiative—an attempt by the leaders of Argentina, Mexico, Sweden, India, Tanzania, and Greece to facilitate an arms control agreement among nuclear powers.

This year, BERKLEY's efforts culminated in the passage of House Joint Resolution 3 by the House. This important resolution urged the President to negotiate a verifiable comprehensive test ban treaty and placed the House clearly on record as supporting a breakthrough in the arms control impasse.

All of us who have served with BERKLEY over the years have benefited from his commonsense approach to the issues, from his hard work and his dedication. I wish him well.

Mr. FUQUA. Mr. Speaker, I appreciate this opporutnity to pay tribute to my colleague, COOPER EVANS, who will be retiring at the end of this Congress. COOPER is a fine gentleman who has made a lasting impression on this Nation through his hard work and dedication on the Agriculture Committee and the Select Committee on Hunger.

COOPER's interest in space as director of advanced manned lunar missions for NASA during 1963–65 is shared by myself and many of my colleagues. His knowledge in this area has been a great asset to this body and this will be sorely missed in the future.

We honor COOPER for his 6 years of dedicated service to the Third Congressional District of Iowa and to the Nation. My wife, Nancy, and I wish him the very best in all his future endeavors.

Mr. HUGHES. Mr. Speaker, I am happy to have this opportunity to pay tribute to our colleagues from Iowa, BERKLEY BEDELL and COOPER EVANS, for their outstanding service in the House of Representatives.

The 100th Congress will sorely miss the able leadership of these two gentlemen when it convenes next year, just as the farmers and small businessmen that they have served will miss their dedicated representation.

Since coming to Congress in 1975, BERK BEDELL has been one of our strongest voices for good and effective government. Whether the issue be commodity price supports, small business loans, or Defense Department spare parts procurement, BERK has consistently proved willing to challenge the conventional wisdom in the interest of his constituents, and of sanity and fariness in Federal programs. His unfailing respect for the views of others has won him many friends here in Congress and allowed him to maintain close ties with the people of Iowa's Sixth District.

COOPER, too, has remained close to the Iowans he represents since coming to Congress in 1981. He has worked diligently to assist the small farmers in his district with the credit problems that they are experiencing, and has consistently refused to bow to pressure from others when the interests of his constituents are at stake. The House will miss his precise and thoughtful analysis of issues ranging from responsible defense spending to higher education, as well as his expertise on questions regarding nuclear power.

I join my colleagues in wishing both BERK and COOPER much success and happiness in their future endeavors.

Mr. MAZZOLI. Mr. Speaker, I am pleased to join my colleagues today in paying tribute to two Members of the Iowa Congressional Delegation—Mr. BERKLEY BEDELL and Mr. COOPER EVANS—who are retiring at the adjournment of the 99th Congress.

Throughout his career in the House, BERKLEY BEDELL has been a staunch advocate for agriculture and always one to be fighting in the corner of America's small businesses. His roots are embedded in that American tradition—a successful, self-made businessman—whose ingenuity, hard work and just folks style have been hallmarks of his service here in the House of Representatives.

COOPER EVANS has provided the House the benefit of his considerable technical training and experience in addressing agriculture interests in the Midwest and across the Nation and the world.

Though retiring from their duties in the House, I know BERKLEY BEDELL and COOPER EVANS will continue, perhaps from different venues, to be active members of society and to enlarge upon the distinguished record they have both achieved in public service.

I join their many Iowa friends, this House, and the Nation in congratulating them for their distinguished service and in wishing them both all the best in the future.

Mr. CONYERS. Mr. Speaker, I rise today along with my colleagues to pay tribute to a very distinguished Member of the House who will be leaving us at the end of the 99th Congress—BERKLEY BEDELL from the "Buckeye" State of Iowa.

It has been a privilege and a pleasure to work with him and we will certainly miss his presence here in the Congress. I have been especially fortunate to have the opportunity to work very closely with BERKLEY BEDELL on a number of issues during his 12 years as representative of the Sixth District. He has been in the vanguard of the American Agriculture Movement and has worked diligently on behalf of America's family farmers. A look at his legislative record will show that a large number of the bills he introduced in the 99th Congress was on behalf of farmers. We also share efforts on another very important issue, and that is banning the testing of nuclear explosives. He was one of the persons upon whom I counted when we were seeking support for legislation to establish Dr. Martin Luther King, Jr.'s, birthday as a national holiday. I want to take this opportunity to again let him know how much I appreciated that support.

I wish this gentleman the very best in his future endeavors and we will certainly miss his presence in the House of Representatives.

Mr. WHITLEY. Mr. Speaker, during the past 10 years, it has been my privilege to serve with two truly outstanding representatives from Iowa, both members of the House Agriculture Committee, one a Democrat and the other a Republican. Both, however, were totally nonpartisan in their approach to issues and their commitment to what they believed was best for American agriculture.

BERKLEY BEDELL is, in my opinion, an outstanding Christian gentleman. If he has a fault, it is that he becomes too concerned about the plight of the farmers and farm families in his district. I have never seen anyone who tried harder or was more determined to do something useful and effective for those he represents and for whose welfare he feels responsible. "BERK," as he is fondly known to those of us who are close to him, has been a model of honesty, sincerity, and concern. He will be deeply missed, and his district and the Nation will be better for his service and poorer for his departure.

COOPER EVANS is a model of quiet effectiveness. His wise, carefully crafted amendments have become a significant part of all agriculture legislation that has passed through the House Agriculture Committee during his tenure as a member. There is not a member of the committee on either side of the political aisle who is more highly regarded as a skilled legislator and thoughtful advocate.

Always mild-mannered and courteous, he succeeds by the logic and simplicity of his approach.

The State of Iowa will be hard-pressed indeed to elect successors to these two gentlemen who can match BERKLEY BEDELL and COOPER EVANS in being respected by their colleagues and in their effectiveness as legislators.

I personally wish both of them Godspeed and fair winds in whatever may lie ahead of them. It has been highly rewarding for me to know and work with them both.

Mr. SMITH of Iowa. I want to thank all the Members who have come forth here at this late hour of the night to express their appreciation for these two colleagues of ours who have decided to retire. I think the number of Members who have come forward and the accolades that we have heard in and of themselves show the great measure of appreciation that we have for both of these gentlemen.

I do not know in my 28 years in the Congress when I have heard more good things said when I did not feel one of them was an exaggeration about anybody.

So I thank all of you.

---

## 1986 CONGRESSIONAL CALL TO CONSCIENCE VIGIL FOR A SOVIET REFUSENIK FAMILY, THE MICHAEL A. FAINBERGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. FIELDS] is recognized for 60 minutes.

Mr. FIELDS. Mr. Speaker, I would like to share with you tonight the plight of a family who has been refused emigration from the Soviet Union to join their relatives in Israel. The Fainbergs are a family of four whose lives are wasting away simply because they want to be reunited with their relatives and live in freedom.

Because of their status as Soviet Refuseniks, Michael and Faena Fainberg have been prohibited from pursuing what had been promising careers. Michael is a computer scientist who holds a doctorate degree. He had been one of the Soviet Union's most respected mathematicians before he applied to emigrate. Faena is a graduate of Moscow University, a school which for the most part, accepts no Jews. Although she was originally interested in acting, a field which is closed to

Jews, Faena majored in English and became a high school English teacher.

When they applied to emigrate, the Fainbergs lost their jobs. This placed them in an extremely difficult situation since unemployment in the Soviet Union is a crime, punishable by imprisonment.

Michael, Jr., was such an exceptional student that he was accepted into a college, despite his Refusenik status.

Andrew, the younger son, is ranked first in his class at Moscow's top rated high school. Despite this fact, the family worries about his future because it has become almost impossible for Refusenik children to gain admission to universities.

Because Andrew and Michael refuse to join the Communist youth groups in their schools, the boys are frequently harassed. They have been physically assaulted by other students who were encouraged to do so by the faculty.

The Fainbergs' case is becoming increasing urgent. Next year Andrew will graduate from high school. If he is not accepted into the Railroad Institute, he will be conscripted into the Soviet Army. In 2 years Michael, Jr. will graduate from college and likewise be forced to join the army. Once an individual enters the army, his wait for an exit visa will be extended to 10 to 15 years on the basis that he has had access to state secrets.

In addition, Faena suffers from acute asthma and has come perilously close to death on two occasions. Her Refusenik status has left her unable to receive adequate medical attention.

Last September, Michael was held and interrogated by the KGB. He now lives in constant fear of fabricated crimes being levied against him.

Sometimes the story of a single person or family can tell more about a system of government than all the statistics in the world. The Fainberg family is only one of thousands of families who have been the victims of anti-Semitism in the Soviet Union.

Since the start of 1980, the number of Soviet Jews permitted to leave the Soviet Union has fallen drastically. In 1979, over 51,000 emigration visas were issued, but since then the exit visas given have dropped to less than 100 a month—virtually a complete stoppage—while between 400,000 and half a million Jews are still waiting.

In order to stem the flow of new applications, the Soviet authorities have produced one restriction after another. For example, in Leningrad, only one application a day is processed. In some towns, a Jewish family must receive an invitation to immigrate to Israel from a relative of the first degree; namely, father, mother, brother, sister, son or daughter. If the entire family is in the Soviet Union, this makes it almost impossible for their emigration request to be accepted.

Since 1981, the Soviet Post Office has delivered very few of the invitations sent to Soviet Jews by their relatives in Israel. Thus, hundreds, probably thousands, of Soviet Jews are waiting for the necessary papers to apply for exit visas.

General anti-Semitism continues to increase. The anti-Zionist committee of the Soviet public was established on March 31, 1983 and since then has encouraged meetings in schools, factories and institutes throughout the country of the theme of "Jewish traitors' denouncing Jews and their desire to immigrate to Israel. Individual Refuseniks are shown and named on TV where they are accused of betraying their motherland.

The "army trap" continues to threaten many young Jews who have waited for exit visas and are now approaching military age. Any Jewish boy who serves in the Soviet Army is classified as a "security risk" and may be refused an exit visa on those grounds alone. Some Soviet Jews have waited more than 20 years after being released from the army and are still being refused visas on this pretext.

Due to the growing difficulty any Soviet Jew has in obtaining a place at a university, parents with young children are now faced with the choice of applying to leave and possibly condemning their sons to the "catch-22" situation or seeing them grow up without any chance of further education.

The Fainberg family represents 15,000 refuseniks and 400,000 Jews who are not activists or dissidents, but rather just want their basic right to emigrate. The Fainbergs represent thousands of Jewish families who have been so unjustly treated.

Now with some movement in the international scene, Soviet Jews are waiting to see whether they can hope for more emigration and a brighter future or whether they must withstand more attacks, more intimidation with little chance of freedom for themselves or their children.

At this time it is especially important that we demonstrate our continued concern for human rights in the Soviet Union. In the anticipation of another meeting between President Reagan and General Secretary Gorbachev, I hope our efforts will contribute significantly to the outcome of talks on human rights. For many Soviet refuseniks, especially the Fainberg family, we are their only hope.

In closing, I would like to take a moment to mention two individuals who brought the Fainbergs' situation to my attention—David Harberg and Sylvia Mayer. Two weeks ago, David and Sylvia traveled to Washington from Houston, to meet with myself and several of my colleagues, to urge our participation in their campaign to free the Fainbergs from the Soviet Union.

It is bright and ambitious individuals like David and Sylvia who will continue to increase public awareness and concern about human rights abuses in the Soviet Union. I would personally like to commend them on their initiative and dedication to a very important cause.

□ 2250

Mr. Speaker, I yield to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. Mr. Speaker, I thank the gentleman for yielding to me. I want to thank the gentleman from Houston, TX, for his leadership on this and other issues in the Congress. The gentleman from Texas displays a great deal of leadership on issues in Congress. The gentleman is particularly noted for his leadership in energy issues and in issues that affect jobs in Houston. But JACK FIELDS is taking out the time tonight to speak of some human beings whom we have never met, but we hope to one night, the Fainberg family.

So it is the leadership of people like JACK FIELDS and the Houston Action for Soviet Jewry that in fact provides that home that Soviet refuseniks have.

This is an especially timely evening to call out this special order, because it has been almost a year after the first summit meeting between President Reagan and Premier Gorbachev, and it was at that summit meeting that we all had a lot of hope, perhaps hope that turned out to be unfulfilled. Many people around the country assumed that somehow because of Gorbachev and because of the summit and other things and celebrated cases, the situation has improved for Soviet Jews.

Well, there have been some celebrated cases, but the situtation has not improved. In fact, under General Secretary Gorbachev, the situation has worsened.

Consider that over one-half of all prisoners of conscience who are in jail today have been sentenced since Gorbachev came to office.

I would say to the gentleman from Houston my wife Gail and I went to the Soviet Union on a human rights trip last summer. It was the most emotional journey and experience that we ever had in our lives, because we met people face to face who have in fact experienced that loss of freedom, that loss of everything, for the hope that they can get their children out.

The people who we met in the Soviet Union are people who we will never, ever forget.

I think of the prisoners of conscience that have been in prison since Gorbachev came to power, and I think of meeting Tatanya Zunshine, whose

husband, Zachary Zunshine—they live in Latvia. But today Zachary Zunshine lives in Siberia. He was sentenced three years to Siberia. He has been forced into solitary confinement. His clothes were taken away. He is in solitary confinement 15 days at a time. The temperatures are as low as 56 degrees below zero with no heat.

What was his crime to earn him 3 years in solitary? He asked permission to be reunited with his family and repatriated with his homeland. He wrote a letter asking the Soviet officials why his exit visa was denied.

Tatanya Zunshine told us that she worried for the life of her husband. She told us she travels to Siberia on those few times a year that she was supposed to be allowed to meet her husband and visit with him in prison, and three out of five of those times, she was denied the right even to meet him for 1 hour at a time during visiting hours, and that was after a 3-day journey from Latvia to Siberia.

There have been some celebrated cases. I think we are all grateful, of course, for Anatoly Shcharansky, and he came to Washington and to Israel and to America, for Shcharansky to be freed and Shcharansky's family.

That is not enough. One Shcharansky is still the equivalent of a Learner and a Slepak and a Pison family and a Yelkon, and 250,000 or more others that are still trapped and still have the right under international law to leave and to repatriate.

I would say to the gentleman from Houston, Texas, the Soviet Government has to learn that the United States Government and this Congress expect them to abide by their formal and informal agreements under international law. That is what they are not doing, regardless of whatever celebrated cases may get out.

Consider for a moment just last month, the latest emigration figures for Soviet Jews, July 1986, 31 refuseniks, 31 Jews, are allowed to leave the Soviet Union. That is the second lowest number since they started compiling those statistics. That is against a number that have applied for invitations to leave to 250,000 that we know about, and perhaps more. So, for this year, 1986, only 417 Jews have been allowed to Soviet Union, and that is down from 51,320 in 1979.

The question that one poses, is Gorbachev different. When you pose that question in the apartment of a Soviet refusenik family, they almost laugh, although the politely chuckle, and the answer comes back, this was the answer I got, is we will believe that Gorbachev is different when Gorbachev acts different.

There is a meeting next month between Secretary of State Shultz and Foreign Minister Shevardnadze. That is in September. I think we are all hopeful that human rights will be discussed. We know that it will be discussed from our point of view.

But refuseniks tell us from the Soviet Union that their only hope is the West. That is what they told Gail and myself when we were there. We would sit down and we would say what could we do. They would say that the West, America, that spotlight of public opinion, is the only thing that gives us any hope for the future, because it is only American public opinion that gives us any prospect to be treated perhaps one day in one generation as human beings.

Gail and I went to the consulate in Leningrad. There we met a number of Soviet officials and American officials and the diplomatic corps and a large number of refuseniks that had been invited. What was interesting about that was that it was the day that the new announcement for the summit was announced, and it was the refuseniks that came to that reception in Leningrad who knew all the news. They had listened to it on the Voice of America. They were the ones that came with the news that the United States, they said with a great deal of pride, had placed human rights on the agenda and at an important place on the agenda for the summit.

We met with Soviet officials. Government officials, water department officials, with mayors, with information officials and with youth officials. And every place we met we would raise the issue of refuseniks. And every place that we raised that issue of the refuseniks, those officials knew exactly what we were talking about, and they listened attentively, and they knew it was coming.

We were told later that that did have a difference, that in fact by raising the issue, whether it is here on the floor of Congress or in a rally in Houston or an event in Dallas or in California or anywhere around this world, that the Soviet officials do pay attention.

Mr. FIELDS. Let me reclaim my time for just a moment, because I think the gentleman makes an extremely important point. That is raising the level of consciousness of this Nation about the refusenik situation in the Soviet Union, and how important it is not only for us as Members of Congress, but average men and women around this country, to contact the Soviet Embassy here in Washington and to contact the Soviet consulates in different cities within America and let them know that the American people are watching and that we do care. That is how a difference is made.

Mr. Speaker, I will continue to yield to the gentleman.

Mr. BARTLETT. I thank the gentleman for yielding, because in fact it is that person-to-person contact, whether it is adopting a family, writing to a family, thinking of a family, writing to the Soviet Government, that counts.

In addition to that, it is that understanding by the United States Congress, which we have, it is that understanding that really makes a difference, in which we say to the Soviet Government, as we do in so many ways, that we as Members of Congress and as American officials, we have a great deal of difficulty believing that the Soviet Government will abide by any future agreements that we may sign with them on any issue, whether they are regional issues or trade issues or arms issues, until the Soviets begin abiding by those elements of international law which they have previously agreed to. International law in the broad sense and the Helsinki agreements in the specifics provides that every nation must agree to allow their people to emigrate out to rejoin their homeland or to rejoin their families.

I want to take a few minutes, if the gentleman will permit, to share with this body some of the individual families that we met while in the Soviet Union.

Elie Wiesel in 1955 wrote the book, "The Jews of Silence." In that book, he talked about, he started the book, one could never forget the eyes, that it is in the eyes of the refuseniks that the issues of repatriation and family reunification find their focus and they become real.

I want to say that it was in those eyes of some very real people that we met and became friends with that we began to understand those issues.

Before I do that, I wonder if the gentleman from California is waiting for the gentleman to yield.

Mr. FIELDS. Mr. Speaker, I yield to the gentleman from California [Mr. HUNTER].

□ 2300

Mr. HUNTER. I want to thank both the gentlemen from Texas for this advocacy for the refuseniks and simply say that we have right now a great competition going on and a propaganda battle really. When you see Phil Donahue hosting these international talk shows with talk show hosts from the Soviet Union and you see the battle for the world's attention, you see both sides attemping to advocate their form of government, our democracy and for the Soviet Union their totalitarian system.

You see that the refuseniks provide a great service to the world because they show with their actions and with the terrible repression that they suffer and sometimes it is great pain as both gentlemen have pointed out, the real difference between our two countries. I think also, as Mr. BARTLETT has pointed out, they show the real character of Soviet leadership, whether it is the former leadership of

Mr. Andropov or the present leadership of Mr. Gorbachev. Through all the talk and through all the promises, through all of the offerings in the arena of arms control, we see sadly the same lack of movement in the refusenik area that we saw last year and the year before that.

It is sad that the refuseniks have to evidence to the world the real character of the Soviet Union, but they do that. They do it at great sacrifice. We would be remiss if we did not take their lesson to heart and remind ourselves, when you go through the Defense bill that is coming up and through a number of other pieces of legislation, that it is important for America to stay strong; that it is important for America to continue to speak out and to be the advocate for people who cannot carry that message very far because of the totalitarian systems that they live under.

I want to thank both gentlemen. I think Mr. BARTLETT from Dallas and my good friend, Mr. FIELDS from Houston, that great champion of jobs and energy, from the State of Texas. I want to thank both of you for giving visibility to this issue. I want to tell you that I will be out here in the future because you have inspired me with some descriptions of my refuseniks in the San Diego area, the people that we are working with and have not done enough for. I want to tell you that I will redouble my efforts because of what you have done.

Mr. FIELDS. I want to say I appreciate the gentleman coming at this late hour and making such a well-reasoned argument. I know through your work on the Armed Services Committee that you are looked at as being one of the experts in the House, not only on military systems but what is happening in the world, geostrategically, and the different government institutions in the world that we have to deal with. So I appreciate taking your time away from your family to come to this floor tonight and to share with all of us your insight.

Let me continue to yield to the gentleman from Dallas.

Mr. BARTLETT. I thank the gentleman from Texas for the additional time.

I would say to the gentleman from California that I posed a question in an apartment in Leningrad. I posed the question, as we were sitting there grappling with the problems of war and peace and world politics and Refusniks and exit visas and so I posed a question to a group of oh, I suppose 10 or 15 refusniks, some of whom had been waiting to get out of the Soviet Union since the mid-1970's, and after they had described the horrors they had gone through since applying to leave, I then said, "What should the United States do? Should we consider a trade off at the arms control table so that we would trade missiles in exchange for visas?" The shock in that room was overwhelming. I thought they were going to throw me out. Everyone at once began shouting, "No, no, no." Once the excitement died down, as one refusenik looked at me and he said, "Because you see, if you trade our lives for America's defense, then the whole world, what will it pay? The whole world will be enslaved within a generation anyway."

So they said, "Keep America strong, but keep that spotlight of Western public opinion on our plight. Then the Soviet Government will one day hear and they will understand that the U.S. Government is not going to trust agreements with the Soviet Union on other issues until we can trust agreements with the Soviet Union on human rights that they have already signed."

We met a number of families while we were there. I remember that we met the Passon family in Leningrad. There are 10 members of the family and they came to this very tiny apartment to see if there was some news that we had. The Passon family's wife's sister is in Israel. Their son is a professor; the son-in-law is a doctor, and this family has given up everything. When you apply to leave, when you fill out that visa form, when you say "I have the right to exit and I am applying for an exit visa what that means is not just that send in a visa request to some bureaucrat somewhere, what that means is that you become a noncitizen. It means that you give up everything. You give up your job, you give up your prospects for an education. You give up your friends because no one will talk with you because you have become a nonperson.

I remember Mr. Passon came to the meeting. He was a veteran of World War II, and he wore his ribbons on his coat. I asked him about his ribbons and he said, "Yes, but in Russia now our name is 'traitor.' "

I met Boris Yelkin who is a radio engineer and was a very successful one, he is today a night watchman trying to support his family on a few rubles a month working from midnight to 6 o'clock and believes he is lucky to have that job.

I remember Mikhail Kazanevich. He applied in 1973. He was immediately fired from his job as a radio technician and he is now a free-lance photographer; that is all that he can do. I think he lists that to avoid having the Soviets declare that he does not have a job. We asked Tatjana Kodner, she is very well educated. She is young, she is about our age. She is a translator, she had a good job. Her husband is a physician. Neither are allowed to work now. She is 36 years old and he is 37. They both lost their jobs and I asked "Can you be a Jew in the Soviet Union?" She said, "You cannot be a human being in the Soviet Union."

I will never forget Jacov Rabinowitz of Leningrad, perhaps the cruelest of all. He was a shipbuilding engineer. He had a very good job. He applied to leave in 1977 so his children can get out. He was told in 1980 that all he had to do to get the exit visa in sort of this cruel hoax was to get a divorce and to leave his wife and children and then they could get out and he would have to stay. He did not know if it was true or not, but he would try anything. So he and his wife got divorced and sure enough, 8 months later, in that sort of macabre cruelty that only the Soviet Government could do they did allow his wife and family an exit visa, but they kept him. They hold his mail and his phone calls. Sometimes he hears from his wife and his children; sometimes not. His son Igor graduated last year from Brandeis University.

I remember Gregory Genusov. He applied in 1976 with his brother. He and his brother had identical circumstances without exception. Identical careers, identical education, almost the same age. His brother was allowed to leave in 1981 but Gregory was required to stay almost as a hostage. What reason was he given? Oh, no reason. It is all verbal and delivered with a chuckle.

We met a number of the divided spouses. I remember Tamara Tretyakova. Her 7-year-old son who we met was quite a poignant sight. The 7-year-old son had never met his father you see because the father, some 6 months before the young boy was born was given an exit visa and an order to leave and was told that his wife and child would be along shortly. Eight years later the son has never met his father. The reason? Every 6 months the reason comes back. The latest reason was just a verbal reason, he was called an undesirable.

We met Prof. Alexander Lerner, one of the celebrated cases in Moscow. You see, when he applied to leave he was on top of the world in 1972. He was the head of an academic department in Moscow University. He was allowed to travel; he was allowed to publish. He was immediately fired from his job and was lucky to become a night watchman. He fell from Soviet society. But over the course of the 1970's many of his family have been able to leave but he has been required to stay as a hostage. I remember the Zlepaks and many people have met the Zlepaks. The Zlepaks are happy now because everyone in their family was allowed to go.

The Zlepaks spent 5 years in a Soviet prison camp because they asked one time too many for permission to emigrate and join their sons in America. Oh, there were so many more. I

asked at the end of every meeting. I would ask "why."

□ 2310

Why would you give up everything, whatever life there is in the Soviet Union, you would give it all up, you would lose your job, you would subject yourself to being put in prison, to being harassed, to being followed by the KGB, not allowed to follow your faith, to become a nonperson, on the off-chance that maybe you will get 1 of these 31 exit visas a month.

Why? Well, two reasons. One stands out stronger than the other. The first reason I guess was best summed up by the Peisin family when I asked and they said, "We are Jews."

Then they told us that one cannot believe the anti-Semitism in the Soviet Union. It is getting worse. There are no Jews at Leningrad University. Of the 23,000 students, the brilliant students are stopped and openly denied permission to continue their education.

They said that the second line on every piece of paper on every job application, on every internal passport has one word, "Jew."

So it is the love of Israel, it is the repatriation of the homeland and it is a sense of the right to be Jewish.

But the more important reason that came through with every refusenik we met was the most important and it is related to the first. That reason was the next generation. You see, each of the adults figured that they could handle it for themselves, but they were not willing to impose that life on their children.

Boris Elkin, when I said "why?" he said, "Why? So I can raise my children as Jews."

Mikhail Kazanevich said, "Two reasons. First I am a Jew. I look like a Jew, I feel like a Jew, and I cannot live without Jewish traditions and nothing is left in this country that is Jewish."

Second, and then he smiled and said, "Actually, first, most important, to give my childen a chance, my 15-year-old and my 4-year-old."

Prof. Alexander Lerner said, "Oh, I am successful, but my children have no future here. I had it all."

He said, "Also, remember my grandfather's prayer, next year, next year in Jerusalem."

Yuri Chernyak said, "The main reason is my children and their future."

Among the refuseniks, that we met, there was a simple courage to try to allow their children to be free.

The Soviets must understand that the Congress and the American Government will find it increasingly difficult, as it is today, to enter into new agreements on other issues when the Soviets refuse flat out to abide by their existing agreements with international law and with their own citizens.

Refusenik after refusenik told us that the only hope came from the United States, from the American people and the American Government and they said, "Keep the pressure on, keep the spotlight on. Americans are our only hope."

The issues of repatriation and reunification will not go away. The trip that Gail and I took and others have taken provided us with a close-up picture of the day-to-day lives of the refuseniks who have been denied their rights as human beings. We will not forget them. Congress will not forget these Soviet refuseniks. President Reagan will not forget and the American people will not forget.

It is people like the gentleman from Texas [Mr. FIELDS] who are willing to shine that spotlight that makes a difference.

I thank the gentleman for his time.

Mr. FIELDS. Mr. Speaker, I want to thank the gentleman from Texas [Mr. BARTLETT] and the gentleman from California [Mr. HUNTER] for being here tonight.

We are concerned. I am not a Jew. I do not believe the gentleman from Texas [Mr. BARTLETT] nor the gentleman from California [Mr. HUNTER] are Jewish. I am a Southern Baptist, but I find it horrendous to think that people are still being persecuted because of their religion, because of their heritage, because of their tradition. It is hard for me to believe that we have those situations occurring in the Soviet Union, but the opportunity for change is for people to be involved.

Tonight it is late. It is very late. It is 11:15 eastern time, but we are standing here because of the Fainberg family, a family that represents refuseniks in the Soviet Union.

I have got to compliment 2 people, David Harberg and Sylvia Mayer. If it had not been for these 2 students who came to my office 2 weeks ago, I would not have been aware of the Fainberg family. I think those 2 people, David and Sylvia, are representative and indicative of what all Americans should do. They should become involved in this issue and participate and let the Soviet Union know that we are watching and that we care and that we are concerned and that we are not going to stop watching until they allow people like the Fainbergs to emigrate and give people like the Fainbergs more freedom, things that we take for granted in this country.

Mr. Speaker, I am very moved by the things I have heard tonight from the gentleman from Texas [Mr. BARTLETT], close friend, and [Mr. HUNTER] close friend. I appreciate greatly what they have had to say.

This is a cause whose time has come, but as Andrew Jackson said, "One person with courage makes a majority."

We need people in this country to have the same courage that has been exhibited by families like the Fainbergs in the Soviet Union. If we have courage in this country and we combine with that courage a commitment to see a change, I am convinced that change will come.

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mrs. HOLT (at the request of Mr. MICHEL), for today and tomorrow, August 8, on account of necessary absence.

Mr. DONNELLY (at his own request), for tomorrow, August 8, on account of a funeral.

Mr. MILLER of Washington (at the request of Mr. MICHEL), for today and tomorrow, August 8, on account of attending a funeral.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. FIELDS) to revise and extend their remarks and include extraneous material:)

Mr. FIELDS, for 60 minutes, today.

Mr. HUNTER, for 5 minutes, today.

(The following Members (at the request of Mr. WILLIAMS) and to include extraneous matter:)

Mr. STARK, for 5 minutes, today.

Mr. LUNDINE, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MICA, for 5 minutes, today.

Mr. PANETTA, for 30 minutes, today.

Mr. LUNDINE, for 15 minutes, on August 12.

Mr. VALENTINE, for 60 minutes, on September 16.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SCHEUER, and to include extraneous matter on H.R. 5081, in the Committee of the Whole, today.

(The following Members (at the request of Mr. FIELDS) and to include extraneous matter.)

Mr. JEFFORDS.

Mr. PARRIS.

Mr. CLINGER.

Mr. FRENZEL in five instances.

Mr. LEWIS of California in two instances.

Mr. MICHEL.

Mr. KEMP.

Mr. MCGRATH.

Mr. COUGHLIN.

Mr. SENSENBRENNER.

Mr. COBEY.

Mr. HENDON.

(The following Members (at the request of Mr. WILLIAMS) and to include extraneous matter.)

Mr. HOYER.
Mr. FASCELL in two instances.
Mr. FLORIO.
Mr. DWYER of New Jersey.
Mr. PEPPER.
Mr. DE LUGO.
Mr. NOWAK.
Mr. LEHMAN of Florida.
Mr. UDALL.
Mr. MARTINEZ.
Mr. STARK.
Mr. YOUNG of Missouri.
Mr. FORD of Michigan.
Mr. FOWLER.
Mr. OBEY.
Mr. WEISS.
Mr. CONYERS.
Mr. BONKER.
Mr. MATSUI.
Mr. FAUNTROY.
Mr. GARCIA.
Mr. DANIEL.

## ADJOURNMENT

Mr. FIELDS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 16 minutes p.m.), the House adjourned until tomorrow, Friday, August 8, 1986, at 10:00 a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4021. A letter from the Executive Director, Presidential Commission on the Space Shuttle Challenger Accident, transmitting volumes II through V of the Commission's report on the space shuttle *Challenger* accident; to the Committee on Science and Technology.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FUQUA: Committee on Science and Technology. Report on Centaur cost, schedule, and performance review (Rept. 99-757). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. Report on subdivision among programs of budget allocation for fiscal year 1987 (Rept. 99-758). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4645. A bill to modify the boundaries of the Cuyahoga Valley National Recreation Area; with an amendment (Rept. 99-759). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4971. A bill to direct the Secretary of the Interior to convey certain interests in lands in Socorro County, New Mexico, to the New Mexico Institute of Mining and Technology; with amendments (Rept. 99-760). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4174. A bill to amend the Indian Self-Determination Act of 1974, and for other purposes; with an amendment (Rept. 99-761). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4037. A bill relating to the Indiana Dunes National Lakeshore, and for other purposes; with an amendment (Rept. 99-762). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 5073. A bill to amend the Toxic Substances Control Act to require the Environmental Protection Agency to promulgate regulations requiring inspection for asbestos-containing material in the Nation's schools, development of asbestos management plans for such schools, response actions with respect to friable asbestos-containing material in such schools, and for other purposes; with an amendment (Rept. 99-763). Referred to the Committee of the Whole House on the State of the Union.

Mr. RODINO: Committee on the Judiciary. H.R. 5316. A bill to amend title 28 of the United States Code to provide for the appointment of additional bankruptcy judges, to provide for the appointment of United States trustees to serve in bankruptcy cases in judicial districts throughout the United States, to make certain changes with respect to the role of United States trustees in such cases, and for other purposes; with an amendment (Rept. 99-764). Referred to the Committee of the Whole House on the State of the Union.

Mr. SWIFT: Committee on House Administration. H.R. 4393. A bill to consolidate and improve provisions of law relating to absentee registration and voting in elections for Federal office by members of uniformed services and persons who reside overseas; with an amendment (Rept. 99-765). Referred to the Committee of the Whole House on the State of the Union.

Mr. PEPPER: Committee on Rules. H. Res. 531. Resolution providing for the further consideration of H.R. 4428, to authorize appropriations for fiscal year 1987 for the Armed Forces for procurement, for research, development, test, and evaluation, for operation and maintenance, and for working capital funds, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes (Rept. 99-766). Referred to the House Calendar.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 5013. A bill to establish guidelines for damage awards in actions for personal injury incurred by seamen on fishing industry vessels and to require additional safety regulations for fishing industry vessels; with an amendment (Rept. 99-767). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOAKLEY: Committee on Rules. H. Res. 532. Resolution waiving certain points of order against consideration of H.R. 5313, a bill making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1987, and for other purposes (Rept. 99-768). Referred to the House Calendar.

Mr. BEILENSON: Committee on Rules. H. Res. 533. Resolution providing for the consideration of H.R. 4430, a bill to require the Secretary of the Interior to conduct a study to determine the appropriate minimum altitude for aircraft flying over national park system units (Rept. 99-769). Referred to the House Calendar.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FASCELL (for himself, Mr. HAMILTON, Mr. YATRON, Mr. SOLARZ, Mr. BONKER, Mr. STUDDS, Mr. MICA, Mr. BARNES, Mr. WOLPE, Mr. GEJDENSON, Mr. DYMALLY, Mr. LANTOS, Mr. KOSTMAYER, Mr. TORRICELLI, Mr. SMITH of Florida, Mr. BERMAN, Mr. REID, Mr. LEVINE of California, Mr. FEIGHAN, Mr. ACKERMAN, Mr. MACKAY, Mr. UDALL, Mr. GARCIA, Mr. BROOMFIELD, Mr. GILMAN, Mr. LAGOMARSINO, Mr. LEACH of Iowa, Mr. ROTH, Ms. SNOWE, Mr. HYDE, Mr. SOLOMON, Mr. BEREUTER, Mr. SILJANDER, Mr. ZSCHAU, Mr. DORNAN of California, Mr. SMITH of New Jersey, Mr. MACK, Mr. DEWINE, Mr. BURTON of Indiana, and Mr. MCCAIN):

H.R. 5352. A bill to combat international narcotics trafficking; to the Committee on Foreign Affairs.

By Mr. YOUNG of Alaska:

H.R. 5353. A bill to provide for a land exchange in the State of Alaska; to the Committee on Interior and Insular Affairs.

By Mr. BRUCE (for himself, Mr. GLICKMAN, Mr. DASCHLE, Mr. EVANS of Iowa, and Mr. DORGAN of North Dakota):

H.R. 5354. A bill to amend the United States Grain Standards Act to provide for optimal grain grading and for the measurement of deviations from the optimal grade designation, and for other purposes; to the Committee on Agriculture.

By Mr. CAMPBELL (for himself, Mr. EMERSON, Mr. MCMILLAN, Mr. ROGERS, Mr. HENDON, and Mr. HARTNETT):

H.R. 5355. A bill to establish limitations on the quantities of textiles and apparel that may be imported into the United States and providing for an Import Licensing System; to the Committee on Ways and Means.

By Mr. HUCKABY:

H.R. 5356. A bill to amend the Agricultural Act of 1949 to modify cross compliance requirements for producers of extra-long-staple cotton; to the Committee on Agriculture.

By Mr. LUNDINE:

H.R. 5357. A bill to provide temporary additional judicial resources to conduct trials of criminal drug cases; to the Committee on the Judiciary.

By Mr. LUNDINE (for himself, Mr. GARCIA, Mr. LEVIN of Michigan, and Mr. RANGEL):

H.R. 5358. A bill to facilitate the interdiction of narcotic drugs, controlled substances, and material for their manufacture from entry into the United States, reduce or eliminate the original production of narcotic drugs, controlled substances and material for their manufacture in other countries, to ensure the development and implementation of eradication programs in countries cultivating, producing, and exporting controlled substance, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MATSUI:

H.R. 5359. A bill relating to the tariff treatment of Chinese gooseberries (kiwifruit); to the Committee on Ways and Means.

By Mr. MICA:

H.R. 5360. A bill to amend title XVIII of the Social Security Act to improve the quality of services furnished by health maintenance organizations and competitive medical plans to Medicare beneficiaries, and for other purposes; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. STARK (for himself, Mrs. BYRON, Mr. STENHOLM, Ms. KAPTUR, and Mr. WISE):

H.R. 5361. A bill to amend the Internal Revenue Code of 1954 to require certain charities which solicit contributions from the public to use at least half of their gross revenues for charitable activities within a year after receipt and to require persons who solicit charitable contributions by mail to disclose certain information in such solicitations; jointly, to the Committees on Ways and Means and Post Office and Civil Service.

By Mr. BIAGGI (for himself, Mr. WRIGHT, Mr. HAWKINS, Mr. JEFFORDS, Mr. RANGEL, Mr. GILMAN, Mr. KILDEE, Mr. GOODLING, Mr. RUSSO, Mr. CHANDLER, Mr. TRAFICANT, and Mrs. BURTON of California):

H.J. Res. 698. Joint resolution designating the month of September 1986 as "National Back to School—Back Off Drugs Month"; to the Committee on Post Office and Civil Service.

By Mr. RICHARDSON (for himself, Mr. STRANG, Mr. MARKEY, Mr. SIKORSKI, Mr. SKEEN, Mr. LUJAN, Mr. WIRTH, Mr. MURPHY, and Mr. SYNAR):

H.J. Res. 699. Joint resolution to prohibit the Secretary of Energy from providing uranium enrichment services under certain criteria submitted to the Congress pursuant to the Atomic Energy Act of 1954; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

By Mr. LUNDINE:

H. Con. Res. 377. Concurrent resolution expressing the sense of Congress that the judicial branch of the Government should increase the exercise of its authority to assign judges temporarily to district courts in districts with large backlogs of pending criminal cases arising out of drug enforcement efforts; to the Committee on the Judiciary.

By Mr. GEPHARDT:

H. Res. 530. Resolution designating membership on certain standing committees of the House; considered and agreed to.

## MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

447. The SPEAKER presented a memorial of the Senate of the State of Illinois, relative to new technologies and commercial applications of coal; jointly, to the Committees on Energy and Commerce and Science and Technology.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1213: Mr. WISE, Mrs. MARTIN of Illinois, and Mr. ANTHONY.

H.R. 1398: Mr. MCCLOSKEY.

H.R. 1625: Mr. FUSTER.

H.R. 1946: Mr. CLINGER.

H.R. 2365: Mr. PEPPER.

H.R. 3040: Mr. EDWARDS of California.

H.R. 3099: Mr. STAGGERS, Mr. DAVIS, Mr. BUSTAMANTE, Mr. WHITNEY, Mr. VOLKMER, Mr. GEKAS, Mr. BONKER, Mr. GARCIA, and Mr. SMITH of Florida.

H.R. 3747: Mr. MICA, Mr. WYLIE, Mr. ROBINSON, Mr. BURTON of Indiana, Mr. MCCLOSKEY, and Mr. RIDGE.

H.R. 3842: Mr. SEIBERLING, Mr. LOWRY of Washington, and Mr. WILSON.

H.R. 3872: Mr. RITTER and Mr. NIELSON of Utah.

H.R. 4057: Mr. TORRICELLI.

H.R. 4183: Mrs. BOGGS, Mr. PERKINS, Mr. MOLLOHAN, Mr. MORRISON of Washington, Mr. MCDADE, Mr. IRELAND, Mr. RITTER, Mrs. VUCANOVICH, Mr. TOWNS, Mr. VENTO, Mr. DICKINSON, and Mr. MARTINEZ.

H.R. 4223: Mr. SOLARZ.

H.R. 4299: Mr. KANJORSKI and Mr. DIOGUARDI.

H.R. 4424: Mr. CONYERS.

H.R. 4625: Mr. BARNARD.

H.R. 4635: Mr. HUTTO.

H.R. 4636: Mr. WHITLEY.

H.R. 4711: Mr. ROBERTS, Mr. SCHEUER, Mr. RUSSO, Mr. HUTTO, Mr. JACOBS, Mr. MILLER of Ohio, Mr. SENSENBRENNER, Mr. HOWARD, and Mr. TOWNS.

H.R. 4787: Mr. MCCAIN.

H.R. 4889: Mrs. BENTLEY and Mr. LOWRY of Washington.

H.R. 4913: Mr. CLINGER and Mr. TALLON.

H.R. 4950: Mr. NELSON of Florida, Mr. MACKAY, and Mr. SMITH of Florida.

H.R. 4981: Mr. BARNARD.

H.R. 5056: Mr. RALPH M. HALL.

H.R. 5066: Mr. BERMAN and Mr. TOWNS.

H.R. 5103: Mr. PORTER and Mr. WALDON.

H.R. 5142: Mr. SMITH of Florida, Mr. FEIGHAN, Mr. UDALL, Mr. MCKERNAN, Mr. FAUNTROY, Mr. STUDDS, Mr. BERMAN, Mr. FRANK, Mr. KILDEE, Mr. GRAY of Pennsylvania, Mr. KASTENMEIER, Mr. PENNY, Mr. WOLPE, Mr. RODINO, Mrs. BENTLEY, Mr. GARCIA, MR. OWENS, Mr. VENTO, Mr. SCHEUER, Mr. OBERSTAR, Mr. ATKINS, and Mr. ANDERSON.

H.R. 5192: Mr. CRAIG and Mr. GEJDENSON.

H.R. 5202: Mr. VENTO, Mr. FASCELL, and Mr. DELLUMS.

H.R. 5238: Mr. FROST, Mr. RANGEL, and Mrs. BENTLEY.

H.R. 5248: Mr. SMITH of New Hampshire, Mr. MOORHEAD, Mrs. ROUKEMA, Mr. MONSON, and Mr. SOLOMON.

H.R. 5257: Mr. LIGHTFOOT and Mr. BEREUTER.

H.R. 5301: Mr. HORTON, Mr. FOWLER, Mr. CONTE, Mr. DERRICK, Mr. MCDADE, Mr. BATEMAN, Mr. DANIEL, Mr. YATRON, Mr. EVANS of Iowa, Mr. DAUB, Mr. THOMAS of Georgia, Mr. LIPINSKI, Mr. TOWNS, and Mr. MITCHELL.

H.R. 5327: Mr. MURPHY, Mr. PEASE, Mr. MCEWEN, Mr. DE LA GARZA, Mr. KOLTER, Mr. ECKART of Ohio, Mr. GEJDENSON, Mr. FAZIO, Mr. BORSKI, Mr. LIPINSKI, Mr. TOWNS, Mr. APPLEGATE, Mr. DAVIS, Mr. KOSTMAYER, Mr. CONYERS, Mr. HAYES, Mr. ROYBAL, and Mr. FRANK.

H.J. Res. 379: Mr. RANGEL, Mr. WEAVER, and Mr. REGULA.

H.J. Res. 385: Mr. LEHMAN of California and Mr. VOLKMER.

H.J. Res. 438: Mr. ANTHONY, Mr. LANTOS, Mr. CONYERS, Mr. COUGHLIN, Mr. LEVIN of Michigan, Mr. HOYER, Mr. APPLEGATE, Mr. DE LUGO , Mr. FUSTER, Mr. GALLO, Mr. CHENEY, and Mr. MCDADE.

H.J. Res. 511: Mr. EMERSON, Mr. JONES of North Carolina, Mr. MOODY, Mr. BIAGGI, Mr. HAMMERSCHMIDT, Mr. KEMP, Mr. HAMILTON, Mr. DYMALLY, Mr. LUNGREN, Mr. MCMILLAN, Mr. BLILEY, Mr. STRANG, Mr. JONES of Tennessee, Mr. STALLINGS, Mr. TRAXLER, Mr. SUNDQUIST, Mr. SPENCE, Mr. BARNARD, Mr. KOLTER, Ms. OAKAR, Mr. BONIOR of Michigan, Mrs. BENTLEY, Mr. MITCHELL, and Mrs. KENNELLY.

H.J. Res. 512: Mr. BLILEY, Mr. KEMP, Mr. LATTA, Mr. MARTIN of New York, Mr. BROWN of California, Mr. PRICE, Mr. LEWIS of California, Mr. BRYANT, and Mr. MCKINNEY.

H.J. Res. 516: Mr. HYDE.

H.J. Res. 555: Mr. SILJANDER, Mr. FOGLIETTA, Mr. PRICE, Ms. OAKAR, Mr. BONER of Tennessee, Mr. BARNES, Mr. HOWARD, Mr. MAVROULES, Mr. MOORHEAD, Mr. MORRISON of Connecticut, Mr. DE LUGO, Mr. SUNDQUIST, Mr. MORRISON of Washington, Mr. FOLEY, Mr. JENKINS, Mr. ROWLAND of Georgia, Mr. FROST, Mr. ROSE, Mr. ECKART of New York, Mr. MURPHY, Mrs. ROUKEMA, Mr. ANTHONY, Mr. RAHALL, Mr. SHUMWAY, Mr. BUSTAMANTE, Mr. CHAPMAN, Mr. COURTER, Mr. GEPHARDT, Mr. FUSTER, Mr. GUNDERSON, Mr. LEWIS of California, Mr. MCCLOSKEY, Mr. MCGRATH, Mr. GEJDENSON, Mrs. BYRON, Mrs. LLOYD, Mr. LELAND, Mr. WEAVER, Mr. VALENTINE, Mr. DIXON, and Mr. JONES of Tennessee.

H.J. Res. 649: Mr. HAYES.

H.J. Res. 660: Mrs. BURTON of California, Mr. LUNDINE, Mr. FUSTER, Mr. CHAPPIE, Mr. BOLAND, Mr. LAGOMARSINO, Mr. REID, Mr. MRAZEK, Mr. FAZIO, Mr. SCHEUER, Mr. TOWNS, Mr. VENTO, Mr. OWENS, Mr. BIAGGI, Ms. MIKULSKI, Mr. MONSON, Mr. LEWIS of Florida, Mr. BORSKI, Mr. CROCKETT, Mr. DIOGUARDI, Mr. SMITH of Florida, Mr. FAUNTROY, Mr. DARDEN, Mr. HAYES, Mr. ROE, Mr. WORTLEY, Mr. DAUB, Mr. DOWNEY of New York, Mr. MCDADE, and Mr. GEJDENSON.

H.J. Res. 673: Mr. LEACH of Iowa, Mr. KOLBE, Mrs. ROUKEMA, Mr. MORRISON of Connecticut, Mr. FAUNTROY, Mr. TORRES, Mr. MCKINNEY, Mr. GARCIA, Mr. UDALL, Mr. DE LUGO, Mr. GEJDENSON, Mr. BARNES, Mr. STARK, Mr. LEVINE of California, Mr. RIDGE, Mr. TORRICELLI, Mr. WOLPE, Mr. MRAZEK, Mr. CARPER, Mr. STUDDS, Mr. GILMAN, Mr. GRAY of Pennsylvania, Mr. BERMAN, Mr. DORGAN of North Dakota, and Mr. BEILENSON.

H.J. Res. 681: Mr. EDWARDS of Oklahoma.

H.J. Res. 686: Mr. BROOKS, Mr. DOWNEY of New York, Mr. ASPIN, Mr. FOLEY, Mr. SISISKY, Mr. DONNELLY, Mr. ROEMER, Mr. TRAXLER, Mr. ROBINSON, Mr. BONER of Tennessee, Mr. HALL of Ohio, Mr. DANNEMEYER, Mr. ALEXANDER, Mr. MOLLOHAN, Mr. WALGREN, Mr. WRIGHT, Mr. CHAPPIE, Mr. SPRATT, Mr. KOLTER, Mr. BORSKI, Mr. FLORIO, Mr. MOAKLEY, Mrs. BOGGS, Mr. MURTHA, Mr. WILSON, Mr. DORGAN of North Dakota, Mr. ROYBAL, Mr. CONTE, Mr. GEKAS, Mr. BEVILL, Mr. BARNES, Mr. ANDREWS, Mr. HENRY, Mr. DINGELL, Mr. LIVINGSTON, Mrs. LLOYD, Mr.

HATCHER, Mr. RUSSO, Mr. HILLIS, Mr. VOLKMER, Mr. REGULA, Mr. HAWKINS, Mr. EDGAR, Mr. KINDNESS, Mr. DERRICK, and Mr. COLEMAN of Texas.

H. Con. Res. 244: Mr. WILLIAMS.

H. Con. Res. 321: Mr. KANJORSKI and Mr. UDALL.

H. Con. Res. 351: Mr. BONER of Tennessee, Mr. FAUNTROY, Mr. SHUSTER, Mr. STUDDS, Mr. ANDERSON, Mr. FUSTER, Mr. STALLINGS, and Mr. SCHUETTE.

H. Res. 412: Mr. EDWARDS of Oklahoma.

H. Res. 451: Mr. MINETA and Mr. EDWARDS of Oklahoma.

H. Res. 468: Mr. WISE.

H. Res. 469: Mr. MARTINEZ, Mr. ECKART of Ohio, and Mr. VENTO.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3129

By Mr. DYMALLY:

—Page 148, after line 19, insert the following:

SEC. 148. DESIGNATION OF INTERSTATE ROUTE.

(a) Notwithstanding section 103(e)(4) of title 23, United States Code, the Secretary of Transportation shall, not later than 60 days after the date of the enactment of this Act, designate, as a route on the National System of Interstate and Defense Highways, a State route connecting an interstate route in Los Angeles County, California, and an interstate route near Riverside, California.

(b) The costs of construction or reconstruction of any route designated under subsection (a) of this section as part of the National System of Interstate and Defense Highways shall be eligible for funds authorized under section 108(b) of the Federal-Aid Highway Act of 1956, as amended, as if such route were included in the 1981 interstate cost estimate and shall be included as an eligible project in any future interstate cost estimate.

(c) For purposes of section 119 of title 23, United States Code, any route designated under subsection (a) shall be considered to have been designated under section 103 of such title.

(d) The mileage of any route designated under subsection (a) as part of the National System of Interstate and Defense Highways shall not be charged against the limitation established by the first sentence of section 103(e)(1) of title 23, United States Code.

H.R. 4428

By Mr. Richardson:

[48]—Page 259, insert the following new section after line 19:

SEC. 2112. LAND EXCHANGE, SANTA FE, NEW MEXICO

(a) AUTHORITY TO CONVEY.—(1) Subject to subsections (b) through (f), the Secretary of the Army may make the conveyances described in paragraphs (2) and (3).

(2) The Secretary may convey, without reimbursement, to the City of Santa Fe, New Mexico (hereinafter in this section referred to as the "City"), all right, title, and interest of the United States in and to the southernmost 27.88 acres, more or less, of the parcel of land conveyed to the State of New Mexico in accordance with the Act of June 19, 1956 (70 Stat. 296) and currently being leased to the City as a public park.

(3) The Secretary may convey, without reimbursement, to the New Mexico State Armory Board (hereinafter in this section referred to as the "Board"), all right, title, and interest of the United States in and to the northernmost 21.61 acres, more or less, of the parcel of land conveyed to the State of New Mexico in accordance with the Act of June 19, 1956 (70 Stat. 296), and currently the location of the State headquarters and other facilities of the New Mexico National Guard.

(b) CONDITIONS.—The lands conveyed by the Secretary under subsection (a) shall be subject to the following conditions:

(1) The City shall, in accordance with the agreement entered into under subsection (d), provide to the Board a site of not less than 250 acres determined by the Board to be acceptable for the construction of—

(A) an armory for all New Mexico National Guard units located in Santa Fe, New Mexico;

(B) an organizational maintenance shop;

(C) a United States property and fiscal office building and warehouse;

(D) a headquarters complex for the New Mexico National Guard;

(E) a local training area for the New Mexico National Guard units;

(F) a complex for the New Mexico Army National Guard officer candidate school and noncommissioned officer academy; and

(G) additional facilities specified by the National Guard Bureau or the New Mexico State Armory Board.

(2) The Board shall use the land provided to it by the City pursuant to paragraph (1) for the training and support of the National Guard of New Mexico, and for other military purposes, and if the site ever ceases to be used for such purposes, all right, title, and interest in and to such property shall revert to and become the property of the United States which shall have the immediate right of entry thereon.

(c) MINERAL RIGHTS.—The conveyances made by the Secretary under subsection (a) shall reserve all mineral rights, including oil and gas, to the United States in accordance with the Act of June 19, 1956 (70 Stat. 296).

(d) GENERAL AUTHORITY.—To implement the land exchange authorized by this section, the Secretary may enter into agreements with the City, the Board, and such other parties the Secretary determines are necessary to effectuate the purpose of this section.

(e) LEGAL DESCRIPTION OF LANDS.—The exact acreage and legal description of the site provided by the City to the Board in accordance with subsection (b) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such surveys shall be borne by the City or the Board.

(f) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such other terms and conditions with respect to the transaction authorized by this section as the Secretary considers appropriate to protect the interests of the United States. Such conditions may include a requirement for payment to the United States by the City or the Board, or both, to the extent, if any, that the value of the property conveyed by the United States pursuant to subsection (a) exceeds the value of the property conveyed to the Board pursuant to subsection (b).

# SENATE—*Thursday, August 7, 1986*

*(Legislative day of Monday, August 4, 1986)*

The Senate met at 10:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious God, our Lord and Savior, Senators are not superhuman. They are leaders or they would not be here—but they are subject to all of the human frailties: nerves, emotions, egos, bodies that can feel pain and be injured. They can grow weary, exhausted, discouraged, frustrated, depressed, they are not impervious to burnout * * * they are not infallible. And the needs of the world with all its problems weigh heavy on them. Weeks like this expose all the vulnerability of their humanness: late hours, recess deadlines, impending elections, an avalanche of amendments, challenging cosmic issues of monumental importance. They need Your grace, wisdom, and strength, Lord. Help them to realize this, seek it, accept it. For the sake of the Nation and the world at this critical, dangerous hour, and for Your honor, Lord. Amen.

## RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The able and distinguished majority leader, Senator ROBERT DOLE, of Kansas, is recognized.

Mr. DOLE. Mr. President, I thank the distinguished Presiding Officer, Senator THURMOND of South Carolina.

## SCHEDULE

Mr. DOLE. Mr. President, we have leaders' time of 10 minutes each, and then we have a flock of special orders, 10 to be precise, and then routine morning business not to extend beyond the hour of 11:30 a.m.

SPECIAL ORDERS VITIATION

I ask unanimous consent that the special orders in favor of Senator HAWKINS and myself be vitiated so that would be of some help.

The PRESIDING OFFICER (Mr. DURENBERGER). Without objection, it is so ordered.

CLOTURE VOTES

Mr. DOLE. Mr. President, I also ask unanimous consent that the cloture votes scheduled to begin at 11:30 a.m., be postponed until—4 p.m.?

Mr. BYRD. Mr. President, if the distinguished majority leader will yield, I would propose that he may wish to ask that both cloture votes—the cloture vote on the Byrd amendment, the cloture vote on the Dole amendment to the Byrd amendment—be postponed, the first to occur at whatever time the distinguished majority leader would suggest. I think that would be all right.

□ 1020

Mr. DOLE. I would think by noon we should have from our side all the "proposed amendments" to either Contra aid or South Africa. Then we would need some time to put those in form. I would say maybe 4 o'clock would give us ample time.

Mr. BYRD. Very well.

Mr. DOLE. We will have an opportunity to meet this afternoon, maybe about 2.

Mr. BYRD. Very well.

The PRESIDING OFFICER. Is there objection? Is the Senator proposing that the quorum be dispensed with?

Mr. DOLE. Yes. Do you have any objection to that?

Mr. BYRD. Mr. President, I personally do not see any reason why that should be included at this point. I would just hope the leader would postpone——

Mr. DOLE. We will just postpone the cloture.

Mr. BYRD. All the operations under rule XXII regarding both of those cloture motions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. And that will give us time. We are in the process on both sides of getting together amendments. We are not trying to encourage amendments.

So I say to my colleagues who may be listening, particularly on this side, the fewer amendments on either Contra aid or South Africa, the better, as far as we are concerned. We know there will be amendments. We know there may be amendments from the committee and there will probably be significant amendments from other Members. But we are hoping to put this agreement together and one thing that could sink it would be a raft of amendments that would take us the rest of the day to sort through and identify, because both the majority leader and the minority leader would like to know as specifically as we can just what the amendment does. We do not want to be trying to find out the rest of the day what the amendment may do.

## MAKING SENSE ON SOUTH AFRICA

AGREEMENT ON FLOOR ACTION FOR SOUTH AFRICA

Mr. DOLE. Mr. President, as the Senate is well aware, we have been working hard over the past few days to schedule floor action on the South African legislation reported out of the Foreign Relations Committee last week by a strong, bipartisan 15-to-2 vote. I hope that in the course of today we can pin down an agreement which will allow us to move on this important legislation. Like Contra aid and some other things, it is really too big an issue to be bogged down in partisan or personal disputes. It is an issue on which the Senate should, and ultimately will, speak.

Meanwhile, the debate over South Africa continues, in the Senate and in the country at large. As with any issue as important and emotional as South Africa, the debate is likely to be marked more often by heat than light. For that reason, especially, I want to bring to the attention of the Senate two items which appeared in the press last weekend, which together make a valuable contribution to our consideration of this issue.

ARTICLE ON OPINIONS OF SOUTH AFRICA'S BLACKS

The first article I want to cite is a UPI story in last Sunday's Washington Post, entitled "Poll Says South African Blacks Split Over Sanctions." The article reports on the results of a poll conducted by the London Sunday Times on the attitudes of South Africa's blacks toward the question of economic sanctions. The poll, which the Times reports as the first ever national survey of South Africa's blacks, concludes that 39 percent of the blacks surveyed had never heard of sanctions or had no opinion on their impact; 32 percent opposed sanctions; and 29 percent favored them.

Obviously the results of a single poll will not be—and should not be—decisive on our own judgment on U.S. policy in this area. But it does strike me that the opinions of those who suffer under apartheid and who are going to feel the brunt of any sanctions we impose ought to weigh rather heavily in our calculations on what we should do. To some in Washington it

seems to be an easy call to pick up our marbles and go home. But it apparently is not such an easy call of South Africa's blacks.

HELEN SUZMAN ON DISINVESTMENT

The other article I want to mention is an excellent piece by one of South Africa's most outspoken opponents of apartheid, Helen Suzman, which appeared in the August 3 New York Times Magazine. The article makes a compelling case against disinvestment and the kind of punitive sanctions that some are advocating. Let me quote briefly from Ms. Suzman's article:

Those who believe that a quick fix is likely to follow the imposition of sanctions, and that the Pretoria, regime will collapse within a short time thereafter, are sadly misinformed * * * far more likely is a retreat into siege economy, more repression and more violence.

Ms. Suzman then goes on to say:

While realizing I may lay myself open to the accusation of paternalism, I have to say that I have more respect for the American companies that have, so far anyway, remained in South Africa (and have set aside millions of dollars for the education, training and housing of their black employees) than for those who have left the country. The companies that have left have taken with them what influence they could have had inside South Africa, thereby . . .

And let me underscore this quote from the article:

. . . Thereby abandoning desperate, jobless bread-winners in a country with no Social Security safety net, no dole and no food stamps.

Mr. President, Helen Suzman's credentials as an opponent of apartheid are beyond question. Her thoughts on how best to accomplish the end of apartheid deserve our most serious attention.

I strongly urge any of my colleagues who have not read these articles from the Washington Post and the New York Times Magazine to do so immediately, and I ask unanimous consent that the full text of both articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From The Washington Post, Aug. 3, 1986]

POLL SAYS S. AFRICAN BLACKS SPLIT OVER SANCTIONS

LONDON, Aug. 2.—A public opinion poll of 615 blacks in South Africa shows 32 percent oppose economic sanctions and 29 percent favor them, the Sunday Times said in what it called the first national survey of South Africa's blacks.

The poll, conducted for the Sunday Times by Market and Opinion Research International and the South African company Markinor, was taken July 18-27 at 123 points throughout the country, both rural and urban, visited by black interviewers.

The results were published in the Sunday Times, which called the poll "the first country-wide survey of blacks in South Africa."

The 615 blacks who were polled were asked, "Are you in favor of economic sanctions against South Africa or not?"

Thirty-nine percent had never heard of sanctions or had no opinion, while 32 percent opposed them and 29 percent favored them.

Forty-four percent of those polled thought they would be hurt personally by economic sanctions, the newspaper said.

Nearly two thirds of those polled—63 percent—said they do not believe violence is justified to end apartheid, although 88 percent are unhappy with the racial system in South Africa.

Fifty percent of those polled said they thought South Africa's problems would be solved peacefully, against 42 percent who said the problems would be solved by civil war.

Of the blacks polled, 59 percent said they do not believe apartheid will exist in South Africa in 10 years, while 25 percent believe it will exist and 16 percent had no opinion.

---

[From The New York Times Magazine, Aug. 3, 1986]

HELEN SUZMAN ON DISINVESTMENT

(By Helen Suzman)

What should the United States do about South Africa? This is a simple question to which there is no simple answer, if there is an answer at all. Of course, if the desire to distance the United States from a morally repugnant system is paramount and if the objective is to punish South Africa for its glaring sins of omission and commission, regardless of the consequences, then sanctions and disinvestment spring readily to mind. And if political expediency is also part of the picture, then calling for economic sanctions must surely be irresistible.

I realized this in November 1984 when I was in the United States and watched on television the landslide victory of Ronald Reagan in the elections. The following morning, I received a call from the New York correspondent of the South African evening newspapers. He asked for my reaction to the election, and I told him I had no doubt that champagne corks were popping in Pretoria. I also said the celebrants were making a great mistake because I believed that the Democrats would seek a rallying cause—and South Africa was going to be it.

I did not need a crystal ball to make that prediction. During visits to the United States over the past seven years, I had observed the buildup of the anti-apartheid campaign in the United States, on campuses in particular. Year after year in the South African Parliament, I had warned that unless the government began to dismantle apartheid, which is legally sanctioned racial discrimination, and to desist from some of its more abhorrent practices—such as detention without trial and the forced removal of helpless black communities—South Africa would be faced with severe punitive measures. My warnings fell on deaf ears. Events in South Africa throughout 1985 triggered an anti-apartheid explosion in the West.

Day after day, scenes of ugly police brutality, of mass funerals of victims of police shootings in black townships, appeared before horrified American and European television viewers. (Such scenes were not shown on South African television, which is state controlled, although the horrendous black-on-black violence frequently appeared on the screen.) With relentless regularity, newspaper headlines abroad proclaimed the rising death rate, the enormous number of people detained without trial, torture at the hands of the security police, the hordes of children arrested and imprisoned.

By mid-1985, the South African issue had been reduced to a simple equation in the United States: "If you are against sanctions and disinvestment, you must be a racist—Q.E.D." The response was of tidal-wave proportions. In July 1985, Chase Manhattan, followed by other banks, pulled the rug from under South Africa's financial system by refusing to roll over loans; as a result, the value of the rand plummeted. Many colleges and universities divested themselves of stocks in companies doing business in South Africa. Cities and states "cleansed" their pension-fund investments of South African connections.

Last year, unable to withstand and hassle factor at home, fearful of boycotts of their products in the United States and nervous about political and economic instability in South Africa, 28 American companies (according to the American Chamber of Commerce in Johannesburg) withdrew from South Africa. Others have followed suit this year.

In September 1985, hoping to forestall more severe Congressional action, President Reagan, long an opponent of sanctions, signed an executive order that prohibited most new loans to South African businesses. The order also banned the sale of most nuclear-related technology to South Africa and the sale of the Krugerrand, the South African gold coin, in the United States.

Across the Atlantic, the other stalwart opponent of sanctions, Prime Minister Margaret Thatcher of Britain, was experiencing even greater pressures. She was forced to agree to limited measures against Pretoria at the Commonwealth conference in the Bahamas in October 1985. The final report of the Eminent Persons Group—a seven-member mission appointed at the Bahamian conference to conduct an in-depth investigation in South Africa—brought no comfort. The mission originally put forward a "possible negotiating concept" to the South African Government, one calling for steps toward ending apartheid. They included the suspension of violence by both the Government and the African National Congress (A.N.C., the most prominent of exiled groups against apartheid); the release of Nelson Mandela, the black leader who has been in prison for 24 years, and other political prisoners; the removal of the Government's military forces from black townships; the legalization of the A.N.C. and Pan African Congress, another black political organization, and a ban on detention without trial.

Instead of accepting these very reasonable proposals, which have long been advocated by myself and by other opposition politicians in South Africa, the Pretoria regime, as is its wont, embarked on a course of action that could only strengthen the sanctions lobby. Last May, while the Commonwealth mission was still in South Africa and was in the process of preparing its final report, the South African Defense Force carried out raids on Lusaka, Gaberone and Harare, the capitals of three neighboring Commonwealth countries. The official reason given was "to take out" A.N.C. bases. But the gains appeared to be minimal. Politically aware South Africans ascribed the raids to a Government attempt to prove to militant right-wing elements inside the country that the Government had not "gone soft" on the A.N.C. and was not succumbing to outside pressures.

Not surprisingly, diplomatic reaction abroad was totally hostile. The Commonwealth mission was understandably outraged, and its final report made this clear.

Shortly afterward, negotiations broke down and the group reported to the Commonwealth heads of government their "reluctant but unequivocal judgment that further talks would not lead anywhere in the current circumstances."

Paradoxically, it was during this tumultuous time that the most far-reaching reforms yet introduced by the South African Government in the direction of dismantling apartheid were enacted. As a result of pressures from inside and outside the country, during the recent Parliamentary session, the Government offered to restore citizenship to those permanent residents in the republic who ceased to be South African citizens when the four black homelands became "independent." (Even with citizenship, however, the blacks in South Africa will not have Parliamentary voting rights.)

The Government also opened the central business districts in major cities to all races. It made property ownership available to blacks in the townships. Most significant of all, it abolished the hated pass laws and influx control, and replaced the old pass book with a common nonracial identity document. (The pass laws have for many decades inhibited the moblity of blacks and their right to lead family lives. Millions of people have been arrested for infractions of these laws, which have bedeviled the relationship between the police and the black community.)

Although many vital issues remain to be addressed—redistribution of land and the disproportionate living standards of white and black South Africans—there is no doubt that the reforms signify a change of direction: away from apartheid. The recent reforms will undoubtedly have a positive effect on the future well-being of black South Africans. In fact, had these changes taken place five years earlier, the impact would have been far greater among blacks. As it is, they have been totally overshadowed by the reimposition of a state of emergency, the detention of thousands of people and the ongoing violence in the black townships.

The reforms have evoked little reaction in decision-making circles in the United States and Europe. (Ten years ago, they would probably have been considered significant, particularly in the United States, which at the time might still have been harboring vivid recollections of its own civil-rights struggle of the 1960's.)

This responsee—or lack of it—to changes the South African Government considers to be of major importance has not only increased its intransigence, but confirmed what it has long suspected: that the failure of the West to define precisely what it means by "dismantling apartheid" is part of a ploy to move the goal posts as each demand is met; ultimately, the Government fears, the West will insist on the total transfer of power to the black majority. This is simply not under consideration by the South African Government.

Those who believe that a quick fix is likely to follow the imposition of sanctions, and that the Pretoria regime will collapse within a short time thereafter, are sadly misinformed. Certainly, if I believed in such a possibility, I would back sanctions to the hilt. Far more likely is a retreat into a siege economy, more oppression and more violence. There will be a long drawn-out confrontation between a well-armed military force shoring up the Government and a popular movement backed by the masses and using Irish Republican Army-type tactics in urban and rural areas. The latter strategy has already been put into effect.

The Reagan Administration's policy of "constructive engagement" may well be dismissed in a great many circles in the United States and elsewhere. It has, at least, aimed for attainable objectives: to prevent forced removals of black communities; to extend funds from the Agency for International Development (A.I.D.) to civil-rights organizations and drought-stricken areas; to press for the release of anti-apartheid detainees. Moreover, together with the Sullivan principles, it encouraged American businessmen and, by example, their South African and European counterparts, to be socially responsible.

Nowadays, the Sullivan principles are also in the doghouse. Drafted almost a decade ago by the Rev. Leon Sullivan, a black Baptist minister from Philadelphia, the code calls for the desegregation of workplaces, equal employment practices, training for nonwhites, social services for black workers and the promotion of trade unionism. The code has been adopted by about 65 percent of the 260 or so American companies now doing business in South Africa. But many black South Africans feel that too much lip service has been paid to the code and not enough action taken.

While realizing that I lay myself open to the accusation of paternalism, I have to say that I have more respect for the American companies that have, so far anyway, remained in South Africa (and have set aside millions of dollars for the education, training and housing of their black employees) than for those that have left the country. The companies that have left have taken with them what influence they could have had inside South Africa, thereby abandoning desperate, jobless breadwinners in a country with no social security safety net, no dole and no food stamps.

The moral outrage and desire for punitive action is something I understand very well, but the reality that will come as a result of a grievously afflicted economy will not be seen by those living thousands of miles away. That reality, compounded by decades of unequal employment opportunities and oppression, is bleak beyond belief. True, many black South Africans say they approve of disinvestment and sanctions, despite the additional hardships they will endure as a result. They fall into four categories: those who have no jobs and nothing to lose; those who have jobs in "sheltered" employment and will lose nothing; those who want everyone to lose everything (therefor, "roll on the revolution"), and, finally, those who believe that the South African Government will crack at the first (or, at worst, second) sign of sanctions. The last category brings to mind a former British prime minister who predicted that it would take "weeks rather than months" to bring down Ian Smith's Unilateral Declaration of Independence in Rhodesia. In the event, it took another 15 years and 30,000 dead.

There are also leaders of the neighboring black states who advocate sanctions against South Africa, despite the fact that southern Africa is one economic unit. Whatever harm is done to South Africa's economy will certainly harm the economies of the country's neighbors, which are dependent on South Africa for jobs, markets and transportation.

The former High Commission territories of Botswana, Lesotho and Swaziland are part of a customs union with South Africa from which they derive substantial revenues; Botswana and Lesotho also belong to the rand monetary area. South Africa's Electricity Supply Commission is an important source of power for these countries, which also depend entirely on routes through South Africa for trade. Zaire, Zambia and Zimbabwe are heavily dependent on South African transport and ports for their imports and exports.

More than 250,000 foreign blacks work in South African mines alone, earning almost 1 billion rand (about $400 million) a year, at least half of which is repatriated. A further 170,000 foreign blacks are employed in other occupations in South Africa, not to mention an estimated one million "illegals." The neighboring states cherish the hope that the Western nations will pick up the tab to make good the substantial losses they will sustain after they cut their links with South Africa. Unfortunately, this hope is probably unfounded.

Unpalatable as it may seem to the sanctions lobby, the most practicable way to get rid of apartheid and to achieve a nonracial democratic society in South Africa is through an expanding, flourishing economy. The process of integrating blacks as skilled workers into such an economy would be expedited. Their economic muscle would then, through increased trade-union action, be a potent force not only in the workplace but also in the sociopolitical sphere. Strike action and consumer boycotts—both of which can be used as temporary expedients, unlike disinvestment and mandatory sanctions—are the most powerful weapons for blacks to use to resolve important issues like political power-sharing.

Indeed, consumer boycotts have already been used to great effect in some parts of the country, such as the eastern Cape Province, where many white-owned shops were brought to the brink of bankruptcy. Conversely, if blacks are unemployed and have nothing to spend, such boycotts would be meaningless. It is astonishing to me that those advocating punitive actions do not realize that, if successful, they will have undermined the most significant power base that blacks could acquire.

Certainly, this approach presupposes a long-term strategy and blacks, especially young blacks, want liberation now. No one should under-estimate the fierce spirit of resistance that pervades the black townships, but while incremental change is certainly attainable, the replacement of the white minority government by a black majority government is simply not within reach, even though many blacks believe that the era of white domination is about to end.

Those calling for sanctions and disinvestment often overlook two important factors.

First, while the present white minority Government in South Africa has no pretensions to democratic rule, there are also no guarantees that it would be replaced by a nonracial democracy respecting the rule of law, a free press, free association, free elections and an independent judiciary, not to mention an economy free of state control.

Second, South Africa does not consist only of an oppressed black majority and right-wing white oppressors. Indeed, 250,000 white voters (20 percent of the white electorate) in the last general election in 1981 cast their ballots for the official opposition in the House of Assembly—the Progressive Federal Party, which has for years advocated the ending of apartheid and the establishment of a truly representative govenment with protection for the legitimate rights of minorities. Although the percentage of those who voted against apartheid is

small, it is nonetheless significant. It may be well to remember that from 1961 to 1974 I was the only Member of Parliament elected on such a platform.

Indications of support for such an alternative government from powerful nations like the United States would certainly encourage many more white South Africans to cast their votes against the Pretoria regime at the next election, due at the latest in three years' time. At the very least, there could be a Parliamentary realignment.

It may well be that all such arguments fall on deaf ears, and that they are advanced in a lost cause. Nevertheless, they deserve to be made in the interest of millions of moderate South Africans of all races who abhor apartheid, who have long fought the abominable practices of race discrimination and who are striving for a peaceful transition to a nonracial democracy. For them, at least, it is surely not too much to ask that they be spared the violence and misery of a scorchedearth policy.

It is not at all certain whether President Reagan can stave off Congressional imposition of harsh punitive sanctions, as he tried to do in his recent speech on American policies toward South Africa. But if he does—and it is a big if—it is vital that the Pretoria Government use the time so won to accelerate the dismantling of apartheid, to provide better housing and education and, most important, to extend political rights to blacks. The release of Mandela as a prerequisite for negotiations is an obvious first step, as are the release of all persons detained without trial and an end to the state of emergency.

The United States should keep up its condemnation of apartheid. The system of apartheid is an affront to people concerned with civilized values throughout the world. Its eradication would be an important gain for the civil-rights movement and would increase the sum of human freedom worldwide. The United States should exert pressure on apartheid, but not impose punitive measures that will wreck the South African economy. That is the strategy of despair that will destroy the inheritance which blacks will inevitably share.

## RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The Democratic leader is recognized.

## PROPOSED AGREEMENTS AND SCHEDULES

Mr. BYRD. Mr. President, the proposed unanimous-consent agreement that was handed to me last evening by staff, I believe, that was prepared by the distinguished majority leader or at his direction, which came as a result of our meetings yesterday in his office, has some very strange language in it.

I would like to inquire as to what the words—let me read the first paragraph:

I ask unanimous consent that, notwithstanding the provisions of rule XXII, H.R. 5052 be laid before the Senate at the close of morning business on Monday, August 11.

Why are those words "notwithstanding the provisions of rule XXII" in the request? Is it contemplated that the debate might be shut off on the DOD bill and that on Monday that bill would still be before the Senate by virtue of the cloture motion having been invoked to shut off debate?

Mr. DOLE. That was my thought, that if we did not finish DOD—though I am getting some heartening news from the managers, as of last night at about 11 o'clock, that they are really making progress. So I suggest there could be another cloture vote on DOD tomorrow. If they can take care of most of these amendments, they felt fairly confident they could finish at a decent hour tomorrow.

But, in any event, yes, that is the reason for that language. The distinguished minority leader raised the possibility the other evening that if we did get hung up—I guess last evening—if we get hung up on DOD, we could be on it all next week. So I understand from the Parliamentarian that that would take care of that problem.

Mr. BYRD. Yes, that is one good reason why Senators should not vote for the cloture motion on DOD tomorrow because, as I indicated last night, if cloture is invoked tomorrow on DOD, then the distinguished majority leader may find it difficult, because of time constraints, to work in legislation on South Africa and on Contra aid, the military construction appropriation bill, and on the Boren campaign reform measure. I contemplated that that was probably the reason why the language was in the paragraph. The distinguished majority leader has stated that that is correct.

Mr. DOLE. If the Senator will yield.

Mr. BYRD. Yes.

Mr. DOLE. On the other side, it appears to me that—and I hope to discuss this with Senator GOLDWATER today—if, in fact, they are having the success they indicate, and they disposed of 20-some amendments in a couple of hours last evening and have about 16 more of those which are acceptable and they have been able to get time agreements on, I understand, 4 other fairly major amendments, it is getting down to the point where it occurred to me that if cloture were invoked, it might speed up the process.

□ 1030

Mr. BYRD. I think it could be just the opposite.

Another bit of verbiage, in the first paragraph, I think, needs explanation. Reference is made to amendments. The language states amendments be dealt with "in the usual fashion." "In the usual fashion" may appear to the layman to be very correct verbiage, nothing to be concerned about. But to me that is strange language indeed in a consent agreement. I have been the party to hundreds of consent agreements over my 20 years working within the Senate leadership of the Democratic Party, and almost all of that time being spent on the floor. That is a very strange phrase. I think before we go further in any attempt to develop a unanimous-consent agreement that will be very clear and could be understood by Senators who know not quite as much about the rules and procedures as some may know, I would like to know what that means. Why is that language in that paragraph?

Mr. DOLE. As I understand again, we were trying to provide for amendments being dealt with in our agreement as we normally do, the usual form or the usual fashion. They could be specified in the agreement. Beyond that, I do not know of any other hidden meaning. Again, what might expedite it is if the Senator from West Virginia would make his suggestions in writing.

Mr. BYRD. I will be happy to do that.

Mr. DOLE. If the Senator will yield, as far as the majority leader is concerned, I would like to get an agreement that both sides are comfortable with, if the Senator has reservations, if I have reservations, or if other people have reservations.

Mr. BYRD. My reservations go to this rather weird language. In "the ususal form" are words of art in Senate agreements. But "in the usual fashion" can mean a lot of things. "Usual fashion" of course means that the committee amendment or amendments have to be disposed of first before floor amendments are in order unless they are to the committee amendment.

So "in the usual fashion" could mean many things. This being an agreement that deals with at least two very highly controversial issues which have developed a lot of emotion on both sides of the aisle, it seems to me the agreement ought to be very clear, and ought to be very specific as to just what is meant. In my judgment, this kind of language in a unanimous-consent agreement is not conducive to that clear understanding.

I think both the majority leader and I want an agreement that will be so clear that it will be unmistakable and that it will provide for the carrying out of the proposals that were discussed in the office of the distinguished majority leader yesterday.

Mr. DOLE. If the Senator will yield, I think for the record I will indicate what I did following our meeting. With the written suggestions that the distinguished minority leader gave to me wherein he stated that the disposition of amendments or some arrangement will permit orderly consideration of amendments, I suggested the Parliamentarian take the recommendations that the Senator has made, along with the earlier proposal that I had given the Senator to see if there is some way we could blend the two. I assume that particular language may be an effort to do that. Again, we can

revisit that to make certain there is no misunderstanding about it.

Mr. BYRD. I think it might be a good idea if the Parliamentarian were in the next meeting so he could clearly understand everything that is said. The proposal that I submitted to the distinguished majority leader was a conceptual proposal. We discussed it and I think reached a rather good understanding. I believe the unanimous-consent agreement that the distinguished majority leader has presented to me through staff has come a long way toward meeting the proposals that we had on yesterday.

I cannot agree to this unanimous-consent agreement as it is written. But I think we can get an agreement the Senator from Kansas can understand, I can understand, all Senators can understand, and that will carry out the intentions of the parties on yesterday.

There is one final problem I have with this consent agreement. It does not give assurance that the South Africa matter will get consideration in this Senate prior to the August recess.

That is not the intention of the majority leader. I know it is not. But without taking further time on this floor to explain why it does not—I will be perfectly happy to do that—this agreement, if it were entered into right now, would not guarantee Senators who want to act on the South Africa matter, that opportunity.

I will be happy to respond further and to provide a unanimous-consent agreement that will lay out the details clearly, leave no questions about the rights of Senators who call up amendments on both sides, will provide not only for assurance that the South Africa matter will be taken up and disposed of, but also that the Contra aid matter will be taken up, also that the Boren measure will be taken up, will provide for the vitiation of the cloture motions today, and provide for action on the debt limit extension clearing it of both issues that are still available to be called up by way of amendments on that.

It can be written, in a way so that all Senators can read and understand the agreement.

Mr. DOLE. If the Senator will yield, I think it would be helpful particularly with reference to the debt ceiling. As I indicated yesterday, we had a visit with the chairman of the Budget Committee.

□ 1040

I have also had a call from the chairman of the Ways and Means Committee, the Honorable DAN ROSTENKOWSKI, who wondered if he should send us a short-term extension. I said, "Not yet. We would like to pass the debt ceiling."

It is my understanding that there will be an informal meeting with some of the probable House conferees and Senator DOMENICI and others to see if they can at least start some preliminary work on the so-called Gramm-Rudman-Hollings amendment to the debt ceiling. That would be most helpful.

Once we get the agreement, if we could vote on the debt ceiling extension and send that to conference, that would be one big obstacle out of the way.

I do want to accommodate the distinguished Senator from Oklahoma. He has been very patient. We have had good discussions. I think we can work that out. He even indicated, to my understanding, that perhaps we could do 3 hours on Monday and 2 hours on Tuesday. I would like to think we can carve out an agreement in some way.

I do want to complete action in the Senate on both Contra aid and South Africa next week.

I believe that is our understanding and I do not know why we cannot achieve that. I would guess that upon the disposition of H.R. 5052, it would give rise to the minority leader for concern if we did not dispose of Contra aid. The only potential problem there is whether or not cloture can be obtained. I believe it can. We now have 50-some Senators who signed a cloture petition. I know a number on the Democratic side, not who signed the petition but I think who will vote for cloture. Some do it as a matter of practice, to vote for cloture.

I believe that can be accomplished. With cloture, we are assured that that would come out. That will erase the problem.

Mr. BYRD. Mr. President, I am going to offer an agreement that will assure the distinguished majority leader that both issues will come before the Senate and it will not leave any room for doubt that South Africa will be called up and disposed of. It will even give the majority leader two bites at the Contra apple.

As a matter of fact, I have it in my pocket, but I want to polish it up a little bit.

I have the usual type of unanimous-consent agreement that has been entered into over the years when there are very difficult measures. This agreement will provide that both sides have their fair shots.

Again, as I say, if it is entered into, it will provide that Senators in the minority as well as Senators in the majority have a chance to call up their amendments and have them disposed of. There will be a time limit on each amendment.

Without going into the details, which are rather dull or not very inspiring to the average listener, I will simply sum it up by saying again that this agreement that I have here will provide the distinguished majority leader the rest of this week, if he wants it, to dispose of the DOD bill. With the kind of progress that has been made in the last day, especially on the DOD bill, and the prospects for further reasonably prompt action, he should be able to have that DOD bill out of the way if not today then tomorrow. If it is necessary to come in Saturday, that is fine. But DOD will be out of the way. Of course, I cannot guarantee that, but a cloture motion will not guarantee it either.

I think if we just let the DOD bill move along on its own, with Senators having the opportunity to call up their amendments and debate them, hopefully, action on that bill will be completed by the close of business tomorrow.

In any event, if cloture is invoked on that bill tomorrow that would knock everything into a cocked hat and leave undecided and in a rather indefinite status the other measures that I think can be disposed of.

Once again, I will offer the distinguished majority leader an agreement that will provide for action which I proposed yesterday, for South Africa to go first. If the distinguished majority leader wishes that Contra aid goes first, that is all right with me. It does not matter to me which side goes first, just so that Senators on both sides, in both parties, have the opportunity to call up their amendments and dispose of them.

I must say to the distinguished majority leader that if he wishes to, I will be glad to sit down with him. This is the way I have done before with the Senator's predecessor when I was majority leader. I can sit down with him and with the Parliamentarian so that the Parliamentarian has a clear understanding of what we want. The agreement can be prepared by the Parliamentarian if the majority leader wants it prepared by the Parliamentarian and it would carry out those intentions.

I have a proposal and I will be ready after I have worked on it just a bit more and gotten the names of other Senators who have amendments. Then I would like to get the names of the Republican Members, or the distinguished leader can fill those in when the agreement is proposed. I think we can get a lot of work done before we go out next week.

Mr. DOLE. I think that is a good suggestion, if the distinguished manager will give me that. I can then review it and I think at that time we can sit down together on any little problems we can work out. Also by that time it is my hope, and again I will say it so that Members or their staffs who are listening in the offices will know it, that if Members on this side have amendments, not just numbers but amendments, to either South

Africa or Contra aid, we have to specify those amendments. We would certainly like to have those no later than 12 o'clock today.

Mr. BYRD. Mr. President, I have to attend a meeting of the Appropriations Committee which is marking up the energy-water appropriations bill.

I ask unanimous consent that my time under the standing order be reserved for me throughout the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 5 minutes.

## CAN THE CONGRESS SAVE ARMS CONTROL?

Mr. PROXMIRE. Mr. President, recently, this Senator spoke here in the Senate about a tentative, hesitant suggestion made by an anonymous source in the Reagan administration to tie the proposal to reduce the number of nuclear weapons in the arsenal of both superpowers to a reduction in nuclear weapons test. Several weeks ago, the proposal became a 1-day newspaper story. Then it died. It has not been revived. Indeed, its prospect for revival appeared slim. It seemed slim for one reason. The administration—in fact, any Presidential administration—almost always has a firm hand on arms control and the arms control agenda. The President decides whether to negotiate. He decides when to negotiate. He decides who will negotiate on his behalf. He decides what will be negotiated. The role of the Congress has been, at best, secondary and peripheral. Congress has been a nosy but helpless kibitzer in the process. President Reagan has left no one in doubt. He opposes negotiating a superpower end to nuclear weapons testing. The American people and the Congress have disagreed with the President. Both have demonstrated again and again that they favor stopping nuclear weapons testing.

But so what? The President determines arms control policy. The Congress and the general public do not. The President has the power on this issue. So what has happened? So we have continued nuclear weapons testing. Except for the tentative suggestion of limiting the number of nuclear weapons tests—a suggestion that seems to have died aborning—the issue appeared to be settled.

But the House of Representatives has introduced a new power element into the situation. The leadership of the House majority has proposed a cutoff of funds for testing nuclear weapons with explosions over 1 kiloton after January 1, 1987. The cutoff would be conditioned on two actions by the Soviets. First, the Soviets will have to stop all testing of nuclear weapons above the 1-kiloton limit after January 1, 1987. Second, they will have to agree to the placement of enough monitoring stations with seismic devices in the Soviet Union to permit the United States to insure effective verification.

This action by the House might or might not have any real effect in limiting nuclear weapons testing. Passage in the Senate would be far more difficult. Even if the congressional limitation on nuclear weapons testing money did pass the Senate, the nuclear weapons tests might very possibly continue. It is true that the President would be hard put to veto the restriction because it would be part of an armed services funding bill that he would need to provide for the Nation's national security. But the President could probably find other money to continue at least some nuclear weapons tests.

Assume, however, that the House proposal passes the House but fails in the Senate. Senate-House conferees would then be mandated to seek a compromise between the House and Senate positions. In that event a partial reduction in the number of nuclear weapons tests, perhaps a 30 percent mutual reduction, combined with a mutual 30 percent reduction in offensive nuclear missiles, also with tight verification provisions, might emerge as a compromise. As this Senator has previously indicated, such a partial reduction in nuclear weapons tests would have little meaning, except as the beginning of a long-term process.

Actually, this process began way back in 1963. The 1963 limited test ban treaty specifically pledged both powers to negotiate a comprehensive end to nuclear weapons testing. Previous American Presidents have favored such negotiations. The partial reduction of these weapons explosions would resume the process. It would inch the two superpowers down the road that is most essential if arms control is to have any real significance. No arms control agreement, including the reduction of nuclear weapons, and no limitation on nuclear weapons, can have any real security significance in this nuclear age unless the two superpowers find a way to stop the onrush of nuclear weapons technology. The superpowers could slash their strategic nuclear warheads from 10,000 to 1,000 but the rush of nuclear technology flowing from testing could make the 1,000 warheads more devastating than the 10,000.

The dreams of President Reagan and Secretary Gorbachev to eliminate nuclear weapons from the face of the Earth are totally unrealistic. No weapons have ever become obsolete except by the invention of a more deadly and destructive weapon that took its place. The intelligence that enabled 20th century man to solve the problem of the atom and convert this fearsome energy into such devastating weapons can never be eradicated. Even if the superpowers succeeded in eliminating all their nuclear weapons, just one of the scores of countries on Earth with the economic and technological capacity to build nuclear weapons could become the top world power at any time in the future by building on the established technology. Nuclear weapons are here to stay. But there is nothing inevitable about their increasingly devastating power. If we stop testing, we stop the research that lies at the heart of the nuclear arms race. This Congress may have a historic chance this year to begin that process.

Mr. President, I yield the floor.

## RECOGNITION OF SENATOR MELCHER

The PRESIDING OFFICER. The Senator from Montana is recognized.

## REDUCING PENTAGON SLUSH FUND WILL REDUCE DEFICIT

Mr. MELCHER. Mr. President, the figures that are coming in on the deficit calculation for the end of this fiscal year are mounting. What that means to us is that our job here, in Congress, is not being prudently done. If we were more prudent, we would obviously be reducing the Federal deficit at a much faster pace.

The Gramm-Rudman procedure would set in motion the requirement that next year's fiscal responsibility would be under a tighter rein. We would have more prudence and more deliberate cuts made in spending so that we do not end up with the 1987 fiscal year figures not coming down. Gramm-Rudman tells us for this coming year—let me repeat that and make it clear—for this coming year, fiscal 1987, we should have the Federal deficit down below $154 billion. That does not seem likely at this point.

On the Senate floor, we have the Department of Defense authorization bill and I think it is appropriate at this moment for me to describe an amendment I shall offer to the bill that would reduce spending in the Pentagon by some $12 billion—$12 billion. The amendment would not cut out funds from readiness, would not take pay away from the Armed Forces personnel, would not cut down on operation and maintenance. The $12 billion reduction would come from the slush fund. That slush fund is estimated by the controller at the Defense Department to be $60 billion plus of unobligated funds.

Mr. President, let me make this clear. These funds have been appropriated for specific purposes, generally for procurement of new weapons, but have not been obligated. That $60 billion that will be unobligated at the close of this fiscal year, October 1, is the slush fund I am speaking of. My amendment would reduce that by $12 billion.

If we are going to have an amendment on that slush fund, it has to come on this bill, not on appropriations. Why? The reason for that is that this would be legislation on an appropriations bill and therefore, be out of order on an appropriations bill. It must be done on the authorization bill.

I caution my colleagues to seriously consider this amendment. I ask for approval of the amendment when it is offered because it is obvious that spending must be cut in the military this year. This is the logical point to make a cut of this magnitude. Twelve billion dollars of unobligated funds would be cut and be available for fiscal 1987.

It will help us meet the Gramm-Rudman targets. It will not reduce troop level nor take away from operation and maintenance. Therefore, readiness is protected. I believe it is a sound amendment. I hope we can have acceptance of it by the Senate when it is offered.

## RECOGNITION OF SENATOR DIXON

The PRESIDING OFFICER. The Senator from Illinois is recognized.

## WHAT ABOUT CORN?

Mr. DIXON. Mr. President, I have spoken on the Senate floor and in the Agriculture Committee in recent weeks about the worsening prospects for U.S. agricultural trade, and rise again today to discuss this issue of great importance to my home State of Illinois and the entire Nation.

For the second month in a row, foreign agricultural imports exceeded U.S. agricultural exports. Our agricultural trade deficit in May exceeded $348 million. The figure for June is approximately $72.1 million.

As ranking member of the Subcommittee on Foreign Agricultural Policy, I have attended a series of hearings on agricultural trade issues. During our hearing last week, I questioned our witnesses about the possibilities of expanding our agricultural exports. The answer they gave me was unanimous: While we work to expand our agricultural exports, our supplies will remain. We must take additional steps to alleviate the grain storage crisis.

I stood on this floor 2 weeks ago, Mr. President, and introduced a resolution supporting the expansion of the Export Enhancement Program to include all of our trading partners. The very next day, I cosponsored an amendment with Senator DOLE which would accomplish this same goal.

The response we have received since the Senate passed that amendment has been astounding. The New York Times has published several articles in the past few weeks highlighting the outrage of several U.S. trading partners over the Senate's action.

Many of our trading partners have long maintained aggressive marketing campaigns to sell their agricultural products in the world market.

Mr. President, while I believe we must maintain good relations with our allies, I also believe that the American farmer should not again be asked to bear the burden of our foreign policy problems. I led the fight on the Senate floor which prevented the President from using agricultural embargoes for foreign policy reasons without the consent of Congress. I am prepared to again lead the fight to protect the interests of the Illinois and the American family farmer. It is high time that we aggressively market our own agricultural exports.

Last Friday, the Secretary of Agriculture announced an export initiative which would permit the Soviet Union to purchase up to 4 million metric tons of wheat through the end of this fiscal year.

Mr. President, I would like to ask the administration: What about corn? In Illinois and the Midwest, we face a serious storage crisis. We have no place to store our corn. At this time, it is hard to believe that the Department would announce an export initiative on wheat and not on corn. Our trading partners can now just sit back and wait for the price of corn to drop before they make purchases.

We need to act now. Illinois has at least 120 million bushels of corn and no place to store it. What about corn, Mr. President? What about Illinois? What about Iowa? What about Indiana? The top three corn-producing States have no place to store their grain. Our farmers are suffering.

I urge the President to use all his authority provided in the 1985 farm bill to make corn available to all of our trading partners. I also urge him to continue these export initiatives beyond the current fiscal year. If we expect to expand our share of world agricultural markets, we must act immediately.

□ 1100

I yield back the remainder of my time, Mr. President.

## RECOGNITION OF SENATOR HUMPHREY

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, are we limited to 5 minutes?

The PRESIDING OFFICER. The Senator is correct.

Mr. HUMPHREY. I liked it better when it was 15.

## INFORMED CONSENT

Mr. HUMPHREY. Mr. President, several days ago I announced my intent to introduce legislation that would assure women contemplating abortion they would be provided with sufficient information that their consent to an abortion would truly be informed consent. I pointed out at that time that the recent Thornberg decision, which was read by many as prohibiting laws requiring informed consent, did nothing of the kind; that the Court was quite explicit in its decision and in the language of the decision indicating that laws requiring provision of information to assure informed consent surely are not unconstitutional, that instead the Court objected to certain provisions of the Pennsylvania law which it struck.

Mr. President, who can object to informed consent? Surely, no Senator, no Member of Congress, whatever his or her view might be on the fundamental subject of abortion. Whether a Member of Congress is for the so-called right to abortion or opposed, I think we can all agree that women contemplating abortion deserve to have the kind of information made available to them prior to the abortion such that their decision will be an informed decision. And yet, Mr. President, that is not the case today, I contend. I contend that too often women are not provided the information such that they can make an informed decision. Indeed, they are often provided with misinformation. As a way, I hope, of building support for my legislation, I intend to introduce into the RECORD every day in alphabetical order by State letters from women who have written to me who had abortions, who now regret having had the abortion, who say that if they had had information they believed they needed, they would probably not have had an abortion. As a part of that effort, today I will read into the RECORD a letter from a woman in Taylor, AZ. I am not going to state her name, but it is on the letter and it will be included in the RECORD. These are women, Mr. President, who are willing to come forward publicly and be known by name as being in favor of informed consent laws of the kind which I intend to introduce shortly.

I hope very much that the Senators from Arizona will read this letter in the RECORD and that other Senators will particularly read the letters from their own constituents.

TAYLOR, AZ,
*May 23, 1986.*

DEAR SENATOR HUMPHREY: I understand that you are in favor of an informed consent law on the national level. I too support this for very personal reasons which I will explain.

In 1980, I aborted my first child. I was told at Planned Parenthood that this "little blob of tissue" would be as easily removed as a wart. Terminating a pregnancy, I was told, is no more significant than removing a tiny blood clot in my uterus. "Sounds harmless," I reasoned. Exercising my right, I opted for abortion. At that time, no other options, such as adoption or single parenting were explained.

Had I been counselled properly concerning the pain and the development of my unborn child, I doubt that I would have chosen abortion. I was not forewarned of the health risks or the deep psychological after effects of abortion. As a bright college graduate, I had a promising future ahead of me. Following my abortion I became deeply depressed, suicidal and unable to hold a job. I never mourned the loss of my appendix, so why did I grieve over the passing of an enigmatic uterine blob? The answer is that it wasn't a mere "blob of tissue." It was a living baby. I realized it the moment I saw his dismembered body. I realized it too late.

I support this bill wholeheartedly and hope that this letter speaks to the hearts and minds of those who do not fully understand this issue.

Sincerely,

KAREN SULLIVAN ABLES.

Mr. President, here is a woman willing to be known by name in public, who states that she was not told anything about the child she was carrying, the object of the abortion. She realized, to use her own words, only too late when she saw his dismembered body that it was a living baby.

Now, it is not my purpose in introducing this legislation to debate the fundamental issue of abortion, but it is my purpose to point out that thousands and thousands of women are undergoing an abortion on the basis of misinformation, on the basis of propaganda, on the basis of euphemisms. It is shocking, it is disgusting, it is disgraceful, and it is degrading to women and to our society. I do not see how any Senator can oppose the concept—the concept—of requiring by Federal law informed consent. They might differ with the language and they are welcome to offer their suggestions and their amendments, but they surely cannot disagree with the concept. I urge all of my colleagues to support this effort.

Mr. President, I yield the floor.

## RECOGNITION OF SENATOR BENTSEN

The PRESIDING OFFICER. The Senator from Texas.

## A CONSISTENT TRADE POLICY

Mr. BENTSEN. Mr. President, at a time when the public and private sectors in countries like Germany and Japan are working hand in hand to conquer rapidly expanding world markets, we have recently seen dramatic evidence of how trade has become a divisive, partisan issue in the United States.

With the prospect of a $170 billion trade deficit this year, the acknowledged loss of over 2 million jobs to imports, and a currency devaluation of 30 percent that has done little to increase our competitiveness, it should be obvious to Congress, to the President, and to the American people that a comprehensive, consistent policy on trade must become an urgent national priority. The time for rhetoric and partisan politics has long since passed.

I would like to take a few moments of the Senate's time to suggest that the 99th Congress can still make a creative, constructive contribution to American trade policy. I know there are those who say time is so short and the agenda so full that there is simply no opportunity for Congress to act on trade this year.

Mr. President, I disagree, trade is as important and urgent as any issue on our agenda. To duck the tough challenge of trade is to concede the future to our competitors.

Is time running out? You bet it is—but not just for Congress. We'll be here into October, but in just a few weeks the U.S. Trade Representative will be leaving for Punta Del Este, Uruguay, for the opening of a new round of multilateral trade negotiations.

That round of talks could last 10 years: It will set the tone of world trade policies into the 21st century. It will deal with problems of debt in the developing countries, reducing market barriers to trade, and stabilizing the world monetary system.

Despite our enormous trade deficit, America remains the unquestioned leader of the international trading system. We have an obligation to help structure a regime of fairness and opportunity in which all nations—including our own—can enjoy the benefits of trade.

With our standard of living and future prosperity at stake, most people would assume that we have prepared carefully and thoroughly for the new round of trade talks. Unfortunately, that is not the case, we still lack an overall strategy for solving our trade problems. We have not enacted a trade bill and, as a result, we are sending our representative to Punta Del Este without the authority to enter into serious negotiations.

You can be sure that fact will not be lost on our competitors who will be armed to the teeth with strategy, policy, and authority. You can be sure that other industrialized democracies will not be treating the Punta Del Este talks as a photo opportunity.

The administration will argue that it does not need a trade bill to start the new round of talks, because they already have negotiating authority. Mr. President, I would respond to that argument with three points:

First, existing trade negotiating authority is not a mandate for a new round of trade talks.

Second, President Reagan has only 1 year of negotiating authority left; the new round will hardly begin before his authority expires.

Third, the negotiating authority our representative will take to Punta Del Este was written 12 years ago—in 1974, in 1974 the United States had a trade surplus—not a $170 billion deficit. We were the world's largest creditor nation, and we are the world's largest debtor nation. The negotiating authority our people take to Punta Del Este predates the OPEC oil shocks, floating international currency exchange rates, and the rise of the semiconductor and personal computer.

Can anyone, Mr. President, seriously suggest that the administration should use the trade policies of 1974 to negotiate the trade problems of the 1990's? How can we expect to negotiate tough, effective trade agreements when our partners in those talks are well aware that our representatives lack a mandate and the backing of the Congress?

Of course, Presidents may negotiate trade agreements without congressional permission, but that is a risky business at best.

Back in 1968 President Johnson's negotiators came home with an international dumping agreement that required changes in U.S. laws and procedures. The President had no authority to negotiate the agreement, so he had to ask Congress to change the law. The Finance Committee refused his request because the agreement did not accurately reflect U.S. trade policy at the time. So the agreement collapsed.

Ten years later, when President Carter completed the Tokyo round of trade negotiations, the situation was reversed. Bob Strauss had full access to the President and consulted regularly with the Congress. He had full statutory authority to negotiate. As a result Congress approved a whole package of trade agreements and changed the law to conform with those agreements by an overwhelming margin.

For almost a year, Congress has been trying to give the President the authority our representatives need to negotiate effectively in Punta Del Este. Last November all 47 Senate Democrats cosponsored S. 1837, which gave the President authority for the new round. In the same month 34 Republicans and Democrats cosponsored S. 1860, which also granted authority. In May the House of Representatives passed a trade bill with new round au-

thority by a 2 to 1, bipartisan majority.

But it seems that the administration will only accept negotiating authority if it comes in the form of a blank check, I reject that approach. Congress has a constitutional role in making trade policy, and we simply cannot abandon our legitimate concerns in one of the most important, complex issues of our time.

Congress—Republicans and Democrats, Senators and Representatives—is concerned about international monetary negotiations; we are concerned about unfair trade practices like dumping, targeting, and subsidies; we are concerned about the international debt problem and adjustment assistance for workers who become the victims of trade policies.

Those are legitimate concerns for all Americans. They should form an integral part of any comprehensive trade policy for the future. No one, Mr. President, is seeking to impose a set of preconditions on the administration as the price of new negotiating authority. We simply want to consult; we want the administration to listen, appreciate our concerns, and work with us to restore America's ability to compete for world markets.

The last thing we need is a test of wills between Congress and the President on trade policy. That kind of tension and bitterness could doom the Punta Del Este talks to failure before they even begin.

I am convinced Congress must move ahead with trade legislation this year—and I hope the administration will help us hammer out trade policies that make sense for America.

Mr. President, there is a very significant distinction between protectionism and legitimate concern about unfair practices in world trade. It's time to start separating the rhetoric from the reality. It's time we start working together to build widespread support here at home for trade policies that will serve America's enlightened self-interest.

At the conclusion of what has been a very contentious and sometimes partisan week on trade policy, I would like to ask the majority leader—and through him the President—to make trade legislation a priority item for the 99th Congress. We still have the time—if we have the will.

---

□ 1110

## RECOGNITION OF SENATOR BAUCUS

The PRESIDING OFFICER. The Senator from Montana [Mr. BAUCUS] is recognized.

## THE NEED FOR TRADE LEGISLATION

Mr. BAUCUS. Mr. President, I join my colleague, the Senator from Texas [Mr. BENTSEN] in calling for trade legislation in this Congress, this year.

Before I go into detail, let me say that it is an honor for me to work with Senator BENTSEN. He has provided exemplary leadership in this area. He is one of the most forthright, prescient and persistently strong persons in this body in his analysis of the need for strong legislation. I commend him for his work. He has provided leadership not only on our side of the aisle but for the entire Senate and the country.

Mr. BENTSEN. Mr. President, if the Senator will yield, I appreciate his comments.

I know of the long and dedicated hours the Senator has devoted to working on trade legislation. He has made a very important contribution to our effort and the recognition of the problem we have today and how important it is for Congress to fulfill its role of responsibility, and the fact that we want to work with the administration in trying to have an effective trade round.

Mr. BAUCUS. I thank the Senator. That is exactly the point I want to make. We need legislation, in cooperation with the Members of the Senate on the other side of the aisle, in cooperation with other groups in our country, in order to pass a trade bill or a series of trade bills to help America fight our battles overseas.

I think it is appropriate, Mr. President, to review a little history.

From 1981 through much of 1985, the U.S. dollar skyrocketed to new heights. As a result, U.S. imports swamped our domestic markets, and our export markets dried up. We had very large trade deficits. Our American businessmen could not compete, and we were flooded by very inexpensive imports.

Throughout that period, many of us, particularly on our side of the aisle, explained that the U.S. dollar was too highly overvalued. It was killing our export industries, and we had to do something about it.

It will be recalled that President Reagan at that time said that the overvalued dollar is no problem whatsoever, that it is fine, that the United States should value a strong dollar because it makes us big and strong—it gives us a macho sense of being big and mighty.

However, it was not too long ago that Secretary of the Treasury Baker began to send signals that maybe the dollar was too highly valued. He met with various finance ministers around the world—the first meeting was held in the Plaza Hotel in New York City.

As a consequence, other countries have intervened and brought the dollar down to more appropriate levels.

Mr. President, now is the time to pass trade legislation. I do not think the President wants a trade bill. He does not want even a reasonable trade bill. He says that any trade bill is a protectionist bill. I do not know of any trade bill that the President has not labeled protectionist.

I think the time is now to pass trade legislation, since the President was sustained on the textile bill in the House yesterday. Since the President has been sustained, the need now is even greater for some kind of trade bill to begin to address our trade problems.

□ 1120

Various countries, Japan, for example, still dramatically deny access to American goods. Japan is a closed market. We ought to do something about that.

I think many countries peg their currencies to the U.S. dollar and take advantage of the United States. There are many ways foreign countries take advantage of the United States. Some have export subsidies. We do not have export subsidies. The list is endless.

I am not saying we should pass protectionist legislation. The United States cannot retreat into a shell. The United States has to live in the world but the United States has to take care of itself, has to stand tall and has to make sure that other countries do not take advantage of us.

We on our side of the aisle call upon the Members of the Senate on the other side of the aisle to call upon the President to work, cooperate, find a compromise, find some agreement, but at least let us pass some trade legislation that is going to help Americans, help Americans work, help Americans keep their work, help American workers find new jobs to help America.

Mr. President, I must say, on the other hand, the President has been worshipping at the altar of laissez faire, worshipping at the altar of free trade, and not recognizing in so doing there are other values that we also have to take account of, and those other values include taking care of America, making sure other countries do not take advantage of us.

Other countries do not worship at the altar of laissez faire. Other countries do not worship at the altar of free trade. Other countries rather proportionately worship at the altar of protecting themselves and passing legislation in their countries to help their workers, help their people at our expense.

I am only saying let us be pragmatic, let us not be blind to certain ideologies, let us rather be pragmatic, responsible, reasonable and work together and pass legislation.

There is still time for a trade bill, Mr. President, and I hope that President Reagan heeds our joint bipartisan call and does work with Congress.

Mr. President, I yield the floor.

## RECOGNITION OF SENATOR DURENBERGER

The PRESIDING OFFICER. (Mr. SYMMS). Under the previous order, the Senator from Minnesota is recognized.

## HOUSE-SENATE CONFERENCE ON H.R. 3838

Mr. DURENBERGER. Mr. President, I am not a member of the House-Senate conference on the tax reform bill H.R. 3838.

However, as one who worked for many months with my colleagues on the Senate Finance Committee to fashion a reform proposal, which was approved 20 to nothing by the members of the Finance Committee and 97 to 3 by our colleagues in the Senate, I want to express my strong concern over the approach that the House Democratic conferees are taking in regard to this bill. I have recently reviewed the so-called House offer to the Senate conferees and I am convinced that the Nation's economy would be far better off if we had no tax bill rather than the proposal submitted by the House of Representatives.

As we know all too well, the Nation's economy is in fragile condition. The gross national product grew a bare 1.1 percent in the last quarter and there are signs of a significant slowdown in the overall economy. Most discouraging, industrial production has declined in 5 of the first 6 months of the year and shows absolutely no sign of picking up. If tax reform is to have any meaning, it must ensure that the Nation's economy begins to grow at a more steady and measured pace. Yet the offer presented to the Senate conferees would threaten to choke the economy into a downward slide.

Yesterday, we were nearly forced to a vote on the President's veto of the Textile and Apparel Trade Enforcement Act. Proponents of that legislation believed that the Nation's horrendous trade deficit would be eased if Congress adopted this protectionist measure. I do not agree and am pleased that the House did not override the President's veto. I would suggest to my colleagues that the most effective way to help solve the trade deficit is to avoid imposing draconian new taxes on American business operations abroad.

Yet that is exactly what the House conferees have recommended to the Senate by proposing more than $12 billion in additional taxes on American companies doing business abroad.

How ironic that the members of the same House committee which drafted the most protectionist legislation since Smoot-Hawley, H.R. 4800, would hamstring American businesses trying to compete abroad through the Tax Code.

What about all of those calls for American business to replace obsolete plant and equipment and streamline operations to face down the industrial challenge of the Pacific basin and Western Europe? The House Democratic conferees' answer to this question is to scale back depreciation deductions by $18 billion. And on top of that, the House proposes cutting back on the special tax credit we adopted in 1981 to spur research and development. In the face of the continuing decline of manufacturing in America, it seems that this proposal just adds insult to injury.

The natural resource sector of our economy—mining, timber, oil and gas—which has been in a depression throughout the 1980's just cannot afford the additional billions in taxes that the House proposal would mandate. Iron ore miners and timber growers in my State of Minnesota, and oil field workers in States like Texas, Louisiana, and Oklahoma will surely never see their jobs again if the House proposals are adopted.

The Senate made a major step in the direction of putting responsible public policy into the Tax Code and they put it especially into the Federal/State relationship when we adopted the tax-exempt bond provisions of the tax reform bill. These provisions allow State and local governments a great deal of flexibility in meeting their important public responsibilities as partners with the Federal Government.

Yet, the most recent offer from the House Democratic conferees sends a devastating message to every State and local government in this country—the Federal Government will mandate hundreds of standards that you must comply with. But the House of Representatives will make it nearly impossible for you to finance those obligations.

I must also note that the House Democratic conferees would take away many of the most important features of the Senate bill that benefit our hard pressed farmers. The House would not allow these self-employed individuals to deduct a single cent of the cost of their health insurance. And the House would not allow farmers to renegotiate their uneconomic loans with their banks without incurring a tax penalty.

This is not an exhaustive list of my strong objections to the tax philosophy embodied in the House offer. We do not have time for that this morning. It merely identifies the stronger of the strongest objections. The list of bad public policy proposals in the House Democratic offer goes on for 16 pages.

Mr. President, I urge my colleagues on the conference committee to hold firm on the provisions of the Senate's tax reform bill. Our economy cannot afford a bill which arbitrarily damages the ability of American business to compete effectively in the world economy. That is exactly what the House Democratic offer would do.

And I would call on our colleagues in the House who are not tax conferees and on the White House to pull out the promises they made to America when they switched to support the House bill last December. In his December 16, 1985 letter to Representative JACK KEMP, President Reagan reiterated that one of his "minimum requirements for a tax reform bill" was that the bill provide "basic tax incentives for American industries, including those which depend upon heavy capital investment in equipment and machinery."

The Senate fulfilled all of the President's promises for tax reform and now the House Democratic conferees propose that the Senate accept the antigrowth measures included in the House bill.

It is time for President Reagan to keep his commitment to lend his full support to the progrowth Senate tax reform bill.

When tax reform advocate JACK KEMP voted to adopt the House bill, he did so in order to "keep the process alive of reforming our Tax Code." But he and others promised "to lead a fight against a bill" that undermines the Nation's economy. Now is the time for those Members of the House who made the Senate tax reform bill possible to send a clear and direct message to the House tax conferees: Do not tamper further with the financing provisions of the Senate bill, a bill which brings dramatic fairness to the individual and corporate Tax Code and encourages the expansion and growth of jobs and industry in America which make the income-based Federal revenue possible.

Mr. President, I yield the floor.

## RECOGNITION OF SENATOR DECONCINI

The PRESIDING OFFICER. Under the previous order, the Senator from Arizona [Mr. DECONCINI] is recognized for not to exceed 5 minutes.

Mr. DECONCINI. I thank the Chair.

## FAIR ELECTIONS IN MEXICO

Mr. DECONCINI. Mr. President, last night in the late hours, thanks to the indulgence of the ranking minority member and chairman of the Armed Services Committee, I submitted a concurrent resolution (S. Con. Res. 158) and I want to speak to it for just 5 minutes this morning.

Mr. President, I would like to read a few statements made by the Catholic Church discussing a specific political situation in an unnamed country:

The churches will remain closed today as a sign of protest, as a loud cry on our part for those whose eyes remain blindfolded or who have been blinded by their own guilt.

We energetically denounce the shameful acts that took place on election day . . . we denounce the lies, fraud, the deliberate delaying of voting, the predominance of public force, the supplanting of individual, the blackmail, the threats and all arbitrary acts that took place on that day.

Where is the Catholic Church making these statements? A student of history might guess El Salvador. Recent world events might point toward the Philippines. Current newspaper accounts might implicate a Central American country struggling for democracy. Future newspapers could carry this scenario for South Africa or perhaps Chile. Where is this, you might ask? This is in the border state of Chihuahua, located in the north of Mexico. Independent civic groups and hundreds of volunteers have documented fraud in what they claim to be more than one-third of the polling places in Juarez. The Catholic Church, from which I just quoted, has been increasingly critical of the Mexican Government. They have bluntly told Catholics they have a moral duty to demand clean government. They have candidly told the Government that the cheating in Chihuahua constitutes a "social sin." They have threatened to close the churches in protest.

Mr. President, I have previously attempted to address this problem. On June 26, I introduced a resolution asking President de la Madrid to appoint a nonpartisan commission comprised of Mexicans of all political parties to monitor the elections in Mexico. On July 6, the elections in Chihuahua were marred by fraud in the most bitterly fought state election in recent Mexican history. The Mexican press reported my resolution to be meddling with the internal affairs of Mexico by sending Members of Congress to monitor the elections. This is simply inaccurate.

□ 1130

I rise today to articulate three important goals. First of all, to establish more effective and constructive diplomatic channels with the Mexican Government. I have written to my good friend, Senator Riva Palacio in the Mexican Senate, to explain and clarify my first resolution introduced with the distinguished Senator from California, Mr. WILSON. I believe he mistakenly thought it included international observers from outside the country. Sharing a 2,000-mile border, miles along Arizona, requires honest and constructive diplomacy. We need to continually discuss, debate, compromise, cooperate, and collaborate in formulating policy between our two countries. We will occasionally disagree, but we must work together. Our two countries are increasingly effected by social, political, and economic factors.

Second, by resorting to fraudulent activities witnessed by thousands of voters and hundreds of reporters, the Mexican Government risks heightened dissent at home. Furthermore, they risk criticism from abroad. And, they risk eroding support from the U.S. Congress. Erosion of domestic support and international confidence complicates Mexico's efforts to solve its worsening economic problems. This hurts Mexico's ability to obtain relief from foreign debt. This erodes their efforts to bolster trade. I am hopeful that fair and free elections will demonstrate their courage and conviction in the Mexican system. This can only assist our neighbors in solving their domestic and international economic problems. Cheating only undermines international confidence precisely when it is most needed.

Third, this is not an endorsement of one party over another, as some reporters in the Mexican press might claim. This is an attempt to support fair and honest elections and condemn fraud. Regardless of who wins, the Mexican people will benefit by ensuring that their political will is reflected by elected leaders.

As a matter of foreign policy, the stability of Mexico ranks second only to the Soviet strategic balance in significance to Americans in the next decade. American foreign policy must remain true, consistent, and fair. When we discuss fair elections, we must encourage all our friends to be accountable. That is why this resolution is both constructive and timely. President de la Madrid will meet in mid-August with President Reagan. As Mexico discusses its international trade and foreign debt problems, we must ensure that fair elections are discussed in an open and frank manner. Congress can send a very important message to both Presidents. This resolution recognizes the great nation of Mexico as a longstanding friend and ally of the American people and the United States. But it would be a mistake to ignore their recent electoral fraud and corruption with silent diplomacy. This resolution supports democratic principles and fair elections in Mexico for all of its citizens.

Mr. President, cosponsors of this concurrent resolution are the Senator from California, Mr. WILSON: the Senator from New Mexico, Mr. DOMENICI; the Senator from Florida, Mrs. HAWKINS: and the Senator from Texas, Mr. GRAMM.

Mr. President, I yield back the balance of my time or, if anybody wants it, I will be glad to yield it during morning business.

Mr. SASSER addressed the Chair.

The PRESIDING OFFICER (Mr. DURENBERGER). The time of 11:30 having passed, under the previous order, there would now be a period for the transaction of routine morning business. However, the Senator from Tennessee, also under that order, has the right to a special order. If the Senator would request unanimous consent that the period for morning business be suspended for the purposes of his special order, the Chair would entertain that request.

Mr. SASSER. Mr. President, I ask unanimous consent that the period for the transaction of morning business be suspended.

The PRESIDING OFFICER. Without objection, it is or ordered.

## RECOGNITION OF SENATOR SASSER

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

## CRACK

Mr. SASSER. Mr. President, on Tuesday I joined with other members of the Democratic Working Group on Drugs in offering legislation to intensify our efforts to combat the deadly drug known as crack.

It is past time that we focus our efforts on this very serious problem. In just a short period, the use of crack has reached epidemic proportions. It threatens to scar an entire generation of our young people.

Statistics show that one of every six of teenagers will have experimented with cocaine before they graduate from high school. That is a truly frightening statistic. And the picture is getting worse. Surveys show that 61 percent of all high school seniors have tried an illegal drug at least once. The simple fact is that students are used to the presence of drugs in their life experience.

For students—as for adults—crack is a particularly dangerous drug. It is highly addictive. Some say that one use of crack and you are hooked. Crack is also cheap. A vial of crack costs as little as $10.

I see the distinguished Senator from New York (Mr. D'AMATO) on the floor. I was interested in seeing him purchase a vial of crack in one of the newspapers not too long ago in an effort to illustrate the pervasiveness of this problem.

So that puts it well within reach, at $10, of most high school students.

The legislation we introduced (S. 2715) addressed both enforcement and education—and both are vital if we are going to make any headway in the battle against crack.

First of all, we add crack to the list of schedule I drugs. This is where it

belongs. Crack is as dangerous as any drug on the street—and more addictive than almost any of them.

Second, we create a separate crime for employing minors in drug operations. Drug dealers often employ minors as runners on the street or as a safety measure to avoid arrest. They know that minors are usually not charged or if they are, they are placed on probation.

I believe we have to come down on dealers and come down on them hard for the use of minors in their drug operations. It brings youngsters into the seamy underworld of crime and exposes them to drugs—usually resulting in their own addiction.

Third, we make it a separate crime to manufacture illegal drugs near a school. Crack is so easy to manufacture that drug dealers can set up shop near a school and entice students to purchase drugs.

Incredible as it may seem, while it is a crime to sell drugs to minors, it is not a separate crime to employ minors in drug dealing. By the same token, while it is a crime to sell drugs near a school, it is not a separate crime to manufacture them near a school. By creating these new offenses we are offering law enforcement a new tool to prosecute these vicious drug dealers who would destroy our youth for profit.

That is a start, Mr. President, but it is only a start. The second part of our bill addresses the issue of drug education. We will never win the war on drugs until we convince our young people to avoid drugs. Drugs are not recreational, it is not smart to use them. They are lethal and they kill you.

First, we direct that October 5, the first day of "Drug Abuse Awareness Week," be designated as "National Drug Abuse Education Day." This will allow us to focus national attention on the need to educate our young people to the dangers of drugs.

Second, we direct the Secretary of Education to immediately provide States with available information on drug education strategies and on the nature and extent of crack.

Third, we direct the Director of the National Institute of Drug Abuse to produce and run public service announcements on the dangers of crack. Again, this is something we can do right now.

While long-term drug education efforts are needed, we also need to do something now—in this school year. This is an emergency program to respond to an emergency situation.

Fourth, we establish a grants program within the Department of Education to enable States to develop drug education programs, to train counselors and teachers in drug education, and to pool knowledge of the most promising programs.

These steps are just a beginning. I know my colleagues who serve with me on the Democratic Drug Working Group are committed to further action to combat this growing national problem. And our legislation marks a good start in our war on drugs. I urge my colleagues to join with us in this important endeavor.

□ 1140

## ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the time of transaction of routine morning business.

Is there morning business?

## DONALD REGAN RECEIVES IRON MIKE AWARD

Mr. THURMOND. Mr. President, I recently had the pleasure of attending a dinner at which White House Chief of Staff Donald T. Regan was presented with the coveted Iron Mike Award of the Marine Corps League. I know my colleagues join me in congratulating Mr. Regan on receiving this prestigious award. He has served with distinction in the Marine Corps, participating in five major battle campaigns, and retiring as a lieutenant colonel.

During his 5½ years of active duty, Mr. Regan was awarded five battle stars, a commendation ribbon, and a theatre ribbon. Following his active duty, he was in the Marine Reserves for 2 years. Donald Regan has continued his fine record of service to his country as the 66th Secretary of the Treasury and as the White House Chief of Staff.

I ask unanimous consent that the fine speech which Mr. Regan made before the Marine Corps League upon his acceptance of this award be included in the RECORD at the conclusion of my remarks.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

MARINE CORPS LEAGUE DINNER

(By Donald T. Regan)

We Marines have a saying: There is no such thing as an ex-Marine. And standing here, this evening—with people like yourselves and the members of this great Marine Corps League—I can assure you: The heart knows how true that saying is, as true as it was 40 years ago when a young recruit proudly wore his first globe and anchor.

It's a deeply humbling moment for me: to accept this award—a most coveted one. To stand here tonight is also to realize that in a world of confused allegiances and divided loyalties, some things never change, that some traditions like those embodied by the Marine Corps League live on; and that there are those who remain upright, who remain always faithful.

But if I feel as one with you tonight, I must act as one as well. So I must live up to the Marine code and tell the blunt truth. Ladies and gentlemen, I confess I am sorely tempted this evening—like any good Marine on such an occasion—to reminisce, to tell some stories.

Now I realize that to do so in such distinguished company runs a considerable risk, particularly as I look out and see some of the most prominent members of the defense establishment, not to mention so many medals, ribbons, and stars. Of course, I learned as a young Marine how to defer to rank. Well, not always. I remember a story that a great American, the late Admiral Rickover liked to tell about being an Admiral. You know, I don't know why the Navy is always coming up at Marine events, it's just one of the oddest things. But anyway Admiral Rickover liked to note that the day before he received his promotion to Vice Admiral, a horse named Rickover also won the 5th race at Belmont Park. And Admiral Rickover commented: no other Admiral in history has had a whole horse named for him. But as I say Marines are a little different. I remember seeing another naval officer break in a Marine who was doing his first duty on board a ship. And the officer of the deck asked what he would do if a man fell overboard. "'I would yell, Man overboard!'" the Marine said. The officer then asked what he would do if an officer fell overboard. The Marine was silent for a moment and then asked, "'Which one, sir?'"

So, with all the military experience out here tonight, I'll be careful of my chutzpah; I won't make the same kind of mistake. So I don't think I should tell any stories tonight: well, maybe one.

1943. New Georgia. It is hot. Captain Regan, sitting in his tent in a pair of field shoes and shorts, hears a huge commotion outside. His Sergeant Major ducks in and says, "Captain, you better come quick and bring your sidearm."

Outside a large group of troops have gathered; the commotion is about an iguana who has been driven high up a coconut tree. Some of the Marines are shouting, others are throwing rocks; some of the Marines are from Brooklyn and think they have treed a man-eating crocodile. There is a hue and cry to shoot the reptile.

At this point, it is important to explain that sometimes when troops were being moved or replaced in combat zones an order would go out restricting ammunition clips to only a few authorized individuals. This was to avoid the kind of jumpiness and accidental firings that occur in the jungle, especially in darkness. As good Marines, we took it as a matter of faith that this was the sort of thing that only Army troops did, but we also had to obey the orders.

So in a Marine company only one person was authorized to shoot. And, as you have guessed by now, only Captain Regan could use his weapon. Now, ladies and gentlemen, every officer has one such moment in his career—a moment of truth, a moment when it is all there, right on the line. See Captain Regan surrounded by his Sergeant Major, his first sergeants and his troops. See Captain Regan take out his 45 and begin to pray. See Captain Regan aim his 45 and begin to sweat. See Captain Regan fire and get lucky. Watch the iguana fall. Watch Captain Regan return to his tent and only then begin to breathe again.

Permit me to turn now from reminiscing to a subject of vital importance: the defense budget. As you know, in his first term the President expanded defense spending greatly. He did so in light of a pressing and obvious need to rebuild our Nation's defenses—and he did so with broad political support.

In this second term, some assert that political support has weakened. Certainly on Capital Hill there is no shortage of plans to cut Federal spending by gutting defense. So the question arises: Will the President be able to maintain defense spending at the needed levels? Pundits in this town say "no." I say "yes"—and here's why.

The President has demonstrated a remarkable, even historic, ability not only to win on specific issues but to reshape the thinking that underlies the issues, to provide new first principles, to replace the prevailing fundamental assumptions with his own. Consider the record. When the President took office, the idea of any major tax reform was considered outlandish, maverick. Today we have already seen the President's 1981 tax cut take effect, and we're moving toward what promises to be the most sweeping and thorough tax reform in some four decades. Indeed, a recent headline in the Washington Post told the story: "The Impossible Became Inevitable."

Or look at aid to anti-communist insurgencies. When the President took office, official opinion in Washington still centered on notions of containment, of attempting to slow the Soviet advance. The idea that we should assist those endeavoring to reverse that advance was scandalous, an affront to established and comfortable patterns of thought. Today the United States is providing aid to freedom fighters in Afghanistan, Africa, Cambodia—and, yes, Nicaragua. El Salvador is safely in the freedom family. And Grenada has been saved.

This reshaping of the established order is precisely the kind of change I believe we're witnessing with regard to defense spending. The President is maintaining the defense budget with guts and persistence. And by giving the people the facts—facts like these.

In 1962, defense spending represented some 46 percent of the Federal Budget, while 29 percent was devoted to social spending. By 1982, those proportions had almost exactly reversed: Defense had fallen to 29 percent of the budget, while social spending had risen to half.

The President knows that the reason for the Federal deficit is social spending that has increased enormously, not defense. And as he says it again and again and again, using the bully pulpit of the Presidency to bring the point home, he's effecting a deep and lasting change in the thinking of the electorate and hence in the character of American politics. Strong defenses and the spending to maintain them, including foreign aid, are coming to be seen not as a temporary aim but as a given, a permanent aspect of the role our Nation must play upon the world stage.

Of course maintaining strong defense involves sacrifice, never politically popular. But the President is able to draw upon the spirit of sacrifice because he offers the people hope—not containment, but the advance of human freedom; not an unending balance of nuclear terror, but the Strategic Defense Initiative and possibility of making nuclear missiles obsolete.

The importance of S.D.I. to our Nation's defenses is obvious; even if only partially successful, it could vastly increase the cost to the Soviets of attempting nuclear aggression. What is perhaps overlooked is S.D.I.'s political importance. S.D.I. represents a forward strategy based upon specific objectives. It marks the difference between thinking defensively and thinking creatively and actively, between accepting the status quo and working for a dramatic change in the interests of peace. If you'll permit me a football metaphor, S.D.I. adds up to the difference between never getting past the fifty-yard line and going for a touchdown. The American people understand all this instinctively. And S.D.I. thus helps the President to enlist their support for his defense strategy as a whole.

In his effort to maintain our defenses, then, the President has the arguments on his side. In S.D.I., he has a winning strategy. And as the polls indicate, he has the American people with him as few Presidents in history. His opponents have on their side only the failed policies of the past.

But this brings me back to this evening, to this award. You see, I learned loyalty in the Marine Corps, so I'm puzzled when I see the press refer to me as a Reagan "loyalist," almost as though it were a criticism. In the Marines, we all knew we were part of a great cause. We knew our officers, we knew our men—and we were loyal to both, up and down. In the West Wing, I feel much the same way. Of course the obvious drama of landing on an island under heavy fire is missing—except maybe when I go up to Capitol Hill. But the sense of urgency is there. The sense of an enormous conflict is there—if at no other time, then certainly every morning at the national security briefing, when we learn what America's adversaries have done or are planning. And the sense of service, the sense of greatness, even if I may say so, the sense of camaraderie—well, that's there every time you walk down the hall and go into the Oval Office.

Loyalty, service—these days my mind goes back to the Corps a great deal. I've told you the great adventure story of Captain Regan and the iguana.

Well, there are other memories, not so humorous. Many of those here today have such recollections. Fate throws us together with others we hardly know; what we have in common is only this: we are all Marines. We live together, fight together, sometimes die together. We see almost daily acts of heroism that are soon forgotten, that history will never record—I can still see in my mind's eye just after a bombing attack on the island of New Georgia a Marine sergeant, without a moment's hesitation, run into the wild flames and flying shrapnel of a burning ammunition dump to pick up a wounded Marine and just barely make it back to safety. We see all this, we become as close as mortal human beings can become and vow never to forget. And then, when it is over and peace has come, we go home, back to a different more settled way of life. We may never see each other again; but we never forget—each other or the Corps.

Nor—and this is the blessing of living in this Nation—does America forget. It is why we are here tonight—to commemorate an institution whose spirit in 210 years of service to country has never flagged: the United States Marine Corps, born on November 10, 1775 in Tun Tavern—some Marines like to say it was a fitting place for the Marine legend to begin.

The military historians have looked for the reasons to explain such legends, to understand why some troops fight well and others do not. British historian John Keegan has said it is simply the will to win—a pride in unit, a sense of comradeship; a simple refusal to let the other guy down. It is what the Marine Corps is all about, that is the pride it instills; it is the real meaning of "Semper Fi." In his memoir of the Pacific War, William Manchester explained why he left his hospital bed to return to his troops, his fellow Marines. "It was an act of love," he wrote. "Those men on the line were my family, my home. They were closer to me than I can say, closer than any friends had been or ever would be. They had never let me down, and I couldn't do it to them, I had to be with them rather than let them die and me live with the knowledge that I might have saved them."

"A man will not sell you his life at any price," Manchester also wrote about the Marines he knew, "but he will give it to you for a piece of colored ribbon." He meant that to be a Marine is to live for something far beyond the bottom line or narrow self-interest.

"They are better," Ernie Pyle wrote after covering the Marines for the first time in World War II. "They are better because they think they're better."

It is so today. Our enlisted Marines today are smarter, better-educated, better-trained, and just as tough as the Marines of any era. And let me say the Corps itself has never been stronger, better-equipped, or better-led than by its current officer corps and a smart, likeable and tough Commandant, P.X. Kelley.

We are fortunate it is so. Look around the world today and see where blood is being shed—Angola, Afghanistan, Nicaragua—listen to those who say our defense budget must be slashed—and who cannot feel grateful that we have to defend our Nation a striking force that is vigilant and ready, infused with the spirit of self-sacrifice and devotion to country.

Ladies and gentlemen, not only from the halls of Montezuma and shores of Tripoli but in France in World War I, in Guadalcanal, Tarawa, Iwo Jima, Okinawa, in Chosin, Korea, in Vietnam, and in Lebanon and other places too numerous to mention, Marines have been in action; and the memory of those Marines sustains and inspires. They haven't changed; if anything, in all the ways that I have mentioned, they are better. Let us be proud of them; let us give them all our support. Let us ever be grateful there are those who fight for right and freedom, who call themselves a band of brothers, who claim the title of United States Marine.

## SHOE AND TEXTILE WORKERS

Mr. SASSER. Mr. President, I deeply regret that we will not be able to provide assistance to our Nation's shoe and apparel workers. The administration's heavyhanded pressure tactics have worked—for now. Once again they have shown their insensitivity to the needs of our shoe and textile workers.

Yesterday was indeed a grim day for these hard-working Americans. For years, textile and apparel workers have seen their jobs disappear in the flood of imports while their Government stood by and refused to offer any assistance. While other countries erected trade barriers to protect a vast range of industries, U.S. workers were told that helping them would cause a trade war. In fact, the United States was not even enforcing the textile agreements we did have.

Finally, we in Congress said "Enough." Last year we passed the Textile and Apparel Trade Enforce-

ment Act. That bill promised some sanity in our textile and apparel import policy. It also promised our domestic industry that they would have a period of stability to modernize their facilities and compete with imports.

In what I think was a very ill-advised action, the President vetoed that bill. At the time, he said that in the series of bilateral textile agreements to be negotiated this year he would hold the level of import growth to the level of growth in the domestic industry. Well, Mr. President, I haven't seen much evidence of that in the agreements announced so far this year.

The recently announced treaties with Taiwan, Hong Kong, and with South Africa show that this administration has no intention of holding the line on import growth. What it does show is that they will continue their blind devotion to a concept of free trade that simply doesn't exist in the real world.

Textile and apparel imports rose 10.9 percent between May of this year and May of last year. In 1986 to date, they are up a staggering 23 percent. Between January and May of this year, our textile and apparel trade deficit was almost $8 billion. If that trend continues—and all the evidence is that it will—our textile and apparel deficit for this year will be $18,830 million.

But these figures are more than mere statistics. They represent real people and real jobs. Last year 4,000 Tennessee textile and apparel workers lost their jobs due to imports. The closing of a textile or apparel factory can be devastating to a local community. Many such facilities are located in rural areas. They are often the major employer in the area—areas which have few alternative employment opportunities.

As I travel around Tennessee, I continually see the effects of shoe imports on our citizens. I talk to individuals who have lost their jobs in the communities where they have lived and worked for years. They face the future with no prospects of new jobs.

Many textile and apparel workers are prevented by family obligations and ties from moving to a new area. Many are women—often single parents and the sole support of their children.

I am deeply distressed that the administration has chosen a head-in-the-sand approach to an issue that is literally shaping people's lives.

Sooner or later, Mr. President, we are going to have a trade debate in this body. And I want to put the administration on notice that when we do, those of us who represent shoe and textile workers will be supporting changes in our trade laws to assist these workers.

## DISINFORMATION WITH REGARD TO CHILE

Mr. HELMS. Mr. President, I am deeply concerned about the massive campaign of disinformation which is being coordinated against the people of Chile who yearn for an orderly transition to democracy. A coalition of the media, the Marxists, and the State Department is seeking to destablize the transition to a full fledged democracy in Chile.

I identify it as a campaign of disinformation because I have been to Chile, and I have seen with my own eyes what is going on. There is a concerted effort to frustrate and discredit the efforts of the Chilean people. The Chilean people want a fully functioning, representative democracy; but they also want a democracy that is not going to slide back into a totalitarian regime, such as they experienced under Allende.

What disturbs me about the disinformation campaign is that the State Department, the CIA, and the media so often, for whatever reasons, side with the Marxists and the totalitarians.

When I publicly criticized Ambassador Harry Barnes for planting the American flag in the midst of a Communist rally, I did so because the decent people of Chile were shocked, and because those Americans who work in Chile and who understand the political alternatives in Chile were outraged by his actions.

Mr. President, Ambassador Barnes admitted to me that he did not see any of the leaders of the democratic opposition present at the demonstration which accompanied the funeral of Rodrigo Rojas. What the Santiago newspaper pictures showed were hundreds of red flags, Communist banners featuring the hammer and sickle, and the slogans of the revolutionary left. This was not a demonstration by Chilean citizens seeking early elections; it was a bid for a Communist takeover by the totalitarian left.

Ambassador Barnes' attendance at the Communist demonstration was exactly as repugnant as if he were Ambassador to Germany and had attended an illegal neofascist brownshirt rally complete with swastikas. Like Germany, Chile knows what happens when totalitarian ideologies take over the democratic process. Just as in Germany today fascist parties, fascist emblems, and fascist slogans have been declared unconstitutional by the constitutional courts, so too in Chile the emblems and parties of Communist totalitarianism embraced by Ambassador Barnes have been declared unconstitutional by the constitutional courts of Chile.

It is clear that Ambassador Barnes' actions not only subversive of the constitutional process in Chile, but made common cause with the enemies of the United States.

The policy of President Reagan is to promote the democratic transition on an orderly schedule. The policy of Ambassador Barnes is to disrupt the orderly transition, to promote the totalitarian left that Chile once threw off just in the nick of time, and to defame the government that rescued Chile from the clutches of international socialism.

Mr. President, Ambassador Barnes and Secretary of State Elliot Abrams have tried to spread the myth that human rights is a major problem in Chile. I have no doubt that human rights problems do occur in Chile. A country that is beseiged by terrorist revolutionaries seeking to destroy freedom has a different problem in balancing the rights of the majority to be free from terrorism and the individual rights of insurrectionists trying to overthrow law and order. Israel, for example, has had to adopt a policy of tough justice to protect its citizens against the attacks of the PLO, and sometimes it has missed the mark. But nobody doubts the good will of Israel toward human rights over the long haul.

So too with Chile. The State Department Human Rights Report itself says that there have been no major cases of human rights violations, such as cases of "disappeared persons," in recent years. And recently a left-wing political science institute in Chile named FLACSO took a scientific survey of public opinion. It was so stunned by the outcome that it tried to suppress the results, but word leaked out and it was forced to publish its findings. The poll showed that more than 60 percent of the Chilean people believe the major problem facing Chile is the economic situation, not surprising in view of the world economic recession. Only 2 percent thought that human rights was a major problem in Chile. But not a word about this poll has appeared in the major media of the United States.

Ambassador Barnes and Secretary Abrams are trying to cater to that 2 percent with their support of the violent Communist left—at the expense of the democratic opposition and the parties that support President Pinochet. There is a democratic left in Chile, but Ambassador Barnes and Secretary Abrams are leaving them high and dry.

There is no doubt that politicians of all stripes would like to have their chance to try to rule the country, and it appears to serve their self-interest to have an early election. But President Pinochet is following the schedule set up in the democratic constitution adopted by 67 percent of the people in 1980. He has not deviated from that schedule; and, in my judgment, it would be a grave mistake to

attempt to try to force him to depart from that schedule.

What is really happening is that Chile has already begun to recover from the world recession, with a growth rate of 4 percent for 1985, and continuing at 4 percent for this year. The agricultural sector has made a strong recovery for the export market, particularly since the seasons are reversed in the Southern Hemisphere, and Chile is able to market seasonal produce in North America when our fields are dormant. Indeed, Chile has the highest growth rate in Latin America.

Mr. President, the resurgent economy is just beginning to have its impact upon the people. Such an impact is precisely what the Communists and Socialists fear most. If the growth rate continues, the economic disaffections of the Chilean people will have vanished by the time of the elections scheduled for 1989, and it is expected that there will be strong support for the political parties advocating social justice through the market economy.

Thus it is to the obvious advantage of the Communists and Socialists to force elections at an earlier date under the intimidating threats of terrorism and social unrest; it is to the advantage of the parties of freedom to keep to the established constitutional schedule. The desire of Ambassador Barnes and Secretary Abrams to attack the economic base of Chile is aimed directly at the partisans of freedom and against the interest of the United States.

Thus Ambassador Barnes has targeted Chile as an object of hostile penetration. Along with Secretary Abrams he has publicly assisted Mrs. Veronica de Negri as an aggrieved mother psychologically wounded by a supposedly brutal regime.

While we can all sympathize for a mother's grief, the intelligence capabilities of the State Department and the CIA evidently were too incompetent to understand another aspect of Mrs. de Negri's life. The view of the media and the Marxists must be tempered by the view of many Chileans who remember her years in Chile as a militant member of the Communist Party of Chile, skilled in psychological warfare.

Mr. President, the image of Rojas and Quintana as merely idealistic young reformers must be tempered by the findings of the special prosecutor that the pair were in fact part of a group of terrorists carrying gasoline, molotov cocktails, and rubber tires for erecting burning barricades, and that Quintana had been arrested for similar activities last April.

The image of brutal soldiers deliberately dousing the helpless pair with gasoline, must be balanced by the special prosecutor's finding that Quintana attempted to kick a molotov cocktail at the group of young soldiers arresting her, only to have it explode against her foot, and of the burned pair refusing to go to the hospital, and inexperienced soldiers making a fatal misjudgment by allowing them to go free. There will be those who prefer the Communist version of the story, but it is remarkable that neither the media nor the State Department have made the other version, based upon sworn testimony and findings by a distinguished judge.

This picture of Chile is admittedly different from the picture presented by the media, the Marxists, and the State Department. But it deserves to be examined disinterestedly by those seeking both truth and the transition of Chile to a stable democracy.

Mr. President, at this point let me outline parts II and III of this statement for those who may be interested in the details which I shall set forth.

There have been at least four themes of disinformation on the Rojas case spread by those seeking the transition of Chile to Marxism.

The first theme of disinformation is that the Chilean Government is somehow stalling on the road to democracy. This is a favorite theme of the State Department.

The second theme of disinformation is that the so-called democratic forces of the left are the best protection for Chile against communism. But the fact is that the same democratic forces of the left that took Chile down the road to totalitarian communism are the very same forces contending for power today.

The third theme of disinformation is that the military forces deliberately sought to torture and kill Rojas and his companion, and subsequently attempted to prevent them from receiving competent medical treatment. This is a theme repeated over and over again by Mr. Ariel Dorfman, a self-appointed spokesman for Chile, most famous for his book, "How to Read Donald Duck," a Marxist interpretation that condemned Walt Disney as an agent of cultural imperialism.

The fourth theme is that Rodrigo Rojas was an idealistic young man, struck down in the flower of his youth. But the fact is that his family, and the family of his companion, are both well known as Communist activists, whose clear motivation has been, and continues to be, to impose communism upon a hapless Chile.

In the last section of this statement, I will discuss the historical role of the Communist Party in Chile, the role of the Communist Party in the general strike of July 2 and 3, the factual incidents relating to the burning of Rojas and Quintana. In addition, at the appropriate time, I will put in the record a number of official documents relating to the Rojas case for the historical record.

PART II

THE ROJAS CASE

Mr. President, I am deeply concerned that the circumstances surrounding the tragic death of Rodrigo Andres Rojas Denegri and the investigation of his death and the burning of his companion, Carmen Gloria Quintana Arancibia, have been grossly distorted by the major media in this country.

I am also concerned that the process of transition to representative government as called for under the 1980 Chilean Constitution has been equally distorted by the media in this country.

Mr. President, as I said to the press in Chile and here in this Chamber, I am neither pro-Pinochet nor anti-Pinochet. What I am for is freedom in Chile. What I am against is communism whether it is in Chile, Cuba, Nicaragua, Surinam, or wherever it seeks to enslave nations and destroy civilization.

CHILEAN CONSTITUTIONAL TRADITION

Mr. President, Chile has been recognized as having one of the most democratic traditions in this hemisphere. It has lived under just three Constitutions since 1833, a remarkable feat within the context of Latin American history. Chile has had the Constitution of 1833, the Constitution of 1925, and the Constitution of 1980.

It is a fact that the Constitution of 1980 was approved in a plebiscite by 67 percent of the Chilean people. It is a fact that the Constitution of 1980 is composed of articles of a permanent character and articles of a transitory character. It is a fact that the transitory articles spell out the timetable and process for the restoration of representative government in Chile. It is a fact that the Constitution of 1980 calls for a plebiscite in 1989 to vote up or down on a Presidential nominee put forward by the junta. It is a fact that the Constitution provides that if this nominee is voted down by the people, then a process leading to open elections in 1990 will commence.

Mr. President, it is also a fact that laws regulating political parties, the registration process, and other electoral matters have been drafted, or are in the process of being drafted, as called for in the Constitution of 1980. It is also a fact that these laws have or will be submitted for final approval in order to set the stage for the political aspects of the transition process as spelled out in the Constitution of 1980.

Mr. President, it is certainly clear that the transition process in Chile is operating under the timetable and guidelines spelled out in the 1980 Constitution which, I will point out again, was approved in a plebiscite by 67 percent of the people of Chile. If anyone doubts this, it is a simple matter to read the Chilean Constitution of 1980 and to then check the actions of the

Government. Should any Senator wish a copy of the 1980 Constitution either in Spanish or in English, I am sure that the Library of Congress would be pleased to furnish it.

Mr. President, our own Constitution spells out a timetable for elections. How would we react if the Soviet Union, or Cuba, or Red China, or England, or France, or West Germany, or any other country in the world, tried to pressure us to hold our next Presidential election in 1987 or in 1989, and not in 1988, as called for by our Constitution? Would Senators in this Chamber like to have a foreign nation dictate when their next election would be? I think not. We all love and respect our Constitution too much for that. We all wish to defend our Nation's sovereignty from foreign interference.

Mr. President, I am apalled that there are those in the media, in Congress, and in this administration who would force the Chilean nation to tear up its Constitution in order to suit their fantasies or their election campaigns, or their news circulation, or their careers in the State Department. Are we, in the United States, going to launch a global campaign to draft constitutions for every country on the face of this Earth and then impose them on these sovereign nations? It would appear that this is what some have in mind.

THE RECORD OF THE DEMOCRATIC LEFT

I am also appalled that the discussion of the so-called democratic forces in Chile has been divorced from the facts about Chile's recent historical experience and political life. There appears to be a short memory in the media, in Congress, and in the administration about the facts of Chile's political evolution over the last two decades.

It is a fact that the Presidential elections of 1964 were bitterly contested and that the line was drawn between freedom and Marxism. The candidate of the Christian Democratic Party, Eduardo Frei, was no Marxist. He was a Christian Democrat in the tradition of reformist Catholic thought as expressed in particular by Jacques Maritain. Unfortunately, his economic programs were not well thought out and attempted to find a way around the free enterprise system. This did not lead to the kind of economic growth that he hoped for but I say again, Eduardo Frei, he was no Marxist.

The campaign of 1964 pitted Eduardo Frie against Salvador Allende, who was a long standing member of the Socialist Party of Chile, which was and is Marxist and even Marxist-Leninist in character. Frei's two campaign slogans were "Revolution in Liberty," which expressed his reformist but democratic outlook, and "Democracy or Marxism," which referred to Allende and his Marixist-Leninist Cuban style platform. Allende was backed by a coalition composed of the Socialist Party, the Communist Party, and other racial Marxist and Marxist-Leninist elements. Ultimately, center and right of center parties supported Frei.

To give an indication of the intensity of the campaign, the Christian Democrats, led by Frei, invited Fidel Castro's sister to Chile to campaign on Frie's behalf. She came and denounced her brother Fidel and his Communist destruction of Cuba. She warned the Chilean people against Allende and his program for a Cuban-style revolution in Chile. Frei won the election and the Communists bided their time.

In 1970, Allende was put forward by the same Socialist-Communist coalition as before. It was a three-way race because the Christian Democratic Party had fallen under Marxist leadership through its candidate, Radomiro Tomic. Tomic refused to align the Christian Democrats in a coalition with center and right parties. Allende was then elected with 36 percent of the vote, less than his coalition had polled in 1964. But with Tomic's assistance, he was able to obtain congressional certification of his "victory."

It is a historical fact that from 1970 to 1973, Allende's coalition of Socialists, Communists, and terrorist groups (such as the MIR) plunged Chile into a Cuban-style social and economic revolution. Allende never stopped quoting Marx or Engels to explain what he was doing. The Chilean Congress used every means at its disposal to block his Communist policies. The Supreme Court exhausted every effort to call into question his unconsitutional behavior.

It is a historical fact that the Chilean Congress and the Chilean Supreme Court called upon the Chilean military to intervene to save the country from Allende and his Communist program which was wreaking havoc on the country. It is a fact that the moderate Christian Democrats supported this request for military intervention to preserve Chile. It is a fact that Eduardo Frei wrote to the head of the Christian Democrat international headquarters to explain why he supported this military intervention.

Mr. President, this is the historical process that led to the establishment of the Government, headed by President Pinochet, that is now in transition to representative government as provided for in the 1980 Constitution. If there are those in this country who wish to create myths about Allende, if there are those who wish to stand up for the Allende policies which were destroying Chile, then they should plainly state their support for the Marxist and Marxist-Leninist road down which Allende was leading his country. Would these supporters of Allende wish to lead our own country down the same road?

THE MEDIA AND THE ROJAS CASE

There have been numerous disinformation themes introduced into the American news media about the Rojas case. It is alleged, without the slightest proof, that the military doused gasoline upon the burn victims. It is alleged that the Government prevented the transfer of the burn victims from the Central Emergency Hospital in Santiago to the Workers Hospital. It is alledged that every bone in the boy's body was broken by the military. It is alleged that the military broke the teeth of the young girl with rifle butts. The U.S. State Department, on several occasions, called on the Government of Chile to "investigate" the incident even though an investigation was already underway by the independent Chilean judiciary.

Mr. President, what has not been presented to the American people is the factual situation surrounding the incident. It is a fact that the massive outbreak of terrorist violence of July 2 and July 3 of this year was planned months in advance by the violent Communist-inspired leftists in Chile. The fact that the general strike and violent demonstrations were planned in advance and publicly announced by the Civilian Assembly, a Communist front organization, has scarcely been reported at all. The fact that these two young people were actively participating with other activists in preparing barricades, molotov cocktails, and other incendiary devices at the time that they were burned, has not been reported at all.

Mr. President, it is a fact that the two young people were receiving appropriate medical care at the main emergency hospital in Chile. Moreover, the Workers Hospital, which had sent a doctor to examine Rodrigo Rojas, found that he was receiving adequate medical care, that it would be highly dangerous to move him to the Workers hospital, and that the Workers Hospital was not equipped to handle a patient in his condition. It is a fact that there is absolutely no mention of any bones being broken in the Workers Hospital doctor's examination of Rodrigo Rojas. It is also a fact that the girl's front teeth were removed by a team of doctors at the Workers Hospital in an emergency procedure after she was transferred there from the central public emergency hospital.

Mr. President, before our plane landed on Chilean soil on July 9, I instructed my staff traveling with me that they should dedicate time while we were in Chile to get to the bottom of the Rojas case. While in Chile, I met with the Minister of the Interior, the President of the Supreme Court, the Minister of Foreign Affairs, and

other officials with knowledge about the case. During each of these interviews, I asked for information that these officials might be able to provide concerning the case without, of course, violating any legal procedures involved in the special investigation which is similar to a Federal grand jury in the United States. My staff contacted the special prosecutor by telephone and indicated my strong interest in the case and in the investigation. I personally indicated my strong interest in the case to every official with knowledge of the case that I met.

I would add that during my 25-minute conversation with the U.S. Ambassador to Chile, Mr. Barnes, on Saturday, July 12, I asked a number of questions about the Rojas case in order to ascertain the information that the Embassy had on it.

It is unfortunate that the American media spent so little time in research and analysis of this tragic incident (which, incidentally, occurred within the context of a 2-day general strike which was organized by the Communist-inspired antidemocratic political sector in Chile). During this 2-day period, there was violence in several cities in Chile which included the use of molotov cocktails and firebombings of stores, taxis, and buses by the Communist-inspired terrorists. Rather than dig for the facts, the U.S. media simply allowed itself to be misled by the propaganda of several extremist spokesmen for the radical left in Chile.

ARIEL DORFMAN

One of the prime disinformation agents of the radical Chilean left in our country, Vladimiro Ariel Dorfman Zelicovich, appeared on numerous television shows as well as in the New York Times, Washington Post, and the Village Voice, a weekly published in New York City.

Mr. Dorfman is a naturalized citizen of Chile born in Buenos Aires, Argentina, on May 6, 1942, and naturalized on December 29, 1967. On September 11, 1973, the day of the military intervention against the Communist Allende regime in Chile, Dorfman sought refuge in the Argentine Embassy. He later fled to Argentina. It is unclear as to why he immediately sought refuge in the Argentine Embassy on the day of the coup. In 1979, he applied for a temporary entrance to Chile but this was denied. He came to the United States in 1982 and participated in several conferences on Latin American literature. On October 3, 1983, he was granted official permission to return to Chile.

About his travels since 1983, the following facts are known. He entered Chile on September 2, 1983, from the United States, and returned to the United States on September 17, 1983. On May 14, 1984, he entered Chile from Ecuador, and departed Chile for Argentina on May 16, 1984. He returned to Chile from Argentina on December 22, 1984, and left for the United States on February 8, 1985.

During the spring semester and fall semester of 1985, Dorfman taught courses as a visiting lecturer at Duke University in North Carolina in the International Studies Department. He is scheduled to teach courses again at Duke in the fall semester of this year. On March 27, 1986, he left Chile for Italy and returned several weeks later to Chile via Argentina. He departed Chile on July 4, 1986, for the United States, and launched his disinformation campaign on the Rojas case. He is married to Maria Angelica Malinarich Saa and holds a degree in philosophy from the University of Chile.

Dorfman has claimed that he cannot express himself in Chile. It is interesting to note in this regard that he is a member of the editorial council of a radical leftist weekly magazine, APSI, which is published in Santiago and which is easily available on newsstands there. According to records in Chile, the name of the company owning the magazine is the Sociedad Agencias Publicitarios y de Servicos Informativos, Ltda. The name, APSI, is an acronym of this company. According to these records, the company was formed by Eduardo Araya Alemparte and Hilda Lopez Aguilar. Eduardo Araya apparently served under Allende in the Foreign Ministry in the capacity of a Third Secretary but was removed from his post on September 11, 1973, when the Allende regime was overthrown. It is further reported that Eduardo Araya is a member of the Communist Party of Chile. The legal representative of APSI is Marcelo Contreras, Nieto who is reported to be a member of the Socialist Party of Chile.

Dorfman's article, which appeared in the Village Voice of New York in its July 22 edition, was an exercise in deception by the author with respect to the Rojas case, particularly in the area of the medical attention that the two young people received. In fairness to the Village Voice, which is a colorful institution in New York, it can be said that the article was essentially an opinion piece and not portrayed as a straight news item.

RECORD OF MEDICAL TREATMENT

It is asserted by Mr. Dorfman that the Government prevented Rojas' transfer from the main emergency hospital to which he and Miss Quintana were taken to the Worker's Hospital several blocks away. The Washington Post on July 8 covered Dorfman's July 7 press conference at the Institute for Policy Studies in Washington when Mr. Dorfman declared that the police blocked the effort to transfer the boy. In an article for the Village Voice Mr. Dorfman paints a picture in which he is at the center of an epic struggle to secure medical treatment for the boy in the face of governmental resistance to medical treatment for the boy. He also includes his disinformation theme that the Government blocked efforts to transfer the boy to the Workers Hospital. The facts are quite the opposite.

Indeed, when I asked Ambassador Barnes to describe the Embassy's role in securing medical treatment for the boy and the girl, Ambassador Barnes admitted that the Chilean Government did not prevent the boy's transfer to the Workers Hospital. Mr. Barnes also indicated that as of that day, July 12, the Embassy had no exact information on the circumstances surrounding the burning of the boy and girl. Ambassador Barnes under questioning noted that he had talked with Dr. John Constable, an American doctor from the Massachusetts General Hospital who had flown to Chile at the Rojas family's request to assist in medical treatment.

According to a New York Times article of July 9, Dr. Constable's trip was sponsored by the American Committee for Human Rights and by the Working Group for Democracy. Dr. Constable indicated in this interview that the private hospital could not have helped under the circumstances. Dr. Constable had apparently examined the patient and conferred with local doctors involved in the case. Dr. Constable specializes in plastic and reconstructive surgery and on burns. Dr. Constable, in addition to this duties at Massachusetts General Hospital, is an Associate Clinical Professor at the Harvard University Hospital. Ambassador Barnes noted that approximately 60 percent of the boy's body had been burned and that these burns were above the waist.

Mr. President, on Wednesday, July 9, my first day in Chile, I met with the Minister of the Interior, Ricardo Garcia Rodriguez, at 6:30 in the evening. Our meeting, which my staff attended, lasted over 2 hours and covered many aspects of the situation in Chile including the Constitution of 1980 and the timetable which it spells out for the transition to representative Government. In order to be able to inform our distinguished colleagues on the Rojas case, I spent some 45 minutes asking questions and discussing the case with the Minister of the Interior. I requested that the Minister provide documentation about the case which I could present to the Senate. The Minister did not hesitate to make available important documents relating to the case and to the conduct of the investigation.

RODRIGO ROJAS

According to information provided by the Ministry of the Interior, Rojas entered Chile by land via the Peruvian town of Tacna, on May 9, 1986. He was

accompanied by an American citizen named Paul Goldstein about whom no further information was available.

Rodrigo Rojas is apparently the son of Veronica Denegri Quintana and Ramon Eduardo Rojas Ruiz Tagle. This marriage ended in divorce. It is unclear at this time whether or not there is a family relationship between Mrs. Denegri and her son's female companion during the rioting on July 2, Carmen Quintana. According to Chilean authorities, Mrs. Denegri is an active member of the Chilean Communist Party and has operated under the code name of Andrea. It is reported that she belonged to the Ho Chi Minh cell of the Communist Party of Chile and was active in the propaganda front of the clandestine Communist Party apparatus.

For this reason, she was arrested by Chilean authorities on March 8, 1976, for subversive activities. She was released on May 19, 1976. On April 14, 1977, she left Chile and came to the United States. On September 14, 1981, she was formally prohibited from entering Chile owing to her subversive activities against Chile.

Mrs. Denegri has a second, son, Pablo Salvador Oyarzo Denegri, who was born in May 1974 and inscribed in the public registry of Valparaiso, Chile on July 25, 1974.

According to Chilean authorities, Mrs. Denegri's sister, Amanda Liliana, is an active member of the Socialist Party of Chile in a Marxist-Leninist faction of the Party. Other members of the Denegri family, Nora Patricia, Domingo Antonio, and Claudio Andres, are all active militants of the Communist Party of Chile according to Chilean authorities.

According to Chilean authorities Carmen Quintana was arrested on April 16 of this year for her participation in violent activities at a university in Santiago.

PART III

COMMUNISM IN CHILE

Mr. President, the Communist Party of Chile was established in 1922 with the assistance of the already established Socialist Labor Party of Chile which took a Moscow line. The Communist Party of Chile was declared illegal in 1927 during the Administration of President Carlos Ibanez. The party later participated in the formation of Popular Front governments in Chile under three presidents drawn from the Radical Party: Petro Aguirre Cerda (1938–42); Juan Antonio Rosas (1942–46); and Gabriel Gonzalez Videla (1946–52). The party was again declared illegal in 1948 by President Gonzalez.

Mr. President, it is an interesting historical fact that Salvador Allende, as a member of the Socialist Party, was the Minister of Health during the Popular Front government of President Aguirre in 1938. Allende had decades of experience working with the Communist Party of Chile and was no babe in the woods idealist as some have portrayed him.

Senators will note that the tactic of Popular Front governments was devised by the COMINTERN and was implemented in Spain in 1936. France and Chile were also testing grounds for this tactic in the 1930's. In 1935, the Communist International recommended alliances of Communist Parties with "bougeois democratic parties." The General Secretary of the COMINTERN stated, and I quote,

> The formation of a joint People's Front providing for joint action with Social Democratic parties is a necessity. Cannot we endeavor to unite the Communist, Social Democratic, Catholic and other workers? Comrades, you will remember the ancient tale of the capture of Troy. The attacking army was unable to achieve victory until, with the aid of the Trojan Horse, it penetrated to the very heart of the enemy camp. We, revolutionary workers, should not be shy of using the same tactics.

Mr. President, I do not see how one could be any clearer in terms of strategy than was the General Secretary of the Communist International, Mr. Dmitrov. This is the same strategy that Moscow, and Communists around the world, are using in our own time. It is not some historical relic to be found in a dusty book of Dmitrov's speeches. It is a strategy which the international Communist conspiracy uses today in the service of the masters of the Kremlin.

Mr. President, we have heard and we will hear all manner of talk about working with supposedly democratic forces in Chile during the transition period. I have heard that our Government is already pouring United States taxpayer's money into the coffers of the Christian Democratic party in Chile in support of the so-called National Accord. The State Department has supported and undoubtedly will continue to support, the concept of a broad front of supposedly democratic leftist parties in Chile as an alternative to the current constitutional government in Chile—and as an alternative to the truly democratic parties of the opposition on the center and the right of the political spectrum.

A POSSIBLE COALITION?

I can foresee the State Department attempting to put together a coalition of the Socialist Party, the Marxist factions of the Christian Democrats, and the Marxist factions of the Radical Party linked to the Socialist International. I can see the State Department going so far as to try to split the center and center-right parties and incorporate sections of the National Party and its breakaway factions into this coalition. Money will pour in from all over the world from West Germany, from Italy, from the United States to intervene on behalf of this type of a coalition. In embryo form, this is what the so-called National Accord appears to be about.

Mr. President, all that I can say about this type of process is that it will inevitably lead to economic decline and lack of progress for Chile and its people. There is no clear cut commitment, and there will not be any clear cut commitment, on the part of this type of coalition with Marxists to free enterprise and to private property.

We will not see productive capitalism at work creating jobs and opportunity and raising the standard of living for the Chilean people. What we will see is the destructive face of the finance capitalism of the New York banks who profit so handsomely from lending to countries plunged into debt by Socialist regimes. Under a socialistic regime, Chile would go further into debt, the New York banks would lend money to the State and profit off of the accompanying interest. There is no risk to the banks in this kind of game.

SOCIALISTS AND BANKERS

Mr. President, in this kind of game, Socialist regimes are a New York banker's best friend because they create sovereign debt. After all, the IMF and the World Bank are right around the corner, and with U.S. taxpayer's money they stand ready at any time to bail the banks out of their bad loans to the State and to State-owned corporations. If either the IMF or the World Bank needs more money it is a simple matter to persuade the Congress of the United States to appropriate further billions of dollars to the international bureaucrats who themselves are exempt from taxation in the United States.

Look at the Mexican case. Isn't that just what has happened in the last few weeks? Didn't the same thing happen in 1982?

We are witnessing today in Central America the consequences of a State Department policy which has imposed socialism on the people of El Salvador, Guatemala, Costa Rica, and Panama. Economic disintegration is a fact in these countries. They are heading backward into the days of the 1930's and 1940's in terms of the economic development. Why? Because the State Department has imposed socialist governments on these countries and socialism never has and never will provide economic growth and prosperity.

It is essential that the exact nature of supposedly democratic parties in Chile be known.

It is a fact that in Chile supposedly democratic parties on the left are highly factionalized and that significant and powerful factions of these parties are Marxist and Marxist-Leninist in character. In no way can these parties and factions be considered democratic. I can predict that there

will be as much disinformation about the nature of these parties and factions as there has been about the Rojas case and the situation in Chile that we have seen in the press and heard from the State Department in recent days.

It is another historical fact that members of the Communist Party of Chile participated in the International Brigades of the Communist forces in Spain during its Civil War. The Communist Party of Chile, therefore, has had firsthand experience with this popular front tactic not only in Spain but also in Chile itself. It has steadfastly adhered to this tactic through the years as a way of penetrating government coalitions and influencing government policy in Chile.

Senators will recall that the Marxist-Leninist Sandinista elements joined in a so-called popular front operation to oust President Somoza of Nicaragua. Once this stage of the revolution was accomplished, the Marxist-Leninist Sandinista vanguard element purged its non-Communist rivals and consolidated its dictatorship in Nicaragua. This tactic of the two-stage revolution, of course, is based upon orthodox Soviet methods as developed by Lenin himself.

In 1958, the Communist Party of Chile was legalized and operated legally until 1973 when it again was declared outside the bounds of legal political activity. The Communist Party of Chile participated in the left-wing alliance during the national elections in 1958 and in 1964. The Communist Party participated in the popular unity coalition of Salvador Allende who was the candidate of the Socialist Party and who was approved by the Communist Party in the 1970 elections which brought him to power with 36 percent of the vote in a three-way race. Since 1980, the Communist Party of Chile has publicly emphasized the need for revolutionary violence to seize power in Chile. In recent months, the Communist Party of Chile has again been promoting its concept of a popular front tactic.

SOCIALIST PARTY OF CHILE

It is no secret that the Socialist Party of Chile, founded in 1933 from several existing socialist parties, has had a long standing relationship with the Communist Party of Chile. Major factions of the Socialist Party follow Marxist-Leninist ideology under Moscow's leadership and discipline. A key leader of one powerful faction, Clodomiro Almeyda, is an avowed Marxist-Leninist and lives in exile in East Germany.

It is also no secret in Chile that the Youth League of the Communist Party of Chile has a working relationship with the Youth League of the Christian Democratic Party which is supposedly democratic but which is heavily factionalized. This working relationship between the two youth groups was publicly announced by them and was reported in the local Chilean press.

Likewise, it is no secret that the Marxist factions of the Christian Democratic Party introduced the concept of the "noncapitalist road" as developed by Khrushchev into its party ideology. This addition of Soviet ideology into the Christian Democratic Party occasioned leading non-Communist members of the party to protest and leave the party. It is a fact that the radical Marxist factions of the Christian Democratic Party have yet to renounce this part of their platform.

COMMUNISM AND THE JULY 2 AND 3 GENERAL STRIKE

Rodrigo Rojas shortly after entering Chile in May of this year began working as a computer assistant at the computer center in the physiology department of the University of Chile.

The incident in which he and his companion were burned occurred within the context of a 2-day general strike which the radical antidemocratic left had been preparing for several months. The strike and violent demonstrations had been scheduled for July 2 and July 3. Throughout the city of Santiago and its suburbs, radical elements prepared for a campaign of violence which included the use of fire bombs, street barricades involving rubber tires soaked with flammable liquids and then set ablaze, firebombing of buses, and firebombing of stores and residences.

This violent activity was widely reported in the Chilean press and included many photographs of flaming barricades erected by the Communist inspired radicals, burned out stores and homes, and burned busses.

Terrorists planted major explosive charges which destroyed three key high tension electric power lines which cut power off in region III, IV, and V of the country. Several terrorist organizations publicly claimed credit for planting bombs around the country. As a result of terrorist violence hundreds of innocent private citizens were wounded or burned by terrorist firebombs and had to be hospitalized. Over 50 terrorist bombs went off throughout the country.

Mr. President, I would emphasive that all of this violence and destruction by the Communist inspired terrorists was widely reported in the Chilean press. Anyone glancing through the press clips for the first week of this July in any of the newspapers in Chile—as I did when I visited Chile—will find lengthy reporting on the damage and a variety of photographs revealing the damage. Was there even a hind in the United States press of the extent of the Communist inspired violence in Chile during the week? No. What was our Embassy in Chile reporting to Washington about conditions in the country? Frankly, I do not believe that either the major media nor the United States Embassy in Chile had the slightest interest in fair and balanced reports of the situation, either to the American people or to the administration.

THE ROJAS INCIDENT

At the site of the Rojas incident, radical elements were preparing street barricades of rubber tires soaked with flammable liquids. Also they were preparing firebombs of the molotov cocktail type and more sophisticated chemical blends which do not need to be ignited but which burst into flame on contact with oxygen.

The exact details of the tragic fate of Rojas and Quintana are not yet known in full.

The special investigating judge has conducted a preliminary investigation on the matter which concluded that the boy and girl were burned owing to an accidental explosion of the incendiary materials that their group of activist friends were carrying and preparing. The judge has also concluded that under Chilean law, which is based upon a Roman law tradition, the senior officer at the sight of the incident is guilty of negligent manslaughter for not immediately taking the burn victims to a hospital. This type of negligence would not be a crime under U.S. law which follows an English common law tradition in this type of situation. As further investigation proceeds in Chile, the details will presumably become available through the judicial process.

The military patrol at the demonstration site is said to have used blankets to smother the flames enveloping the boy and girl. They were then transported to a different section of Santiago and dropped off on a road leading to the small settlement of Quilicura.

On July 2, at approximately 10:30 a.m., owing to reports by motorists at the access control post for the Arturo Merino Benitez Airport, a police patrol went to the road to Quilicura at its intersection with La Boza street and confirmed that Rojas and Quintana were there and that they were severely burned. Apparently, the police after giving some preliminary first aid treatment took the boy and the girl to the main emergency hospital in Santiago.

On the same day, after the Government had been informed of this incident, the Minister of the Interior petitioned the First Court of Appeals of Santiago to designate a special judge to investigate the case. The first court of appeals named Alberto Echavarria Lorca as the special investigating judge for the case. Mr. Echavarria is well known in Chile as a distinguished professor of law at the University of Chile where he has taught for over

two decades. His academic and professional specialites include criminal procedure.

Mr. President, I would point out to Senators that this incident was reported in the Chilean press on July 3. The El Mercurio specifically reported the incident in its extensive coverage of the violence of the preceding day. El Mercurio also reported that the Minister of Justice had requested a special investigation of the incident. This newspaper, the leading newspaper in Chile, was certainly available to our Embassy on July 3.

Statements by the United States State Department in Washington, beginning on Monday July 7, called on Chile to investigate the incident. But this was 5 days after the Ministry of the Interior had requested a special investigation, and 4 days after it had been reported in El Mercurio. This indicates a lack of information—to say the least. Whether this was due to inept reporting by the Embassy, or to a specific design to grandstand on the part of some in the State Department is unclear.

The Government of Chile fully cooperated with the independent judiciary in its independent investigation and submitted several documents to the investigating judge providing information about potential witnesses as well as requesting certain steps to be taken with respect to the investigation. These steps included a request that the criminal laboratory of the investigation police of Chile prepare a report on the clothes that Rojas and Quintana were wearing in order to determine the origin and cause of the burns, a determination of the flammable agent that caused the burns, and the origin and date of the burns.

Mr. President, I am no lawyer but it was explained to me that under long established Chilean legal procedure, the outcome of the investigation by the special investigating judge can result in two actions. If the judge determines that there has been a crime and that there are grounds to proceed with a criminal prosecution and that only civilians are involved then the judge himself proceeds with the trial.

If, however, a military person is found to be involved, then the matter is turned over to the military court system for further investigation after which the military court system may determine that prosecution for criminal activity is required. However, actions of the military court system are under the supreme court which is the final focus of legal authority in Chile. Should the military courts fail to handle the case in a manner acceptable to the supreme court, or should an appeal be made over the military courts ruling and judgment, then the supreme court can take the matter before itself.

Mr. President, I request unanimous consent that an official aide-memoire of the Ministry of the Interior of Chile on the Rojas case as translated by the Congressional Research Service be entered in the RECORD at the conclusion of my remarks as exhibit 1.

Mr. President, I request unanimous consent that the formal petition of the Ministry of the Interior to the first court of appeals to appoint a special investigative judge to the Rojas case dated July 2, 1986, as translated by the Congressional Research Service, be entered in the RECORD at the end of my remarks as exhibit 2.

Mr. President, I ask unanimous consent that documents from the Ministry of the Interior to the special investigative judge of July 7, and July 8 as translated by the Congressional Research Service be entered in the RECORD at the end of my remarks as exhibit 3 and exhibit 4.

Mr. President, I ask unanimous consent that a letter dated July 3, 1986, as translated by the Congressional Research Service from Dr. Jorge Escobar Cousino, director of curative medical services at the Hospital del Trabajador to Dr. Raul Guzman, director of public assistance at the main emergency hospital in Santiago requesting permission for Dr. Guy Heiremans, chief physician of the intensive care unit at the Workers hospital, to examine the patient Rojas be entered in the RECORD at the end of my remarks as exhibit 5.

Mr. President, I ask unanimous consent that a medical report dated July 3, 1986, on the examination of Rojas on July 3 at 1 p.m. by Dr. Guy Heiremans to the director of his hospital as translated by the Congressional Research Service be entered in the RECORD at the end of my remarks as exhibit No. 6.

I would call to the attention of Senators the medical report of Dr. Guy Heiremans of the Workers Hospital. I am told that Dr. Guy Heiremans is the nephew of the chairman of the hospital, Mr. Eugenio Heiremans. In paragraph four of the report, Dr. Heiremans states that, and I quote:

> The above indicated makes the transfer to another hospital highly dangerous, keeping in mind that where he is currently, he has the necessary means for his care.

Mr. President, it is clear from this paragraph in Dr. Heiremans report that the myth created by Mr. Dorfman and others in the media, to which regretably some in this Chamber have fallen prey, that the Government interfered with the transfer of the patient, is simply without foundation.

I would draw the attention of Senators to the same medical report in paragraph six which states, and I quote:

> In view of this situation, it was felt that the patient would not benefit from a transfer and that our hospital is not in a position to receive a patient with these characteristics.

Mr. President, taken in conjunction with the earlier paragraph that I cited from the report, the following facts are quite clear: That the medical judgment of the second hospital—the one that the Rojas family sought too transfer the boy—said too that the boy was receiving proper care at the main emergency hospital; that the Government in no way interfered with his transfer; that his transfer would have been highly dangerous; and that the Workers Hospital itself was not in a position to receive Rojas. I would add that in the case of Miss Quintana, who was less severely injured, she was later transferred to the Workers Hospital.

Mr. President, I am appalled by the ease that disinformation on this case was spread by Mr. Dorfman and others of his ilk through the American media. I would note that it appears that Dorfman has used the Institute for Policy Studies here in Washington as a platform for his press comment. It is no secret that the IPS has, according to knowledgeable observers, functioned for over two decades as a conduit for Soviet and Soviet bloc disinformation efforts. It is a sad commentary that such an organization as the IPS and such specialists in disinformation as Dorfman can distort our public debates and discussions and mislead not only our own news media, but this adminstration and even the Congress.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXHIBIT 1.

SANTIAGO, *July 12, 1986.*

CASE: RODRIGO ANDRES ROJAS DENEGRI, CARMEN GLORIA QUINTANA ARANCIBIA

1. Events:

1.1 For July 2 and 3 the sectors of opposition to the government had called for a social mobilization with characteristics of protest and a stoppage of activities.

1.2 On July 2, 1986, at approximately 10:30 a.m., because of reports made by private motorists at the Access Control Post for Arturo Merino Benítez Airport, a Carabinero patrol went to the road to Quilicura and Lo Boza Street, and was able to confirm that at that place were, with critical burns, Rodrico Andres Rojas Denegri and Carmen Gloria Quintana Arancibia, both 19 years of age.

1.3 These persons were taken to the Carabinero post in Quilicura and then, because of the seriousness of their injuries, to the Central Public Assistant post of Santiago.

1.4 When at that time the two youths were questioned about the circumstances under which the events leading to such serious wounds had occurred, they refused to give any information.

2. Dissemination (of news):

2.1 The news of these events was disseminated immediately inside and outside of the country.

2.2 In the cables sent abroad, it was noteworthy that from the first instant "uni-

formed personnel" and "army patrols" were metioned as the perpetrators of the burns exhibited by said two youths.

3. Government Action:

3.1 In view of the seriousness of the event and the imputations mentioned, the Government, through the Ministry of the Interior, requested, the same day, July 2, of the First Court of Appeals of Santiago, the designation of an Extraordinary Visting Judge to be established as the special high-ranking investigator dedicated exclusively to the case, in order to fully clear up the events.

3.2 As a result of this request, the First Court of Appeals of Santiago named Minister Alberto Echavarría Lorca as the investigative judge in this case.

3.3 In addition, the Government cooperated with the Court immediately. With this end, on the 7th of this month, it requested a series of steps, all of them aimed at this purpose. (A photocopy of the corresponding documents with details on the procedures requested is attached.) Even more, with this same goal, on the 8th of this month, through another document, new steps were requested, which are considered important for the clearing up of the events being investigated. (A photocopy of that document with the details on these steps is also attached.)

4. Medical Care:

4.1 The initial care was given to the victims at the local medical post of the same site in which they had been found and when the gravity of their condition was confirmed, they were transferred, as has been said, to the Central Post of Santiago.

4.2 The mother of the youth Rojas Denegri, as well as some of the media, stated that the transfer of the youths from the Central Post to the Workers' Hospital, a place that would have greater resources for this type of emergency, had been prohibited.

4.3 It is clear from the certificates, photocopies of which are attached, that Dr. Escobar, Director of Curative Medical Services of the Workers' Hospital, designated Dr. Guy Heiremans, of the same hospital, to examine the "feasibility of making said transfer provided it does not mean a risk for the patient that is going to mean immediate or subsequent complications for him." After Dr. Heiremans had completed his examination, a photocopy of which is also attached, he resolved: "the above makes the transfer to another hospital highly dangerous, keeping in mind that where he currently is they have the necessary means for his care," and he ended by stating in his report that "in view of this situation it was felt that the patient would not benefit from a transfer and that our hospital is not in a position to receive a patient with these characteristics."

5. References of Victims:

5.1 Rodrigo Andres Rojas Denegri was a Chilean citizen with residence in the United States and he entered the country on May 9, 1986, from Peru via Tacna, in the company of an American citizen named PAUL GOLDSTEIN, about whom no more information is know.

5.2 Inturn, Carmen Gloria Quintana Arancibia is a student of Electronic Civil Engineering at the University of Santiago.

6. Current Situation:

6.1 The case is in the proceeding stage (the procedural stage established in ordinary laws for the clearing up of criminal acts).

6.2 The Visiting Judge is carrying out all the investigations of the case, for that purpose having the collaboration of the services that he may require.

6.3 Before the investigating judge, all persons who seem to have information on the matter are providing testimony.

6.4 The Government will remain attentive in order to foster attainment of that information with all the legal means in its reach in order to accelerate the total clearing up of the events and the determination of those who are guilty, who shall be deserving of the respective punishments.

6.5 It is not appropriate at this time in the case to prejudge or anticipate any final evaluation of the case, which will be the responsibility of the Court in charge of the investigation.

Attached to the document on the Rodrigo Andrés Rojas Denegri and Carmen Gloria Quintana Arancibia case are the following documents:

1. Photocopy of the document asking the First Court of Appeals to designate a Visiting Judge.

2. Photocopy of the document presented on July 7, 1986 to the Visiting Judge, asking for the steps indicated.

3. Photocopy of the document presented on July 8, 1986 to the Visiting Judge, asking for the steps indicated.

4. Certificates issued by the authorities of the Workers' Hospital.

---

EXHIBIT 2

CONCERNING: REQUEST FOR DESIGNATION OF VISITING JUDGE

I, Ricardo Garcia Rodriguez, Minister of the Interior, with residence in this city, Palacio de la Moneda, respectfully say:

Today, July 2, 1986, at approximately 10:30 a.m., and in view of a report by private motorists made at the Access Control Post for Arturo Merino Benítez Airport, a Carabinero patrol gathered on route 70 (road to Quilicura) and Lo Boza Street; they were able to confirm that at that intersection were, with serious burns, Rodrigo Andres Rojas Denegri, 22, student at the University of Santiago, and Carmen Gloria Quintana Arancibia, 19, also a student at the same institution.

Both showed burns on their clothing and various parts of the body, so they were taken to the Quilicura station and from there to Central Public Assistance, where they are in critical condition.

When questioned by the Carabinero patrol that was present at the site, they refused to report on the circumstances that led to the facts described above.

In the opinion of the Minister of the Interior, they are [in] extremely critical [condition]. They show signs of aggravated brutality, the result of the crime of violence to which the promoters of today's events have led the citizenry.

Accordingly, it is a matter of events that have produced a justified public alarm and which require prompt repression because of their special gravity and harmful consequences.

Therefore:

I ask: that in view of the above and in keeping with what is provided in Article-560, No. 2, of the Organic Law of Tribunals, that it be ordered that a Judge of the First Court of Appeals of Santiago be designated on extraordinary visit in the Nineteenth Criminal Court, before which has been entered today document No. 405, which relates and reports the events previously described, and that the case be taken to the higher court for the investigation of and verdict on the same.

EXHIBIT 3

JULY 7, 1986.

REQUEST FOR CONDUCTING OF PROCEDURES INDICATED TO THE VISITING JUDGE

I, Ricardo Garcia Rodriguez, Minister of the Interior, because of the death of Rodrigo Rojas Denegri and injuries of Carmen Gloria Quintana Arancibia, state:

That, with the object of cooperating properly with the action of the Court, I request of that Visiting [Judge] that the following steps be carried out:

a) That Mr. Andrés Domínguez, attorney, who has made public statements through the press, stating that he has information related to the events which are the subject of this proceeding, be summoned to testify.

b) That Ariel Poblete, journalist, Secretary of the Editorial Staff of the magazine *Cauce*, be summoned to the tribunal on the records that he had in hand in order to include a feature article on the events being investigated in edition No. 82 of said weekly, on page 21.

c) That a summons be issued for a person named Pedro Martínez, whose identification data should be provided by Mr. Ariel Poblete, and who, according to what said article stated, witnessed the events.

d) That the Criminal Laboratory of the Investigation Police of Chile prepare an expert report on the following points:

1) Clothing of the persons Rojas and Quintana, in order to determine the origin and cause of the burns.

2) Determination of the heat-giving agent that caused the burns, for which purpose they will be authorized to report to Legal Medical Service in order to examine the corpse of Rojas and to the Workers' Hospital for the same purposes with respect to Miss Quintana; and

3) Possible origin and date of burns.

e) Summon the Director of Central Public Assistance, Dr. Raúl Guzmán, so that he will put at the disposal of that judge all medical files on the care provided to Rojas and Quintana.

f) Summon the medical doctor of American nationality named Constable, who supposedly treated the burned persons and reported on that to the U.S. Ambassador.

g) Summon Dr. Jorge Villegas of the Workers' Hospital, who examined the above-mentioned persons, and under whose care Miss Quintana is now.

I include the documents which justify the above requests.

Therefore, I ask that the above requests be granted.

---

EXHIBIT 4

JULY 8, 1986.

REQUEST FOR CONDUCTING PROCEEDINGS—VISITING JUDGE

I, Ricardo Garcia Rodriguez, Minister of the Interior, in the proceedings related to the death of Redrigo Rojas Denegri and the injuries of Carmen Gloria Quintana Arancibia, state:

That with the object of cooperating properly with the action of the Court, I ask of that visiting [judge] that the following steps be taken:

(1) That Ramiro Gavilane Granja, journalist, Director of the EFE Information Agency, be summoned to testify; he states in the documents already presented on July 2, 1986 he sent abroad a cable in which he refers in detail to the events which are the subject of this proceeding.

(2) That Jose Aldunate, priest, be summoned to testify; as stated in the publication of the Magazine *Cauce*, included in the records of the case, he stated that he was an eye witness to the events and even gathered up some of the victims' belongings.

(3) That the Director of the Workers' Hospital, Dr. Escobar, who provided medical assistance to the injured Miss Quintana, be summoned to testify.

Therefore: I ask that what is requested be granted.

[Signature]

EXHIBIT 5

SANTIAGO, *July 3, 1986.*

Dr. RAÚL GUZMÁN,
*Director of Public Assistance, "Dr. Alejandro del Río" City.*

MR. DIRECTOR: This office has received the request from the U.S. Embassy that the possibility of transferring the critically burned patient Mr. Rodrigo Rojas Denegri to our hospital be examined.

In that matter, I have appointed Dr. G. Heiremans, Chief Physician of the Intensive Care Unit, to act as my representative and to go your establishment in order to determine, after examining the patient and conversing with the attending physician, the feasibility of making said transfer, provided it does not mean a risk for the patient that is going to mean immediate or subsequent complications for him.

Thanking you for the facilities you may grant us, with best wishes,

WORKERS' HOSPITAL,
Dr. JORGE ESCOBAR COUSINO,
*Director of Curative Medical Services.*

EXHIBIT 6

JULY 3, 1986.

From: Dr. Guy Heiremans, Director of Curative Services.

Re Rodrigo Rojas Denegri, 19 years of age.

In accordance with what you requested, I proceeded to visit the patient, Mr. Rodrigo Rojas Denegri, at Public Assistance (Central House).

In that respect I can report the following:

1. The visit was made at 1:00 p.m. on July 3, 1986.

2. I was received by Dr. Raúl Guzmán (Director), who got in touch with Dr. Garcés (Chief of Burn Services) and Dr. Fierro (Resident Physician of the Service).

3. The patient is hospitalized in the Burn Service and his condition is the following:

19 years of age. He has been suffering from burns for approximately 30 hours.

a) Surface burned, 62%.

b) Most of the surface affected is type AB.

c) The gravity index upon entry was 128 points, without considering respiratory burn. The current index and future one will decline greatly, according to what the doctors of the Service have reported.

d) For some hours he has been without pressure, without a palpable pulse, and without diuresis.

e) Gasometry indicates the presence of adult respiratory distress.

f) Metabolic acidosis, dehydration, and hypernatremia.

4. The above indicated makes the transfer to another hospital highly dangerous, keeping in mind that where he is currently, he has the necessary means for his care.

5. Because of his hemodynamic instability and distress, within a few hours he will need a mechanical respirator, orotracheal intubation, and extensive use of intensive technical instrumentation.

6. In view of this situation, it was felt that the patient would not benefit from a transfer and that our hospital is not in a position to receive a patient with these characteristics.

Sincerely,

Dr. GUY HEIREMANS E.,
*Chief, UCI.*

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

## NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

The Senate resumed consideration of the bill:

Pending:

(1) Byrd (for Kennedy and Weicker) Amendment No. 2414, to set forth a comprehensive and complete framework to guide the efforts of the United States in helping to bring an end to apartheid in South Africa and lead to the establishment of a nonracial, democratic form of government.

A motion was entered to close further debate on Amendment No. 2414 and, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, a vote on the cloture motion would occur on Thursday, August 7.

(2) Dole Amendment No. 2417 (to Amendment No. 2414), of a perfecting nature, to promote economic and political development, peace, stability and democracy in Central America, to encourage a negotiated resolution of the conflict in the region, and toward these ends, to enable the President to provide additional economic assistance for the Central American democracies as well as assistance for the Nicaraguan democratic resistance, subject to certain terms and conditions.

A motion was entered to close further debate on Amendment No. 2417 and, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, a vote on the cloture motion would occur on Thursday, August 7.

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, parliamentary inquiry. Am I correct in remembering that Senator DECONCINI has an amendment that is to be called up at this time?

The PRESIDING OFFICER. The Senator is correct, the DeConcini amendment No. 2588.

Mr. GOLDWATER. I thank the President.

Mr. President, I would like to remind my colleagues that we did a good job yesterday on amendments on this bill. We accomplished a lot. If we can accomplish as much today in the next, say, 12 hours, I feel rather certain that we can finish this legislation today.

Relative to the amendment that is coming up, I want to say that I am very, very well aware of the problem that his amendment addresses. Senator DECONCINI and I live on the Mexican border. It is 1,875 miles from Tijuana to Texas and we only have six airplanes to patrol that whole distance. I can tell you, Mr. President, that we probably find as many as three wrecked airplanes a week on the deserts along the Mexican border.

If all they want to do is land their nacotics and get away, they do not care what happens to the airplane. It is impossible for us to know how many tons of these narcotics come across that Mexican border. We do not have the means to surveil it. Because of that, I am very, very sympathetic to the purposes of the DeConcini amendment. However, it is like other amendments. They say get the money out of defense.

Mr. President, there is not any money in defense. I am looking around, we are all looking around for a place to cut another $10 billion out of defense, and here comes an amendment that says we will supply needed aircraft from the defense fund.

I just have to tell my friend, Senator DECONCINI, when he gets here, that we are broke. I would love to do it. But we cannot even buy those aircraft for the Air Force or the Navy or the Army, let alone for the very important task of drug interdiction.

I wonder if my friend from Maine would like to address himself to this because he has given a lot of thought to the problem and this specific problem.

Mr. COHEN. I thank the chairman for yielding.

Mr. President, last evening we spent a considerable amount of time talking about the deficiencies of our special forces, pointing out that we are no better prepared today than we were 6 years ago to conduct a rescue mission such as that in Iran. We do not have any more aircraft than we had 6 years ago. We are still 5 or 6 years away from having the kind of airlift necessary to deal with terrorists and insurgencies. Suddenly we have another amendment pending that would add another $200 million or $300 million on top of the $200 million added for the Coast Guard last night to the defense budget.

Frankly, I do not know. The Coast Guard is very important to drug inter-

diction. Certainly the Senator from Arizona, Senator DECONCINI, is really concerned about the influx of drugs coming into the country. His record is well established on that.

We have a problem in my own State of Maine with drugs coming in. We have a problem with the Coast Guard. We cannot get enough Coast Guard helicopters to rescue drowning fishermen, not to mention interdicting the flow of drugs coming into the State of Maine. It seems to me if we are now going to impose upon the Defense Department additional burdens requiring additional aircraft to be dedicated to this purpose, with the advice, and I assume consent of the Justice Department, the very least we should be willing to do is say Justice should pay for it.

So if the Senator from Arizona, Senator DECONCINI, were amenable to altering his amendment to say that the appropriated funds shall come from the Department of Justice and be transferred to the Department of Defense, I would have no objection. But it seems to me if we are going to start adding $200 million and $300 million and $500 million on top of what we are requesting, and take that out of the defense budget, we are making a mistake. I would have to actively oppose it.

I would be willing to support the amendment provided the Senator from Arizona would modify his amendment to say that any funds that are appropriated for the Justice Department would be transferred to DOD.

If he is willing to do that, then I think we would have a basis for accepting the amendment.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I echo what the Senator from Maine has said so well. We have got a real budget squeeze in this bill. The Chair well knows we have tried to protect areas that are in this bill that involve crucial parts of our national security, not only the military itself but other components including some intelligence components. We have a real squeeze on the budget, not just this year. We have a squeeze on the budget for the next 3, 4, 5 years.

When I say squeeze I mean a squeeze of massive proportions.

I am very much in favor of what the Senator from Arizona, Senator DECONCINI, is trying to do. I would like to cosponsor his effort because he is doing what we need to do for our drug effort. But it is incumbent on the administration who is at least at this stage seemingly endorsing the program, backdoor, to come forward and show how we are going to fund this and ask for the request and the proper budget.

We cannot simply fund everybody's high priority project in the defense budget. We cannot do it.

So I know there are an awful lot of people who want to vote for this. It may very well be one of those votes where our committee position does not prevail, but it seems to me what the Senator from Maine is suggesting is perfectly in order.

I would suggest an amendment that would put this in the function at least that is carried under the budget resolution as the Justice Department function or the Treasury Department function or some category. We simply cannot afford to fund this out of the military budget.

We are funding the Coast Guard. We accepted the amendment of the Senator from Alaska. That is a unique set of circumstances because those Coast Guard personnel are going to be on Navy ships. One of the very sensitive areas is posse comitatus, the law that precluded military participation in law enforcement is on the books, beginning in the reconstruction days because of some of the abuses of military in enforcing the law back after the War Between the States.

And we have an amendment that was very carefully crafted about 4 years ago which was my amendment which permitted the military under certain circumstances to assist domestic law enforcement in drug enforcement. They are doing that now. We put the Coast Guard on the Navy ships because we did not want the military making arrests. Therefore, there is a unique set of circumstances for the amendment of the Senator from Alaska. But this amendment basically in spite of the purposes which I applaud is basically a shifting of resources from the Department of Defense to the Department of Justice. If we are going to start doing that on this bill, I do not know where we draw the line.

There are a lot of different departments that would like to get defense funds. If this was going to be justified, it should have been justified in a period of time when the defense budget was growing.

We are going down in real terms now. We are going to have a squeeze on personnel. The Members of this body are going to begin to understand what we are doing in the defense budget by the end of this year or early next year when they start hearing from military personnel who have gotten RIF's because that is the kind of action that is going to end up being taken under this outlay squeeze, particularly if we continue to have project after project that tends to be funded out of the defense budget.

Mr. COHEN. Is the amendment now pending before the body?

The PRESIDING OFFICER. The amendment is not pending.

Mr. PRYOR. Will the Senator from Maine yield to me?

Mr. COHEN. I would like to call up the amendment first, so we can start the time running.

AMENDMENT NO. 2588

(Purpose: To authorize funds for enhancement of drug interdiction assistance activities of the Department of Defense)

Mr. COHEN. Mr. President, I call the amendment up which is at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

Mr. PRYOR. Will the Senator yield from that?

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Maine [Mr. COHEN], for Mr. DECONCINI, proposes an amendment numbered 2588.

Mr. COHEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 2121. AUTHORIZATION OF APPROPRIATIONS FOR ENHANCED DRUG INTERDICTION ACTIVITIES.

(a) IN GENERAL.—Funds are hereby authorized to be appropriated to the Department of Defense for fiscal year 1987 for enhancement of drug interdiction assistance activities of the Department as follows:

(1) For procurement of aircraft for the Navy—

(A) $83,000,000 to be available for modification of four P-3 aircraft by the addition of APS-138 radar, including the purchase of four APS-138 radar sets; and

(B) $138,000,000 to be available for refurbishment and upgrading of four existing E2C Hawkeye surveillance aircraft for drug interdiction purposes, and the procurement of four replacement E2C Hawkeye aircraft and related spares for the Navy.

(2) For procurement for the Air Force, $49,500,000, to be available for procurement of 3 aerostat radar systems, 3 aerostat radar spares for such system, and 1 aerostat radar system authorized and funded for location in the Bahamas by section 5(b) of the Urgent Supplemental Appropriations Act, 1986 (Public Law 99-349; 100 Stat. 723).

(3) For operation and maintenance for the Air Force, $12,615,000 to be available for the transfer of 6 Air Force helicopters to Davis Montahn Air Force Base for use in carrying out drug interdiction missions.

(4) For the Secretary of Defense, $12,000,000 for enhanced intelligence collection activities concerning illegal importation into the United States of drugs originating in South America.

(b) LOANS TO THE UNITED STATES CUSTOMS SERVICE.—Secretary of Defense shall make available the refurbished, upgraded, and modified aircraft, using funds appropriated pursuant to authorizations in subsection (a)(1) to the United States Customs Service in accordance with chapter 18 of title 10, United States Code, except that the four replacement E2C Hawkeye aircraft procured

using funds appropriated pursuant to authorizations in subsection (a)(1) shall be delivered to the Navy.

(c) RESPONSIBILITIES OF THE UNITED STATES CUSTOMS SERVICE.—(1) The United States Customs Service shall have the responsibility for operation and maintenance costs attributable to the aircraft refurbished, upgraded, or modified using funds appropriated pursuant to authorizations in subsection (a)(1) and the aerostat radar systems using funds appropriated pursuant to authorizations in subsection (a)(2), except that responsibility for the operation and maintenance costs by the United States Customs Service shall commence upon receipt of the modified, refurbished, and upgraded aircraft authorized in subsection (a)(1) and upon completion of the installation of the aerostat radar systems authorized in subsection (a)(2).

(2) Upon enactment of this Act, the Commissioner of Customs shall immediately commence consultations with the Commandant of the United States Coast Guard regarding coordination of the deployment of the aircraft authorized in subsection (a)(1) and on loan to the United States Customs Service under subsection (b) in order to maximize the detection, surveillance, and intelligence gathering capabilities of the drug surveillance aircraft on loan to the United States Customs Service. The Commission of Customs shall make quarterly reports to the Committees on Appropriations and the Committees on Armed Services of the Senate and the House of Representatives regarding drug interdiction plans developed under this paragraph.

(d) AMOUNTS IN ADDITION TO OTHER AMOUNTS.—The amounts authorized by subsection (a) are in addition to any other amounts authorized to be appropriated to the Department of Defense in this Act for fiscal year 1987.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DECONCINI. Does the junior Senator from Arizona control half of the time?

The PRESIDING OFFICER. That is correct, 40 minutes equally divided.

Mr. NUNN. Parliamentary inquiry: How is the time divided? Who controls time?

The PRESIDING OFFICER. There are 40 minutes equally divided with no amendments thereto in order.

The Senator from Arizona [Mr. DECONCINI] has 20 minutes, the manager of the bill has the other 20 minutes, unless he is in favor of the amendment.

Is the manager in favor of the amendment?

Mr. NUNN. The managers of the bill are not in favor of the amendment. I think Senator GOLDWATER already made that clear.

Mr. GOLDWATER. We are not in favor of the amendment.

Mr. NUNN. I suggest Senator GOLDWATER manage the time in opposition.

Mr. GOLDWATER. I think it would be more comfortable, instead of having two Senators from Arizona running the time, to let the Senator from Georgia get in the action.

Mr. NUNN. I will be glad to manage the time in close consultation with the senior Senator from Arizona.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

□ 1150

Mr. DECONCINI. Mr. President, this amendment is cosponsored by the Senator from New York [Mr. D'AMATO], the Senator from Florida [Mr. CHILES], the Senator from New York [Mr. MOYNIHAN], the Senator from Tennessee [Mr. SASSER], the Senator from California [Mr. WILSON], and the Senator from New Mexico [Mr. DOMENICI].

Mr. President, last Monday, the President of the United States stated that he declared the war on drug abuse problems that plagues our Nation, which is poisoning our youth, and destroying the fabric of American society. On April 18, the President signed a national security decision directive which, among other things, called for the increased use of military resources to combat the narcotic traffickers.

On June 18, after nearly 4 years of congressional badgering, the administration finally concurred with the elements of the national drug interdiction strategy that Congressman ENGLISH, Senator NUNN, Senator STEVENS, Senator D'AMATO, Senator CHILES, myself, and many others, have supported in cooperation with the Department of Defense, the U.S. Customs Service, and other supporting agencies.

The amendment that we are offering will authorize funding for the second important phase of this drug interdiction plan and accelerate DOD's role in providing the sophisticated military resources to our civilian drug interdiction efforts.

The first phase of this program was authorized in the fiscal year 1986 DOD authorization bill, funded in the continuing resolution in 1986, Public Law 99-190, and reconfirmed in the urgent supplemental appropriations bill of 1986 signed into law by President Reagan on July 2.

Mr. President, this amendment authorizes a total of $295.1 million to fund five major proposals for enhanced Department of Defense drug interdiction assistance.

The Attorney General, as chairman of the Drug Policy Board, recommended four of these proposals in a letter to the Armed Services Committee of the House and Senate on June 18, while the Secretary of Defense recommended the fifth proposal to the Drug Policy Board in April.

Also, the elements addressed in my amendment today will form a major plank in an administration southwest border initiative that is scheduled to be announce next week.

Specifically, the amendment that we are offering will contribute the following drug interdiction assets to our war against the drug smuggler:

First, four existing E-2C Hawkeye surveillance aircraft will be refurbished by the Navy and turned over to the U.S. Customs Service; and the Navy, in return, will receive four replacement E-2C aircraft: Total cost, $138 million includes spare parts.

Second, four existing P-3 Navy aircraft be retrofitted with APS-138, 360-degree radar and turned over to the U.S. Customs Service for drug interdiction purposes: Total cost: $83 million, includes three APS-138 radars.

I have now agreed to one P-3 with APS-138 prototype at a cost of $27 million.

Third, three aerostat radar surveillance systems to be purchased by the Air Force for both national security and drug interdiction purposes: Total cost: $49,500,000, including spares for these aerostats and aerostat authorized in Public Law 99-349 for the Bahamas.

Fourth, transfer of six Air Force helicopters to Davis Monthan Air Force Base near Tucson, AZ to be co-located with the Tucson Customs Service Air Support Branch. These aircraft would be flown by Air Force pilots with Customs Service officers on-board: Total cost, $12,615,000.

Fifth, increased intelligence collection activities concerning illegal importation of drugs into the United States from South America: Total cost: $12 million.

Mr. President, this amendment offers a balanced, well-conceived, cost-effective strategy for combating the drug smuggler with sophisticated military resources.

It represents a culmination of vigorous, sometimes heated negotiations and compromise between myself, the Defense Department, the Administration, and other Members of the House and Senate.

My amendment will fund four proposals that have the support of OMB and the administration, plus a P-3 prototype that will offer an outstanding addition to this comprehensive plan for putting more sophisticated military assets into the war on drugs—at a price that the American taxpayers can afford.

Mr. President, last Monday, Attorney General Meese said in an editorial that—

The President's decision to sign the recent national security decision directive underscores our commitment to use military resources when appropriate against the insidious drug threat. (Washington Post, August 4, 1986.) Our plan is consistent with the

President's national security directive of April.

It is consistent with the original air wing concept originally authorized back in May of 1985.

It is consistent with the plan endorsed by the Secretary of Defense in April, in his report to Congress and the Drug Enforcement Policy Board.

It is consistent with our original concept of using existing DOD aircraft and sensors, whenever possible, and only purchasing those assets that are not already available for drug interdiction purposes.

And my amendment is consistent with our attempts to provide the most sophisticated DOD assets to meet the requirements of our drug interdiction agencies to detect, intercept, and arrest the drug trafficker.

My amendment will put our national drug interdiction effort into overdrive as we attempt to catch up with the narcotics trafficker, at a cost that the American taxpayers should be more than willing to pay.

Mr. President, let me finish by saying that, if we are willing to spend over $3 billion on a strategic defense initiative [SDI] that might not work, then we should be able to find $295 million for a program that will.

This amendment will go a long way toward meeting the President's goals and our own goals of attacking the drug smuggler that threatens our shores, our cities, and our children's futures.

I urge my colleagues to enthusiastically support this amendment and to turn up the heat on the narcotics trafficker.

Mr. President, I cannot think of a better investment that this Senate can make today with our defense funds. Most of this is going to be used in training with the defense capabilities intact. We have an opportunity to strike a blow, Mr. President, against drug interdiction. Sixty percent of the cocaine coming into this country comes by way of airplanes from outside our borders. We have to do something and we have to do it now. It is time that we use some of these assets.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DECONCINI. Mr. President, is my amendment at the desk at this time?

The PRESIDING OFFICER. The amendment is pending.

Mr. DECONCINI. Mr. President, I am glad to yield to the Senator from New York [Mr. D'AMATO].

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. D'AMATO. Mr. President, I rise not only to support this amendment, but to commend the Senator from Arizona, Senator DECONCINI, for his constant attempt to help utilize and mobilize resources of this country in the battle against drugs.

We talk about a drug war. The fact of the matter is there is no drug war. That is, we are not waging a war against those who bring drugs into this Nation. It is absolutely ludicrous to say that because we have undertaken some action, that we have begun to wage war that we have really mobilized, given the significance of what is taking place in our communities today.

This proposal is a logical next step in the comprehensive drug interdiction strategy that we have been working on—Senator STEVENS, Senator CHILES, Senator HAWKINS, Senator ABDNOR, and others—for years.

If we are serious about stopping more than 1 percent of the almost 19,000 flights that carry drugs into this country, then endorsing and supporting this initiative is the only logical step to do that.

Mr. President, I understand that there is a squeeze in resources on the defense side. I vote for those defense budgets. I am going to continue to do so.

However, I cannot think of a more important mission in the way of training, in the way of using our resources to interdict those 19,000 planes that carry their cargo of death and destruction into our neighborhoods and into our communities. It is about time that the Department of Defense understood that this is as important a mission as interdicting those who would spread alien philosophies and those who would come and pose a threat to our national security, whether it be the Qadhafi's or the Soviet Union with their KGB people.

If we cannot interdict the 19,000 planes that are carrying these drugs, then all of our wonderful defense systems go for naught.

This amendment, as Senator DECONCINI indicated, is in keeping with the national security decision directive signed by the President on April 18. It represents a plan agreed to by Attorney General Meese in the National Drug Enforcement Policy Board in June.

Senator DECONCINI has just set forth, in a very clear and detailed, manner, the history of bipartisan congressional support for an increased Department of Defense role in drug interdiction.

I think if we are going to do more than just give rhetoric to the so-called war against drugs, then we have to support the adoption of this legislative initiative to give to those who are in this battle the tools to see to it that we interdict the drug runners, to make it more than a slim possibility that they may be apprehended, to begin to say that, "If you are running drugs into this country, there is a good chance that we are going to interdict you, prosecute you, and put an end to this."

□ 1200

I hope that whatever difficulties do exist in terms of accepting this amendment could be worked out prior to a vote because I would like to see this amendment adopted unanimously, because we then show concrete proof that it is not just rhetoric, that we are prepared to mobilize nationally this war against drugs.

I urge my colleagues to give this amendment their full and overwhelming support.

I thank the Chair.

Mr. ABDNOR. Mr. President, I ask unanimous consent that my name be added as a cosponsor of the amendment offered by the Senator from Arizona.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABDNOR. Mr. President, I want to take this opportunity to commend the distinguished junior Senator from Arizona for sponsoring this amendment. We have worked together very closely over the past 5 years to develop an air interdiction effort. He has been a key player in the effort and deserves much credit. We have made strides, but we have a long way to go. The assets provided by this amendment will help considerably.

Yesterday the President of the United States declared war on drug abuse. It is a major problem facing this Nation today. No one can deny that. We have tried as hard as we have to provide support to the men and women on this country's front lines of defense against the drug trafficker. Quite frankly the support we have given has been modest at best. I am sure my good friend, Senator DECONCINI, will agree with me when I say we are glad the administration is coming to our aid.

I am just sorry to say it has taken too long. We have a long way to go. The drug problem is epidemic in this country. There are many steps which must be taken. These steps include education of our people. We must cut down on the demand. That, however, is a long term process. In the meantime we must interrupt drug trafficking. Detection and interdiction provide the means to that end. The dopers have had the upper hand too long. They have been better financed and better equipped. The assets provided in this amendment will provide the state of the art equipment to the good guys. It will make an impact.

I am very happy to be a cosponsor of this amendment and urge my colleagues to join in its support.

● Mrs. HAWKINS. Mr. President, I rise to speak in favor of the amendment of the Senator from Arizona, Mr. DECONCINI. This amendment makes

military surveillance equipment available for use in various drug interdiction programs. I share the concern of the Senator from Arizona about how inadequate our Drug Interdiction Program is in the Southwest and other parts of the country. We must recognize in this country that drug trafficking is a matter of national security. We must make the most sophisticated resources available to fight the scourge of drug abuse. If we fail to take this forceful action more of our citizens will be put at risk.

While I understand that our defense programs are facing serious budget constraints, these interdiction programs are a very high priority in the fight against drug traffickers. Many in this body have talked the so-called war on drug abuse. But we can never prevail in this war if we do not use the weapons and equipment necessary to prevail. The equipment that would be made available to the Drug Interdiction Program by amendment of the Senator from Arizona will go a long way toward ensuring that we do prevail in the war against drug traffickers and drug abuse.

Mr. President, as a cosponsor of the amendment of the Senator from Arizona, I urge my colleagues to support this proposal and thereby make a significant contribution to our national effort to stop drug traffickers. Only by our strong collective action can we begin to bring the tragedy of drug abuse and drug addiction to a halt.●

● Mr. MOYNIHAN. Mr. President, I thank my good friend and distinguished colleague from Arizona. I am pleased to cosponsor this amendment to provide badly needed funds for use in surveillance and interception efforts against drug smuggling. This proposal will help us to deal effectively with at least one-half of the drug equation: supply.

There is no more insidious and pervasive threat to our Nation. The abusers of drugs bring about numerous dangers to themselves and those around them; a drug epidemic brings with it a crime epidemic of equal proportion. The most elemental of all civil rights—the right to move freely in your own society—is denied by the presence of drug dealers and pushers on our streets. Just last week, the New York City Police Department reported a marked surge in crime in the last 6 months directly attributable to drugs. The number of reported major crimes rose to 249,090, and that was just for the first 5 months of this year. Of the 653 murders which occurred during this time, 35 percent were drug related. Consider: more than one-third of all murders in New York City were due to the inability to successfully combat drugs.

Our focus now is on countries like Bolivia, Peru and Colombia, as they are the primary source of most of the drugs which end up on our streets. This amendment allocates funds for the collection of intelligence on the flow of drugs from countries such as these, and for the planes and equipment to stop shipments before they reach our shores. If we can cut off the flow of drugs, we will have addressed at least one part of the drug equation.

But intercepting drugs is only one aspect of dealing with supply. Another calls for destroying drugs where they are produced. That means assisting countries like Bolivia and Peru in changing their agricultural base from coca plants to legitimate crops. These types of programs can work: they worked with respect the poppy plant—from which heroin is made—in Turkey in the early 1970's.

Permit me to explain. In 1969, President Nixon asked me to be his assistant for urban affairs. I agreed. I proposed to the President that among the first things to be done about American cities was to place international drug traffic on the agenda of American foreign policy. He agreed, and in the course of 1969 this was done. To be precise, in August of that year I flew eastward to Calcutta, Istanbul, and lastly Paris. At each place, I talked with American and local officials, stating that the United States could no longer tolerate the extraordinary commerce in smuggled heroin then flooding our cities, especially on the east coast, and bringing with it a plague of death and crime.

I met with the Turkish Foreign Minister and explained to him that the heroin flowing into the United States began as poppies grown in Turkey then processed in Marseilles, France. There it was associated with bread and life, but here it meant a slow death in our cities. Afterward, I flew to Paris to meet with the head of the French "Securite," who wondered how we could ask him to clamp down on drugs when we couldn't enforce our own laws. As we parted, he looked me straight in the eye and asked, "What kind of people are you?" that we were now coming to them about a matter which we should have taken action upon much, much earlier.

Now, we are faced with a cocaine, and more recently crack, epidemic. Some say that we can't afford to allocate more money for drug interdiction: I say we can't afford not to. The costs of drug abuse to our society are enormous. According to a study commissioned by the Alcohol, Drug and Mental Health Administration, drug abuse costs society a total of $60 billion every year. Yet this Senate continues to cut drug enforcement and interdiction programs by invoking such measures as Gramm-Rudman. For example, in New York City, the Immigration and Naturalization Service cannot fill 50 staff positions because of Gramm-Rudman's cut in its budget. It is not reasonable to expect these agencies to do an adequate job with inadequate funding.

The time has come to provide sufficient ammunition to those who are on the front lines of the fight against drug abuse. We require sophisticated and powerful equipment to combat smugglers, and this amendment would provide it. In part, it calls for the conversion of the E-2C Hawkeye aircraft, made by the Grumman Co., on Long Island, to be used against those who dare to bring lethal drugs into this country. With sophisticated instruments such as these planes, we give ourselves a fighting chance in winning the war against drugs.●

The PRESIDING OFFICER. Who yields time? If neither side yields time, time runs equally against both sides.

Mr. NUNN. Mr. President, I suggest the absence of a quorum to be equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. COHEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COHEN. Mr. President, if I could have the attention of the Senator from Arizona [Mr. DECONCINI]——

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI. Mr. President, I am glad to pay attention to the distinguished Senator from Maine.

Mr. COHEN. I wonder if he would be willing to modify his amendment to delete the P-3 aircraft out of his amendment. As the Senator knows, the Secretary of Defense felt very strongly in opposition to that in view of the cost that will be involved in that aircraft and that the developing cost will be excessive. He is trying to hold down that range.

Mr. DECONCINI. If the Senator from Maine will yield, I have talked with the Senator from California [Mr. WILSON], who serves on the committee. I am most reluctant to do that, because I think there is a lot of misinformation stemming from the Secretary of the Navy regarding the P-3's. We have those figures indicating that it is going to cost hundreds of millions of dollars to retrofit them; we have a firm commitment from one defense contractor to do four of them for $83 million. So I am very reluctant to do it.

However, let me say to my good friend from Georgia and my senior colleague from Arizona. I realize how far they have come to find some accommodation here. The answer to the question is, I shall reluctantly do that,

although I would like to yield to the Senator from California for his comments on it if he cares to get into this before we voluntarily give away the P-3.

The PRESIDING OFFICER. It will take unanimous consent to modify the amendment.

Mr. DECONCINI, I understand. I thank the Chair.

I shall be glad to yield back to the Senator from Maine.

The PRESIDING OFFICER. Who yields time?

Mr. NUNN. Mr. President, I yield to the Senator from California.

Mr. WILSON. I thank the Senator.

Mr. President, I think the Senator from Arizona has stated his reluctance, but I think it is probably a wise compromise. We are placed in this unfortunate position not through the fault of any member of the Armed Services Committee; very much to the contrary. The senior Senator from Arizona [Mr. GOLDWATER], the distinguished chairman of the Sea Power Subcommittee [Mr. COHEN], and the distinguished ranking member from Georgia [Mr. NUNN] are not in any way opposed to efforts to bring about more effective, more rigorous drug interdiction. Very much to the contrary. I dare say there is not a Member of this body that does not recognize the need for greater efforts to be made.

The reservations that are being expressed by the Senator from Georgia and the Senator from Arizona and the Senator from Maine have to do with money. They do not oppose the effort; they oppose its being funded from the defense budget.

Spending as many hours as I do with them agonizing about the allocation of too-scarce resources for our national security, I can well understand and entirely sympathize with their reluctance to see money that they have not authorized spent for purposes, however commendable, other than national security.

I support the junior Senator from Arizona. I think we have a compromise here that both sides can support. The point I am attempting to make, Mr. President, is that we are placed in the position of the junior Senator from Arizona having to take less than he feels is really required to make an adequate effort and the members of the Armed Services Committee, on the other hand, reluctantly granting some of their too-scarce resources for a purpose not contained in their bill.

I think what it means, very clearly and simply, is that this compromise may be the best that we can do this year. But there is an absolute necessity for the administration to recognize the need for new money for this effort, which I rank in many instances as being more important than a number of the expenditures we make even for national security. We are faced with a situation not just of growing concern; it is a growing crisis.

I say to my friend, the junior Senator from Arizona [Mr. DECONCINI] first, he has my support and my admiration for the steadfastness in the effort he has made.

Second, I extend thanks to my brothers on the Armed Services Committee. I think the pain of having to oppose a good program simply because you have inadequate resources to pay for what is in your own bill is something we can all understand and sympathize with.

What we need to do, I think, in this instance, is take this compromise, however reluctantly it is made by both sides, recognizing that we are placed in an untenable position because we have not accurately and adequately allocated, as a priority, what is necessary for us to discharge the obligation to interdict the flow of drugs into the United States, particularly the aerial interdiction of aerial smuggling.

So, to my friend from Arizona [Mr. DECONCINI], I say I think we should accept this and then make common cause with our colleagues on the Armed Services Committee so that new money and adequate money can be available to do this job properly in the future.

□ 1210

Mr. NUNN. Mr. President, will the Chair inform Senators what the remaining time and its allocation is?

The PRESIDING OFFICER. The Senator from Georgia has 13 minutes, the Senator from Arizona has 7 minutes.

Mr. NUNN. Mr. President, I believe this is a good compromise based on the information we now have. I must say I am not completely satisfied that the cost figures we have are entirely accurate. We have several estimates mostly on the telephone from the Department of Defense about various aircraft, but we are not going to be able to settle that on the floor now.

I believe that when we go to conference we should have much closer scrutiny of the figures which have been given us so we can make sure that not only are we doing something in the drug area but we are procuring the aircraft that are most effective and efficient for this purpose and also procuring aircraft for this purpose that are competitive and that meet the taxpayers' need to save money.

I am not satisfied on that aspect, but I know the Senator from Arizona has done the very best he can with this amendment. I think the Senator from California and the Senator from New York have made major contributions. I believe it is a very important program.

We still have a terrible dilemma of where we get the money. Nothing has changed. We are going to have to cut our bill very, very substantially in conference. We do not meet the budgetary figures—the numbers are going up on the floor, not down—and we do not meet the outlay figures.

So we will have a real problem in conference. The House is going to be debating probably today a couple amendments that will get their bill down to the budget authority and get their bill down to the outlays. We have closely coordinated our position with the Senate Budget Committee. They understand that we are over the ceilings. They understand that we are pledged to come back with a budget authority figure within the ceilings, and they understand that we are not pledged to come back in the outlay figure, although we are going to strive for that, because we have said over and over again those two numbers, budget authority and outlays, are totally incompatible; we cannot meet both. We can meet one of the other but not both.

So this amendment, worthy as it is, adds to our problems in conference. I serve notice to the Justice Department and Treasury Department we are for the drug problem, but we are also for honest accounting in executive budgets. And when they endorse a program they should endorse it in their budget; it should be sent up in their budget or it should be sent up here in a supplemental. It is rather frustrating to be handling the military budget and get other departments of the executive branch endorsing efforts to take money out of this budget and put it into other budgets.

That is just not the way to handle the accounting of the Federal Government. But I do applaud the program. We have a very serious problem with drugs in our Nation. I think drug affliction in our Nation does indeed affect our national security so I applaud the Senator and I believe the compromise should be accepted.

I yield whatever time the Senator from Maine may need.

Mr. COHEN. Just for the purpose of clarification, as I understand the proposed modification, it would still require the purchase of four new E-2C Hawkeye aircraft which would be transferred to the Navy; the Navy then would have the assets to dispose or divert for purposes of drug interdiction?

Mr. DECONCINI. If the Senator from Maine will yield, that is correct. There would be four new ones purchased for the Navy and four existing ones would be sent over to Customs obviously subject to recall for national security purposes.

Mr. COHEN. I thank the Senator.

Mr. DECONCINI. Mr. President, I will be glad to yield to my colleague from Arizona.

Mr. GOLDWATER. Mr. President, I think what is happening on this particular amendment is rather indicative of one of our major problems when we set out to provide legislation, particularly in the field of defense. The Senator from Georgia and I had an audience with the President just 2 days ago. We outlined in great depth the very, very dangerous situation that our Armed Forces face. We told him that we could not authorize more money because we did not have any more money. In the usual language, we are broke. Yet, Mr. President, this morning, August 7, the Secretary of Defense sends a letter over here saying that they support the DeConcini amendment. We do, too. I, like my colleague from Arizona, live on that border, and we know what we want. But we do not like to get an approval from the Secretary of Defense about an hour before we are going to work on this thing. And then, Mr. President, we have been thinking about this legislation, traveling under the assumption that the Attorney General did not want money specifically appropriated for this, and yet this morning we find the Attorney General backing this amendment.

Again, I say that I think both the Senator from Georgia and I would back this amendment without question provided we had the money.

So I wish, Mr. President, that the administration would learn how to operate a little better than they do, so that the committees are not left hanging in the air when important decisions have to be made.

I thank my colleague from Arizona for agreeing to delete the P-3's. I think that was a very wise move, and I think it will ensure the passage of the amendment and acceptance in the conference.

I yield the floor.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the Senator from South Carolina [Mr. HOLLINGS] be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I also want to thank the Senator from New York for his steadfastness in taking the time away from the Appropriations Committee that he is supposed to be at right now on defense I think to come over and talk to this, as well as my colleague, Senator WILSON, from California.

Mr. President, I will ask to insert in the RECORD a letter that is addressed to my senior colleague from Arizona, Senator GOLDWATER, from Attorney General Edwin Meese dated June 18, 1986, spelling out what is necessary under the National Drug Enforcement Policy Board. I note that all of the items that are in this original amendment with the exception of the P-3's are a part of this policy board's decision. I ask unanimous consent that that letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE,
NATIONAL DRUG ENFORCEMENT
POLICY BOARD,
*June 18, 1986.*

HON. BARRY M. GOLDWATER,
*Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: The DOD Authorization Bill for FY 1986 called for the establishment of an Air Force Special Operations drug interdiction air wing to provide peacetime air interdiction surveillance and detection assistance to drug enforcement authorities.

The conference report accompanying the FY 1986 Appropriations Act (appended to the Continuing Resolution) required the Department of Defense to configure one AC-130H-30 stretched variant gunship for drug interdiction surveillance deliverable not later than January 31, 1987. Thirty-five million dollars were appropriated for this purpose. The Conference Report also suggested that DOD should consider budgeting for an additional nine AC-130H-30 gunships during FY 1988-89.

In my letter to you on February 12, 1986, I expressed the National Drug Enforcement Policy Board's concern that the C-130 gunship was not the most cost effective means of providing air surveillance and detection (Enclosure 1). Further, I suggested that the Policy Board would work with the Congress to identify appropriate resources best suited for drug surveillance and intelligence needs, consistent with DOD mission requirements.

In an April 18, 1986 letter to the Vice President, Senator DeConcini and Representative English proposed a plan to implement the DOD Air Wing (Enclosure 2). This plan provides for seven aerostat radar surveillance balloons (two in the Bahamas and five along the U.S. Southern tier); ten C-130 aircraft retrofitted with target acquisition radars (two for SOUTHCOM; remaining eight divided equally between Florida and Arizona); and four Customs P-3A aircraft (or suitable platform) retrofitted with 360° radar.

The National Narcotics Act of 1984 empowered the Policy Board to review, evaluate and develop United States Government policy, strategy and resources with respect to drug law enforcement efforts. Accordingly, on May 19, 1986, the Vice President asked the Policy Board to review the Congressional plan. The Policy Board analyzed the plan and agrees that certain parts of it would help address the problem along the Southern tier. Specifically, they are: placing five aerostats along the Southwest border, moving Air Force helicopter assets to Davis Monthan AFB, and providing two C-130's to SOUTHCOM to assist drug law enforcement on a not-to-interfere-with-mission basis. The Board believes that the location of the aerostats and other detection assets should be determined by those agencies responsible for their operation.

In addition to the above elements from the Congressional plan, the Policy Board proposes modifications which address interdiction needs and also provide an effective enhancement to the Government's overall anti-drug effort. The alternative proposal constitutes a Government-wide package that will initiate improvements in several of the critical components of the drug strategy. They are presented in Enclosure 3.

The total cost of our proposal is $232.9 million (plus one year O&M of $33M), compared with $309M (plus $61M O&M) for the Congressioanl plan. Not only would this alternative cost the taxpayers less, the Policy Board believes that it would also be more effective. Our proposal simultaneously addresses several of the key elements of the strategy in a balanced approach, rather than focusing solely on interdiction assets.

While I believe that our proposal fully addresses the needs along the Southwest border, the differences in terrain and threat along the Southeast border pose a more complex set of problems. As an interim solution, the Policy Board endorses the substitution of E-2C's for P-3A's as air surveillance platforms. The P-3A's would then be returned to DOD. (In our view, the E-2C is superior to the P-3A in terms of cost, effectiveness and availability.) However, the Policy Board must emphasize that it is prudent to study other air surveillance modalities before final determination is made for the Southeast border. We will forward to the Congress, following the Policy Board's expedited review, a complementary report for the Southeast border.

I know you share our concern over the adverse impact illicit drug trafficking has on our nation. On behalf of the Board, please be assured of our willingness to work with the Congress to effect measures to end this national scourge. I have sent identical letters to Chairmen Hatfield, Whitten, and Aspin.

Sincerely,

EDWIN MEESE III,
*Attorney General.*

*Policy Board's alternative proposal* [1]

| Interdiction: | *Million* |
|---|---|
| Items from Congressional plan: | |
| 5 Aerostats for Southwest border[2] | $62.5 |
| Transfer 6 Air Force Helicopters to Davis Monthan AFB in Arizona[3] | 15.0 |
| 2 C-130's to Southcom[4] | 79.4 |
| Other items: | |
| Customs Service Command, Control, Communication's Intelligence Center ($C^3I$) for the Southwest border | 10.0 |
| An All-Source Intelligence Center to modify or replace the existing El Paso Intelligence Center (EPIC) | 15.0 |

[1] Additional O&M for full year operation is estimated at $33M.

[2] Acquisition funded by DOD; O&M funded by other agencies.

[3] Acquisition and O&M funded by DOD.

Mr. DECONCINI. Mr. President, I send to the desk a modification which is in accordance with the understanding and discussion we just had, which modifies my amendment, taking out the P-3's. I ask unanimous consent that the amendment be so modified.

The PRESIDING OFFICER. Is there objection to the modification? Without objection, it is so ordered.

The amendment, as modified, is as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 2121. AUTHORIZATION OF APPROPRIATIONS FOR ENHANCED DRUG INTERDICTION ACTIVITIES.

(a) IN GENERAL.—Funds are hereby authorized to be appropriated to the Department of Defense for fiscal year 1987 for enhancement of drug interdiction assistance activities of the Department as follows:

(1) FOR PROCUREMENT OF AIRCRAFT FOR THE NAVY—$138,000,000 to be available for refurbishment and upgrading of four existing E2C Hawkeye surveillance aircraft for drug interdiction purposes, and the procurement of four replacement E2C Hawkeye aircraft and related spares for the Navy.

(2) For procurement for the Air Force, $49,500,000, to be available for procurement of 3 aerostat radar systems, 3 aerostat radar spares for such system, and 1 aerostat radar spare for an aerostat radar system authorized and funded for location in the Bahamas by section 5(b) of the Urgent Supplemental Appropriations Act, 1986 (Public Law 99-349; 100 Stat. 723).

(3) For operation and maintenance for the Air Force, $12,615,000 to be available for the transfer of 6 Air Force helicopters to Davis Montahn Air Force Base for use in carrying out drug interdiction missions.

(4) For the Secretary of Defense, $12,000,000 for enhanced intelligence collection activities concerning illegal importation into the United States of drugs originating in South America.

(b) LOANS TO THE UNITED STATES CUSTOMS SERVICE.—The Secretary of Defense shall make available the refurbished, upgraded, and modified aircraft, using funds appropriated pursuant to authorizations in subsection (a)(1) to the United States Customs Service in accordance with chapter 18 of title 10, United States Code, except that the four replacement E2C Hawkeye aircraft procured using funds appropriated pursuant to authorizations in subsection (a)(1) shall be delivered to the Navy.

(c) RESPONSIBILITIES OF THE UNITED STATES CUSTOMS SERVICE.—(1) The United States Customs Service shall have the responsibility for operation and maintenance costs attributable to the aircraft refurbished, upgraded, or modified using funds appropriated pursuant to authorizations in subsection (a)(1) and the aerostat radar systems using funds appropriated pursuant to authorizations in subsection (a)(2), except that responsibility for the operation and maintenance costs by the United States Customs Service shall commence upon receipt of the modified, refurbished, and upgraded aircraft authorized in subsection (a)(1) and upon completion of the installation of the aerostat radar systems authorized in subsection (a)(2).

(2) Upon enactment of this Act, the Commissioner of Customs shall immediately commence consultations with the Commandant of the United States Coast Guard regarding coordination of the deployment of the aircraft authorized in subsection (a)(1) and on loan to the United States Customs Service under subsection (b) in order to maximize the detection, surveillance, and intelligence gathering capabilities of the drug surveillance aircraft on loan to the United States Customs Service. The Commissioner of Customs shall make quarterly reports to the Committees on Appropriations and the Committees on Armed Services of the Senate and the House of Representatives regarding drug interdiction plans developed under this paragraph.

(d) AMOUNTS IN ADDITION TO OTHER AMOUNTS.—The amounts authorized by subsection (a) are in addition to any other amounts authorized to be appropriated to the Department of Defense in this Act for fiscal year 1987.

Mr. DECONCINI. Mr. President, I will be glad to yield to the Senator from Georgia.

Mr. NUNN. Mr. President, I am prepared to yield back the remainder of the time of the former opponents of the amendment.

Mr. COCHRAN. Mr. President, before all time is yielded back, let me just ask—I was on my way to the floor—of the Senator from Arizona whether or not this amendment would preclude the retrofitting of planes other than the P-3 for the drug interdiction efforts?

As I understand the modification, am I correct in the assumption that the planes are being taken out of the amendment?

Mr. NUNN. The P-3's have been taken out by the Senator from Arizona.

Mr. COCHRAN. So there would be no prohibition of the administration or the administrators of Customs or the Coast Guard retrofitting other aircraft such as the C-130 for surveillance purposes in the drug interdiction effort?

Mr. DECONCINI. If the Senator will yield, maybe the Senator from Georgia would care to discuss the Defense Department and Air Force position on using the C-130 but this modified amendment only takes out the P-3's.

It does not go to any other retrofitting or modification of any other airplanes. If the Drug Policy Board so ordered the Defense Department to do it and the Defense Department found the funds or decided to do it or in conference if they decided to do it with P-3's or the C-130, let me yield to the Senator from Georgia for the answer.

Mr. NUNN. I would agree with that assessment. I think the plan fact out here today, at least as one of the managers of the bill, I do not know which aircraft are better for this purpose and even though the P-3's have been eliminated in the amendment based on cost information from the Department of Defense, it seems to me what we want to do in this program like any other program is find the best airplane for the job and get it, whatever it happens to be, at the best cost, and I would say that would be our goal in conference. We do not have enough information here now—at least I do not—to be able to make that kind of judgment.

□ 1220

Mr. GOLDWATER. Mr. President, if the Senator will yield, I will try to help him a little.

The E-2C is a proven fleet aircraft with overwater and overland capability. The E-2C is a sort of miniature AWAC. It is used off the decks of carriers.

The trouble with the P-3 for this use is that it is a down-looking radar. It is a submarine detector. What we have to have is radar that can look forward or sideways.

We have a very fine, old Army airplane, the Mohawk, that is perfectly satisfactory for this type of operation, and we have been using them on the Mexican border. It has an infrared side-looking radar and standard radar for straight ahead.

I believe that the money necessary to modify a P-3 would be to exorbitant, and the money to buy AWACS would put it out of the question.

I think the decision that has been reached here this morning by the members of the Armed Services Committee is probably the least expensive one we can come up with.

Mr. COCHRAN. Mr. President, I appreciate very much having the explanation of the managers of the bill and the author of the amendment. I certainly have no objection to the amendment, and I join in applauding the Senator from this initiative.

Mr. DECONCINI. Mr. President, I thank Senator GOLDWATER and Senator NUNN and their staffs for their cooperation.

I yield back the remainder of my time.

Mr. NUNN. I yield back the remainder of my time.

Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. No.

Mr. NUNN. I think it would be preferable if we did not have a rollcall vote.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment, as modified.

The amendment (No. 2588), as modified, was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GOLDWATER. I believe there was a unanimous-consent agreement reached last night to accommodate another amendment at this point.

The PRESIDING OFFICER. The Senator is correct. The amendment would be offered by Senator HATFIELD.

Mr. GOLDWATER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1230

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oregon is recognized.

AMENDMENT NO. 2606

(Purpose: To prohibit the use of funds for the production of binary chemical munitions until certain conditions are met)

Mr. HATFIELD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oregon [Mr. HATFIELD] proposes an amendment numbered 2606.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, strike out lines 9 through 16 and insert in lieu thereof the following:

SEC. 109. BINARY CHEMICAL WEAPONS.

(a) SENSE OF CONGRESS.—It is the sense of the Congress that the Presidential certification of July 29, 1986, transmitted to Congress pursuant to section 8093 of the Department of Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190 (99 Stat. 1217)), does not meet the requirements of such section and, therefore, the conditions necessary to begin production of binary chemical munitions pursuant to such section do not yet exist.

(b) PROHIBITION ON USE OF FUNDS.—None of the funds appropriated pursuant to an authorization contained in this or any other Act may be used—

(1) for the procurement or assembly of binary chemical munitions (or components of such munitons); or

(2) for establishment of production facilities necessary for procurement or assembly of binary chemical munitions (or components of such munitions),

until legislation has been enacted, after the date of the enactment of this Act, declaring that the certification requirements of section 8093 of the Act referred to in subsection (a) have been met.

(c) EXCEPTION.—The prohibition in subsection (b) does not apply to funds used exclusively for research, development, test, and evaluation of binary chemical munitions.

Mr. HATFIELD. Mr. President, this is a very simple amendment and yet I know that it carries with it many implications.

Mr. President, I allocate myself 5 minutes.

I would like to consider this amendment strictly on the wording and the intent of the amendment.

I will not make any efforts here today to hide my own personal feelings about the weapon involved in this amendment—nerve gas. I fought the idea of nerve gas production and sought to sustain the moratorium placed on it by President Nixon for many years.

But if we could but lift our eyes for just a few moments to the actual wording of the amendment, I would like to concentrate on its merit outside of the question of whether you are for or against nerve gas.

In the continuing resolution passed by this Senate last year, there was included the following wording—and I refer specifically to Public Law 99-190—there will not be any moneys expended for the binary chemical munitions for production purposes until "there has been submitted to the North Atlantic Treaty Organization a force goal stating the requirement for modernization of the United States proportional share of the NATO chemical deterrent with binary munitions and said force goal has been formally"—and let me emphasize "formally"—"adopted by the North Atlantic Council."

Mr. President, there are three groups within this whole NATO structure to which we refer: the Military Review Committee, the Defense Planning Committee, made up of the defense ministers of various member countries, and the North Atlantic Council, made up of the member nation's foreign ministers.

In effect what happened was this: the Military Review Committee (in which Ambassador Abshire represents the United States) approved of binary weapon production force goal, as part of the total force goal package. The Defense Planning Committee took note of that fact—did not act on it—but took note of that fact. Mr. President, the Council never took action on it in any form or in any shape.

□ 1240

The wording of our language has not been complied with. How did it happen?

Mr. Abshire, our permanent representative, was very much aware of the precise language of the requirement. Let me tell you the intent was very, very carefully crafted because we wanted to make sure that this was considered by both the military and the political groups within NATO. It is something more than a military question. It is a political question as well.

Mr. Abshire says, "Well, we should have used the words 'force plans' rather than 'force goals'," because force goals are considered by the military agency, not by the North Atlantic Council. Now, after the fact, that is a very interesting interpretation. But it still does not override the wording and the intent of the wording of the language in the appropriation bill.

Now, Mr. President, the committee that now has this authorization bill before us, the Armed Services Committee, is attempting, evidently, to try to undo the situation or to correct it after the fact. This bill will allow binary weapon program production money to be utilized after approval by the military group that has already acted upon it, the Defense Planning Council.

Mr. President, that does not change existing law. The existing law says very carefully that there shall be formal adoption given by the North Atlantic Council.

Now you might ask: Why should the Council do this, as well as the military arm of NATO? I have letters here, Mr. President, from three of the four countries that disapproved of this weapons system, written by their ambassadors. Their ambassadors are political appointees. Mr. President, you cannot have it both ways. You cannot have a military group saying, "Oh, this is approved," and then the political people of those countries going home and saying, "Oh, we didn't approve it. We didn't approve it, because it is too hot a political item to approve."

Now let us not get into all the arguments about whether this is a deterrent and all those other matters relating to the nerve gas weapon. Let us get to the essence of this amendment, which is simply to restate the language of existing law. That is all.

Not one NATO ally has agreed to bring this binary weapon to their land. Why should America take the brunt of all the political venom being expressed in the very countries where their own political people refuse to take a stand but then, backdoor, under the table, through their military people in a lower echelon of the NATO, say, "Oh, yes, we approve." It is a double standard. It is not honest. It is not forthright.

Not too long ago, I happened to be in the company of the head of government of one of our NATO allies. I raised the question to this head of government. He said, "Oh, please don't make us take a position on this. We will support you on it. We will support you through the Defense Planning Committee, but do not ask us in the political realm to take a position. It is to hot a potato for us to handle."

So America takes the full blame for this.

Mr. President, there is an integrity of Congress' instruction at stake here. That is the essence of this amendment. Does the Congress mean what it says? And is the agency that the instruction is directed to going to ignore

it, thumb its nose at us, and say, in effect, "Well, that means little," even though it is the law of the land and has been signed into law by the President as well as passing both Houses of Congress.

I say again, I very forthrightly say I am opposed to nerve gas production. I am all out opposed to it. But that is not the purpose of this amendment at this time. Instead, it is to sustain the integrity of the Congress. That is the essence of this amendment.

I reserve the remaining part of my time.

Mr. GOLDWATER. Mr. President, parliamentary inquiry. How much time do we have left?

The PRESIDING OFFICER. The Senator from Arizona has 23 minutes and the Senator from Oregon has 18 minutes.

Mr. GOLDWATER. Mr. President, I yield as much time as the Senator needs.

Mr. COHEN. I thank the chairman for yielding.

Mr. President, let me say at the beginning that I was opposed to the requirement that the NATO countries have a veto, in essence, over the question as to whether or not the United States would resume production of chemical weapons. It seemed to me that that was placing the United States in a rather untenable position, to in any way derogate our responsibilities to our NATO allies on this issue as to whether or not we should resume the production for possible deployment in other regions of the world.

But that is not the issue that is being debated here today, as the Senator from Oregon has correctly stated.

Senator GLENN and I spent a considerable amount of time on this issue in conference with the House of Representatives. It is not as clear as the Senator from Oregon would have us believe, that the language is so precise. As a matter of fact, even though the bill contains a reference to the North Atlantic Council in the bill itself, it is interesting to note that in the bill's report language the reference is to the North Atlantic Alliance. So there is a great deal of ambiguity on this very proposition.

I submit to my colleagues that the Senator from Oregon, who has correctly stated his long opposition to the program, has seized upon an ambiguity in order to strangle the program from being either initiated or indeed completed.

Now what has happened with respect to this particular issue? We have requested that the NATO allies be required to express some approval of a plan that has been proposed by the administration. A letter was sent to the Senator from Oregon from our permanent representative, Ambassador David Abshire, explaining exactly what took place with respect to the North Atlantic Council.

The fact of the matter is that, back in 1966, when France withdrew from the NATO integrated military command structure, the NATO countries had to formulate some mechanism whereby issues pertaining to force goals could be resolved and approved, without the approval of France. At that time, it was decided to give that authority for force goals to the DPC, the Defense Planning Committee, which was done. And it has been that policy since 1966.

Now I have a copy of a letter—and I hope the Ambassador will forgive my pronunciation of his name—from Andre De Staercke, who was the dean of the NATO permanent representatives at the time that the decision was made, when France withdrew from the NATO integrated military command structure, to establish a mechanism whereby these decisions pertaining to force goals could be dealt with.

Let me just read a portion of the letter he addressed to Ambassador Abshire. He said:

> Since France intended to cease participation in discussions and decisions on NATO's integrated defense structure, it became necessary to agree upon a way to reach final decisions on these matters at the highest level. A number of possibilities were considered, with French participation in the search for solutions. Fortunately, a body which could serve the purpose was already at hand—the Defense Planning Committee. In 1963 the Council had made a decision to constitute itself as a Defense Planning Committee for the purpose of carrying out the decisions of the 22-24 May 1963 Ministerial meeting * * * The DPC so established was open-ended and chaired by the Secretary General. All that was needed was a Council decision giving the DPC full competence in all matters pertaining to NATO's integrated defense structure. The North Atlantic Council, in which, of course, France is a member, took this decision, with French agreement, the 3rd of November 1966. Thus the DPC is, in effect, the Council when it deals with matters upon which it alone is competent.

□ 1350

So here we have the dean of the permanent representatives speaking on this particular issue, the DPC acting as the council on matters pertaining to force goals. That particular position is reinforced by Lord Carrington, I quote from Lord Carrington who had an interview, recently, May 28, 1986, on this particular issue because questions were raised by the European press as to whether or not they had complied with the United States position. Let me read just for a moment Lord Carrington's responses.

> And the Defense Planning Committee is in no way subordinate to the Council (North Atlantic Council—NAC). The Council doesn't bless what the Defense planning Committee does. How could it, when it has one nation which does not partake in those discussions: so there is no question whatever here of having a re-run of anything that we may have done in the DPC.

Later during the same interview he said:

> I think there really is no way in which that could be done. I mean, as I said, the DPC is not a subordinate body to the Council and there is no way that the Council could take cognizance of what happened in the DPC. Would it be prepared to.

I think it is clear with this letter, which I will also submit for the RECORD along with that of the former dean, Ambassador Staercke it is clear from the records of the Defense Planning Committee that that is the body of competent jurisdiction to handle issues dealing with force goals.

It somehow has been suggested here just because the DPC made the decision, not recognizing that it is the body of competent jurisdiction, it did not have the approval of its political leadership. I do not know of any particular permanent representative to the NATO alliance that acts without instructions from its very highest political officers and leaders. I would submit to my colleagues that no permanent representative is going to take action to approve anything without the approval of the cabinet level ministers and indeed the leadership of that country. For anyone to imply somehow these military type personnel are operating all on their own without any sort of accountability to higher political leadership I think is a clear misstatement of the facts.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the letter to Ambassador Abshire dated May 28, 1986, and the letter to Senator GOLDWATER from Ambassador Abshire, along with the excerpt from Secretary General Carrington's press conference.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ANDRE DE STAERCKE,
*Brussels, May 28, 1986.*

Ambassador DAVID M. ABSHIRE,
*U.S. Permanent Representative on the North Atlantic Council.*

DEAR AMBASSADOR ABSHIRE: The purpose of this letter is to confirm the information I provided you in our chance conversation last week on the competence of the Defense Planning Committee. In that conversation, I reminded you that I was the Dean of the NATO Permanent Representatives before, during, and following the time when France withdrew from the Alliance's integrated defense structure. You might also wish to know that I chaired the group of "fourteen" charged with working out a basis for negotiations with France and which then conducted these negotiations with France to an agreement.

Since France intended to cease participation in discussions and decisions on NATO's integrated defense structure, it became necessary to agree upon a way to reach final decisions on these matters at the highest levels. A number of possibilities were considered, with French participation in the search for solutions. Fortunately, a body

which could serve the purpose was already at hand—the Defense Planning Committee. In 1963 the Council had made a decision to constitute itself as a Defense Planning Committee for the purpose of carrying out the decisions of the 22-24 May 1963 Ministerial meeting in Ottawa, which "directed the Council in Permanent Session to undertake . . . further studies of the inter-related questions of strategy, force requirements and the resources available to meet them." The DPC so established was open-ended and chaired by the Secretary General. All that was needed was a Council decision giving the DPC full competence in all matters pertaining to NATO's integrated defense structure. The North Atlantic Council, in which, of course, France is a member, took this decision, with French agreement, the 3rd of November 1966. Thus the DPC is, in effect, the Council when it deals with matters upon which it alone is competent.

Force goals have a long history within the Alliance. Council communiques from the very first years of the Alliance suggest that the Alliance expected member nations to bend their efforts to meet defense requirements in the most effective way. These suggestions find specific expression in the 20-25 February 1952 communique from Lisbon, which refers to decisions on the "building-up of balanced collective forces to meet the requirements of external security," and the 23-25 April 1953 communique from Paris explicitly mentions "force goals." I must add, however, that force goals ceased being a matter for the Council once the DPC became competent for the integrated defense structure.

Sincerely yours,

ANDRE DE STAERCKE,
*Honorary Ambassador for His Majesty, the King of the Belgians.*

---

EXCERPT FROM SECRETARY GENERAL CARRINGTON'S PRESS CONFERENCE OPENING HALIFAX NORTH ATLANTIC COUNCIL MEETING, MAY 28, 1986

CHEMICAL WEAPONS MODERNIZATION NAC VERSUS DPC

Q: (A question was asked in French that did not pertain to chemical weapons. Secretary General Carrington apparently misunderstood the question and made the following statement.)

Carrington. "When the French left the integrated military structure of NATO in 1967, it was decided that the defense aspects of NATO would be hived off to the Defense Planning Committee (DPC). And the Defense Planning Committee is in no way subordinate to the Council (North Atlantic Council—NAC). The Council doesn't bless what the Defense planning Committee does. How could it, when it has one nation which does not partake in those discussions: so there is no question whatever here of having a re-run of anything that we may have done in the DPC. Oh, I'm sorry I misunderstood you. I thought you were talking about something a little bit different in the context of the DPC."

Q. (From Paul Taylor, Reuter) "Mr. Secretary General, last week the NATO Defense Planning Committee adopted force goals which included one from the United States on the production of binary chemical weapons. Some of the sticklers for detail in Congress are saying that their legislation actually required that this should be adopted by the North Atlantic Council. Is there any way that this could be done at this meeting and do you expect it to be discussed in any way?"

Carrington. "Is this your final, awkward appearance? It is, is it? This is your last one?"

Q. "I think you do have a news conference scheduled for Friday as well." (Outburst of laughter.)

Carrington. "I think there really is no way in which that could be done. I mean, as I said, the DPC is not a subordinate body to the Council and there is no way that the Council could take cognizance of what happened in the DPC. Nor, I think, would it be prepared to."

Q. "Lord Carrington, to return to the question of chemical weapons and resumed production by the U.S.: Given that the North Atlantic Council does not appear to be the competent body to approve force goals, could you say how you think this came to have been written into Congress conditionally (SIC) in the first place; and secondly, if Congressional opponents insist on this point, does it not suggest that it's going to be rather difficult to get it through Congress at all?"

Carrington. "Well, I've found it very difficult all my life to understand my own Parliamentary system and you really mustn't ask me how this got into Congress. I haven't the smallest idea how it got there. Perhaps it got there by mistake. I really don't know. But, to be frank, that isn't my business. My business is to operate this organization on the only basis on which it can operate, which is the legality of what it does, and there is no way, I think, in which the NATO Council can take cognizance of something which is the business of the DPC."

Q. "Getting back to chemical weapons, how would you characterize the deliberations on that issue last week in Brussels? Was that approval of the U.S. Force goals or was it merely recognition of it? And, getting back to your first answer on this question, are you saying that you do not expect any delegation here to raise the issue again, or, as chairman, would you rule them out of order?"

Carrington. "I don't think one would do that, but I don't think that there's anything that this body can do about it. The mechanics of these things are extremely difficult. What we did in the DPC last week was to adopt the American force goals, and adopt means adopt."

---

U.S. DEPARTMENT OF STATE,
*Washington, DC, June 13, 1986.*

Hon. BARRY GOLDWATER,
*Chairman, Committee on Armed Services, U.S. Senate.*

DEAR MR. CHAIRMAN: I am pleased to report that NATO has adopted the U.S. chemical weapons force goal. Although a few nations expressed reservations about the force goal, the vast majority of NATO countries recognized the need for and supported the production of binary chemical weapons.

On May 15, the Defense Planning Committee (DPC) in Permanent Session, composed of the Permanent Representatives to NATO of the 15 countries participating in the Alliance's integrated military structure, adopted the NATO force goals for 1987 to 1992, including the binary chemical weapons (CW) modernization force goal addressed to the United States. Defense Ministers, meeting as the DPC in Ministerial Session on May 22, according to normal NATO procedures "noted" the Permanent Representatives' action.

The Defense Ministers' action completes the etablished NATO procedure for adopting force goals for the Alliance. Further, since all authority of the North Atlantic Council related to NATO's integrated military structure developed by agreement of the NAC to the DPC, and since force goals are a central element of defense planning for the integrated military structure, the DPC, not the NAC, is the competent Alliance authority for the adoption of force goals by NATO.

I would like to call to your attention that some critics have asserted that we at NATO have through procedural means sought to downplay the significance of NATO's decision. This is simply not correct. That would be impossible in the context of the free and open political debate customary in NATO nations. As I am sure you are aware, Allied Governments have expressed intense interest in this matter. NATO's decision has been the focus of parliamentary debate and government attention at the highest levels in NATO countries. The instructions to Permanent Representatives and Defense Ministers at the DPC were cabinet-level instructions.

In this context of free and open debate, and because representatives of Norway and Denmark asked that I relay personally the positions of their countries to the Congress, I want to report each of the dissenting views. I must, however, stress that there was no attempt to block the adoption of the CW modernization force goal.

Of the 15 nations represented in the DPC, the Netherlands, Norway, and Denmark made it clear that their positions could not be interpreted as meaning that they supported the production of chemical weapons. Although the only issue before the DPC for decision was adoption of force goals, these three nations took the opportunity to make statements on national positions concerning other chemical weapons issues. They stated that chemical weapons could not be stored or based on their territories. One other Ally, Greece, citing the Protocol of Geneva of 1925, said it is against the production, modernization and storage of chemical weapons.

A point that may not be well understood, however, is that unlike the United States, Denmark, Greece and Norway signed the Protocol of Geneva of 1925 without reservation. While the United States reserved the right to use chemical weapons in retaliation to a chemical attack, Denmark, Greece and Norway formally renounced the right to do so. Thus, their actions with regard to the CW force goal are consistent with long-standing national positions.

The Allies who support the CW force goal constitute an impressive majority of the Alliance, in sheer numbers and in terms of their population, size of military forces, and proportion of contribution to NATO's defense. A number of these nations made especially forceful statements in support of the CW force goal.

As compelling arguments for the production of binary munitions, they cited the large and growing Soviet CW threat and the need for NATO to maintain its CW retaliatory capability to deter Soviet CW attacks. Without an effective chemical retaliatory capability, NATO's only response to Soviet use of chemical weapons will be nuclear. Several nations pointed to the Soviets' continued production of CW in the face of U.S. unilateral restraint. Clearly, U.S. restraint has not produced corresponding Soviet restraint, and the decision to adopt the CW force goal may be a new incentive for the Soviets to conduct fruitful negotiations in Geneva. Secretary General Carrington aptly

concluded the discussion on the CW goal by describing the arguments made in favor of the force goal as weighty.

Sincerely yours,

DAVID M. ABSHIRE,
*Ambassador.*

Mr. COHEN. Let me conclude, Mr. President, to say that the Senator from Oregon has cited three countries that disapproved the action taken. Who were those countries that dissented? Norway, our great ally Greece and Denmark. Three countries who in fact decided long ago in their interpretation of Geneva protocol to not allow any chemical retaliation by their forces if they are attacked with chemical weapons. These are the same countries who have had a long history of opposing any placement of any chemical weapons on their territory. So these are the three countries who could have been expected to dissent.

It comes as no surprise, but the fact of the matter is that the overwhelming majority of those countries represented in the DPC have approved the force goals outlined in Ambassador Dave Abshire's letter to us.

So I submit, Mr. President, that what we are doing here is seizing upon an ambiguity in order to strangle this particular program. I would try to draw some sort of an analogy. If, for example, the NATO countries were to say, "We have a treaty in mind; we would like to have the U.S. Congress give its ratification. Let us have the U.S. Congress in this particular document give the ratification of this treaty." Everybody in this body would say that is a mistake. The U.S. Congress does not include for this purpose the House of Representatives. That is something that the U.S. Senate does under the Constitution. It is the U.S. Senate that ratifies treaties, not the U.S. Congress. I would say the same position applies here. It is the DPC which has the authority. It is the body of competent jurisdiction. It has in fact approved the force goals outlined by the United States and for anyone to challenge that now, it seems to me, is seizing upon this ambiguity in order to kill the program.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I yield myself 3 minutes.

Mr. President, the only ambiguity that we are talking about is the ambiguity of the administration and the committee trying to cover the tracks of their mistakes. They did not really recognize the mistakes at the beginning, but this language was clearly understood by Mr. Abshire. He raised no objections against it at the time. Now Mr. Abshire says that it was probably a mistake on his part for not interpreting it. There is no ambiguity. The Committee on Appropriations knew precisely what it was doing.

If we are going to get into a debate here trying to define who is ambiguous, let me quote from a document published by the House of Representatives Committee on Foreign Affairs. They asked for a legal opinion on this issue in case a question of ambiguity arose. I quote from page 25 of that document:

A further difficulty with Ambassador Abshire's interpretation of the act is that according to his own testimony the type of action taken by the Defense Planning Committee on force goals is to note the force goals. The word "note" of course implies a perfunctory review.

While Congress instead required formal adoption on this point as well, the Ambassador's interpretation disregards the expressed language of the act and established NATO procedures.

Here is a legal opinion. There is no ambiguity about what the Congress intended or at least the Appropriations Committee approved. Where were the members of the Armed Services Committee? Why did they not object then if they had a different view? I assume they read those sections of the continuing resolution that had to deal with their particular area of responsibility. Why did they go to such pains to redraft the whole thing to comply with something after the fact? Because they knew very well that the administration is not in compliance now. No ambiguity in that. That is very straightforward. If they thought there had been ambiguity—they would have come in here, argued the ambiguity, and left it out of their bill.

Mr. President, this is pretty clear. The clarity is such that the committee has felt constrained to try to mend the situation after the fact.

Mr. President, I yield 3 minutes to my colleague from Arkansas.

Mr. PRYOR. Mr. President, I thank the distinguished Senator from Oregon for yielding. I am proud to be a cosponsor with him on this amendment.

I would like, Mr. President, to make reference to the comments my distinguished friend from Maine made a few moments ago about the attempted explanation of how this law has been actually, in my opinion, circumvented, and in my opinion, a raw circumvention of the intention of the Congress of the United States.

There is a quote from last year's appropriation bill adopted by this body, basically leading up to this point, saying that we could not produce the new binary chemical warfare "until said force goal has been formally adopted by the North Atlantic Council."

That is the law. That is not the committee report. And I do not know of one case in the history of this Republic when a committee report has superseded the law. I do not know of one case, Mr. President, when a letter from Lord Carrington in Great Britain has superseded a law passed by the Congress of the United States.

Mr. President, I do not know of one case where an interview or a letter with an Ambassador has superseded the law of the United States. It is clear. It is evident. It is right here on page 4 in the appropriations bill of last year, the North Atlantic Council. The President has now certified that we can go forward based on not the North Atlantic Council as this body explicitly informed and mandated the President to do, but something called the Defense Planning Committee. That is the basic issue in the Hatfield amendment. It is an issue about the integrity of the Congress of the United States mandating and putting requirements on a program that the President has circumvented.

Mr. COHEN. Will the Senator yield?

Mr. HATFIELD. Mr. President, will the Senator yield for just a moment for a matter of business that they have asked me to take care of? Mr. President, this should not be chalked against my time.

## IMPEACHMENT OF JUDGE HARRY E. CLAIBORNE

CONSIDERATION DATE TO BE SET LATER

Mr. HATFIELD. Mr. President, this is a unanimous-consent agreement cleared on both sides of the aisle.

I ask unanimous consent notwithstanding provisions of rule III of the Rules of Procedures and Practices of the Senate when sitting on an impeachment trial that the Senate not proceed to consideration of the articles of impeachment presented on Wednesday, August 6, 1986, until a time to be fixed later by the Senate.

Mr. BYRD. Mr. President, there is no objection on this side. I join with the distinguished Senator in presenting the request.

The PRESIDING OFFICER (Mr. SYMMS). Without objection, it is so ordered.

□ 1300

Mr. PRYOR. Mr. President, I ask unanimous consent if I have any time remaining from my 3 minutes, that the time may be yielded back to the distinguished Senator from Oregon, Senator HATFIELD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I yield another 2 minutes for a colloquy, if the Senator wishes that, to the Senator from Maine.

The PRESIDING OFFICER. The Senator from Maine.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

Mr. COHEN. Mr. President, will the Senator tell me who are the representatives who serve on the North Atlantic Council?

Mr. PRYOR. The foreign ministers of all the 15-member NATO nations.

Mr. COHEN. Can the Senator tell me who are the members who serve on the Defense Planning Committee?

Mr. PRYOR. The defense ministers of the same countries.

Mr. COHEN. Mr. President, I might mention to the Senator that the DPC is the North Atlantic Council without France. The same permanent representatives serve on both bodies with the exception of the French representative to the NAC. We are talking about the same people, with the exception of France.

I do not want to be in the position, and I hope the Senator from Arkansas does not want to be in the position, of saying——

The PRESIDING OFFICER. The time of the Senator from Arkansas has expired. There are 11 minutes remaining to the Senator from Oregon and 15 minutes remaining to the chairman of the committee.

Mr. PRYOR. Mr. President, I am not arguing with what the Senator from Maine or the Senator from Arkansas says is the law. I am stating explicitly what the law is. The law says the North Atlantic Council. It has no mention of the Defense Planning Committee. That is the reason that Senator HATFIELD, myself, and others are bringing this matter to the attention of the Senate today, because it is an issue of the integrity of the U.S. Senate, the Congress of the United States.

Mr. COHEN. Mr. President, I will respond to my colleague that notwithstanding his denigration of the report language, there is inconsistency in the language by way of its reference to the North Atlantic Alliance. The fact of the matter is that the DPC is the body of competent jurisdiction which deals with these issues.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. COHEN. Mr. President, I ask if I may have 1 more minute.

Mr. GOLDWATER. Mr. President, I yield 1 additional minute.

Mr. COHEN. Second, it has been suggested that the DPC did not formally adopt the force goal but simply noted it. I will submit for the Record, Mr. President, a letter from Ambassador David Abshire, which I would like to read.

On May 15, the Defense Planning Committee in Permanent Session, composed of the Permanent Representatives to NATO of the 15 countries participating in the Alliance's integrated military structure, adopted the NATO force goals for 1987 to 1992, including the binary chemical weapons modernization force goal addressed to the United States.

That is very clear language. They adopted formally the force goals as proposed by the United States. Ambassador Abshire's letter continues:

Defense ministers, meeting at the DPC in Ministerial Session on May 22, according to normal NATO procedures "noted" the Permanent Representatives' action.

Mr. President, I ask unanimous consent that the letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF STATE,
*Washington, DC, June 13, 1986.*

Hon. BARRY GOLDWATER,
*Chairman, Committee on Armed Services, Washington, DC.*

DEAR MR. CHAIRMAN: I am pleased to report that NATO has adopted the U.S. chemical weapons force goal. Although a few nations expressed reservations about the force goal, the vast majority of NATO countries recognized the need for and supported the production of binary chemical weapons.

On May 15, the Defense Planning Committee (DPC) in Permanent Session, composed of the Permanent Representatives to NATO of the 15 countries participating in the Alliance's integrated military structure, adopted the NATO force goals for 1987 to 1992, including the binary chemical weapons (CW) modernization force goal addressed to the United States. Defense Ministers, meeting as the DPC in Ministerial Session on May 22, according to normal NATO Procedures "noted" the Permanent Representatives' action.

The Defense Ministers' action completes the established NATO Procedure for adopting force goals for the Alliance. Further, since all authority of the North Atlantic Council related to NATO's integrated military structure devolved by agreement of the NAC to the DPC, and since force goals are a central element of defense planning for the integrated military structure, the DPC, not the NAC, is the competent Alliance authority for the adoption of force goals by NATO.

I would like to call to your attention that some critics have asserted that we at NATO have through procedural means sought to downplay the significance of NATO's decision. This is simply not correct. That would be impossible in the context of the free and open political debate customary in NATO nations. As I am sure you are aware, Allied Governments have expressed intense interest in this matter. NATO's decision has been the focus of parliamentary debate and government attention at the highest levels in NATO countries. The instructions to Permanent Representatives and Defense Ministers at the DPC were cabinet-level instructions.

In this context of free and open debate, and because representatives of Norway and Denmark asked that I relay personally the positions of their countries to the Congress, I want to report each of the dissenting views. I must, however, stress that there was no attempt to block the adoption of the CW modernization force goal.

Of the 15 nations represented in the DPC, the Netherlands, Norway, and Denmark made it clear that their positions could not be interpreted as meaning that they supported the production of chemical weapons. Although the only issue before the DPC for decision was adoption of force goals, these three nations took the opportunity to make statements on the national positions concerning other chemical weapons issues. They stated that chemical weapons could not be stored or based on their territories. One other Ally, Greece, citing the Protocol of Geneva of 1925, said it is against the production, modernization and storage of chemical weapons.

A point that may not be well understood, however, is that unlike the United States, Demark, Greece and Norway signed the Protocol of Geneva of 1925 without reservation. While the United States reserved the right to use chemical weapons in retaliation to a chemical attack, Demark, Greece and Norway formally renounced the right to do so. Thus, their actions with regard to the CW force goal are consistent with longstanding national positions.

The Allies who support the CW force goal constitute an impressive majority of the Alliance, in sheer numbers and in terms of their population, size of military forces, and proportion of contribution to NATO's defense. A number of these nations made especially forceful statements in support of the CW force goal.

As compelling arguments for the production of binary munitions, they cited the large and growing Soviet CW threat and the need for NATO to maintain its CW retaliatory capability to deter Soviet CW attacks. Without an effective chemical retaliatory capability, NATO's only response to Soviet use of chemical weapons will be nuclear. Several nations pointed to the Soviets' continued production of CW in the face of U.S. unilateral restraint. Clearly, U.S. restraint has not produced corresponding Soviet restraint, and the decision to adopt the CW force goal may be a new incentive for the Soviets to conduct fruitful negotiations in Geneva. Secretary General Carrington aptly concluded the discussion on the CW force goal by describing the arguments made in favor of the force goal as weighty.

Sincerely yours,

DAVID M. ABSHIRE,
*Ambassador.*

Mr. GOLDWATER. Mr. President, what is the situation on time?

The PRESIDING OFFICER. The Senator from Arizona has 13 minutes remaining and the Senator from Oregon has 10 minutes remaining.

Mr. GOLDWATER. Mr. President, this has been a very interesting debate. We have had this debate for so many years that I forget the number.

Mr. President, I am not a lawyer and I do not want to stand here and argue a legal matter. I know it is very proper and easy to say that we cannot do anything on this floor that is construed to be illegal. But, Mr. President, as chairman of the Armed Services Committee, I feel a great responsibility to making sure that our troops have the necessary equipment to defend themselves and to act in aggression, if that is needed.

Gen. Bernard Rogers, the chief of forces in Europe, puts this at the very top of his list of what he wants us to provide him with. This and the airborne, forward-looking radar are the

things that he keeps calling me about, talking to me about, that he has to have them.

Why? The fact, Mr. President, is that we had chemical weapons in World War II, which prevented the Germans from using the weapons they also had. We recall in World War I chemical weapons were used because the allies did not have any.

One might say, are the Russians using chemical warfare in Afghanistan? Yes, our Intelligence Committee has ample proof of that.

But the thing that bothers, Mr. President, is raising an objection to this particular item that we are talking about that in no way endangers the lives of anyone except the enemy. It is not a dangerous weapon until it is fired or dropped as a bomb, whichever may be the case.

Mr. President, I would hate to see our forces in Europe be faced with a chemical threat from the Soviets and we not have a better defense than we now have. Many of us have seen the demonstration put on by the Air Force, the Army, and even the Navy, pointing out how weak we are in this area of chemical weapons.

I can well understand the interest of my friend from Oregon because he has a long reputation, a well-earned reputation, of being opposed to this type of weapon. This is not something you carry around in a bottle or something you carry around in a box. It is a weapon that, when fired, becomes a weapon of chemical warfare that can be used and would be used against the enemy.

I have to merely repeat to my friends in the Senate that the top of the list in the eyes of Gen. Bernard Rogers are chemical warfare items.

I would hope that the Senate would once again overrule what I understand to be a basic feeling against this type of weapon and provide our troops with the ability to prevent the Soviets, or any other enemy, from ever using this type of weapon against the United States.

Mr. HATFIELD. Mr. President, I yield myself 3 minutes.

Mr. President, I find the debate getting into some very interesting interpretations now. To say that the Defense Planning Committee is the North Atlantic Council when it comes to dealing with defense matters would be like saying that the House of Representatives taking certain action is equivalent to the Senate taking action because we are both part of the Congress.

I have here, Mr. President, a number of letters from members of the North Atlantic Council who are for and against nerve gas production. Each one says there was no action taken in the North Atlantic Council on that issue. I have here, as I say, letters from representatives of Italy, Belgium, West Germany, the Netherlands, Greece, and other countries.

So if we are getting confused on what constitutes the North Atlantic Council, certainly the members of that Council are not confused. They said very clearly: "Nerve gas was not considered in our Council."

The argument offered by the Senator from Maine—that the requirement was fulfilled—is odd. Why did the committee even take action by noting this in the bill? Why did they go to that extent to try to correct something if they were so convinced that it had already been complied with?

Mr. President, it still comes back to a simple understanding of the English language. There is nothing complex about it at all. The bill stated two things very clearly: formally adopting—not noting, not being aware, not observing—formally adopting. And it said who shall formally adopt it: the North Atlantic Council. Bill language is precise.

Mr. President, there is no ambiguity here. I think there may be an attempt to correct something. That is certainly legitimate. I do not fault that. But for the committee to come here and say there was a lack of clarity as to what the Appropriations Committee meant or what Congress meant is wrong. I think what we have here may be a whole series of errors, but not a question of ambiguity.

All my amendment attempts to do is restore the integrity of Congress; the law stated the requirement clearly enough that it ought to be observed.

Mr. President, again I emphasize that of which everyone is fully aware: I am opposed to production. But research and development are going to continue. We are going to continue the money for that, and we are going to continue the money to develop the protective devices for our military personnel against nerve gas if, God forbid, it were ever used.

Though I would like to delete all production money, the issue here is simply that production money shall not be made available until the language in the CR is complied with. We restate that language of the amendment: Once true compliance is certified, production money can go. I do not know why people are so fearful of the Council not adopting chemical weapons production. This does not end the bill; this does not end the argument. With certification on the basis of the bill language, production money can proceed. That is all. Production money can proceed. A vote for this amendment is a vote to sustain the integrity of a government of law and the integrity of the Senate as well.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. GOLDWATER. Mr. President, I believe I have 9 minutes left.

The PRESIDING OFFICER. The Senator from Arizona has 9 minutes left, the Senator from Georgia has 5.

Mr. GOLDWATER. Mr. President, I yield to the Senator from South Carolina 5 minutes.

Mr. THURMOND. Mr President, I rise in opposition to the amendment offered by my distinguished friend from Oregon [Mr. HATFIELD]. The United States does not possess a credible deterrent to chemical attacks against United States and allied troops today. This lack of a credible chemical deterrent is probably the single most serious deficiency in our conventional defense posture.

According to the former Chief of Naval Operations, Adm. James Watkins:

> I no longer consider our 25-year old stockpile of unitary chemical weapons a credible deterrent. Today's stockpile is as much a liability as an asset. Were it not all that we had, I can not think of a single item in it I would wish to retain. In comparison to the Soviet's offensive chemical warfare capability, our posture almost invites the use of such weapons against us.

By undermining the multibillion dollar investment we are making to improve our conventional forces, the lack of a credible chemical deterrent increases the likelihood that we will be forced to resort to an early use of nuclear weapons.

According to Gen. Charles Donnelly, the Commander in Chief of the U.S. Air Forces in Europe:

> The gross imbalance that presently exists, in their favor, effectively negates our conventional force improvements, and places dangerously inappropriate reliance on our nuclear forces.

Mr. President, 72 percent of the administration's request for the Chemical Deterrent Program—$814 million—funds protective measures like defensive clothing. However, this is no substitute for an effective retaliatory capability. According to Gen. Fred Kroesen, the former Commander in Chief of the U.S. Army in Europe:

> There is no defense measure that alone can do anything more than delay the success of the enemy, not prevent it.

The United States has consistently taken a leading role in seeking effective chemical disarmament. In February 1984, Vice President BUSH tabled a U.S. draft proposal for a complete ban on chemical weapons before the Committee on Disarmament in Geneva.

The Soviets have been more serious in their approach to chemical disarmament as a result of last year's action by the Congress approving the Binary Chemical Modernization Program. To reverse this decision now would constitute a serious set-back to our negotiating efforts, and would eliminate the incentive that lead to this indication of seriousness on their part. Mr. President, I urge all of my colleagues to oppose this amendment.

71-059 O-87-15 (Pt. 14)

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. Mr. President, I yield myself 4 minutes.

The Senator form Oregon, my esteemed friend, has placed in the RECORD a number of letters from organizations, organizations that really do not have much to do with fighting wars—political organizations that we have many of in our country. I just wonder, Mr. President, standing here, what the GI in Europe must be thinking, if they are paying any attention at all to what we are attempting to do. I think he must be wondering whether it is more important for us to dot the "i" or allow him, a member of the service, to be able to fight for our freedom.

Mr. President, I can understand the noble intentions of anyone opposed to chemical warfare. It is a hideous type of weapon. But our potential enemy uses it today without any censure from anyone and the man who has the weapon always has one up on the man who does not have it.

I repeat that because we were equipped to retaliate with chemical weapons in World War II; there were none used. There were none used by the Japanese, although they were well prepared to use it, because we had the defense for it and we could have retaliated. So, Mr. President, I am not standing here on the floor today trying to argue a legal question, I am trying to argue the question of whether we are going to listen to the men's leader General Rogers in Europe, who says that this is the most needed weapon he has and he does not have anything over there now in the way of modern weaponry in chemical wartime.

We bring this up, Mr. President, every year. It has been up every year and it will go on and on in the years after I have gone. But I do not want to leave this body with the idea in my mind and other people's minds that I did not stand up and try to see that our uniformed man in service, wherever he is, is supplied with the proper weapons. That is what this amendment would do. It would deny him a weapon that he might be called upon to use and he does not have it.

□ 1320

Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 2 minutes remaining.

Mr. GOLDWATER. Mr. President, I am willing to yield back my time.

The PRESIDING OFFICER. The Senator from Oregon has 5 minutes remaining.

Mr. HATFIELD. Mr. President, does the Senator from Arizona yield the floor? I do not want to intrude.

Mr. GOLDWATER. Senator NUNN might come back and I am sure he would like to talk on this.

Mr. HATFIELD. Mr. President, just breifly I do not want the Senator from Arizona to misunderstand what I have introduced into the RECORD. Mr. President, what I did introduce in the RECORD was only the letters and statements of Ambassadors. I have not introduced any political organization letters. The letters I introduced express the political position of several governments on this issue and whether or not the issue raised in the North Atlantic Council.

Mr. President, I yield a minute to my colleague from Arkansas.

Mr. PRYOR. Mr. President, I thank my colleague for yielding. This debate has taken a very unique turn. It has taken a very unique turn because the name of the GI has been invoked, and if the name of the GI out there has been invoked, I wonder what our American GI in Europe thinks about unilaterally disarming ourselves pursuant to this force goal agreement which I think is not even valid, has not been approved by the right body. We are unilaterally disarming chemical warfare by removing our stockpiles from Europe while the Russians will have theirs in Europe. Now, how does that make our GI feel? What sort of transportation capabilities, Mr. President, are we going to have in a time of crisis when we have to call those foreign ministers or call those defense ministers and say, "We are in a situation we need to bring some nerve gas to your soil; will you let us?" And if so, maybe 16 days later, working 24 hours around the clock, we might get some of those munitions there.

Mr. President, I think we should certainly reexamine what we are doing today, and I very much hope the Hatfield amendment will pass.

● Mr. HATFIELD. Mr. President, I am pleased to be a cosponsor of the amendment by the distinguished Senator from Oregon.

Opponents of this amendment will remind the Senate of the Soviet's activities in the chemical weapons area. And they do so for good reason. In Afghanistan, and in South East Asia, we've seen repeated evidence of Soviet use of toxins. We've seen the appalling deaths and injuries those gases inflict. Soviet behavior in this area is repugnant; the Senate stands united in our condemnation.

Decisions on defense policy arise from a variety of factors including, but not limited to, the depths to which the other side sinks. But there is a higher standard, at least in the judgment of this Senator: our national interest.

But in at least four respects, the committee recommendation has failed that test.

First, it is not in our interests to build a weapon we don't need. The United States possesses a large and useable chemical stockpile sufficient to meet our requirements. In testimony, Secretary Weinberger has said that procurement of additional chemical artillery shells is not needed to redress existing military deficiencies. While the Defense Department states repeatedly that only a small portion of the stockpile is militarily useful, the current arsenal is so enormous that a small fraction could force Soviet soldiers into protective gear for 60 days of continual engagement.

Second, it is not in our interests to build a weapon which cannot be positioned effectively. The rationale for the new weapon assumes a Soviet attack against Europe. Many of our allies will not accept new deployments of chemical weapons on their soil. And while the Government of West Germany may be willing to accept binary chemical weapons, Chancellor Kohl adds that existing supplies of chemical weapons must be removed from German soil and, in peacetime, that binary chemical weapons must be stored elsewhere.

Third, binary chemical weapons have never been tested in the field. American combat forces should not be asked to stake their lives on untested munitions. The technical problems which have plagued the development of the Bigeye bomb since the program's inception have only exacerbated concerns about the reliability of these new weapons, and increasingly called into question the wisdom of basing our deterrent upon them.

Fourth, the production of binary chemical weapons will be expensive. Cost estimates run as high as $2 to $3 billion over the next decade. Unless a better case can be made suggesting this weapon is either necessary or justified, we'd do well to invest these scarce defense resources elsewhere.

Mr. President, the Soviet program in chemical warfare represents a serious threat because we are not prepared to face a chemical weapons attack or conduct military operations in a contaminated environment. So long as Soviet forces are better prepared to fight once chemical weapons have been used, our troops will be an inviting target on the field.

To meet this challenge, we must improve substantially our capabilities to defend our soldiers against a chemical attack. We can do so by meeting our existing goals for improvements in defensive measures, developing new and more effective protective equipment, enhancing early warning capabilities, and improving the training of our troops to cope with operations in a chemical environment. If the DOD pursued the advancement of defensive capabilities with the same dedication it applies to increasing our stockpile,

our forces would be better protected than they are today.

Mr. President, when we last addressed this issue, Congress conditioned the production of new chemical weapons on the formal approval of the North Atlantic Council. Senators were informed that the specific language which exacted that commitment was acceptable to Administration officials. But this spring, the administration ignored the law and instead consulted NATO's Defense Planning Committee, a body which regularly rubber stamps hundreds of recommendations at a time. We put that requirement in the law for a very important reason.

Our own military, and the military branches of our alliances, must not operate in a political vacuum, for the military itself is but a means to political ends. To ignore the political implications of the deployment of chemical weapons on European soil will surely lead us into a swamp of political debate.

The intent of Congress was not to ignore the debate that lingers beyond the horizon. The goal of Congress was to bring on that debate, to engage now in political discussions about chemical weapons—long before we commit ourselves to billions of dollars in expenditures. This administration should recognize that the development of new weapons systems is not just a military decision but a political decision as well. That is why Congress instructed the administration to handle the issue with sensitivity. But it failed to do so.

But fundamentally, this amendment is not offered in response to the administration's arrogance; it is offered with more important objectives in mind. Our security will be better protected by relying on existing stockpiles, by spending more on defensive capabilities, and by operating in concert with our allies. These policies are embodied in the Hatfield amendment. I urge its adoption.●

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. I will yield to the Senator from Georgia my remaining time.

The PRESIDING OFFICER. The Senator from Georgia is recognized for 2 minutes.

Mr. NUNN. Mr. President, I was unable to be here for the whole debate, but I do think I understand the dilemma. The Senator from Oregon is exactly right in saying that the words used last year in terms of the North Atlantic Council were what they intended. I think the question for us today is, is that the right choice? Because if we are going to use the North Atlantic Council to make decisions that are vital to the national security of the alliance on which we depend for our own frontline security in the world, NATO, we are going to be using the wrong council, because they are going to be people who do not participate in the military organization of NATO.

So the question is not in my view whether the Senator from Oregon is correct in what his intention was, and I regret I have not heard the debate. The real question is what do we intend now. I submit to the Senate that the North Atlantic Council is the inappropriate body to make military decisions for NATO because they are not the body that is represented in terms of the military command in NATO. That is the question. I think what we have to do is remedy the mistake that was made. It was not a mistake with some people because they certainly intended what they drew up and the words were chosen as to what they intended, but it is a mistake in terms of running NATO that way. I do not believe the U.S. Senate should impose on NATO a structure where the North Atlantic Council makes decisions when there are people who sit on that council who have nothing to do with the military structure of NATO.

So that is the long and short of what we have to decide today. I think it is an enormously important decision. It goes beyond just the question of chemicals. It goes to the question of what the U.S. Senate says about the structure that governs the military of NATO. That should not be the North Atlantic Council.

The PRESIDING OFFICER. All time of the opponents has expired. The Senator from Oregon.

Mr. HATFIELD. I have one more statement. Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 3 minutes.

Mr. HATFIELD. Mr. President, let me just say that this is not the question before us. I respectfully disagree with the Senator from Georgia. The question before us today, Mr. President, is very obviously whether or not the requirement this Congress enacted, what it enacted last year, was met by the President's certification. The Senator has in effect perhaps implied that maybe this was the wrong way to go, but it was before this body. No one raised the question then. It was considered by the committee. It was considered by this body. It was signed into law. Now after the game is started, we want to come back and change the law, change the rules.

Mr. President, I think it is very important to note that the Council, whether we agree with whether that is the right body or not, is the body that was established in law and it has not been complied with. That is the simple question. I would challenge the Senator from Georgia on that. He said the Defense Planning Council is the proper body. The Military Review Committee has already adopted it, and the Defense Planning Council has noted the adoption. But it is both a military and a political issue and the Council is therefore an appropriate body. We are just saying let us force the politicians to take a position. The United States is so often put in a situation in which we have to confront the anti-American demonstrations because the politicians are hiding, afraid to admit that they let the defense ministers and military people approve some new weapons system. They take a hands-off approach. We must force the politicians to take a stand. That is what I suggest and that is what this amendment will do. Moreover, it will restore the integrity of the Congress.

Mr. GOLDWATER. Mr. President, I have no time to yield back but I will yield something.

Mr. President, I ask for the yeas and nays.

Mr. HATFIELD. I know of no one else who wants to speak. I yield back my time.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Oregon. The clerk will call the roll.

The legislative clerk called the roll.

The result was announced—yeas 43, nays 57, as follows:

[Rollcall Vote No. 182 Leg.]

YEAS—43

| | | |
|---|---|---|
| Andrews | Harkin | Mitchell |
| Baucus | Hart | Moynihan |
| Biden | Hatfield | Packwood |
| Bradley | Heinz | Pell |
| Burdick | Inouye | Proxmire |
| Byrd | Kassebaum | Pryor |
| Chafee | Kennedy | Riegle |
| Cranston | Kerry | Sarbanes |
| Danforth | Lautenberg | Sasser |
| Dodd | Leahy | Simon |
| Durenberger | Levin | Specter |
| Eagleton | Mathias | Stafford |
| Evans | Matsunaga | Weicker |
| Ford | Melcher | |
| Grassley | Metzenbaum | |

NAYS—57

| | | |
|---|---|---|
| Abdnor | Glenn | McConnell |
| Armstrong | Goldwater | Murkowski |
| Bentsen | Gore | Nickles |
| Bingaman | Gorton | Nunn |
| Boren | Gramm | Pressler |
| Boschwitz | Hatch | Quayle |
| Broyhill | Hawkins | Rockefeller |
| Bumpers | Hecht | Roth |
| Chiles | Heflin | Rudman |
| Cochran | Helms | Simpson |
| Cohen | Hollings | Stennis |
| D'Amato | Humphrey | Stevens |
| DeConcini | Johnston | Symms |
| Denton | Kasten | Thurmond |
| Dixon | Laxalt | Trible |
| Dole | Long | Wallop |
| Domenici | Lugar | Warner |
| Exon | Mattingly | Wilson |
| Garn | McClure | Zorinsky |

So the amendment (No. 2606) was rejected.

□ 1340

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, as I remarked earlier, the administrative branch of our Government does not get their things down here in time. I just received, about 5 minutes ago, a letter from the Secretary of State endorsing our position on chemical weapons.

I ask unanimous consent that it be printed in the RECORD.

Mr. NUNN. Mr. President, I ask my chairman, the Senator from Arizona, should we also stipulate that the letter made a profound difference in the outcome of the vote?

Mr. GOLDWATER. Oh, it made it.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF STATE,
*Washington, DC, August 6, 1986.*

Hon. BARRY GOLDWATER,
*U.S. Senate,*
*Washington, DC.*

DEAR BARRY: The United States faces a serious challenge to our national security and that of our allies on the issue of chemical weapons modernization. The threat is real and growing. The Soviet Union has persisted in its build-up of chemical weapons far beyond any defensive need. There are only two effective responses to this threat: arms control—a total and verifiable ban on chemical weapons—and, in the absence of such a ban, maintenance of an effective U.S. deterrent capability.

The foremost objective of this Administration remains a comprehensive, effectively verifiable, global ban on all chemical weapons. We have been pressing the Soviets since 1977 to negotiate a ban, without result, and the Soviets have not yet constructively addressed critical verification issues in response to our 1984 Draft Treaty in Geneva. The Soviets lack any real concrete incentive to negotiate seriously on a chemical weapons ban as long as they retain a vast superiority in chemical munitions and face an aging and deteriorating U.S. chemical weapons retaliatory capability. Unilateral restraint for the last 17 years has not been reciprocated.

After last year's authorization by Congress to begin the modernization of our retaliatory chemical weapons stockpile, the Soviets, in their characteristic manner, at first refused to participate in chemical weapons treaty negotiations and then immediately attacked the action with polemics and posturing. Since that initial reaction, however, the Soviets have negotiated more seriously, even though they have yet to address all relevant issues.

Until a comprehensive ban on chemical weapons is achieved, we must maintain deterrence through a strong defensive posture and a credible retaliatory capability. Our aging unitary chemical weapons stockpile is deteriorating. Only a small percentage is militarily useful. The production of new binary munitions will provide the U.S. with the strong and effective deterrent. The threat of chemical weapons attack against U.S. forces is not limited to a Soviet attack in NATO Europe; it is a world-wide threat. Binary munitions which are safer and easier to transport than unitary weapons will provide the United States with the flexibility necessary to deter the threat of chemical weapons attack against U.S. forces wherever that threat may occur.

As you know, the President has certified to Congress that certain conditions required by Congress for the release of Fiscal Year 1986 funds for the binary chemical weapons modernization program have been met. NATO adopted the chemical weapons modernization force goal addressed to the United States. The U.S. has also developed a contingency deployment plan for binary munitions, and we have consulted NATO Allies on that plan.

The unitary chemical munitions currently in Europe provide an extremely limited deterrent and retaliatory capability. These munitions and the rest of the current unitary CW stockpile will be destroyed in conjunction with the acquisition of binary munitions by September 30, 1994, as directed by the Congress. We appreciate the concerns some have expressed regarding a chemical retaliatory capability in Europe, and we have weighed such considerations carefully in proceeding with discussions with our NATO Allies. We are convinced that even without peacetime deployment in Europe, the new binary munitions will provide a CW deterrent clearly superior to what we now have. Binary munitions will effectively protect our forces and the forces of our allies not only in NATO but throughout the world.

The production of binary munitions is crucial to U.S. security, and supports our arms control efforts. On this issue, so critical to our Nation's safety, I sincerely welcome your support.

Sincerely yours,

GEORGE P. SHULTZ.

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas, Senator PRYOR, is recognized to offer an amendment on the Bigeye bomb, on which there shall be 30 minutes' debate equally divided with no amendments thereto in order.

Mr. PRYOR. Mr. President, before we start the time running could we have order in the Chamber?

The PRESIDING OFFICER. The Senator is correct. The clerk will not start the time.

Mr. GOLDWATER. Mr. President, will the Senator yield for an insertion charged to my time?

The PRESIDING OFFICER. The Senator from Arizona.

Mr. NUNN. Mr. President, may we have order, please?

The PRESIDING OFFICER. Will all Senators in the Chamber clear the aisle in back of the room and remain silent so we can hear the distinguished chairman of the committee?

□ 1350

The PRESIDING OFFICER. The Senator from Arkansas will suspend until we can maintain order in the Chamber.

Mr. NUNN. Will the Senator yield?

Mr. PRYOR. I am glad to yield, if it does not count against my time.

Mr. NUNN. Mr. President, before the Chairman leaves the floor, I am going to propound another unanimous-consent request on another amendment that I would like to make sure is acceptable to both sides.

Mr. President, I ask unanimous consent that, following disposition of the Pryor amendment on Bigeye, which I understand is or will be the pending amendment in a moment, that the recurring Wilson amendment be temporarily laid aside for the consideration of a DeConcini amendment on the Stinger missile; that 40 minutes of debate be held on the DeConcini amendment, equally divided; and that no amendment to the DeConcini amendment be in order.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

AMENDMENT NO. 2612

(Purpose: To restrict procurement in connection with the BIGEYE binary chemical bomb program.)

Mr. PRYOR. Mr. President, on behalf of myself, Senator GORTON and Senator HATFIELD, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Arkansas [Mr. PRYOR], for himself, Mr. GORTON and Mr. HATFIELD, proposes amendment numbered 2612.

Mr. PRYOR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 4, line 13, strike out "$6,121,657,000" and insert in lieu thereof "$6,093,124,000".

On page 6, line 20, strike out "$10,374,848,000" and insert in lieu thereof "$10,346,448,000".

On page 10, between lines 16 and 17, insert the following new section:

SEC. 110. RESTRICTIONS ON THE BIGEYE BOMB PROGRAM

(a) IN GENERAL.—Except as provided in subsection (b), none of the funds appropriated pursuant to an authorization contained in this or any other Act may be used for procurement or assembly of the BIGEYE binary chemical bomb, for the procurement of any component or subcomponent for such bomb, or for the procurement of any construction facilities or equipment associated with the production of such bomb until specific, subsequent legislation has been enacted authorizing the obligation and expenditure of funds for production of the BIGEYE binary chemical bomb.

(b) EXCEPTION FOR RESEARCH, DEVELOPMENT, TESTING, AND EVALUATION.—The requirements of this section shall not apply to funds obligated solely for the purpose of carrying out research, development, testing, and evaluation in connection with the BIGEYE binary chemical bomb program.

(c) LIMITATION ON FISCAL YEAR 1986 FUNDS.—Except as provided in subsection (b), the funds appropriated to carry out the BIGEYE binary chemical bomb program in fiscal year 1986, and which remain unexpended on the date of the enactment of this Act, may not be used to carry out such program.

Mr. PRYOR. Mr. President, this amendment is not, and I repeat, not another amendment just about chemical warfare nerve gas. In fact, the two sponsors of this amendment at the desk, myself and the Senator from Washington, have voted differently on the production of chemical weapons in the past. But today, on this particular amendment relative to taking that nerve gas ultimately to the target, the Senator from Washington and the Senator from Arkansas are in agreement.

We agree that we should not pay for the production of thousands of Bigeye bombs that do not work. We agree that we must not put our own pilots of those planes carrying that Bigeye bomb with the nerve gas in jeopardy. And we agree that we have consistently failed, in the Bigeye Test Program, the most elemental test of delivering nerve gas to its ultimate target. Therefore, Mr. President, we think, or at least the Senator from Arkansas thinks we are making a mockery of the theory of deterrence in this issue of chemical warfare.

We have before the Senate today, Mr. President, another Divad on our hands. We remember that debate last year. How in the world did we ever reach the point, when we had a gun that would not shoot, where we had spent billions of dollars on a weapon that would not work, how in the world did we ever get in the position of funding all of that money all of these years? The answer was simple. A procurement mentality. A procurement mentality that said to the Congress, "Go ahead and give us the money for the Divad and we will fix it later."

Mr. President, that is precisely the issue today. The Bigeye bomb has not met the test and we are here today to talk about authorizing the beginning of the production of Bigeye bombs that do not work.

Mr. President, this amendment has four parts. First, it removes from the bill the $57 million that has been requested for Bigeye production in 1987. Second, it prohibits expenditure for production of the $104 million that Congress appropriated last year, but which was fenced, and fenced for a good reason, but not spent. Third, Mr. President, our amendment allows research, development, and testing of Bigeye to continue. But, fourth, it prohibits any production of Bigeye bombs except solely for testing purposes until the Congress approves production by specific legislation.

Mr. President, this amendment would not terminate the Bigeye Program. It merely insists that we have a design and a bomb that works before we produce it and before we spend a billion dollars, ultimately to wake up someday and see that it does not work.

Mr. President, I am honored today to be joined in this amendment by the distinguished Senator from Washington, Senator GORTON. I notice he is on the floor. Mr. President, at this time, I yield the floor and I yield the Senator 4 minutes.

The PRESIDING OFFICER. The Senator from Washington is recognized for 4 minutes.

Mr. GORTON. Mr. President, I thank my distinguished colleague from the State of Arkansas. He has both eloquently and succinctly outlined the reasons for this amendment. He has also pointed out that we were on opposite sides of this issue 1 year ago.

The Senator from Arkansas has consistently opposed the production of this type of chemical weapon. I did, for my first several years as a Member of the Senate, on the ground that we should attempt to negotiate a prohibition against such weapons with the Soviet Union. I changed my mind last year because those negotiations seemed to have been unsuccessful and, because of Soviet production, that some kind of American counterforce was needed.

I must confess, Mr. President, that I probably differ from the Senator from Arkansas in that in each case on which I have voted on this issue, I regarded it as an extremely close question with very, very good arguments on both sides.

This year, I can enthusiastically join with the Senator from Arkansas, however, in connection with a crusade on his part which is certainly not limited to this weapon but simply is a demand that, before we go into production on expensive and controversial weapons systems, we have reasonable assurance that they will work and that they do not threaten those who use them more greatly than they deter aggression on the part of the other side, a potential aggressor. It is precisely for that reason that this amendment is proposed.

The General Accounting Office has indicated a wide range of problems with this weapon, a wide range of failures in the testing of the weapon, a very significant risk to those who deliver it by air and otherwise, so that it would be improvident, in my view, to go ahead with production until that set of problems is solved.

The Senator from Arkansas is not attempting to bar all work in this connection. The amendment continues to allow research, it continues to allow development, and it continues to allow testing and then say, simply, because of the attitude of the Department of Defense, before there is production, that the Department of Defense satisfy the Congress of the United States that those tests have been successful and that we have a weapon which provides a true deterrent.

It is obviously as a deterrent that this weapon was conceived in the first place. It is not something which we intend to use on a first-use basis by the wildest stretch of the imagination. But a deterrent is only a deterrent to the extent that it is believable, to the extent that it is operational, to the extent that it works.

The Defense Department has criticized the General Accounting Office tests and recommendations on the basis of being out of date, but has refused to the GAO the kind of information which would be necessary to completely bring that report up to date, and yet, in addition, internal memoranda within the services indicates the same kind of failures which the GAO report found.

So this is a cautious and simple amendment. It can be joined in by those who feel that this deterrent is appropriate as a part of our NATO defense, as well as those who, like the Senator from Arkansas, have not felt it to be appropriate at all, because it makes the most fundamental and simple demand, which we should make across the board with all weapons systems, that testing show that a weapon is effective and not an overweening danger to those who utilize it before it goes into production.

For that reason I join with the Senator from Arkansas and ask for the approval of the amendment.

□ 1400

Mr. PRYOR. Mr. President, I thank the very distinguished Senator from Washington for his very eloquent comments on this issue. I would like to just remind our colleagues of this point. Since 1963, the Bigeye bomb has been researched, developed, tested, and now 23 years later and six Presidents later the Bigeye bomb still does not work. Who says it does not work? The General Accounting Office, after years of study, says so. They said it does not work because of several areas: One, pilots and aircraft delivering Bigeye will be more vulnerable to air defenses than is desirable; two, the bomb fuse failed many times. Mr. President, some of these concerns and some of these findings are agreed on by the Department of Defense.

Third, the device to mix the binary chemicals have failed many times. The shelf life requirement has not yet been met. Five, at certain temperatures the Bigeye bomb is not usable.

Mr. President, this program is riddled with problems. But the Defense Department today still wants to go ahead with the production and the purchase of Bigeye bombs. They want

to do it now. They want to do it before the problem is fixed, not after the problems are fixed. They want their money now.

This is almost like going down to an automobile agency and buying an automobile and the dealer says this is a $20,000 automobile I am trying to sell you. You say, well, is there anything wrong with it?

"Yes. The drive shaft may come undone. It may break. It has two flat tires. It may blow up on you. But you buy it, you pay me cash, and we will fix it later."

That is precisely or very similarly, Mr. President, the situation we are in with the Bigeye bomb.

The DOD talks very little about the most serious problem involved. The technical nature makes pilots and aircraft trying to deliver extremely vulnerable to enemy air defense. And to deliver the Bigeye normal bomb delivery cannot be used. Instead, under computer control the pilot must come in low on the target, put his aircraft into a steep climb close to the target and then loft or lob the Bigeye bomb in an arching trajectory so the bomb's chemicals have time to mix.

Mr. President, unfortunately this whole scenario gets worse and worse. By exposing themselves to enemy defenses our own pilots delivering this bomb will probably deliver duds. In its chemicals and developmental test, the Bigeye has experienced numerous failures and the GAO has stated in other instances to allow for the illustration of test success criteria have been relaxed and removed altogether, and in still other instances no test whatsoever has been conducted on the Bigeye bomb.

In the most recent report, Mr. President, by the General Accounting Office of May 1986, the General Accounting Office made some very devastating statements relative to the production of the Bigeye bomb.

One, it is stated that the Bigeye bomb is not ready for production. It is that simple. It is that clear. And this amendment will simply fence those funds, Mr. President, until we have a bomb that works, and until the Congress is satisfied that the bomb works, and until the Congress has specifically appropriated and authorized the money for those bombs to be produced.

Mr. President, I reserve the balance of my time.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER (Mr. PRESSLER). The Senator from Maine.

Mr. COHEN. Mr. President, I agree with almost every point the Senator from Arkansas and the Senator from Washington have made. I say almost, because there are some critical points of disagreement, plus the fact that I ultimately come to a different conclusion than the two distinguished Senators do. Let me point out some of the things that I agree with.

Number one, the statement by the Senator from Arkansas that we do not want to buy a Bigeye that does not work—I agree. That we do not want to put our pilots at risk, this Senator agrees with that as well. That we do not want to purchase a system that consistently fails, I agree with that as well. We do not want to produce another Divad. No one would want to dispute that particular proposition.

Then we come into something that diverges quite seriously from what the Senator is arguing. The Senator from Arkansas said we are about to produce thousands and thousands of these weapons. Wrong. This is a limited initial production for the purpose of continuing the testing itself. It is far less than a thousand bombs we are talking about, not thousands upon thousands, but a very low initial rate for the purpose of conducting even more tests to make sure we do not produce a system that does not work, that does not put pilots at risk, and that does not consistently fail.

The Senator from Arkansas has cited the GAO analysis. Again, I think he is at least partially correct. The GAO did make an analysis of the testing of the Bigeye bomb, but they made their analysis based upon old data. They made their analysis upon the initial research phase of the testing, which showed a number of deficiencies. They did not have access to the first phase of the developmental testing which corrected a number of those deficiencies. So this is something that GAO was not able to address. So, for that reason, the GAO study itself is somewhat deficient. It is no fault of GAO. They did not have that information available.

For example, there were some problems with the fusing of the Bigeye. That was a major deficiency. Since then, it was corrected so that in 14 out of 15 tests, the operational tests proved successful. So we have a substantial body of evidence that the fuse problem has been dealt with. That was one type of fuse, the so-called fuse 37 electrical generator. There was another fuse problem. That too had some failures. They corrected that during their operational testing. Now we have 39 out of 40 tests conducted successfully.

There was another problem which I believe the Senator from Arkansas addressed in terms of creating a problem for the pilots. There was in fact a problem created for the pilots. When they tested it to the extreme, they found out the pilots would be at risk under certain conditions. They changed the entire operational method so that now the pilots are not at risk. There is no mixing of the chemicals until such time as the bomb is actually released. It has a time of release to target of about 30 seconds. There is absolutely no way the structure can rupture at least until 5 minutes under the new testing standards.

So the tests that were conducted initially were designed to find out what the flaws were. Many of those flaws have been corrected to date.

I would also like to cite a statement from John Krings. I believe the Senator from Arkansas is familiar with John Krings, Director of Operational Test and Evaluation. As I recall—the Senator from Arkansas can correct me if I am wrong—the Senator was the primary motivating Senator behind establishing this office. And, as I recall, the Senator really wanted to put Congress in the position of having this kind of access to information. I want to commend the Senator for it. I think we all supported it. Let me read what John Krings said. He said:

> We do not totally agree with the recent GAO report on Bigeye. Bigeye has demonstrated feasibility but has not demonstrated satisfactory operational effectiveness. At this point in the procurement cycle only Low Rate Initial Production (LRIP) is being addressed. Bigeye has shown progress and capability warranting LRIP.

So we have the director of the very office the Senator from Arkansas helped to establish saying we should go forward at this point, that some of the deficiencies have been addressed. There may be more. We are addressing them, but it would warrant low-rate initial production.

Mr. PRYOR. Will the Senator yield for me to make a comment? I did support, and I hope I helped create the office. I did not support Mr. Krings. I really like Mr. Krings. I talk to him every now and then. But, in fact, I voted against his confirmation hearing in this body. I thought he was too close to the industry and I thought he would be on tap from the Department of Defense.

Mr. COHEN. I can only say to my good friend he was right in creating the office, and wrong in the assessment of the ability and objectivity of Mr. Krings.

Mr. President, the Senator from Arkansas has suggested we do not want another Divad. I agree with that. But we do want some more M-1's, HARM's, and Harpoons and those are the very systems which also had some initial problems that were resolved.

I would suggest that, rather than associating this particular system with the Divad, he ought to compare it to the M-1 tank, HARM, and Harpoon which have evolved through their operational tests to become very effective fighting systems.

So for all of the reasons I have indicated that the deficiencies have been addressed, most of them, and it would warrant a low rate of initial production, I urge my colleagues to reject the

amendment of the Senator from Arkansas.

□ 1410

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. COHEN. I yield such time as required to the Senator from Georgia.

Mr. NUNN. What time remains?

The PRESIDING OFFICER. Eleven minutes 20 seconds to the opponents and 3 minutes and 11 seconds to the proponents.

Mr. NUNN. Mr. President, I oppose this amendment but I oppose it reluctantly. I say reluctantly because in most circumstances, the problems with the Bigeye would be sufficient to warrant the steps that the Senator from Arkansas advocates. They are advocating we continue a test program, that we not go into what we call low-range or low-intensity production. The low-range intensity production is to avoid going into major production, to avoid committing to the system.

The committee's position is that the program has sufficient problems that we should not commit to major production lines.

The problem with the position of the Senator from Arkansas is this: The problem is, we have neglected updating our chemical capability for years and years and years. What would the pilot of an F-4 aircraft be charged with doing if we had to retaliate with chemical weapons now or if we had to get into some kind of chemical response to a chemical attack?

I am told that an F-4 aircraft pilot would have to fly directly over the target, just like a crop duster, and he would have to spray the chemicals on whatever the target was. Presumably, the target is going to be shooting back.

That is an outmoded delivery system. It is a suicide mission.

Most F-4 pilots I know of would not really relish that opportunity. Some of them are brave enough to probably do it.

What is our other alternative? Suppose we have a chemical attack. Our other alternative is to do what NATO hopefully will never have to do, and that is, to respond to a chemical offensive attack—the Soviets and Warsaw Pact have chemicals all over Europe—to respond with nuclear weapons. In other words, escalate up the nuclear ladder in response to a chemical attack.

That is not what we should be postured to do. We want nuclear weapons to be the absolutely last resort. To be in a position to have to use nuclear weapons in response to a chemical attack is an intolerable position.

That is why I support, with a great deal of reluctance, going into chemical production, going into binary production which is much safer.

What does the Bigeye do? The Bigeye bomb is not the most modern system. Technology goes back quite awhile. It is supposed to allow the pilot to come out of the low-flying pattern, to go up and to toss the weapon far enough so that it lands on the target. At least he has a chance. He is not having to come right in on top of whatever the target is.

That may seem somewhat hypothetical here on the floor of the Senate. It is not hypothetical if you are charged with flying those aircraft.

What is the justification for the Bigeye that has had a lot of problems? The Senator from Arkansas and the Senator from Washington have documented the problems. The General Accounting Office has. I think some of the information is based on out-of-date information but some is accurate. We know there are some real problems with it.

The problem with not going on with the committee position is that even if they ironed out the problems with the test, you are going to have probably 1½ to 2 years or maybe longer in delay. We are going to be in the continuing intolerable, untenable situation of having an outmoded delivery system for chemical weapons. We are going to continue to have a very weak deterrent and we are going to continue to rely, frankly, on having to escalate right up the nuclear ladder in response to a chemical attack. That, to me, is an intolerable position for NATO.

It is my opinion that the committee's position is not as safe a position as what the Senator from Arkansas is advocating in terms of wise use of the taxpayers' money.

If we were judging this simply on what is the safest way we can proceed with the taxpayers' money, I would vote for the amendment. But we have to look beyond that. We have to say, can we afford another year, 2 years, 3 years—I do not know how long it would be—to iron out all of these problems, or should we go ahead with a very low-range program on production, taking some risk, admittedly being willing to cancel if we cannot get the weapon to work properly, but then not having to restart and reinstitute a production line, thereby taking a lot of time?

What we are really asking our colleagues to do, as I see it, is to take a chance with this program. It might end up not being a bomb. It might end up being a bomb. We are not sure. I am not going to guarantee that on the floor of the Senate.

I believe in this case, taking a higher risk with the taxpayers' money that may not prove to be absolutely wise 2 years from now is worth the risk because the risk of continuing in a position where we do not have a credible deterrent with chemical weapons is a risk that I am not willing to take.

I am willing to explain to my constituents and the American people that we are paying a higher premium here of risk than we would like to pay in terms of purely looking at weapons procurement. But we are looking beyond simply the question of weapons procurement in this debate today.

I congratulate my friend for bringing this to the attention of the Senate. We have to continue to scrutinize this program. We may get to the point where it is a failure, where we have to start over. I would hope that would not happen because I believe the consequences would be adverse not only to our military posture but to our hopes for securing some type of arms control agreement on chemical weapons. That is the ultimate hope, to do that.

I would urge my colleagues to vote no on the Pryor amendment.

Mr. KERRY. Mr. President, last year, Secretary of State George Shultz affirmed that, and I quote, "The sad fact is that a half-century of widely accepted international restraint on the development of chemical weapons is in danger of breaking down." End quote.

The sad fact, Mr. President, is that the same administration which Mr. Shultz serves is in danger of unilaterally breaking down that restraint. Today, the possession of chemical weapons resides in only a handful of nations. Tomorrow, if the United States is to terminate its 17-year mortorium on nerve gas production we will set an example for all the world that nerve gas—in the form of the Bigeye bomb or other binary projectiles—is a critical weapon for every nation's arsenal. U.S. production may well directly encourage the same proliferation of chemical weapons over which Secretary Shultz expressed such deep remorse in his statement just 1 year ago.

There are an abundance of reasons to oppose the production of chemical weapons. I will be brief, and outline just three of the arguments: First, that the production of chemical weapons is destabilzing. Second, that the General Accounting Office report on the Bigeye bomb concludes incontestably that the weapon is inherently dangerous to its carriers and ineffective. And third, that many of our allies in NATO have expressed grave reservations about U.S. production of chemical weapons.

The rhetoric that chemical weapons form a credible deterrent is actually incredible—because the fallacy simply ignores so many basic and valid deterrence arguments.

First, the building of allegedly safer binary weapons will create a new conception that chemical weapons are acceptable, ordinary, and, in fact, conventional. The logical integration of

binaries into our conventional arsenal may then appear to the Soviets as a preparation for offensive first use.

Second, with the production of chemical weapons contingent upon storing binaries in the United States, and removing unitary chemical weapons from their bases in Europe, it is easy to see a logistical nightmare in store for this country. Where are these poison gases going to be kept? In what facilities? I must stress to my colleagues that the horrors of Bhopal and Chernobyl are fresh in the minds of the American people—and of Europeans as well. Regardless of the outcome of the Senate's vote on this amendment, opponents of binary weapons production will continue to remind the American people—including the men and women in this chamber—of the dangers which these inhuman weapons present—even under the ostensibly "safe" conditions of binary separation.

This storage proposal also creates a strategic nightmare for this country. It has been estimated that it would take the entire Air Force fleet of C-141 transports up to 6 weeks to move the binary arsenal from the United States to Europe. Try to picture what the Soviets would think of such an act, and how they would react to this destabilizing initiative. What the production of binaries is intended to prevent—Soviet first use of chemical weapons—may become more likely if this new policy is implemented.

The deterrence argument for renewed chemcial weapons production fails on a third count, Mr. President. The Department of Defense claims that the ability to retaliate with chemical weapons will raise the threshold of nuclear war as high as possible, when the contrary is true. The production and potential use of chemical weapons in fact lowers the threshold of mass devastation through lethal binary nerve gas. In the event of a chemical weapons exchange, there is no telling what the "losing side" might do to avoid a defeat of such magnitude. By hastening the deployment of destabilizing weapons of last resort—such as chemical or tactical nuclear weapons—we are escalating the arms race, killing real efforts toward arms control, and ensuring that the day of reckoning is drawing ever closer.

Mr. President, one of the principal means of employing nerve gas in the military's force structure is with the Bigeye bomb, which is supposed to be capable to spreading noxious gases deeper into enemy territory than ever before. Recently, the GAO evaluated the Defense Department's chemical and developmental tests of the Bigeye bomb and found it to be an ineffective and dangerous method of propelling binary artillery projectiles. According to the GAO report, not only were the Defense Department's tests "inconsistent," "skewed," and "ambiguous" in their results and methodology, but the data reveal that the Bigeye bomb just doesn't work.

The report also provides evidence that the testing "fails to demonstrate the feasibility and effectiveness of the Bigeye" and that "intractable problems" still exist. One of these intractable problems is that the aircraft's only means of delivering the bomb successfully is by lofting it and, in so doing, exposing the aircraft to ememy defenses. This is no way to conduct a military operation. an inherent danger is created for the pilot and crew because the Bigeye simply does not function properly. Finally, the GAO report concludes that "the Bigeye bomb is not ready for production."

Last year, Congress issued a directive specifying that authorization of funds for chemical weapons production was contingent upon approval of the program by the NATO political body. In May, NATO Defense Ministers—rather than the government leaders—halfheartedly approved resumed production of binary nerve gas weapons. The Reagan administration has presumed that the NATO Defense Ministers' approval satisfies the directive. As a result, opposition to NATO's quasi-approval has mounted. In late May, Dutch Foreign Minister Hans van der Broek stated that he "profoundly regretted" the development of chemical weapons, and that any suggestion—by the Reagan administration or others—that the program had received the "benediction" of the NATO alliance would be an "enormous embarrassment" to his and other governments.

In addition, many other officials from NATO countries—including Norway, Denmark, the Netherlands, Luxembourg, Iceland, and Greece—dissented from general NATO approval, expressing grave reservations about the production of binary nerve gas weapons. Clearly, the Reagan administration's twisting of congressional intent and the disapproval shown by many of the NATO governments casts a dark shadow of uncertainty over NATO's supposed approval of the chemical weapons program.

Mr. President, in 1969, 17 years ago, President Richard Nixon wisely imposed a voluntary moratorium on the production of chemical weapons. The strategic result was that the United States response to Soviet first use would be an effective conventional antipersonnel counterattack, but not one in kind. The political result was that the United States gained international prestige and was perceived as a nation committed to controlling arms which undermine strategic deterrence. If the U.S. Senate is to approve the renewed production of these Godawful weapons, then we are taking a great leap backward. It will be an irrevocable step—one which can only worsen America's image and destabilize Europe militarily. For 5 years now, the only major weapons system that this Congress has denied the Reagan administration is the binary nerve gas program, and for good reason. We must not alter our course now.

When I served in Vietnam nearly two decades ago, I witnessed the use of chemical weapons on our own troops—by our own troops. Today, we are still recording the costs of this human tragedy. It is my hope that we will never witness the use of such weapons again. I urge my colleagues to oppose funding chemical weapons and the Bigeye bomb.

The PRESIDING OFFICER. Who yields time?

Mr. PRYOR. Will the Chair state the amount of time remaining on this side?

The PRESIDING OFFICER. The proponents have 3 minutes and 11 seconds. The opponents have 2 minutes 28 seconds.

Mr. PRYOR. Mr. President, I will submit to my friend from Maine that we have been told on many, many occasions that this part has been fixed, this has been done, and now we are ready. Then we see when those areas do not quite get tested properly, they change the criteria for testing.

This is the deep concern I have, Mr. President, overall, and I say this respectfully.

In the Navy, their latest operational test says "In a high threat, well-defined target environment, all delivery modes would result in high aircraft vulnerability."

What does that mean, Mr. President? It simply means that our pilots have a great opportunity to get killed while delivering the Bigeye bomb to its target.

I am saying that we should keep the testing, we should keep the ongoing program of research, but we should not go into the production, because even the Director stated that the low rate of production we are talking about means 1988 when we will see the first production of Bigeye bombs come off the assembly line.

Another interesting development as a result of the vote on the Hatfield amendment a few moments ago is we have removed or will remove all of our chemicals in Europe, all of our nerve gas from Europe, while the Russians will keep theirs in Europe.

Now we are saying to the Soviets there is a great deterrent in the chemical warfare area. We are saying to the Soviet Union, "We are getting ready to put all of our eggs in one basket. That is the basket of delivering ultimately nerve gas to the target with a flawed and unworkable Bigeye bomb that the General Accounting Office has testi-

fied in a May 1986 report is not ready for production."

It is the procurement mentality, Mr. President. It is the buy now, test later mentality that concerns me that the amendment addresses.

At this point, Mr. President, I will reserve the remainder of my time.

Mr. COHEN. Mr. President, let me just respond briefly to the statement concerning the delivery profile of the Bigeye, the high risk.

Every mission flown by the Navy is high risk. The delivery profile for the Bigeye is no different than the delivery profile for any conventional type of system. As a matter of fact, the same delivery profiles were flown in Libya. We saw that as a high-risk environment. So I hope he would not cite the delivery profile as being a greater risk than the pilots currently encounter.

□ 1420

Mr. PRYOR. Mr. President, will the Senator from Maine yield for a question?

Mr. COHEN. On the Senator's time. I have limited time.

Mr. PRYOR. I do not think the Senator from Arkansas has any time, but the Senator from Maine brought up a very critical point.

Mr. COHEN. Mr. President, the critical question is the delivery time for the weapon. I would hope the new Bigeye would have a lower delivery risk. We do not want to have to fly directly over the target in order to lay these weapons onto a particular target.

John Krings agrees to some extent with the Senator from Arkansas. He said:

> Bigeye delivery profiles, survivability, and weapons effects remain a concern. Full production will not be recommended unless satisfactory results are achieved during upcoming Operational Tests.

So we do not want to go forward with full production yet. The Office of Operational Testing and Evaluation does not want to go forward with it. We will reserve that judgment until a later time.

I yield the remainder of my time to the distinguished Senator from South Carolina.

Mr. THURMOND. Mr. President, I thank the Senator very much.

First, I want to say that we do not have a deep-strike capability. That is important. This will allow the United States to deter chemical use by threatening to retaliate against targets at long-range airfields and supply depots.

Admiral Crowe, chairman of the Joint Chiefs of Staff, feels this is very important. He says one of the key elements in reestablishing a credible deterrent is the need for establishing a deep-strike credibility. This is what we are trying to get here.

Recent testing of the Bigeye binary bomb demonstrated it will meet this requirement.

Mr. President, the committee has approved the administration's plan to enter into a low-rate initial production. That is all this does. This low-rate initial production is designed to determine the adequacy of their production facilities and to produce additional test assets.

How can you do it other ways? It is the only possible way he can proceed.

The committee has not indulged and has not funded full-scale Bigeye production. Instead, it has made clear that it will decide whether full-scale production is warranted based on the results of the second phase of operational testing, which is scheduled for this summer.

So, Mr. President, we think it is important to go ahead. We need deep-strike capability and by testing this, we find out the situation. We can find out the adequacy of the production facilities and also the additional test assets.

I hope the amendment will be defeated. The chairman of the Joint Chiefs of Staff is extremely anxious for the bill to be passed, the administration wants it to be passed, and we should not delay.

The PRESIDING OFFICER. The time of the opponents has expired.

Mr. PRYOR. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. PRYOR. Mr. President, I appeal in the name of commonsense for the Members of this body to recognize that we have a flawed weapon that is dangerous to our pilots, that is not going to serve the purpose of acting as a deterrent until we get it fixed. If we get this weapon fixed, if it can prove or if they can prove that this weapon is fixed, then, Mr. President, maybe we should buy them. But, please, I urge my colleagues in the Senate not to go forward on a $1 billion procurement program until we have the assurances and the guarantees that this weapon will work.

I thank the Chair for recognizing me. I yield the floor.

The PRESIDING OFFICER. All time has expired. The yeas and nays have been ordered.

Mr. COHEN. Mr. President, I move to lay the amendment on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Arkansas. The motion is not debatable. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 49, nays 50, as follows:

[Rollcall Vote No. 183 Leg.]

NOT VOTING—1

Stennis

So the motion to lay on the table was rejected.

□ 1440

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1500

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Is there objection? Without objection, it is so ordered.

ORDER THAT TIME TO VOTE ON CLOTURE BE POSTPONED UNTIL 7 P.M.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that, notwithstanding the provisions of rule XXII, the cloture votes for today on the Byrd amendment No. 2414 and the Dole amendment No. 2417 be postponed until 7 p.m. in the hopes that an agreement can be reached for the Senate to consider both issues separately.

The PRESIDING OFFICER. Is there objection to the unanimous-con-

sent request? Hearing none, it is so ordered.

Mr. GOLDWATER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1510

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

All time for debate has expired.

The question is on agreeing to the amendment of the Senator from Arkansas. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

The VICE PRESIDENT. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 50, nays 50, as follows:

[Rollcall Vote No. 184 Leg.]

□ 1530

The VICE PRESIDENT. The Senate being equally divided, the Vice President votes in the negative and the amendment is rejected.

Mr. DOLE. I move to reconsider the vote by which the amendment was rejected.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

□ 1540

The VICE PRESIDENT. Under the previous order, the Senator from Arizona (Mr. DECONCINI) is to be recognized.

The Senate is not in order. The Senator is asked to suspend until the Senate is in order.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER (Mr. GORTON). The Senator will suspend. He cannot be heard at this point.

AMENDMENT NO. 2617

(Purpose: To prohibit the sale, donation, or other transfer of STINGER antiaircraft missiles to democratic resistance forces unless certain conditions are met)

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. DECONCINI] proposes an amendment numbered 2617.

Mr. DECONCINI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

RESTRICTION ON THE SALE OF STINGER ANTIAIRCRAFT MISSILES

SEC. . Notwithstanding any other provision of law, no STINGER antiaircraft missiles may be sold, donated, or otherwise provided, directly or indirectly, to democratic resistance forces unless the President certifies to the Congress that the proposed recipient has agreed to the following conditions:

(1) Physical security of such missiles shall consist of the following:

(A) Magazines of reinforced concrete, arch-type, and earth-covered whose construction is at least equivalent in strength to the requirements of the Chief of Engineers (Department of the Army) drawings, 652-686 through 652-693, 27 Dec 1941 as revised 14 Mar 42, shall be provided.

(B) Lighting shall be provided for exterior doors and along perimeter barriers.

(C) Exterior doors shall be class 5 steel vault doors secured by two-key operated high security padlock and hasp (mil spec P-43607), and keys shall be secured separately to insure effective two-man control of access.

(D) Fencing shall be 6-foot (minimum) steel chain link on steel or reinforced concrete posts over firm base, and clear zones shall be established inside and outside fencing.

(E) A full-time guard force or combination guard force and intrusion detection system shall be provided.

(2) Such missiles shall be accounted for as follows:

(A) A 100 percent physical count shall be taken monthly with two-man verification, and records shall be available for United States inspection.

(B) A United States Military Training Mission shall conduct the United States inspection and inventory annually, and weapons expended outside of hostilities shall be accounted for.

(C) When missiles are deployed and assembled, the recipient shall be responsible for a daily accounting of such missiles. Records shall be maintained by the recipient and, upon request, shall be available for United States Government review, United States representatives, shall have the right, upon request, to inspect the missiles at the deployed sites.

(3) Movements shall meet United States standards for safeguarding classified material in transit.

(4) Access to such missiles and to classified information relating thereto shall be as follows:

(A) Access to hardware and related classified information shall be limited to military and civilian personnel who have the proper security clearance and who have an established need-to-know. Information released shall be limited to that necessary for assigned functions or operational responsibility and, where possible, shall be oral or visual only.

(B) No maintenance shall be authorized which required access to the interior of the operational system. Such maintenance shall be performed under United States control.

(5) The recipient shall report to the United States by the most expeditious means any instance of compromise, loss, or theft of any material or related information. This report shall be followed by prompt investigation and the results provided to the United States.

(6) The recipient shall agree that no information on Basic STINGER shall be released to a third government or any other party without United States approval.

(7) The security standards applied by the recipient to protection of Basic STINGER information and material shall be at least equivalent to those of the United States at the identified security classification.

(8) The recipient shall use the information on Basic STINGER only for the purpose for which it was given.

(9) United States officers shall be allowed to inspect and assess physicial security measures and procedures established for implementation of these security controls on an announced random access basis.

(10) Damaged launcher shall be returned to United States Armed Forces for repair or demilitarization prior to disposal by United States authorities.

(11) Two principal components of the STINGER system, the gripstock and the missile in its disposable launch tube, shall be stored in separate locations. Each location shall meet all physical security requirements applicable to the STINGER system as a whole. The two locations shall be physically separated sufficiently so that a penetration of the security at one site shall not place the second at risk.

(12) The principle components of the STINGER system, the gripstock, missile, and launch tube, may be brought together and assembled only under the following circumstances:

(A) In the event of hostilities or imminent hostilities.

(B) For firing as part of regularly scheduled training (only those rounds intended to be fired shall be withdrawn from storage and assembled).

(C) For lot testing (only proof round(s) shall be withdrawn and assembled).

(D) When STINGER systems are deployed as part of the point of defenses of high priority installations or activities.

(13) Field exercises or deployments where-in the use of STINGER system is simulated shall not create conditions for the assembly of the system.

Mr. GOLDWATER. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The junior Senator from Arizona has the floor.

Mr. GOLDWATER. I ask a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the parliamentary inquiry.

Mr. GOLDWATER. Is there a time agreement on this amendment?

The PRESIDING OFFICER. There is a time agreement on this amendment of 40 minutes equally divided.

Mr. GOLDWATER. I thank the Chair.

Mr. DECONCINI. Mr. President, I ask unanimous consent that I may yield the floor to the senior Senator from South Carolina to take up a routine matter and that time not be charged on this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from South Carolina.

Mr. THURMOND. Mr. President, I thank the distinguished Senator from Arizona.

AMENDMENT NO. 2620

(Purpose: To provide funds for Air Force One maintenance facilities to support White House operations)

Mr. THURMOND. Mr. President, I send to the desk an amendment that has been agreed to on both sides and ask the clerk to report.

The PRESIDING OFFICER. The Senator will have to ask unanimous consent that the pending amendment be temporarily laid aside. Does the Senator make that request?

Mr. THURMOND. Mr. President, I ask unanimous consent that the pending amendment be laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND] proposes an amendment No. 2620.

Mr. THURMOND. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 241, line 7, strike out "$2,950,806,000" and insert in lieu thereof "$2,949,746,000".

On page 241, line 24, strike out "$131,640,000" and insert in lieu thereof "$130,580,000".

On page 260, between lines 19 and 20, insert the following new item:

Andrews Air Force Base, Maryland, $25,000,000.

On page 263, strike out line 8.

On page 264, strike out "$12,800,000" and insert in lieu thereof "$9,400,000".

On page 268, line 12, strike out "$670,057,000" and insert in lieu thereof "$695,057,000".

On page 268, line 15, strike out "$329,543,000" and insert in lieu thereof "$321,243,000".

On page 268, line 17, strike out "$218,320,000" and insert in lieu thereof "$210,280,000".

On page 268, line 20, strike out "$124,860,000" and insert in lieu thereof "$117,260,000".

Mr. THURMOND. Mr. President, I rise to offer an amendment in support of a maintenance and support facility at Andrews Air Force Base in Maryland. This facility is needed to support the wide-bodied 747 which the Air Force has been authorized to procure for use as the new Air Force One. Mr. President, Members may recall that last year we appropriated money to purchase these new planes, subject to authorization. Earlier this year, when the Congress acted on the question of a supplemental authorization, we approved the authorization.

The planes have been bought and the first is scheduled for delivery in November 1988. This amendment would provide facilities to support these aircraft. The current facilities at Andrews are not large enough to support the 747 aircraft.

We need to provide the money now in order to have the facility when the aircraft arrives. When our committee originally acted on this issue, the design status of the project was too low. It is now close to 35 percent. I am advised that the Appropriations Committee has included $25 million to fund the first phase of this $45 million project. My amendment would authorize that same phase one.

This amendment will not add any additional funds to the bill as the Air Force has identified any equal amount in offsets, which are included in the amendment, and outlined in my statement. Mr. President, I urge adoption of the amendment.

Mr. President, the Defense Department approves the amendment. The Air Force approves the amendment. I believe we have acquiescence on it.

Mr. GOLDWATER. Mr. President, we have no objection to this amendment.

Mr. NUNN. Mr. President, we have talked to the Senator from South Carolina about the amendment. We urge its adoption.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 2620) was agreed to.

Mr. GOLDWATER. I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2617

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Arizona, who is recognized.

Mr. DECONCINI. Mr. President, I thank the Chair.

Mr. President, the security measures on arms control which we establish today will determine the safety of Western democracies into the next century. My amendment seeks to protect, safeguard, and secure Stinger missiles from falling into the hands of terrorists. This amendment will hopefully prevent the Stinger from becoming a readily available shopping item on the black market. This legislation will limit the likelihood that Stingers, weapons of frightening power, could paralyze American airports or shoot down commercial and military aircraft.

In the book "Terrorism: How the West Can Win," Dr. Paul Johnson writes about a concern affecting all legislators, policymakers, and American citizens:

There is the danger, frighteningly obvious to all of us, that terrorists will eventually possess nuclear weapons. But a more immediate risk is that they will secure—perhaps already have secured—the devastating modern equipment now moving into the inventories of official armies: high speed machine pistols firing 1,200 rounds per minute and almost soundless lightweight grenade launchers and mortars, flamethrowers, short-range portable anti-tank weapons, shoulder-fired rocket launchers, and most alarming of all, the new generation of portable missiles which have long ranges, are highly accurate, and can be carried and fired by one man or woman.

This is a thoughtful and careful man not given to exaggeration. Yet he has a way of concentrating one's mind—and in this case, it is on the point that we in the Western democracies do not have forever to counter the problem of terrorism. His voice is urgent. His argument is compelling. His facts are conclusive.

Mr. President, the Stinger has been accurately labeled as the ideal terrorist weapon. It is now considered to be the crown jewel of democratic resistance efforts. It seems nonchalant and cavalier, almost automatic, that democratic resistance efforts ask for Stingers—and we provide them. We provide little thought as to safety and totally neglect foreign policy goals. How will these top-of-the-line items be protected from terrorists, Cubans, Libyans, Russians, and fanatics? How do these weapons influence regional politics; the possibility of escalation and heightened conflict; and do we then provide even more sophisticated weapons after the Stinger?

I take a back seat to no other Member of this Senate Chamber or

any Congressman as to my tenacious support for the Afghan rebel fighters. I deplore and condemn the Soviet invasion and their widespread combat which cripples Afghan children. I heartily endorse U.S. efforts to assist the Afghans in their efforts to preserve their religious safety and their political freedom.

I have met in my office with several Afghan people fighting in this effort. The United States reportedly provides close to $500 million in covert assistance to those resistance fighters. They already have sophisticated surface-to-air SA-7's and have told me that they would like the Stinger, but it will not win or lose the war by itself. They have told me that they would like our best technology, but they will carry on in their struggle and effectively use the SA-7's.

Mr. President, I am all for resistance efforts that sustain and promote freedom and safety for people of different political struggles. But we cannot afford to nonchalantly provide weapons which subequently endanger American freedom and safety. We cannot afford to let Qadhafi's and Khomeini's secure this weapon. We cannot afford to give terrorists the power to wipe out airplanes and paralyze airports. I do support resistance efforts but by their very definition they are meant to resist, retaliate, and rebuff the aggressor. By supplying our most sophisticated weapons cavalierly we endanger our own citizens. Americans traveling are not safe. Our allies' military planes are not safe. American airports are not safe. Reportedly, Stingers have been delivered to Angola and Afghanistan. This was leaked by a source in the Reagan administration, who was consequently fired.

The situation in Nicaragua might be the next sight for Stinger missiles. Mr. Calero, one of the Contra leaders, recently said after the House passed the administrations aid request, that all they needed now were Stingers. Mr. President, Stingers in Central America will severely escalate the involvement of all outside parties. Stingers could easily end up disrupting the fragile Central American democracies and wrecking havoc on the regional progress we have achieved. Stingers could easily find their way up through Mexico into California, Arizona, and Texas. This would only contribute to the drug and weapons running problem that already exists. Some of these Contra leaders are closer in philosophy to the drug runners and terrorists than to American democratic ideals.

Some argue that this issue should not be discussed on the Senate floor. The Reagan administration, in deciding recently to provide these missiles to guerrilla fighters, made two key assumptions. One, the news of the decision would not lead to the public and secondly, that none of the Stingers would fall into the hands of terrorists. The first assumption has already failed. It is with the second assumption in mind that I seek to address this issue. Ideally, I would not want to discuss this sensitive issue or legislate a solution. But we have no choice, now that the first assumption has failed, we must seek to prevent the second from happening.

President Reagan is very concerned about the implications of the Stinger. The administration removed the Stinger from the Saudi Arabia arms package due to congressional concern and fear that these would fall into the wrong hands. The President wrote to Majority Leader ROBERT DOLE discussing "the particular sensitivity of Stingers being transferred to any country." This legislation seeks to safeguard these missiles and prevent the terrorist scenario from happening. Supplying our best technology without safeguards is not in the national interest.

As a colleague of mine stated when the Stinger was to be transferred with safe security conditions; if the Stinger falls into the wrong hands, there will not be an airplane or airport in the civilized world that will be safe. I urge the adoption of this legislation to protect Americans and our allies. The rush of sophisticated technology without adequate safeguards, drastically changes the rules and boundaries for terrorists. It escalates the war effort on the part of outside parties, as it did in Afghanistan and Angola. After the reported introduction in Angola, the 6-year peace effort negotiated by the United States went out the window.

In Afghanistan, the Pakistani's are reportedly seeking to encourage a Soviet withdrawal and consequently prevent Stingers from exacerbating this conflict. We need to prevent this type of policy. Different support including less sophisticated surface-to-air weapons might be the answer. But right now we need to clarify our policy with wise and prudent safeguards.

Mr. President, imagine the scenario with one of these weapons systems that can be held on the shoulder, that can be fired a distance of 3 to 5 miles. And this is not classified information. It has been reported in the press. It is only 34 pounds in weight. It is only 5 feet long. It can be carried in a compact sense. It has an infrared heating device that homes on the target.

□ 1550

Put this scenario together: That it falls into the hands of terrorists like Qadhafi or Khomeini or Arafat and is used at one of our major international airports. What kind of chaos are we going to have?

What if it developed that it was given to the Contras, fighting the Nicaraguan Sandinistas? How safe would it be to have that weapon there? I question that.

The purpose of this amendment is not to outlaw by any means that these weapons go to democratic resistance groups. It only says that the President certifies to Congress that the proposed recipient has agreed to the following conditions—and they are listed in this amendment.

These conditions are the conditions we place on this missile now, that we have transferred to a number of countries, particularly Saudi Arabia. Why should we not impose the same type of conditions and ask the President to certify that they are being upheld?

Mr. President, this is a serious matter, and I hope the Senate will join me in putting on some restrictions, and yet not tying the hands of the President to use these weapons where he feels that certification can be made. Failing to do this, we are inviting the misuse of this weapon by international terrorists.

Mr. LUGAR. Mr. President, will the distinguished chairman of the Armed Services Committee yield me 5 minutes?

Mr. GOLDWATER. I am very happy to yield 5 minutes to my friend.

Mr. LUGAR. I thank the chairman.

Mr. President, the amendment before us is a foreign policy issue. It has arisen in different contexts before, but I simply say, once again, that it is a foreign policy issue and has to do with the success of our country in our ability to help freedom fighters. We are attempting to help freedom fighters in a number of places. The President of the United States and those who are attempting to work with the freedom fighters have to have the latitude to give the freedom fighters and equipment required to get the job done.

Mr. President, I note the descriptions from time to time of the Stinger missile. There are even pictures of a single individual of normal size carrying the missile, with the thought that almost any one of us—apart from such unusual persons as Arafat or Khomeini or what have you—could use a Stinger missile.

Mr. President, it is an effective weapon. The country is proud of the development of this kind of weapon. But it requires an extraordinary amount of training. The ordinary terrorist carrying a Stinger missile is not going to be any more effective than you or I would, without tens of hours of training and a very great deal of support in the use of this particular weapon.

The intent of this amendment is to kill the use of the Stinger missile in the foreign policy of our country, insofar as we help other countries. I say that advisedly, because the drafters of this amendment have listed an impossible set of conditions that literally render this particular option, the

Stinger missile, out of the question in helping freedom fighters in Angola or in the Nicaraguan situation and wherever else we may be trying to help people.

Mr. President, this is an option that we ought not deny in the course of an armed services authorization bill. This is a foreign policy option we ought to be able to retain in our country.

Beyond that, Mr. President, I suggest that it would be useful, before we got into these kinds of amendments—this is the second time around the track in this particular session. The same amendment was defeated by a vote of roughly 2 to 1, when it applies to certain instances before, and not what has been redrafted to apply to all instances.

We really ought to have an opportunity to discuss this in the Foreign Relations Committee, in the Intelligence Committee, and other forums which have something to do with the foreign policy of the country.

I know that the distinguished chairman of the Armed Services Committee, Senator GOLDWATER, has addressed himself pointedly to the subject. This is a foreign policy question, and the chairman is weary of seeing this appear again in this form, and so am I.

Mr. President, I think it is important to settle this issue once and for all. Let us simply defeat the amendment. Let us get it back into the foreign policy arena, back into a discussion of what is useful in the foreign policy of our country, without all the phobias usually attached, that somehow the Stinger, unlike all the other types of weapons we might provide people, is an exceptionally destructive weapon.

Conflict is always destructive. If one is going to argue philosophically, one could argue that we ought not provide anything to allies, whether they be freedom fighters, members of NATO, or what have you. There is always a risk in doing that. But I submit that it is no more with the Stinger than with a half-dozen other objects.

This is the wrong time and the wrong place to be discussing the issue.

Mr. DURENBERGER addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. I yield the Senator 2 minutes.

Mr. DURENBERGER. Mr. President, I appreciate the opportunity to speak on this issue and to speak in opposition to the amendment, particularly to speak in favor of the argument made by my colleagues, the chairman of the Senate Foreign Committee.

Basically, this is a foreign policy issue. In which committee it is to be resolved is not clear to me. I am convinced that it is not to be resolved on the Defense authorization bill, nor is it the kind of issue that lends itself to resolution on the floor of the Senate.

Sometime next week, we are going to be debating another foreign policy issue in which the elements of the implementation of an element of foreign policy are going to be openly debated on the floor of the Senate.

Today, we are offered the opportunity, though, to vote for or against one particular armament, committed to one broad category of indigenous forces. I urge my colleagues to consider the fact that this really is not a very good place for our country to make foreign policy, regardless of how we personally may feel about the weapon involved or the application of the weapons to a particular circumstance.

So I support the chairman of the Foreign Relations Committee and the chairman of the Armed Services Committee in opposition to this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. Mr. President, I yield myself such time as I may require.

Mr. President, unfortunately, I must rise in opposition to the amendment being offered by my colleague from Arizona. This subject was dealt with in May when a similar amendment was debated during the Senate's consideration of the DOD reorganization bill. At that time it was tabled by an almost 2 to 1 margin. I am hopeful that the pending amendment will also be defeated.

This amendment deals with the most sensitive of subjects—possible U.S. covert operations. The questions raised by this amendment can only be thoroughly examined and debated in a classified setting—most appropriately in the Intelligence Committee. The Senate floor is certainly not the proper forum for such a debate.

However, I will try to outline my opposition to this amendment as well as I can in an unclassified context.

□ 1400

First, and most importantly, the net effect of this amendment would be to prohibit even the possibility of our providing this vital equipment to freedom fighters throughout the world whose causes we have traditionally supported. The stringent conditions required by this amendment are clearly incompatible with the nature of guerrilla warfare and would be virtually impossible for rebel groups to meet. Therefore, a vote for this amendment is tantamount to a vote against freedom fighters throughout the world.

By adopting this amendment, we would be placing severe restrictions on the President's freedom of action in this very important and volatile arena. This is the type of micromanagement that I believe the Congress should avoid.

Second, one of the main goals of the proponents of this amendment is to prevent shoulder-fired antiaircraft weapons such as the Stinger from falling into terrorist hands. While this is a worthwhile goal, it will not be achieved by this amendment. The fact is that most terrorist organizations already have a wide variety of man-transportable SAM's. Soviet SA-7's are readily available on the world arms market and have been acquired by the vast majority of terrorist groups.

Mr. President, this type of weapon is made by almost countless countries and they can be purchased almost everyplace. I cannot tell you where, but you can buy them retail in the United States.

I am not saying that this is reason to let down our guard in the fight to keep sophisticated weaponry out of the reach of terrorists. But we should acknowledge the situation as it is and not get into the business of arbitrarily choosing to severely restrict the possible supply of one weapon system to specific groups.

I would suggest to my colleague from Arizona that the best way to proceed on this issue is to introduce this amendment as freestanding legislation and allow the relevant committees to fully examine its ramifications. This is the only way to ensure that the many important and complex issues raised by this amendment are given the careful and thorough consideration that they deserve.

The chairman of the Intelligence Committee and the chairman of the Foreign Relations Committee have spoken against this amendment.

Mr. President, I yield to the Senator from New Hampshire how much time he needs.

Mr. HUMPHREY. Three minutes I think will be sufficient.

Mr. GOLDWATER. Three minutes.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, others opposing the amendment covered the point I intended to address.

Let me point out to my colleagues before we have a vote on this matter just explicitly what it is the Senator from Arizona is proposing.

Let me just read from the amendment what he would require of recipients of this kind of weapon and my colleagues should think of this in the context of these freedom movements which are essentially guerrilla operations on whose mobility their survival depends.

Here are the physical requirements that the Senator from Arizona would require before these groups could possibly receive these weapons. The amendment reads:

Physical security of such missiles shall consist of the following:

Magazines of reinforced concrete, archtype, and earth-covered whose construction is at least equivalent in strength to the requirements of the Chief of Engineers (Department of the Army) drawings, 652-686 through 652-693, 27 Dec 1941 as revised 14 Mar 42, shall be provided.

Lighting shall be provided for exterior doors and along perimeter barriers.

Exterior doors shall be class 5 steel vault doors secured by two-key operated high security padlock and hasp (mil spec P-43607), and keys shall be secured separately to insure effective two-man control of access.

Fencing shall be 6-foot (minimum) steel chain link on steel or reinforced concrete posts over firm base, and clear zones shall be established inside and outside fencing.

These requirements might be OK and indeed are OK and necessary to require of our established allies, but for Heaven's sake, can you imagine the freedom fighters in various countries trying to produce these kinds of safeguards?

What the DeConcini amendment means bottom line is that these freedom movements could never be considered for this kind of assistance from the United States.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI. Mr. President, I would like to respond to some of the arguments.

First, the distinguished chairman of the Foreign Relations Committee indicates that this affects foreign relations policy. It seems to me that that argument is indeed very appropriate for the defense authorization bill.

I do not know anybody who looks on close to $300 billion of defense authorization that does not affect our foreign policy.

In his committee, the Foreign Relations Committee, the last vote we had, though, we were defeated in this amendment. Nine members of the Foreign Relations Committee voted in support of this amendment, eight opposed it.

So there is already a good bellwether right there that the Foreign Relations Committee thinks something should be done.

I hope the Senator from Indiana intends to hold hearings. I think that is very, very good.

The Senator from New Hampshire just read the requirements. I am glad he did. I did not want to take all the time because of the limited time on this subject matter to read the requirements.

No better argument can be given than those requirements that we impose on allies, NATO allies, Saudi Arabia, countries that we now share this weapon with. Should we not require the same security for a guerrilla group out in the jungle, in the desert, in the mountains of Afghanistan?

It seems to me like that argument is clear that if we do not do this, we are asking for someone to abuse or lose or sell to the black market some of these weapons.

Our own military has great reservations about what we are doing, and I think everybody here who is involved in this argument, certainly the Intelligence Committee, certainly the Armed Services Committee, knows that so well.

I want to quote Gen. John Wickham, who is the Army Chief of Staff, on this subject matter of the Stinger missiles.

Wickham reported on June 21, in the Washington Post, saying on the subject matter in an interview with the Washington Post yesterday that "we anguish over decisions of which allies should get the weapon because of U.S. concern that it will fall into the wrong hands."

I am glad they anguish over it because they rightly should anguish.

What have they done? They have imposed some very, very severe security restrictions before we hand that weapon over, and I am glad they have done it.

The only thing that the amendment of the Senator from Arizona says is that those same restrictions be applied if you hand those weapons over to a democratic resistance group.

For the likes of me, I can see no reason not to impose those same conditions here because with failure to do that we are asking and we are inviting a disaster.

I am glad to yield to my colleague from Kansas.

Mrs. KASSEBAUM. Mr. President, I just briefly wish to comment why I am supporting the Senator from Arizona's [Mr. DECONCINI] amendment.

It has already been argued and debated here before and, as has been stated, I do not know whether this is the right place to have it as an amendment. Certainly before when it was offered on the military reform, it was not the right vehicle. Maybe the debt ceiling extension is a better one. But I think, frankly, it does fit into the whole question of defense.

It is to me and certainly in my mind not a vote against freedom figthers. It is in my mind a whole question of really how we do account for our highly sophisticated technologies.

We have taken such great precautions in the transfer of our technologies, but today with the Stinger missile, which is highly effective and has been a very successful antiaircraft missile, we more or less just say that we are going to turn it over to be used by those without the same conditions that we impose on our allies.

I think that this is something that is of importance for us to argue, whether it is today, or tomorrow, and I think it is something that for the success of our future transfer of technologies and our feeling of security in that transfer of technologies we should be willing to debate and be responsible in those transfers.

Mr. President, I find the reports about our Government's decision to send Stingers to rebel forces a very dangerous proposition. This decision runs directly counter to our vigorous efforts over the past several years to control technology transfer and to ensure that our advanced technology whether military or civilian does not fall into the hands of the Soviet Union.

Even more importantly, supplying Stingers to rebel forces also runs directly counter to our concern about curtailing terrorism. This Chamber has fully discussed the danger of sending Stingers to sovereign nations.

Only just a couple of months ago, there was overwhelming concern expressed on this floor about having Stingers as part of the arms package to Saudi Arabia, largely because of the fear that these weapons would fall into terrorists' hands.

Mr. President, the danger of this weapon system falling into terrorist hands or into the hands of unfriendly nations is only escalated in the case of sending these weapons to rebel groups.

There is no certainty that the Stingers will remain in the hands of the rebel forces. We have already seen that captured Soviet surface-to-air missiles have turned up in rebel hands in Angola and Central America. And we have also seen numerous reports that any arms sent to Afghan rebels end up in the black market in Pakistan.

Mr. President, it is paradoxical to me that we would require sovereign nations to have stringent security controls on sophisticated weapon systems such as the Stinger, and yet we would just transfer these systems to rebel forces with no precautions.

Mr. President, I believe that at a minimum, if this sophisticated technology is going to be transferred, we should require the same rigid security requirements that we have imposed on our sale and transfer of this technology to sovereign nations.

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. How much time does the Senator from Indiana want?

Mr. QUAYLE. Three minutes.

Mr. GOLDWATER. Go ahead.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, I want to just very briefly state my opposition to this amendment.

I think the chairman of the Armed Services Committee, the chairman of the Foreign Relations Committee, and the chairman of the Senate Intelligence Committee have all brought out

that this is a very sensitive matter. It is a very sensitive matter because of certain classifications. We are not even going to be able to go into some of the discussions about what in fact is going on with any kind of these potential transfers.

I believe that the junior Senator from Arizona has a very valid concern, and that valid concern is that he is worried about, rightfully so, the Stinger missile being put into the hands of terrorists. I think that is a valid concern and, believe me, everybody that deals with this issue is certainly very sensitive to that possibility and equally as concerned as the junior Senator from Arizona.

□ 1610

Unfortunately, as the chairman of the Senate Armed Services Committee has already pointed out, terrorist organizations already have the SA-7. It is a very comparable weapon to the Stinger missile.

What I believe that this amendment would do, even though the sponors of the amendment do not want it to do so, is it would place a disadvantage, a great disadvantage on some of the freedom fighters around the world.

Terrorist organizations and those who would not like to see democracy survive have a very comparable weapon. If we place these restrictions, and they are not unreasonable restrictions for Saudi Arabia, for all of our allies who do not have the guerrilla-type environment, but it is really an unreasonable restriction in any kind of guerrilla, freedom fighter resistance type of movement. To have them comply with certain military specifications, a certain amount of Army Corps of Engineers specifications, is simply inappropriate.

Therefore, it would be a disadvantage out there. You have comparable military weapons on both sides, unfortunately. And the terrorists, the ones that are against freedom, already have the SA-7.

We need to put in some equilibrium and allow the President the flexibility. I think, to do this at this time, even though the sponsor of the amendment does not want to do that, it would unfortunately tie the hands of the President.

This is a very sensitive matter, as the chairman of the committees have pointed out. I believe, in my good judgment, that we should readily dispatch this amendment and go on to other things. But I do think that the junior Senator from Arizona has a legitimate concern. I just think that the amendment is way off base. I do not think it is appropriate here and I hope it is resoundingly defeated.

Mr. DECONCINI. Mr. President, how much time remains?

The PRESIDING OFFICER (Mr. EVANS). The junior Senator from Arizona has 9 minutes and 7 seconds, and the Senator from Arizona has 4 minutes and 47 seconds.

Mr. DECONCINI. Mr. President, let me wind up by saying that I appreciate the concern of the Senator from Indiana that this is a sensitive matter. We know that. There are subject matters that we cannot talk about on the floor.

The so-called Stinger missile is not sensitive. What is sensitive is where it has been deployed and how many and in what kind of action. That has already been disclosed, too, by Dr. Pillsbury, by the way, who lost his job for that disclosure in the Washington Post.

The fact of the Stinger missile and the requirements, that is not a sensitive disclosure or nondisclosure matter. What is really sensitive here is: Do we want to risk this missile in the hands of people who cannot provide the security?

My good friend just suggested—and I wish I had thought of it—how would you like to see, in equal size and proportion, a foreign airplane like the British Airways sitting right up here in relation to where this weapon could knock it down being in the hands of some terrorist? That is what we are talking about—at the Athens Airport, 2 or 3 miles from the airport; at the Leonardo da Vinci Airport, 2 or 3 miles from it, or one of our own airports, if one of these weapons come up through Mexico into Texas or Arizona and somebody sits 2 or 3 miles away and wants to take down an airplane. That is what we are talking about.

That weapon now is not in the hands, that we know of, of any terrorist. We do not think anybody has that weapon yet. And there is a great difference, as I am sure my senior colleague will agree, between this weapon and the SA-7, a great deal of difference for the freedom fighters. They want the advanced technology, but they will tell you that is not going to win or lose the war for them.

So I hope we will use some common sense and apply the same security to freedom fighters as we apply to other allies. By the way, once those Stingers are deployed, then you have a different set of security and you are not bound by the ones that are listed in this particular amendment. I think it is paramount that we apply the same standards here. I hope the Senate will support this amendment.

I thank the Senator from Kansas for her support.

Mr. THURMOND. Mr. President, I rise in opposition to the amendment offered by my distinguished colleague from Arizona. The net effect of this amendment would be to seriously hamper implementation of the Reagan doctrine. Without a doubt this amendment should be defeated.

In the first place, the amendment we are considering should not even be discussed in open session because it involves possible U.S. covert activities. The Senate floor is not the proper forum for this discussion.

The conditions set forth in the amendment are not compatible to guerrilla warfare. Guerrillas do not construct secure armories in the bush, nor should they, given the mobile nature of such conflicts. No rebel group could meet these restrictions.

I must ask my colleagues what would have happened to our forebears in their struggle against England had Lafayette's government imposed such restrictions on the transfer of arms to the colonists.

Mr. President, this amendment should be addressed in the Intelligence Committees and not here. The Senate should oppose the amendment.

Mr. LEVIN. Mr. President, I regret that I cannot support Senator DECONCINI, amendment to condition the sale or transfer of Stinger antiaircraft missiles to democratic resistance forces. As I stated May 7, 1986, in the CONGRESSIONAL RECORD, I share Senator DECONCINI's deep concern and fear that Stinger missiles may end up in the hands of terrorists and enemies of the United States. However, the conditions which would be established by this amendment would require U.S. servicemen to enter areas of hostilities to inspect and repair these missiles, a most unwelcome prospect. I also find this language too broad and inflexible. There may be circumstances where we would want to allow these missiles to be used where these stringent security conditions could not be met. The conditions for maintaining security over Stinger missiles in the amendment would be unachievable for virtually every situation in the world except our NATO allies, and therefore, the reach of this amendment is overly broad and I must oppose it.

Mr. MITCHELL. Mr. President, today I am pleased to support the DeConcini amendment prohibiting the sale, donation, or other transfer of Stinger anti-aircraft missiles to democratic resistance forces until and unless the President certifies in advance that the proposed recipient has agreed to a specified set of security conditions.

The Stinger has been called "the ultimate terrorist weapon," and rightly so. Accurate and highly portable, it is an ideal weapon for small, mobile guerrilla bands. Unfortunately, it can also be, in the wrong hands, an instrument of wanton destruction, easily capable of downing a civilian or military aircraft.

Even the remotest possibility of such a weapon falling into irresponsible hands impels us to take exceptional precautions. In making Stingers avail-

able to our NATO partners and to Saudi Arabia, we have always insisted on rigid security safeguards, including steel vaults, 24-hour armed guards, and separate storage of launchers and missiles. We have also required the right to conduct inspections of these safeguards at any time.

It appears perfectly obvious that comparable safeguards would not be possible were we to supply Stingers to the Afghan mujaheddin, Savimbi's UNITA forces, or the Contra rebels in Nicaragua. It appears equally obvious that in making Stinger missiles available to these or similar groups, we would be giving up virtually all control over these weapons. Lacking both adequate security and close American supervision, these weapons would then be highly vulnerable to theft, capture, or illegal diversion, and could end up in the hands of individuals or groups who might not hesitate to employ them in ways contrary to American interests. It is this concern that impels me to support the DeConcini amendment.

Earlier this year, during Senate debate on reorganization of the Defense Department, an amendment very similar to this one was brought to the floor. At that time I believed that this issue was an important one and deserved consideration on its own merits, not as an afterthought to a major bill on an altogether different issue. As a consequence I voted then to table the amendment, in the hope that the matter could subsequently receive full-scale committee hearings and be considered on its own merits.

Since then, alarming reports have surfaced to the effect that both UNITA and the mujaheddin have received covert Stinger shipments. As a consequence I will now support the DeConcini amendment, before further Stingers are sent overseas.

In addition, this amendment differs from the earlier one in that it also applies to the Contras. Keeping these dangerous weapons out of the hands of the Contras seems to me another compelling reason for supporting this amendment. I plan to do so and I urge my colleagues to do so as well.

### DR. MICHAEL PILLSBURY AND THE STINGER MISSILE

(Later the following occurred:)

Mr. HUMPHREY. Mr. President, earlier this evening during the debate on the DeConcini amendment relative to the Stinger missile, a Washington Post story based on anonymous sources was cited. In that connection, the name of Dr. Michael Pillsbury was raised. Certainly without any criticism intended for the Senator from Arizona, I want to point out that the story quoted was based on anonymous sources. Dr. Pillsbury has denied disclosing the information cited in that story. An investigation is under way to determine who really did leak the information.

I want to point out further that Dr. Pillsbury now works for four Senators, one of which is the Senator from New Hampshire. I would not like the comment of the Senator based on the Washington Post to pass without mentioning for the Record that there is another side of this story that is yet to be fully told.

(Conclusion of later proceedings.)

Mr. GOLDWATER. Mr. President, I know of no other Senator on this side who cares to speak. I am perfectly willing to yield back my time, if my colleague is, and we can proceed to a vote.

Does the Senator want a yea or nay vote?

Mr. DECONCINI. Yes.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GOLDWATER. Mr. President, I yield back my time.

Mr. DECONCINI. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Arizona [Mr. DECONCINI]. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 37, nays 63, as follows:

[Rollcall Vote No. 185 Leg.]

YEAS—37

| | | |
|---|---|---|
| Biden | Hatfield | Mitchell |
| Bingaman | Hollings | Packwood |
| Bradley | Inouye | Pell |
| Burdick | Johnston | Proxmire |
| Chafee | Kassebaum | Pryor |
| Cranston | Kennedy | Riegle |
| D'Amato | Kerry | Sarbanes |
| DeConcini | Lautenberg | Sasser |
| Eagleton | Leahy | Simon |
| Ford | Mathias | Specter |
| Gore | Matsunaga | Weicker |
| Harkin | Melcher | |
| Hart | Metzenbaum | |

NAYS—63

| | | |
|---|---|---|
| Abdnor | Exon | McConnell |
| Andrews | Garn | Moynihan |
| Armstrong | Glenn | Murkowski |
| Baucus | Goldwater | Nickles |
| Bentsen | Gorton | Nunn |
| Boren | Gramm | Pressler |
| Boschwitz | Grassley | Quayle |
| Broyhill | Hatch | Rockefeller |
| Bumpers | Hawkins | Roth |
| Byrd | Hecht | Rudman |
| Chiles | Heflin | Simpson |
| Cochran | Heinz | Stafford |
| Cohen | Helms | Stennis |
| Danforth | Humphrey | Stevens |
| Denton | Kasten | Symms |
| Dixon | Laxalt | Thurmond |
| Dodd | Levin | Trible |
| Dole | Long | Wallop |
| Domenici | Lugar | Warner |
| Durenberger | Mattingly | Wilson |
| Evans | McClure | Zorinsky |

So the amendment (No. 2617) was rejected.

□ 1630

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I will just take a moment. I have been having a brief discussion with the chairman of the Appropriations Committee. I would like to yield to him for the purpose of his extending a parliamentary inquiry.

Mr. HATFIELD. Mr. President, I thank the majority leader.

I would like propound to the Chair a series of parliamentary inquiries relating to the bill that is now pending before the body.

Mr. President, I do not intend to make a point of order if these are valid points that could be made. I want to make that clear statement from the beginning. I merely want to raise the application of the Budget Act to the total legislative proceedings of this body. I suppose being extraordinarily sensitive to the fact that appropriations bills which have been frequently the target of points of order as they may violate or appear to violate the Budget Act.

I do want to make these inquiries of the Chair now, if I could.

Under section 302(c) of the Budget Act, as amended by Gramm-Rudman-Hollings, it is not in order for this body to consider legislation that provides new direct spending authority or new entitlement authority if reported by any committee which has received an allocation under 302(a) of the Budget Act with respect to the most recently agreed to budget resolution for the coming fiscal year and that committee has not filed the 302(b) report required by the Budget Act. That is, the committee's report subdividing its allocation among its subcommittees or programs over which it has jurisdiction.

Mr. President, is that correct?

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. Mr. President, is it not true that the Senate Armed Services Committee has received an allocation pursuant to section 302(a) of the Congressional Budget Act with respect to the budget resolution for fiscal year 1987, Senate Concurrent Resolution 120?

The PRESIDING OFFICER (Mr. QUAYLE). The Senator is correct.

Mr. HATFIELD. Mr. President, is it also correct to say that the Senate Armed Services has not yet filed the

report required by section 302(b) of the Budget Act? Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. Now, Mr. President, the bill we are considering, S. 2638, the National Defense Authorization Act for fiscal year 1987, has been reported by the Senate Armed Services Committee. It is my understanding that the bill, as reported and further amended by the committee, provides new direct spending authority.

□ 1640

For example, section 1214 of the bill provides for an increase in capitalization of the special defense acquisition fund and affects direct spending in functions 050 and 150 according to the Congressional Budget Office. Am I correct in saying that this bill provides new direct spending authority?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. Given this, along with the fact that the Senate Armed Services Committee has not yet filed its required report under 302(b) of the Budget Act, this bill violates section 302(c) of the Budget Act which prohibits consideration of such legislation until the committee has filed its required 302(b) report. Am I correct that this bill is subject to a point of order under section 302(c) of the Budget Act?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. To take this one step further, Mr. President, section 302(f) of the Budget Act say that it is not in order to consider any bill that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported by any committee in its section 302(b) report in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year. Can the Chair please advise this Senator how this body is to know if such a point of order is available to its Members under this provision of the Budget Act if a committee has not yet filed its required 302(b) report under that act?

The PRESIDING OFFICER. Under those circumstances, the point of order would not lie under section 302(f) because there is no way to measure whether any of the amounts provided are in excess of the calculations.

Mr. HATFIELD. I thank the Chair.

Can the Chair please advise this body which of the 16 Senate committees receiving a section 302(a) Budget Act allocation with respect to the fiscal year 1987 budget resolution have not filed their section 302(g) reports?

The PRESIDING OFFICER. The Chair announces the Chair does not have any such list.

Mr. HATFIELD. I thank the Chair.

Mr. President, another provision of the Budget Act, as amended—section 401(a)—prohibits the consideration of any measure providing new contract authority or new borrowing authority which is not limited by appropriations.

Is the legislation before us not also subject to a point of order under section 401(a) of the Budget Act?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. Mr. President, these are the points I wanted to raise relating to the particular application of the Budget Act to the defense authorization bill. As I indicated earlier, having been a Member of this body when the Budget Act passed and also when the Gramm-Rudman-Hollings provisions were passed, I have been on this floor trying to make certain that every appropriations bill measured up to the Budget Act requirements. We have gone through various exercises of tabling, referring, and all the other procedural motions members are quite familiar with. I merely want to point out that we are in violation here today of the Budget Act. I would like to know what the Budget Committee's views are on this.

Also, if the majority leader would permit me to do so, having yielded the floor merely for a parliamentary inquiry, the chairman of the Budget Committee has indicated that he has an amendment to correct one of this bill's provisions relating to contract authority that violates the Budget Act. I wonder if there are any thoughts that could be expressed at this moment or shared that could clarify the situation as to the other violations of the Budget Act this particular bill represents.

Mr. DOLE. Mr. President, I thank the distinguished Senator from Oregon, the chairman of the Appropriations Committee. I wonder if we might have an agreement that the Senator from New Mexico and the Senator from Florida might be recognized for 5 minutes each if they desire, not to exceed 5 minutes each.

The PRESIDING OFFICER. Is there objection? Hearing no objection, it is so ordered.

The Senator from New Mexico is recognized.

Mr. DOMENICI. I thank the distinguished majority leader. I do not need 5 minutes.

I say to my friend from Oregon the Senator from New Mexico is aware of what I consider to be a very serious violation of the Budget Act with reference to new spending authority as defined in section 401(c)(2) of the Congresssional Budget Act.

I am aware of the fact that provisions of the bill are out of order if indeed they are construed to be entitlements, contract authority, or direct spending. I have an amendment pending at the desk that I filed 2 days ago. I have not called it up because I would like to see more of the bill evolve, but basically, I have checked it through with the manager and the ranking minority member. I intend to offer it. They said they did not intend to object to it.

Basically, it provides that any new spending authority, as defined in section 401(c)(2) of the Budget Act, provided by specified sections of this bill, shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation acts. My amendment lists the various sections of the bill which the amendment applies to—611, 625, 631, 635, 636(f), 931 1006, 1214, 2175, and 2183. Those are the sections where this Senator has found in this bill either direct spending authority or contract authority or entitlements.

If not amended, they would be construed to be direct expenditures in violation of the Budget Act. I am prepared to offer the amendment. The managers know it. I will furnish my friend, the chairman, with a copy of it.

As to the section 302(c) contention he made, it is true there are no crosswalks filed by this committee. I assume if someone desires to make a point of order under section 302(c) they could. I hope the committee would file a 302(b) allocation. I do not believe it is very difficult, not like the appropriations crosswalk.

I will assist the committee if they desire to comply on the technical matters. If they do not, I will consult with them. If it appears to the Senator from New Mexico as one Senator and chairman of the Budget Committee that they violate the Budget Act as it operates to get things under control, I shall raise appropriate points of order.

Mr. HATFIELD. I state again, Mr. President, that I raise these points at this time as the bill is under consideration so there will be opportunity to correct them. I wanted to make certain that, again, we do not go through the whole exercise up to third reading without some kind of action.

Again, I think if we are going to observe the Budget Act in any one area of legislation, it ought to be observed in all areas. Usually, the Budget Committee has been very helpful in reminding the rest of us where we have been in violation or potential violation of the Budget Act. I am glad to know the chairman has taken action on at least one of these violations. I am hopeful the committee will comply enough so that when we get to third reading, we will not have any technicalities on violations of the Budget Act.

If I had to vote for a question of waiving the Budget Act in order to get to this bill, I would even consider that. I want to point out that the Budget Act ought to be applied to every bit of

legislation we enact, not just the appropriations bill where the Budget Act has had so much careful scrutiny. I just wanted to point out there are also questions here.

Mr. DOMENICI. Let me add that I am prepared, at a point in time when I am informed by managers that we are getting close to the end of amendments that have real significance in point of dollars, to engage in an exchange with the managers with reference to the level of authorization in this bill versus the limitations on budget authority and outlays that are imposed under the appropriations process. Clearly, this is an authorizing bill and we will discuss thoroughly with the Senate before we leave the floor the fact that if those who are proponents of this bill expect that everything within it will indeed be funded by the appropriators in its present form—it has not gone to conference yet and we are not finished yet, but if it did, clearly there is more authority and more outlays than we can accommodate in the appropriation process.

□ 1650

But everyone knows that that is the case. The Armed Services Committee has discussed it with me and we will discuss it in detail so that everyone knows how much it is over. But that does not make it subject to a point of order. That merely means you can expect the appropriators to fund this much.

Mr. NUNN. Mr. President, I am trying to understand here whether we are talking about something really substantive or whether we are talking about a technicality. In either event, I think we ought to comply with the budget. I hope the Senator from New Mexico and the Senator from Oregon could give us a little more guidance on this. It is my understanding we have been working all week with the staffs of the Senator from New Mexico and the Senator from Florida to get the entitlement question, which I understand and believe is a substantive question, worked out.

Mr. DOMENICI. It is.

Mr. NUNN. My understanding is that that was one of the points of order that the Senator from Oregon pointed out. Is it not true that we had already basically agreed to accept that amendment? Will the Senator correct that?

Mr. DOMENICI. I indeed indicated and I will repeat, the floor managers indicated their willingness to accept an amendment which makes the entitlement and direct spending that is in this bill subject to appropriations. They had agreed to that.

Mr. NUNN. The second question I would ask on the 302(b), is that the form 302(b)?

Mr. DOMENICI. They are more than B's. He is referring to some others and I believe we can help the floor managers with that and we will do that before the day is out.

Mr. NUNN. I would be delighted from our side to do everything we could to make sure we are in technical compliance, but I have to raise the question, we brought our bill out, it was already out of committee long before we had a budget resolution. That meant that we had already gone through the subcommittee markups, the subcommittees had already reported to the full committee. The full committee had already acted. The full committee reported to the Senate. The bill is pending on the Senate floor. Now, what substantive sense would it make to go back after we got a budget resolution and give subcommittees direction when we had already gone through the whole process? That would have been a useless exercise. And again I want to comply technically, but I see that as no substantive meaning at all.

Mr. HATFIELD. Will the Senator yield at this point? The Senator is enunciating the very frustration that beset the Appropriations Committee from the very beginning and I am glad to welcome the frustration.

Let me just say we cannot draw a distinction between technical and substantive violations for the simple reason we had to go through the process——

The PRESIDING OFFICER. Under the unanimous-consent agreement, the time of the Senator from New Mexico has expired. The Senator from Florida is now recognized for 5 minutes.

Mr. GOLDWATER. Parliamentary inquiry.

Mr. CHILES. I yield back my time.

The PRESIDING OFFICER. The Senator from Florida yields back his time?

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. GOLDWATER. Under section 300 of the Budget Act, on what date is the action on the concurrent resolution due to be completed?

The PRESIDING OFFICER. April 15.

Mr. GOLDWATER. April 15. One more question, Mr. President. Let me write that down before I forget it. Under the Congressional Budget Act, what effect upon the points of order discussed here today does the failure to complete the concurrent resolution on the budget on April 15 of this year have?

The PRESIDING OFFICER. It has no effect.

Mr. GOLDWATER. It has what?

The PRESIDING OFFICER. It has no effect.

Mr. GOLDWATER. Well, Mr. President, I raise those points because I am getting a little bit tired, as the chairman of the committee, of year after year after year completing our work when we are supposed to complete it and the Budget Committee never is ready.

Now, I think we ought to change the budget setup because we are not getting anything done under it. We have been ready since May, late May. Then we had to change everything because the Budget Committee said we were wrong. We changed everything. Then we had to change it again because they said we were wrong again. We are either going to straighten this out or you are going to have the Budget Committee running the Senate. I just repeat I am getting a little tired of this committee working its tail off and other committees sitting down doing nothing.

AMENDMENT NO 2627

(Purpose: To provide for a report by the Secretary of Defense on the impact of the new interpretation of the Administration concerning the Anti-Ballistic Missile Treaty)

Mr. WALLOP addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WALLOP. I send an amendment to the desk on behalf of myself, Mr. QUAYLE and Mr. WILSON and ask it be stated.

The PRESIDING OFFICER. Does the Senator ask unanimous consent to set aside the pending amendment?

Mr. WALLOP. The Senator regrets that oversight and does.

Mr. DANFORTH. Reserving the right to object——

The PRESIDING OFFICER. The Senator from Missouri reserves the right to object.

Mr. DANFORTH. Mr. President, I am not going to object but I was wondering, if I could have the attention of the managers of the bill, if they have any intention with respect to a unanimous-consent request perhaps putting in sequence some future amendments so that Senators could be alert when their time at bat will come.

I and several Senators will have an amendment relating to defense spending for the NASA Program, and I think there are about four or five Senators who would like to speak on behalf of the amendment. I was wondering if we could have some idea of a time agreement when they would be on the floor.

Mr. GOLDWATER. If the Senator will yield, the Senator can have the next opening for the amendment. As soon as the Senator from Wyoming is through, get your act on the road.

Mr. DANFORTH. All right. I wonder if the Senator would yield for a unanimous consent request?

Mr. NUNN. Mr. President, will the Senator yield? It really does not matter to me what amendment comes next, but I do think we have an opportunity—the Senator from Massachusetts talked to us a few minutes ago about bringing up the comprehensive nuclear test ban amendment that he has, and he has, I believe, advised that he would be willing to take 1 hour with equal division. Is it my understanding the Senator from Missouri would be willing to take 1 hour equally divided also on his amendment?

Mr. DANFORTH. That is correct. Would the Senators decide which one would go first because if we could set both of those up we would be able to move very rapidly.

Mr. DANFORTH. It would be fine with me if the Senator from Massachusetts would go next after the Wallop amendment and if we can be recognized after that.

Mr. LAUTENBERG. Mr. President, reserving the right to object to that unanimous-consent request, there are others of us waiting with amendments as well, and to stand here while time is divided between two Senators is in my view not an appropriate way to distribute the time. We are looking for recognition. People are waiting on the floor. I have been prepared, as the Senator from Georgia knows, since last night to claim my time. But I do not want to stand by here while it is divided by others.

Mr. NUNN. I understand the point of the Senator. That is why we have the Chair and every Senator will have to get recognition. We cannot recognize any Senators. We would like to get unanimous consent if it is possible on both of those. Does the Senator from New Jersey have any time in mind for a possible unanimous consent on his?

Mr. LAUTENBERG. I would be content to have a half an hour, 15 minutes on each side.

Mr. NUNN. I would say to the chairman, we have three possibilities of unanimous consent agreements here. If we can work them out, as far as I am concerned, the sooner the better.

Mr. DANFORTH. Mr. President, I would be prepared to go third in that sequence. That is fine with me. All I wanted to know is if we could get some idea of where we are in the sequence so that the Senators who are concerned with the NASA amendment could be prepared. If we could lock up a unanimous-consent request now, which would include the NASA amendment, I would be most appreciative. One hour equally divided would be sufficient.

Mr. NUNN. I would suggest while we have the Senators on the floor that we propound each unanimous consent request without regard to which one would take priority and the Chair will have to decide that matter or the Senators can decide themselves. The Senator from Missouri is at least willing to have unanimous consent for 1 hour equally divided.

Mr. DANFORTH. Yes.

Mr. NUNN. Mr. President, I ask unanimous consent that the amendment of the Senator from Missouri concerning NASA allocations——

The PRESIDING OFFICER. The Chair will announce that there is a unanimous-consent request from the Senator from Wyoming pending to lay aside the pending amendment so we can consider the amendment of the Senator from Wyoming.

Mr. NUNN. I have no objection to that.

The PRESIDING OFFICER. Is there objection to the unanimous consent request of the Senator from Wyoming?

The Chair hears none, and it is so ordered.

□ 1700

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. WALLOP] for himself, Mr. QUAYLE and Mr. WILSON, proposes an amendment numbered 2627.

Mr. WALLOP. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. Mr. President, reserving the right to object, I might not object if the Senator could give us the basic substance of the amendment.

Mr. WALLOP. I will be happy to respond.

My amendment deals with asking the Defense Department to file a report with the Senate by the 1st of February of next year asking them to tell us——

Mr. KENNEDY. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end thereof, add the following:

SEC. . REPORT ON THE ANTI-BALLISTIC MISSILE TREATY.—The Secretary of Defense shall, not later than February 1, 1987, transmit to Congress a report concerning the impact of the less restrictive interpretation of the Anti-Ballistic Missile Treaty. Such report shall include, but not be limited to the following:

(1) an analysis of the ramifications of the less restrictive interpretation on the development under the Strategic Defense Initiative program, of strategic defenses, including comprehensive strategic defense systems, and more limited defenses designed to protect vital U.S. military and command and control assets, based on "other physical principles". This analysis should compare research and development programs pursued under both the restrictive and less restrictive interpretations of the ABM Treaty, including a comparative analysis of—

(A) the overall cost of the research and development programs

(B) the schedule of the research and development programs, and

(C) the level of confidence attained in the research and development progams with respect to supporting a full-scale engineering development decision in the early 1990's; and

(2) a list of options under the less restrictive interpretation of the ABM Treaty that meet one or more of the following objectives: (a) reduce the overall development cost, (b) to advance the schedule for full-scale engineering development decisions, or (c) to increase the level of confidence in the results of the research by the original full-scale development date.

Mr. WALLOP. Mr. President, I ask unanimous consent that it be in order that the unanimous-consent request on the three amendments that have been mentioned, if possible, be propounded now.

Mr. NUNN. I thank the Senator from Wyoming.

Mr. President, I ask unanimous consent that the amendment of the Senator from Missouri concerning NASA funding be given a 1-hour time limit, with the time equally divided.

Mr. DANFORTH. And no amendments.

Mr. NUNN. And no amendments thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I ask unanimous consent that the amendment of the Senator from New Jersey be allocated 30 minutes, 15 minutes on each side, equally divided, with no amendments thereto.

The PRESIDING OFFICER. Is there objection?

Mr. WARNER. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. WARNER. Mr. President, I may withdraw that objection if the Senator will tell us what the context of the amendment is.

Mr. LAUTENBERG. It has to do with the wearing of religious apparel in the military.

Mr. WARNER. Mr. President, would the Senator from New Jersey and the ranking minority member consider adding time? There are speakers on our side who wish to address this issue. I do not know how many there are and what time would be consumed. I would think an hour would adequately protect the interests on this side.

Mr. LAUTENBERG. I have no objection.

Mr. NUNN. Mr. President, I propound another unanimous-consent request; that the amendment of the Senator from New Jersey be allocated 1 hour, with time equally divided between the proponents and the opponents, with no amendments in order thereto.

The PRESIDING OFFICER (Mr. MCCONNELL). Is there objection?

Mr. LEVIN. Mr. President, reserving the right to object, will the Senator

modify that to allow for one germane amendment that I may wish to offer?

Mr. NUNN. I defer to the minority leader.

Mr. LEVIN. On the same subject.

Mr. BYRD. Mr. President, there is a little difference between germaneness and relevancy. I am just stepping into this. I do not know anything about the amendment, the identification of it. I simply want to be sure that the managers have some identification of the amendment, so that all Senators will realize what they are entering into.

I merely suggest to my distinguished friend that if we can get identification of the amendments and if he can continue, as he is doing, to get agreements that no amendments be in order, unless they are identified or germane, it would be fine.

Mr. LEVIN. The amendment I would offer would be on the same subject and would be germane.

Mr. NUNN. It would be about religious apparel?

Mr. LEVIN. Yes.

Mr. NUNN. Does the Senator from Virginia have any objection?

Mr. WARNER. No.

Mr. NUNN. Mr. President, I amend my request so that one amendment would be in order, and that would be the amendment by Senator LEVIN, which would be germane and on the same subject.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. NUNN. Mr. President, I seek the attention of the Senator from Virginia on the next request. There might be a problem with this request.

The Senator from Massachusetts has an amendment—and I understand the Senator from Massachusetts will confirm this—which has to do with the comprehensive test ban, ratification of the Threshold Test Ban Nuclear Explosion Treaty.

Mr. President, before I propound a request, it would be my intention to propound a unanimous-consent request for 1 hour, equally divided, with no amendments being in order.

Mr. WARNER. Mr. President, we would have to object. However, I wish to consult the distinguished chairman of the Foreign Relations Committee, who will handle the debate, instead of the Armed Services Committee. So we will endeavor to consult them. My understanding is that he would object to any time agreement.

Mr. NUNN. Perhaps we could find out what the content of the amendment would be; and if the Senator from Massachusetts would not object and there were no objections, we could agree on one amendment and specify what the amendment would be.

Mr. WARNER. My suggestion is that the staff work with the staff of the Foreign Relations Committee and see if they can contact the chairman.

Mr. KENNEDY. Mr. President, I hope we can work something out on this. I will be glad to enter into whatever time agreement we can.

I indicated to the ranking minority member last evening that we are prepared for an hour of consideration, evenly divided. At that time, there appeared to be no objection to it. But I understand that Members might want to be assured of adequate time to discuss the issue.

While unanimous-consent requests are being made, I hope the manager and the minority floor manager would recognize that on the amendment I will offer on Davis-Bacon and the service contract provisions that are in the bill, which have little if anything to do with the defense authorization, I also would be prepared to enter into a time agreement of an hour, so that we could expedite the whole consideration of the defense authorization bill. I want to make that public.

There may be some objection to it, but I want to indicate a willingness to work with the floor managers of this bill, to see if we can get this agreed to in a timely fashion.

Mr. NUNN. I think it would be very helpful if we could get a time agreement of an hour on both of those, and I will work toward that end. I will withhold any unanimous-consent request at this time.

Mr. GRAMM. Mr. President, will the Senator yield?

Mr. WALLOP. Mr. President, I believe the Senator from Wyoming has the floor and yielded——

Mr. NUNN. I yield the floor.

Mr. GRAMM. Mr. President, will the Senator from Wyoming yield to me briefly, to respond to the Senator from Massachusetts?

Mr. WALLOP. The Senator yields for the purpose of one response. The Senator from Wyoming does not wish it to take place over his amendment.

Mr. GRAMM. I thank the distinguished Senator from Wyoming.

I would be happy to enter into a unanimous-consent agreement on an amendment relating to Davis-Bacon and a separate unanimous-consent agreement on an amendment relating to the Service Contracting Act. I would be happy to allow the distinguished Senator from Massachusetts to set any time limit he sought.

I will not enter into a unanimous-consent agreement and will object to any unanimous-consent agreement with respect to a time limit on an amendment that considered both items at once.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. DANFORTH. Mr. President, will the Senator yield for about 15 seconds?

Mr. WALLOP. I yield 15 seconds to the Senator from Missouri, without losing my right to the floor.

Mr. DANFORTH. Mr. President, I ask the Senator from Georgia and the Senator from Virginia, with respect to the two amendments on which there are time agreements, is there any possibility of determining—I would have to come second. In other words, after the Wallop amendment is disposed of, would it then be in order to recognize the Senator from New Jersey, let him deal with his amendment, and then deal with the NASA amendment, in that sequence, so that we will not have to sit around the floor, scrambling for recognition?

Mr. NUNN. That is fine. I hesitated to propound that unanimous-consent request, because then we would have to see who was recognized. I hope the Senators can work that out.

Mr. DANFORTH. Mr. President, I ask unanimous consent that after the disposition of the Wallop amendment, Senator LAUTENBERG be recognized; that his amendment be disposed of; that subsequent to the disposition of the Lautenberg amendment, I be recognized, and that the NASA amendment be in order.

The PRESIDING OFFICER. Is there objection?

Mr. WARNER. We have no objection, except that I understand there may be an amendment to the amendment of the Senator from New Jersey, in which case that should be incorporated in this unanimous-consent request.

Mr. DANFORTH. I think it is incorporated. That is understood.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

□ 1710

The Senator from Wyoming.

Mr. WALLOP. Mr. President, the amendment which I sent to the desk is really simple and I believe noncontroversial. It has been cleared with the distinguished managers of the bill.

The amendment would simply require the administration to report to Congress by February 1, 1987, on how current SDI programs would be impacted by or reconstructed under the new interpretation of the ABM treaty.

My colleagues are all certainly aware that in October of last year, the administration announced that after a thorough review of the ABM Treaty negotiating history, their judgment was that a broader interpretation of what is permitted in the area of research and development and testing of ABM systems or their components was justified. They then decided that even though this new, broader interpretation was legally valid; the United States would adhere strictly to the narrow interpretation.

My amendment does not prejudice in any way the question of which interpretation is more valid or whether

the United States should be adhering to one or the other. It is simply informational, designed to see what we would do differently under the new interpretation, specifically, how the new interpretation might effect the cost and time schedule of and technical confidence in the SDI Program.

Mr. President, it seems to me that we in Congress need to know how this new interpretation effects the SDI Program, and more important, that the American people have a right to know. I expect that this amendment will not require a rollcall vote and I hope that all Senators will support it, particularly since we have had a letter at DOD since last October requesting precisely this information. If they have not examined the issue they should. How else can we make policy decisions if the consequences of choices remain unknown to us?

Mr. President, it is my understanding that the distinguished floor managers of the bill have reviewed and accepted this amendment and I would ask them if that understanding is correct, and, if so, I am prepared to ask for the question on the amendment.

Mr. WARNER. Mr. President, I apologize for being away from my desk momentarily.

I say to my distinguished friend from Wyoming that his amendment is acceptable to this side and I wish to commend him for it.

It is a subject which we have dealt with from time to time in the Armed Services Committee hearings and it is an important body of fact which should be brought to the attention of the Senate within the time frame as provided in the amendment.

Mr. WALLOP. I appreciate that.

It is my understanding that the distinguished minority floor manager is of the same view.

I thank him and his staff for working with me on the language of the amendment in addition to that of the majority.

Mr. WARNER. Mr. President, I apologize to my colleagues. I was looking for a copy of the amendment which I had not received.

Mr. NUNN. I intend to support the amendment. We have a couple of copies floating around here and I want to make sure that the one at the desk is the one we have.

The amendment in front of me has section (A) which reads "the overall cost of the program including the research program and future development programs."

Mr. WALLOP. The Senator is correct.

Mr. NUNN. That is the correct amendment.

Mr. WALLOP. It is the last one the manager and majority staff had.

Mr. NUNN. The cost is in there.

Mr. WALLOP. Yes.

Mr. WARNER. Again we indicate acceptance on this side.

Mr. NUNN. Mr. President, I am sure I have been given this amendment from the desk, and I believe that perhaps inadvertently, I am sure inadvertently the word "deployment" cost has been left out.

Mr. President, I am told the amendment at the desk is the amendment we have looked at and, therefore, I urge its adoption.

Mr. WALLOP. Mr. President, I call for the question on the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Wyoming.

The amendment (No. 2627) was agreed to.

Mr. WALLOP. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WALLOP. Mr. President, I particularly thank the distinguished floor managers and their staff. They have been cooperative in trying to seek the information which the Senate approved.

AMENDMENT NO. 2628

(Purpose: To permit members of the Armed Forces to wear, under certain circumstances, items of apparel not part of the official uniform)

Mr. LAUTENBERG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG] for himself, Mr. D'AMATO, Mr. KERRY, Mr. WILSON, Mr. SIMON, Mr. BOSCHWITZ, Mr. SPECTER and Mr. GRASSLEY proposes an amendment numbered 2628.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. WEARING RELIGIOUS APPAREL NOT PART OF THE OFFICIAL UNIFORM.

(a) IN GENERAL.—Chapter 45 of title 10, United States Code, is amended—

(1) by redesignating section 774 as section 775; and

(2) inserting after section 773 the following new section:

"§ 774. Wearing religious apparel

"(a) Except as provided in subsection (b), a member of the armed forces may wear an item of religious apparel if—

"(1) the wearing of that item of apparel is part of the religious observance of the religious faith practiced by the member; and

"(2) the item of apparel is neat and conservative.

"(b) The Secretary concerned may prohibit a member from wearing an item of religious apparel if the Secretary determines that the wearing of such item significantly interferes with the performance of that member's military duties.".

(b) CONFORMING AMENDMENTS.—The table of chapters at the beginning of such chapter is amended—

(1) by redesignating the item relating to section 774 as 775; and

(2) by inserting below the item relating to section 773 the following new item:

"774. Wearing religious apparel.".

Mr. LAUTENBERG. Mr. President, today I am offering an amendment to permit the wearing of neat and conservative religious apparel in the military. Under my amendment, such apparel would be permitted only if it does not significantly interfere with the performance of military duty.

This amendment tracks S. 2269, legislation I introduced earlier this year with Senator D'AMATO in response to the Supreme Court's 5 to 4 decision in Goldman versus Weinberger. Language identical to this amendment has already been incorporated into the House version of the Department of Defense authorization bill. In Goldman, the Court held that the military's perceived need for uniformity of dress, and for discipline, overrode the first amendment right of an Orthodox Jewish serviceman, Dr. Goldman, to fulfill his traditional Jewish obligation by wearing a skullcap. Our amendment would permit Dr. Goldman to serve his country while at the same time allowing him to remain true to his religion. And it would permit others like him, of whatever faith, to do the same.

This amendment, and this issue, is broader than any one religion. It concerns the right of people of all faiths to serve their country without having to forsake their religious beliefs and practices. It would affirm the religious and ethnic diversity that have made America strong, not weak.

The primary philosophical objection to this amendment has been that wearing visible items of religious apparel may threaten the military uniformity necessary in building unit cohesion. While I appreciate and agree with the importance of unit cohesion and esprit de corps in the Armed Forces, I do not believe that wearing neat, conservative and unobtrusive religious apparel threatens this principle.

To the contrary, it would strengthen morale by affirming that the military is a humane and tolerant institution. And as Justice Brennan made clear in his moving dissent to the majority opinion in Goldman, allowing religious apparel to be worn with a U.S. military uniform is an eloquent reminder that the shared and proud identity of U.S. servicemen embraces and unites religious and ethnic pluralism.

Although uniformity is claimed as an important value, the services easily permit other manifestations of reli-

gious diversity. Service members attend Christian, Islamic, Jewish and other religious services. Barracks mates see Mormons wearing temple garments and Catholics wearing crosses and scapulars. It is obvious that our services are made up of people from different faiths and ethnic backgrounds and that diversity is America's greatest asset. It is no secret, nor should it be.

Further, I should point out that the record here and abroad on the wearing of religious apparel support my position. In the Goldman case, for example, it was established that Captain Goldman himself, as well as many other members of the armed services, had worn skullcaps for many years in the military service without any apparent disruption, difficulty, or adverse impact on military effectiveness.

□ 1720

And the dissenting justices—and I remind you that there were four—pointed out there was no evidence in the record that the discipline of the Armed Forces would be subverted if Orthodox Jews are allowed to wear skullcaps with their uniforms, nor did the Air Force offer any basis for such a contention as a general proposition.

Further, for years, our Army accepted Sikhs and allowed them to wear their turbans for decades. It still allows them to reenlist under those conditions. Would an Army that believed that the wearing of turbans impaired morale permit these Sikhs to enlist year after year? Obviously, I think not.

The Army has stopped enlisting Sikhs since its lawyers voiced concern that if the Army tolerated Sikh turbans, it would have to allow saffron robes as well. So in changing its enlistment policy toward recruits who wear turbans as a matter of religious practice, the Army was objecting not to turbans, but to saffron robes. It is my position that the wearing of robes might interfere with the performance of military duty, and would therefore probably not be permitted under the terms of this amendment. However, that would be a decision left for the services to make in the first instance, as would all decisions under this amendment.

There is ample evidence from other countries that wearing religious apparel does not interfere with the fighting spirit of the military unit. The Israeli Defense Forces, for example, have many servicemen who go into battle, distinguishing themselves, wearing skullcaps. After successes in four separate wars, it is hard to argue that the yarmulke in any way interfered with their ability to wage successful war.

Furthermore, research by the Congressional Research Service indicates that in Canada, New Zealand, and India, Sikh and Jewish soldiers are permitted to wear their religious headwear and their religious artifacts with other standard items of clothing.

In the United Kingdom, Sikh members of the services are permitted to wear turbans, and to keep their hair long, if they choose. And we are not advocating that. And the Queen's Regulations for the Royal Air Force, which generally require all personnel to remove their headdress while on duty before a judge or magistrate, specifically exempt members of the Jewish faith or other religions which require the head to be covered on solemn occasions.

Our own experience, and that of other countries on this question speaks for itself. There is simply no evidence that the wearing of visible religious apparel interferes with uniformity or unit cohesion.

Our citizens in uniform should not be deprived of their basic constitutional rights, such as the free exercise of religion, the minute they enter the military. There must be a compelling and supportable argument justifying such a prohibition. None has been made.

Some of the services have argued that the neat and conservative standard will be hard to apply, forcing them to make delicate and difficult distinctions between religious garb. But the services have a successful record of using the neat and conservative standard to distinguish acceptable from unacceptable jewelry. If we can make this distinction for neat and conservative jewelry, why can't we make it for religious apparel.

Certainly, the wearing of apparel central to the practice of one's religious beliefs is more important and worthy of review than the wearing of jewelry. The Air Force permits the wearing of up to three rings and one identification bracelet of neat and conservative but nonuniform design. This jewelry is permitted even if, as if is often the case with rings, it associates the wearer with a denominational school or a religious or secular fraternal organization. These items are not deemed to be unacceptably divisive. I cannot see why religious apparel that is neat and conservative would be.

In closing, I want to emphasize, once again, that this amendment is not confined to the wearing of skullcaps, but addresses the wearing of any item of apparel that is part of the member's religious observance. The amendment states, "In order to preserve constitutional rights to the free exercise of religion, a member of the Army, Navy, Air Force or Marine Corps may wear any neat and conservative item of apparel if the wearing of such apparel is part of the religious observance of the member, unless the wearing of such apparel significantly interferes with the performance of the member's military duties."

I urge my colleagues to approve this amendment so that the practice of religion and service to one's country need not be in conflict.

Mr. President, I ask unanimous consent to add Senator GRASSLEY as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMON. Will the colleague yield?

Mr. LAUTENBERG. I yield to my distinguished colleague from Illinois.

Mr. SIMON. Mr. President, I simply want to rise and support this amendment. Back when I was in the Illinois general assembly, I found myself sponsoring the amendments that accommodated religious minorities—Seventh-Day Adventists, Christian Scientists, Jehovah's Witnesses. In the process, I learned a little more about the diversity that is America, that makes America rich.

One of the things we ought to do is to accommodate religious diversity and go out of the way to do that. I think this is a very, very small gesture in the right direction.

I strongly support the amendment. I commend my colleague from New Jersey for offering this amendment.

Mr. LAUTENBERG. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. Mr. President, this is something that should never be allowed by the Congress of the United States. Now, the purpose of this is to permit military members to wear religious apparel in uniform if it is part of a religious observance of a faith practiced by the member and is neat, conservative, and unobtrusive.

Well, let us stretch that a little bit. Let us say the man is a Moslem. Would he be allowed to wear all the dress and gear of the Moslems? Suppose he is a Hopi Indian? They like to wear a red band around their head. That is religion, too. It may not be our religion, but it is religion.

The headdress, the feather headdress of many of the Indians in this country, that is religious. It is not just on there for ornamentation.

And then, if you are stretching it far enough, you might see someday a man in kilts. It is hard to relate that to religion, but it probably could be done.

Mr. President, one of the great things about the service is the uniform. It is the pride of the man who is wearing that uniform that does more to create the strong morality of our Armed Forces than anything else.

I might say, Mr. President, that when we allow uniforms to become sloppy, when we allow the shoes to be

unshined, when we allow them to disregard the uniform dress codes, then we begin to see the breakdown of morality and we begin to see the breakdown of the Armed Forces.

The Supreme Court, of course, has held in Goldman versus Weinberger, that the Orthodox Jewish Air Force captain had no first amendment right to wear the yarmulke in military uniform and that military uniform regulations do not violate constitutionally guaranteed rights.

Military uniforms have that name because they are to be uniform. That is why each of the services has a different uniform. The Air Force wears blue. The Army wears green. The Navy wears blue. This has been done down through the 200-odd years of our history. Never before has there been suggested the idea that we could have a difference in the way different members of the armed services dress.

The military uniforms have that name because they are to be uniform. And, as I said earlier, studies have identified failure to enforce and require uniform dress and appearance in military as being a major source of discipline problems. And, Mr. President, I can tell you, as one who has served, along with many other Members of this body, in the military, that this is one of the first things we recognize. You look at an outfit where they allow sloppiness, then it is a bad outfit. I am not saying the same thing would apply if a man wore a religious object.

□ 1730

What I am getting at is if you allow men or women in the services to wear one type of differentiation in their uniform, it is not going to be long before they are wanting to get in on the act. I probably will be criticized very loudly. I happen to be half Jewish. But I do not go around wearing half of this and half of that. I want to wear the uniform of my country. That is what I am proud of. I am proud of my religion. I happen to be Episcopalian. I am also proud of being half Jewish. I do not think this is any time or place for us to be arguing whether or not we allow differences in the uniform. The amendment would require military commanders to become judges of appropriate military apparel such as caps, armlets, turbans, beards, hair tufts, daggers, face coverings for females.

I think it will lead to endless unnecessary litigation involving Armed Forces and their individual members. A survey as part of the study indicate there could be a substantial negative response among Armed Forces members if visible uniform exceptions were to be made.

Mr. President, I have to oppose this as strongly as I can. I do not think to vote no would indicate any antireligious feeling. I do not think voting for it is voting for a strengthening of our Armed Forces. If you are not happy in uniform, get out of the uniform. Join something else. If you are unhappy because you cannot wear a red button, get out, join something else. If you are unhappy because you cannot wear a religious item, you do not have to stay in the outfit. Get someplace where you can be happy. I feel very strongly about this, Mr. President.

I devoted too many years of my life to the military to idly stand by and watch something like this start the deterioration of our uniforms. I also consider myself to be a rather religious man. But I can see no connection between religion and the wearing of a uniform.

I yield the floor.

Mr. SPECTER addressed the Chair.

THE PRESIDING OFFICER. Who yields time?

The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I support the amendment on the grounds that it sets forth a reasonable and limited standard under which there may be a limited wearing of a religious item like the yarmulke without unduly interfering in any way with the military function. When the Supreme Court of the United States decided in a 5-to-4 decision that the conduct was not covered under the first amendment, that in no way reached the issue whether it would be appropriate for the Congress of the United States to consider the matter as a matter of public policy for legislation in this body.

The distinguished Senator from Arizona comments that this is not the time or place to consider the matter, and I disagree respectfully, but I disagree. I think that the decision by the Supreme Court of the United States is not a correct decision. When those nine Justices decide a case, five come up on one side and four on the other. It is a hairline difference of opinion as to whether the first amendment properly accepted this conduct within the ambit of freedom of religious expression.

But that is not at all the same issue as whether it is a matter of public policy that the Congress ought to say that the wearing of an item like the yarmulke is acceptable. It is, after all, for the Congress of the United States to establish the rules governing the military course of the United States. That is our promise.

We are today considering the Department of Defense authorization bill. We decide what the Department of Defense should do, what its numbers should be, what its organization should be, what its weapons should be, and what its dress should be. So this is particularly and peculiarly a matter within the ambit of congressional decision.

When the distinguished Senator from Arizona talks about a breakdown of morality, Mr. President, I suggest exactly the contrary. Where you have people who are religious and who care sufficiently about a religion to undertake a certain kind of dress or garb, that is a firm showing of morality. I think the morality of that individual would be enhanced, and to the extent that it is a concern for the discharge of military responsibility, it would be a plus and not a minus.

Mr. President, I do not believe that there would be any undue trend toward very extreme situations if this legislation were to pass. If there were to be a head dress, if there were to be a turban, that might not be so bad. Certainly, when you consider what is meant by the yarmulke, a very small skullcap, that does not interfere with the ability of some of the military to perform their service.

The case at hand which led to the Supreme Court decision involved a doctor who chose to wear a yarmulke under those very limited circumstances.

Mr. President, I think there is a feel, a tone, a sense that arises from this Supreme Court decision which really goes beyond the items which we have talked about today. And that is a feeling that for a limited dress and a limited item a man or a woman ought to have the latitude to have that particular item of apparel. I think it is a sound approach, certainly within the purview of the Congress, to make a decision. I do believe it is an appropriate action for us to take. That is why I support the amendment as offered.

I thank the Chair. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. WARNER and Mr. LAUTENBERG addressed the Chair.

Mr. WARNER. Mr. President, I am happy to yield.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. WARNER. At some point in time I would like to address this issue.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. LAUTENBERG. I yield time.

Mr. LEVIN. I ask for 5 minutes if the Senator from New Jersey will yield.

Mr. President, I rise in support of the amendment of the Senator from New Jersey, and ask unanimous consent that I be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, this is obviously an issue of a sense of vision, one I think all people of good will would like to try to resolve. But the facts are that very few of our military people are of the Orthodox Jewish faith. We have a proportionate per-

centage of our military that are Jewish, but most of the members of the Jewish faith are reformed and conservative Jews or reconstructionist Jews. They do not have this requirement of wearing the small skullcap when they are indoors. But those of the Orthodox Jewish faith have this religious requirement. What is important for all of us to remember is that this requirement has always been accommodated in the American military. And I say this again because it seems to me that this is the critical fact.

This religious need has always been accommodated in the services. Orthodox Jews died in World War II with their skullcaps on; that is, if they were killed indoors and if they were the victim of a shelling. There is no requirement to wear the skullcap when outdoors. It is only indoors that there is a requirement to have your head covered. This skullcap has been so unobtrusive that it has not even been noticed by most people. I have checked with Jewish chaplains, and have checked with my own military adviser on my staff who is a retired Army colonel. They all say Orthodox Jewish soldiers indoors have always worn skullcaps. They have been unobtrusive, never noticed, and accommodated in a pluralistic society.

What is changed is not a sudden desire to wear the skullcap. That has not changed. That is thousands of years old. What has changed is that we have a Supreme Court opinion which says that the abstract prohibition on wearing skullcaps is constitutional. That is not the issue. The issue is whether we can accommodate something which has been traditional, which has created no problem and do so without doing a disservice to what my friend from Arizona correctly states is a requirement of military discipline. There is no doubt that we have to have discipline in the military. There is no doubt that we have to have uniforms.

□ 1740

We allow for minor deviations with rings. We allow for minor deviations with bracelets. This would not be a deviation from practice. The practice has been to allow the skullcap indoors because it has been unobtrusive and has created no problem.

The Defense Department did a study on this. That study, I think, is about 100 pages long. The one thing that it does not do is to ask people the very simple question: Has the wearing of skullcaps been allowed and, if so, has it created a problem? The answer is that it has been allowed and it has created no problem.

There is not a word in the study about common sense, practice, practicality, accommodation.

Has this been allowed? Have orthodox Jews in World War II, Vietnam, Korea, and in between been allowed to wear a skullcap which is unobtrusive when they are indoors?

The answer is yes. There has not been any problem.

We are creating a problem for ourselves, not because there is a new practice which is being sought, but because there is an abstract regulation which the Supreme Court has said is constitutional.

This can be accommodated without any violation of custom in the military, which has allowed it, and without any violation of the need for uniformity and discipline.

Our military services fight for a lot of causes, a lot of American ideals. One of those ideals that they fight and die for is American pluralism. That is one of the things our military is all about and that is one of the reasons they are there.

If my time has been exhausted, I might ask for 2 additional minutes.

Mr. LAUTENBERG. I would agree to that.

Mr. LEVIN. Mr. President, in a speech of President Reagan to a Baptist convention in 1984, he read from a letter from a Jewish chaplain who was present at Beirut when over 200 marines were killed. The chaplain described his experience. This was a chaplain who was wearing a small skullcap, took off his skullcap and used it to mop the brow of a wounded marine, and of his Catholic brother, a chaplain, who tore off a piece of his clothing, the Catholic chaplain's clothing, to replace the skullcap of the Jewish chaplain's head because the Catholic chaplain, Father Butarelli, wanted everybody to know that American soldiers were fighting for American pluralism. This demonstrates the pluralism of this society, this is what we were protecting in Beirut, and this is what is so different from what exists in many parts of the world.

That was a plus in Lebanon where they kill each other for religious differences. In this country, we fight to accommodate religious differences. My point is that we have done this for decades in the military; we have allowed these skullcaps to be worn in an unobtrusive way.

We have accommodated it, we have defended it, we have protected it, because this practice has been no problem. There has never been a problem.

We are creating a problem. We are creating a problem if we do not allow it. If we return to the draft, if we ever do, what do we say; Orthodox Jews cannot serve in the military? Do we want to say that, that Orthodox Jews cannot serve in their country's service? Does anyone here want to say it? I do not think anyone does.

The only way an Orthodox Jew can serve is if he is allowed to wear a skullcap indoors. It is his religion. We should not be excluding people unless there is a mandatory reason to do so. We do not have to exclude these people. We never have. I repeat. We never have. We have accommodated this religious difference without any difficulty. I yield the floor.

Mr. WARNER. Mr. President, it is with a great sense of reluctance that I stand in opposition to the amendment.

I first would like to recognize my two colleagues for having brought up a subject which I respectfully believe they feel very strongly about.

I have had opportunities in our enjoyable careers in the Senate to talk with the distinguished Senator from New Jersey about his military career during World War II, in the closing stages of that conflict when he was in Europe with the U.S. Army. I know he speaks not only from a sense of conviction that also a sense of pride, having served in uniform. He understands full well the practical difficulties that have been pointed out here today.

I would ask my distinguished colleague from Michigan about one point. I am searching my memory. This has been a learning experience for some of us here in the past half hour. I cannot recall whether or not the orthodox members of his faith wear that skullcap aboard ship, which technically is an enclosed area. I cannot recall in my Navy experience of having seen that. Does the Senator know that regulation?

Mr. LEVIN. I believe the practice is that if they are indoors, they do wear their skullcap.

Let me again assure my friend, who I know is extremely sensitive, who has shown sensitivity all his life, that this has been so unobstrusive, such a nonproblem, that it has never been noticed until the Supreme Court opinion approved an abstract regulation. Until then it was never a problem.

The Orthodox Jews have, on ship, indoors, worn either a hat or a cap. It does not have to be a skullcap. If they were not allowed under their military regulations to wear their military cap indoors, they have had a small skullcap, which was unobtrusive. No one has ever noticed.

Mr. WARNER. I point out to my distinguished colleague that while great emphasis was placed on wearing this particular issue of religious faith during a military career, would the Senator from Michigan wish to address other issues which have been raised here; namely, that other forms of religious issue could well be disruptive? Would the Senator care to address that question?

Mr. LEVIN. I think the critical issue here is the obtrusiveness. As the Senator from Arizona pointed out, and others have pointed out, it is important that we have a uniform. That is clear. And that any deviations from that uniform, such as a ring or brace-

let, be allowed. We allow for rings with religious insignia on them and we allow for bracelets, which are unobtrusive. The skullcap is so unobtrusive that very few people have noticed that it has been worn. And it only has to be worn inside.

Mr. WARNER. Indeed, the skullcap is unobtrusive. In my brief tenure in active service in World War II and Korea, I do recall seeing, even in the combat zone, the apparel described by the Senator.

However, being unobtrusive in that particular case, the commanding officer could presumably be faced with a series of requests and some of the religious apparel might not only be obtrustive but interfere with the conduct of military duties.

I recall so well one time in my experience in Korea an officer who had not been up to the frontlines came up and he was wearing a red scarf. He did it because he was of a high rank and he thought that would single him out.

It sure did. It brought in an incredible amount of battery fire on a lot of innocent persons who, fortunately, in this instance, were not hurt. I remember that particular man being tackled and thrown into a bunker and covered up by his comrades very quickly. That scarf was interpreted by the enemy looking to it that perhaps he was a generalissimo and they wanted to get him fast.

I point out that there are complications.

Mr. LEVIN. That is always true, that inaction can interfere with military duties. That is why the amendment does provide that this unobtrusive skullcap could be prohibited if it interferes with one's military duties. If this should be the case, there is no doubt that the military need must come first. There is no question about that, and you have to be able to prohibit even an unobtrusive skullcap if it interferes with one's military duties.

My friend from Arizona is correct. The military obligation and military duty have to come first. We have always accommodated this skullcap; that is my point. If it is inconsistent with discipline and duty, the skullcap has to go.

□ 1750

Mr. WARNER. Mr. President, if I may ask another question of the proponents. I go back to the prolonged and passionate debates on school prayer. I recall that certain Senators brought up the issue of peer pressure. I must confess, that was the most difficult issue I found in the debate on school prayer; namely, that members, and I think a lot of emphasis was put on the Jewish faith—would feel that they had to do certain things and that they would be singled out. In this instance, there would be a certain amount of peer pressure among the members of a religious group to conform to whatever one or two might have done. As such, they might feel obligated as an entire group or unit to wear the manifestation of their religious faith, perhaps against their better judgment, because of peer pressure. Am I raising the subject fairly?

Mr. LAUTENBERG. Mr. President, if I may respond to my friend and colleague from Virginia, I think they are unrelated for the most part because we talk about school prayer. Of course, we do not want to open up a debate on that.

Are we talking about something that says that all or the majority of the attendees have to observe?

In this case, the peer pressure, if any, would be on the individual who has the courage to wear that skull cap or to wear that unique identification that says, "Look, I am as good an American as anyone else is, I am proud of my religion and I do not think that wearing this, that, or the other, as long as it does not interfere with my duty, in any way detracts from my being a good soldier, a good sailor, or a good airman."

Both the distinguished Senator from Virginia and the very distinguished Senator from Arizona have great experience and I have too much respect for their concerns to deny that their observations would be significant. But what we have tried to do is make certain that there is ultimately a commanders decision someplace along the line that says, "If this interferes in any way with the performance of your duty, you are prohibited." The amendment clearly states that.

I also do want to respond very briefly. I served in World War II; I got to the rank of corporal. It took me a long time to get there. But I do remember, for the benefit of the distinguished Senator from Arizona, that there was an allowance even then for store-bought additions to the uniform. I could not afford it. I wore GI issue. I kept it neat, I kept it pressed, I kept my shoes polished. I was afraid of incurring the wrath of the platoon commander if I did not. I was very reserved.

I am not an Orthodox person and do not wear manifestations of my religion. But I served with those who did and they served as well as anybody in the unit. So I do not think it in any way breaks down morale, breaks down pride, eliminates the ability to have a cohesive fighting unit that knows what its job is.

As a matter of fact, as has been said several times here now, I think rather it asserts once again that we in America are of different lots. We have our uniform, we have our pride in our Nation; yet it never suggests at any time that we have to sacrifice our particular ethnicity or our religion.

I hope that we do not make decisions here based on a breakdown in the structure of the military units that we might be able to maintain discipline. I used the examples of other countries where they have good fighting people and they permit the obvious manifestations of religious affiliation. I hope that our colleagues will see this, as the Senator from Michigan has said, as a practice that has taken place over many years. It has never interfered with the performance of duty to our knowledge.

We preserve the right, again, for the field commander, for the service commander, for the Secretary to make those decisions and hope that we will be able to move ahead with this and assert that we support uniformity, cohesiveness, high morale, et cetera. At the same time, we believe that people have the right to see that their religious observance is carefully supported.

Mr. WARNER. Mr. President, we are all aware of the fact that our men and women in the Armed Forces serve throughout the world.

Regrettably, there are certain parts of this world that practice religious intolerance. My concern would be if we were to write this into law—I happen to believe there would be a certain amount of peer pressure connected with this were it to be written into law. We may have a disagreement, but I feel that way.

If members of a certain religious faith felt they were obligated, now that this would be a matter of law, to wear that religious apparel, it might well jeopardize that individual in certain parts of the world to bodily harm and injury and might very well associate that individual in the proximity of wherever he or she may be serving his position.

Does the Senator see that as a problem?

Mr. LAUTENBERG. I do not see that as a problem. I see it as a problem of the past, when we reinforce our belief that every one of our citizens is entitled to serve wherever we send them. We have had some unhappy moments when some of our purportedly friendly countries have said, "We don't want any American Jews sent here, whether they are members of the military or members of the diplomatic corps." There were some shameful moments when the United States agreed. But we had second thoughts. We have said time and again, "An American is an American is an American, whether he is a Jew or black or whatever, we are proud of them. If you want our friendship, you will take our citizens as 100 percent American citizens."

Frankly, I do not think it is a problem.

Mr. WARNER. If my friend will yield, I did not suggest it as a policy; I suggested it might be a problem. We have had young people going to parts of this world where there is religious prejudice and they might be subject to attack.

Mr. LEVIN. There are places where black Americans are not welcome in this world and nobody would tolerate our not sending black soldiers with white soldiers anywhere just because they might be subject to attack. That is not what we are all about in this country. We stand for something and our fighting people die for something. That is really what it is all about.

What is ironic here is that this is one of the rights that we are fighting to protect, the right to religious pluralism.

Mr. WARNER. Mr. President, I agree with the Senator on that point. I was not suggesting in any way——

Mr. LEVIN. Let me quickly say that I know the Senator from Virginia very well. The Senator is an extraordinarily sensitive person on this issue and however we resolve this issue, he is still a very sensitive person on this issue, as is our friend from Arizona and our other colleagues who have spoken or may speak. That is not the issue.

Mr. WARNER. Mr. President, I am prepared to yield back my time. My colleague from Georgia may wish to address this matter.

Mr. THURMOND. Mr. President, I would like a few minutes.

The PRESIDING OFFICER (Mr. HECHT). The Senator from South Carolina.

Mr. THURMOND. Mr. President, I have the greatest respect for the proponents of this amendment. However, I cannot agree with them on it. I rise in opposition to it.

The goal of this amendment is to overturn a Supreme Court ruling through legislation. The case in question is Goldman versus Weinberger, a 1986 decision.

If this amendment is adopted, we will be placing military commanders in a position of deciding which religions will have the benefit of the statute and which will not. This is wholly inappropriate.

The Department of Defense should never be put in the position of endorsing or rejecting specific religions, and this is exactly what will happen if this amendment is adopted.

Justice Stevens concluded in the ruling on Goldman versus Weinberger that the military services have "no business drawing distinctions between such persons of different religions when enforcing commands of universal application."

Mr. President, we may be opening the door for numerous more court cases because of the subjective manner in which this amendment would have to be applied should it become law. The military does not favor certain religions and the Congress should not force the military to do so. I urge my colleagues to oppose this amendment.

● Mr. D'AMATO. Mr. President, I rise today in support of the amendment offered by my good friend, the junior Senator from New Jersey.

This amendment corrects an injustice affirmed by a Supreme Court ruling in March of this year. The Supreme Court, in a 5 to 4 decision, ruled that the Department of Defense was within its rights in disallowing the wearing of a yarmulke indoors by military personnel. The case, Goldman versus Weinberger, involved an Air Force officer who, though serving as a psychologist, was an ordained Rabbi. As an Orthodox Jew, Capt. S. Simcha Goldman wore his yarmulke at all times. The Air Force insisted that this was not within regulations. The case eventually reached the Supreme Court. On April 8, we introduced legislation, S. 2269, to correct this situation.

Mr. President, the amendment offered today is a reasonable solution to this problem. It will amend chapter 45 of title 10 of the United States Code to allow the wearing of neat and conservative religious apparel. Specifically, the bill allows members of the Armed Forces to wear any neat and conservative item of apparel, if the wearing of such apparel is part of the religious observance of the member, unless the wearing of such apparel interfers with the performance of the member's military duties.

I note that there is similar language for the wearing of jewelry in the military.

I believe the Air Force and the Department of Defense interpreted too strictly the regulations that prevented Captain Goldman from wearing his yarmulke indoors. Indeed, the Supreme Court's less-than-unanimous decision on this case left much room for debate.

It is uncertain whether the Supreme Court would have affirmed the lower court's decision if Goldman had not joined the Air Force of his own choice.

This legislation would not only resolve cases involving the wearing of the yarmulke, but also allow military personnel of any religion to wear, within reason, appropriate religious apparel. I question whether we can afford to preclude a certain group within our society from voluntary military service because of their centuries-old legitimate religious beliefs concerning the wearing of certain type of religious apparel.

For this reason, Mr. President, I believe it is necessary for us to pursue a legislative solution. Obtrusive and possibly interfering apparel should not be allowed, especially if such apparel would hinder the effectiveness of the service man or woman. In addition, religious apparel should not hinder the effectiveness of other military personnel. This is straightforward legislation that further strengthens the right of freedom of religion in this country. Our Armed Forces should not be in the position of completely dictating what religious behavior is acceptable.

Mr. President, I urge my colleagues to support this important amendment.●

□ 1800

The PRESIDING OFFICER (Mr. QUAYLE). Who yields time?

Mr. WARNER. Mr. President, I yield to the Senator from Georgia such time——

Mr. LEVIN. Mr. President, I note the absence of a quorum.

The PRESIDING OFFICER. The Senator from Michigan does not control the time. Is the Senator from Virginia yielding?

Mr. WARNER. I failed to hear the remarks.

The PRESIDING OFFICER. The Senator from Michigan does not control the time.

Mr. WARNER. The Senator from Virginia controls the time of the opposition.

Mr. LAUTENBERG. Mr. President, I think I have time left on our side, is that so?

The PRESIDING OFFICER. The Senator is correct.

Mr. LAUTENBERG. How much time is there?

The PRESIDING OFFICER. The Senator has 6 minutes 48 seconds.

Mr. WARNER. Mr. President, I would be happy to yield to the proponents of the amendment such time as they may need from the time remaining of those in opposition.

The PRESIDING OFFICER. The Senator from Virginia has the floor.

Mr. LAUTENBERG. The Senator from Virginia offered to yield time and if that is the case and the Senator from Michigan has asked for the floor——

The PRESIDING OFFICER. Who yields time?

Mr. LAUTENBERG. I will take a moment as long as I have the floor.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. LAUTENBERG. I ask unanimous consent that the senior Senator from New York [Mr. MOYNIHAN] be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

□ 1810

Mr. LAUTENBERG. I ask unanimous consent, Mr. President, that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, it is my understanding that the Senator from Virginia has agreed to yield time to our side, from the side of the opponents to the side of the proponents. Can we clarify that?

The PRESIDING OFFICER. The Chair states that the time allotted to the Senator from New Jersey has expired.

Mr. WARNER. Mr. President, the opponents are happy to yield such time as the proponents desire, to accommodate them.

The PRESIDING OFFICER. The opponents have 7 minutes and 25 seconds.

Mr. WARNER. Mr. President, I understand that there is a desire on the part of the Senator from Nevada to address this issue, and I would like to make certain of the amount of time he desires.

I ask the Senator from Nevada how much time he desires.

Mr. HECHT. Two minutes.

Mr. WARNER. I understand that the Senator from Georgia would like some time. Let us say 2 minutes to each Senator, and the remainder of the time, as a matter of courtesy, we yield to the Senator from New Jersey.

The PRESIDING OFFICER. Does the Senator suggest that as a unanimous-consent request?

Mr. WARNER. I do.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WILSON. May I hear the request that is being propounded? I did not hear it.

The PRESIDING OFFICER. The unanimous-consent agreement has been entered into that allots 2 minutes to the Senator from Nevada, 2 minutes to the Senator from Georgia, and the remaining time to the Senator from New Jersey.

The Senator from Nevada is recognized at this time under that order.

Mr. WILSON. I wonder if the Senator from New Jersey might offer some of that time to the Senator from California.

Mr. LAUTENBERG. Depending on how much time.

The PRESIDING OFFICER. The Senator from Nevada is recognized for 2 minutes, under the unanimous-consent agreement.

Mr. HECHT. Mr. President, I rise to speak in opposition to the amendment.

When one enters the Armed Forces of the United States, certain religious obligations are foregone—dietary laws, morning prayers, and the wearing of religious items. We adhere to the laws of our country and the Armed Forces. After duty, leave time, and so forth, are another situation.

I am Jewish. I served in the Army; I was proud to wear the uniform, which did not differentiate me from any other soldier of any other faith, and that is the way I always want it to be.

I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Georgia is recognized for 2 minutes.

Mr. NUNN. Mr. President, I appreciate what my colleagues from Michigan and New Jersey are trying to do here.

This is one of those matters that never should have gone to court. Once you go to court, you get lawyers involved. Once you get lawyers involved, you have to define every word. Once you get a court decision that you want to overrule, you have to come to the legislative process. When you get to the legislature, which is Congress, you have to define every word.

We have an amendment here that has been thought out carefully. We have a phrase that says that the Secretary determines that the wearing of such items significantly interferes with the performance of the person's military duties.

Well, as a lawyer—and that is sometimes a disadvantage—let us strike out the word "significantly," and let us say that it does not significantly interfere with the duties but interferes with the duties. Where are we then?

We have the words "neat and conservative" here. I know what "conservative" means in the political context, although that is changing a great deal these days, but what does it mean with apparel?

Every time I go out of the house, I am critiqued by my daughter about my apparel. She may say it is not her style. I am not always sure about what young people are wearing—whether it is neat and conservative. To me, it is not.

We are putting the military commanders in the position of trying to make those judgments, and what we are asking for with this amendment is a tremendous amount of litigation. I would like to be able to accommodate this amendment, but it is difficult to do. I know it is a sensitive and tough subject, but I do not know how we can solve it with this amendment, and I have to reluctantly oppose the amendment.

The PRESIDING OFFICER (Mr. HECHT). The Senator from New Jersey controls 3 minutes and 10 seconds.

Mr. LAUTENBERG. Mr. President, I wish to address comments that have been made.

There is permission to continue to observe one's religious needs while one does serve in the service, including, on many occasions, the opportunity to have a dietary program that satisfies one's religious concern.

I cannot believe that it was the intention of either the Founding Fathers or those who today are in the administration of the military, those who command the troops, that one has to sacrifice one's religious beliefs, however that is manifested, to serve as a diligent member of the armed services.

I want that to be reflected in the RECORD; because it is a deep belief of mine that one can be a good, loyal, determined soldier, sailor, or airman without at any time having to make a decision between his belief and loyalty to his country and his belief and loyalty to his religion. They are never, in my view, in conflict.

I would like to respond to the comments of the Senator from Georgia. We know what conservative politics is; we do not know what neat politics is. But in the manuals, the reference to neat and conservative is just with reference to attire or appearance. That is a common term, as I understand it, in the military manuals, and there should be no problem defining that.

I have no further comments to make.

The Senator from California asked for some time.

How much time remains, Mr. President?

The PRESIDING OFFICER. One minute and 5 seconds remain.

Mr. LAUTENBERG. I am happy to yield 1 minute and 4 seconds to the distinguished Senator from California.

Mr. WILSON. I thank the distinguished Senator from New Jersey.

Mr. President, I do not think this imposes an insuperable burden on the service Secretaries. I think the standards are clear. They do give discretion. It is workable, and I think it is worth whatever effort is necessary on their part to assure that the fighting men and women of this country are permitted to be reminded of what they are fighting for in addition to their country, and it is the freedom of religious expression. It seems to me that that is worth whatever small burden attaches.

Mr. WARNER. Mr. President, with great reluctance, I move to table the amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. LAUTENBERG. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is the e a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The question is on agreeing to the motion to table the amendment. On this question the yeas and nays have

been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

□ 1820

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 51, nays 49, as follows:

[Rollcall Vote No. 186 Leg.]

YEAS—51

So, the motion to lay on the table amendment No. 2628 was agreed to.

□ 1840

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senate is not in order.

The Senator from Arizona.

Mr. GOLDWATER. Mr. President, it is now nearly 7 o'clock.

Mr. NUNN. Mr. President, the Senate is still not in order, and the Senator from Arizona is about to indicate some of the schedule for the evening. I think the Members would be interested if they would be a little cooperative.

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order. Will Senators please take their seats and staff take their seats in the back of the room?

The Senator from Arizona.

Mr. GOLDWATER. Some of those people in the back of the room ought to keep on moving back.

Mr. President, I want to try to help my colleagues decide about tonight. First of all, it is going to be a late night. It will be at least 11, and it will probably be past 12.

We had an opportunity to pass this bill today but once again, 1 more year, the military bill was made a catchall. We call it, out West, a hitching post for any rambunctious animal that wants to come along.

We have had today the Coast Guard, we have had drugs, and we still have labor provisions. We have not done much about the military of our country today. We do have, though, coming up next, an agreement to consider the NASA addition, which we only learned about this morning, and that has a 1-hour time limit. But that leaves us with antisatellite weapons, test ban treaty, labor provisions, independent director of operational tests and evaluation, and SDI-related amendments.

So, Mr. President, if we get to work, I think we might get through tonight. I would not bet a lot of money on it.

Let us move on to NASA.

□ 1850

Mr. NUNN. I concur. I think that we are making progress. We would like to get a very short unanimous-consent agreement on the remaining amendments. I have not talked to the junior Senator from Massachusetts about the antisatellite amendment, but I understand he is willing to enter into a time agreement. Perhaps during the next vote, we can make some arrangement on that one. That is one that could take a considerable amount of time. It would be very helpful if we can get a time agreement on that one.

I concur with the Senator from Arizona. I would hope that we could make a lot of progress tonight, if not finish.

Mr. DOMENICI. Mr. President, in light of the discussion that we had here on the floor about 1 hour ago with the distinguished chairman of the Appropriations Committee——

Mr. STENNIS. Mr. President, I am unable to hear the Senator. May we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, about 1 hour ago, we discussed here on the floor the pending bill and certain points of order under the Budget Act which might apply.

I would like to pose a parliamentary inquiry to the Presiding Officer about an amendment which I have filed.

Might I first ask, is the Chair familiar with the Domenici amendment which deals with limitations on new spending authority, entitlements, and direct spending in the Budget Act?

The PRESIDING OFFICER. The Chair is familiar with the amendment.

Mr. DOMENICI. Let me say to the Senate, the distinguished chairman of the Appropriations Committee quite appropriately asked about various points of order that might lie against this bill. At that point, I alluded to the amendment which the Chair indicated he was familiar with. I would like to pose a parliamentary inquiry to the Chair: If the amendment which the Chair is familiar with were adopted by the U.S. Senate, would there be any points of order under the Budget Act that lie against the pending measure?

The PRESIDING OFFICER. Since the amendment of the Senator from New Mexico would provide that direct spending authority provided in the bill be effective for any fiscal year only to such extent and in such amounts as are provided in an appropriations act, the adoption of that amendment would correct the defects under the Budget Act.

Mr. DOMENICI. I thank the Chair.

Let me say to the Senate that while I am certainly not the exclusive Senator in terms of making points of order, it is any Senator's privilege, I do intend at some point to offer an amendment to correct the Budget Act violations. It is my understanding that it would make the bill no longer subject to points of order. In the event the amendment is not adopted, I would clearly have to raise points of order.

While I have the floor, I want to insert one other thing in the RECORD.

We try our very best in the Budget Committee, and our staff does, to inform the various committees of a terribly complicated law requiring a lot of work by a lot of people.

I ask unanimous consent to insert into the RECORD a letter dated July 11, 1986, sent to the staff director of the Armed Services Committee by the director of the Budget Committee at my direction concerning sections 302(a) and 302(b). Attached to this letter was a committee printout to assist the committee in filing their 302(b) allocations.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE BUDGET,
*Washington, DC, July 11, 1986.*

MR. JAMES MCGOVERN,
*Staff Director, Armed Services Committee, U.S. Senate, Washington, DC.*

DEAR JIM: On Monday, July 14, the Budget Committee will file the allocations requried by section 302(a) of the Budget Act. These allocations are based on the budget resolution adopted on June 26, 1986. Generally, the section 302(a) allocations are included in the joint explanatory statement accompanying the conference report on the budget resolution. However, due to time constraints, the Committee obtained unani-

mous consent to file these allocations on July 14th.

As you know, the Budget Act also requires all Committees that receive an allocation under section 302(a) to file a section 302(b) allocation as soon as practicable after a resolution is agreed to. The purpose of this letter is to provide information that will help you prepare your section 302(b) allocations.

Section 302(b) requires Committees to subdivide their section 302(a) allocation for outlays, new budget authority, and new credit authority among subcommittees or programs within their jurisdiction. Under section 302(e), these allocations may be altered by the Committees at any time as long as the alterations are consistent with actions already taken by the Senate on legislation within the Committee's jurisdiction.

To assist you as you develop your section 302(b) allocation, I am enclosing a computer run that shows the conference agreement on the resolution for each budget account under your Committee's jurisdiction. These computer runs are provided for informational purposes only. Specific resolution assumptions regarding subcommittee or program allocations are not binding.

The Balanced Budget and Emergency Deficit Control Act of 1985 amended section 302 of the Budget Act with two new sections related to Committees' section 302(b) allocations.

Section 302(c) creates a point of order against any bill, resolution, or amendment that provides new budget authority, new spending authority, or new credit authority within the jurisdiction of a committee that has not filed its section 302(b) allocation. Section 302(f) creates another point of order against any bill, resolution, amendment of conference report that provides for budget outlays or new budget authority in excess of a committee's 302(b) allocation. A copy of section 302 as amended is enclosed along with the conference report on the FY 1987 budget resolution.

If you have any questions or if there is anything further we can do to assist you, please call me at 4-0769.

BILL HOAGLAND,
*Staff Director.*

Mr. DOMENICI. I do not make anything of this, other than I would like to have it in the RECORD so that at least my particular role would be shown here.

Having said that, I will not offer an amendment to cure the points of order until that point in time when the managers think it most appropriate. Then I will offer it and I hope they will support it.

Mr. NUNN. Mr. President, I want to respond briefly to the Senator from New Mexico. The Senator from New Mexico has been working very diligently with us trying to get these matters worked out under the Budget Act and we appreciate it very much. We think we are going to be able to work it out and we believe we are going to be able to accept the Senator's amendment which the Parliamentarian has acknowledged would eliminate the problems concerning the Budget Act and this bill.

We thank the Senator from New Mexico.

The PRESIDING OFFICER. Under the previous order, the Senator from Missouri is recognized.

Mr. GOLDWATER. Will the Senator yield for a unanimous consent request?

Mr. DANFORTH. I yield.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that notwithstanding the provisions of rule XXII, that the cloture vote for today on the Byrd amendment 2413 and the vote on the Dole amendment 2417 be postponed until 9 p.m. in the hopes that an agreement can be reached for the Senate to consider both issues separately.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Missouri.

AMENDMENT NO. 2633

(Purpose: To make an amendment regarding authorizations of appropriations for activities of the Air Force)

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Missouri [Mr. DANFORTH], for himself, Mr. GORTON, Mr. GARN, and Mr. RIEGLE, proposes an amendment numbered 2633.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

SEC. . AUTHORIZATION OF APPROPRIATIONS FOR THE AIR FORCE.

Notwithstanding any other provision of this Act, funds are hereby authorized to be appropriated for fiscal year 1987 for the Air Force as follows:

For missiles, $8,866,000,000.

For research, development, test, and evaluation, $15,334,573,000.

For expenses, not otherwise provided for, for operation and maintenance, $19,687,171,000. Of the funds authorized to be appropriated under this section, not less than $556,300,000 shall be available for the purpose of payment to the National Aeronautics and Space Administration to reimburse such agency for launch services and related expenses of the space shuttle system as agreed to between such agencies.

Mr. DANFORTH. Mr. President, this amendment is offered on behalf of myself and Senators GARN, RIEGLE, and GORTON.

The amendment is supported by the Department of Defense and more specifically by the Secretary of the Air Force. The amendment is also supported by OMB and the amendment is supported by NASA.

The thrust of the amendment is as follows:

Each year, the Department of Defense pays to NASA an amount which is necessary to pay for the space missions of the Department of Defense in the following year.

This payment a year in advance is factored into the total spending plans of NASA. Therefore, when the budget of NASA was prepared approximately a year ago, it was anticipated that in addition to the regular NASA budget, NASA would also be receiving $556.3 million from the Department of Defense in fiscal year 1987, which was the prepayment for the NASA flights for DOD which would take place in 1988.

As we were proceeding in the Budget Committee to work on the 1987 budget, the space shuttle disaster took place.

However, at the time that the disaster took place, the budget process was well along and it became impossible in the Budget Committee, even though a lot of us tried to do so, to increase the amount of the budget for NASA.

The administration originally proposed $7.7 billion for NASA for next year. In fact, the budget resolution gave NASA $7.3 billion, less than the administration asked for even before the space shuttle disaster.

It is clear to everyone, Mr. President, that $7.3 billion for next year is not adequate to do the job for NASA.

But all along it was anticipated by NASA that in addition to the $7.3 billion provided in the budget, NASA would also receive $556.3 million from the Department of Defense.

The Department of Defense agrees that that money should be paid to NASA. The Office of Management and Budget agrees that that money should be paid to NASA.

But our Armed Services Committee, in putting together this authorization bill, reasons that because the NASA program is being disrupted and the anticipated space launches will not take place, it could, in effect, renege on the payment of the over half billion dollars to NASA.

□ 1900

I understand the reasoning of the Armed Services Committee. That committee has its own problems with the budget. The chairman of the committee has pointed this out to me several times. But the fact of the matter is that NASA, which is already, even without the orbiter disaster, well under what the President asked for, given the fact of the space shuttle disaster, clearly NASA will incur additional costs. At the very time that NASA is being hard pressed, our Armed Services Committee decides that it is going to withhold the payment that everyone anticipated when the budget was being prepared; that it is going to withhold the payment that was anticipated by our Budget Committee, that was anticipated by the ad-

ministration, that was anticipated by NASA, that was anticipated by OMB and by the Department of Defense.

Mr. President, that, in a nutshell, is the issue. The issue is whether we are going to truly cripple our space program by cutting back by an amount of more than half a billion dollars what they anticipated receiving before the shuttle disaster took place.

Mr. President, if we do not accept this amendment, the effect of what we are doing is to put off further space launches by an additional half year or more. The effect of it really is to pull the props out from underneath the space program.

Despite the fact that the Armed Services Committee has its problems, it is my hope that the Senate will realize that this is not the time to cut back more than half a billion dollars what it was anticipated NASA would receive before the orbiter disaster took place.

Mr. GOLDWATER. Mr. President, I think I understand full well what the Senator from Missouri is talking about. I happen to have served on the first Space Committee of the Senate. I have great admiration and respect for and realize the extreme importance of space to the future of our country and the future of the world. But we have some problems, Mr. President.

We are talking about $556 million. The Armed Services Committee has already taken $30 billion in cuts and right now, we are trying to find another $10 billion to comply with the recent Budget Committee judgment. There is no question that when we get into conference with the House, we are going to be asked to take maybe another $6 to $8 million.

So what the Senator from Missouri is asking the Armed Services Committee to do, I have to say, is an absolute impossibility. We do not have the money.

Now, Mr. President, we could get the money by not buying some equipment, and I am not even going to refer to the Senator's hometown. We do not have to buy all the main battle tanks. We do not have to provide money for the Navy. We can cut some troop strength, which we do not want to do. But, Mr. President, the actions of the committee with respect to shuttle flight discharges we took for budgetary reasons. There was certainly no prejudice with respect to NASA's requirement for these funds, which constitute an important source of their operating revenues for 1987.

We cut the money out because we were told, and we are still being told, that there will be no flights so the money is not needed.

At issue in this bill is the tradeoff between valid military requirements on the one hand and an agreement between NASA and DOD that provides budget and program stability to our national Space Transportation System on the other. We know that NASA requires these funds to implement their shuttle recovery efforts. But we also know that the DOD has already transferred to NASA during fiscal year 1983-86 payments for more shuttle flights than NASA currently projects to fly in fiscal year 1986 and fiscal year 1988.

The committee is strongly committed to the recovery of our space launch posture at the earliest possible time and our recent actions with respect to expendable launch vehicles attest to this commitment. But under the current budget constraints on DOD funding and the increased funding requirements to meet DOD's military space launch requirements, I just don't see where we are going to get the money.

I keep saying that, Mr. President, because it is the God's truth. We are broke.

I do not see where we are going to get the money to keep DOD's commitment to NASA for shuttle launch charges for launches that unfortunately will not take place as scheduled.

In the fiscal year budget, the administration requested $268.8 million in Air Force O&M, $32.9 million in Air Force RDT&E, and $297.9 million in Air Force missile procurement to reimburse NASA for fiscal year 1988 DOD shuttle missions.

Mr. President, I do not want to go on on this but we have just talked to Mr. Aldridge, the Secretary of the Air Force, and he has told us he wants the money, but do not take it out of the defense budget. I know he has told the Senator from Missouri another tale. In fact, the last paragraph of the letter he has written to a large number of us says:

> In summary the Shuttle accident and the recent ELV failures have dealt a serious blow to this Country's capability for launching payloads into space. Recognizing that funding stability was necessary in order for NASA and the DOD to plan an expeditious recovery, we agreed to keep fiscal year 1986 and fiscal year 1987 reimbursements intact. This approach will permit appropriate preparation and planning for DOD missions to proceed in an orderly and efficient manner. It is our joint recommendation, therefore, that the Congress endorse the ongoing efforts of both DOD and NASA for the overall STS recovery, for the orderly and mutually beneficial reconstruction of the DOD STS flight planning, and for the application of credit adjustments for DOD reimbursements in the fiscal year 1988 budget.

Mr. President, I know there are others who want to talk on this, but as chairman of the Armed Services Committee, I just have to repeat: My heart is with them. I wish we had this money. I wish we had a lot more money than we have. If they insist on getting this out of this budget, as I say to my friend, we are going to have to take it out of equipment or take it out of personnel, and I know that the Senator does not want to do that. I know Colonel Garn does not want to do that, and neither do I.

So, Mr. President, we have our problems. I hope we can solve them.

I have said all I care to say on this. I yield to the Senator from Virginia.

Mr. WARNER. Mr. President before the distinguished chairman yields the floor, I listened carefully to his statement, and I am certain he meant that NASA does need the money. There is a very legitimate requirement for these funds, and his opposition is solely on budgetary considerations as it impacts on the DOD budget.

□ 1910

Mr. GOLDWATER. I could not declare in strong enough language how badly I know NASA needs the money, but at the same time I could not declare in strong enough language how broke we are.

Mr. COHEN. Will the chairman yield?

Mr. GOLDWATER. Yes.

Mr. COHEN. It is my understanding that the Department of Defense has already provided NASA reimbursements for 10 shuttle flights which have yet to be flown, and if we are to provide another half a billion dollars, it is the proposal that DOD get a credit for that amount of money.

The difficulty is that next year and the year after and the year after that we are going to be facing more constrained budgets than we have this year, and in all likelihood they will never be able to reimburse DOD for this half a billion dollars, not to mention the 10 flights which have yet to be flown.

So I would agree with the chairman that as much as we would like to fund this program, it seems to me it is incumbent upon the administration to clearly specify where they are going to come up with the money for the program itself. We all support it, but I do not know how we can come up with another half a billion dollars, on top of what we have added today and yesterday and the day before, and have any kind of a budget that is going to survive not only the budget conference but be subject to a point of order when we come back with the appropriation process.

Mr. GOLDWATER. The Senator is absolutely correct.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. I concur with what the chairman has said and what the Senator from Maine has said.

We are talking about a situation where we are going to decide with this vote whether we want the U.S. Air Force to be a customer of NASA or whether we want the U.S. Air Force to be the banker for NASA. That is the

question. This has been a customer relationship before. They have been prepaying NASA on an orderly basis because if you did have a delay of a flight at the end of a fiscal year, the payment was not made in advance, you would have a disaster in the NASA budget.

Now, what we have is tremendous delays, and the Senator from Maine put his finger right on it. You have 10 flights that the Air Force has already paid for. There is no possibility those flights can be completed by the end of fiscal year 1988, let alone 1987. What we are now being asked is for the Air Force to pay for seven more flights. What we are really saying is we are converting what was supposed to be an arrangement based within agencies but based on business, based on a business proposition, because the shuttle was supposed to be a business proposition. We hope it will be in the long run, but we are now going to convert that from a business proposition with transfers between two agencies to a banking proposition. The Air Force is being asked with this amendment to loan NASA the money. They have already got tremendous credits.

They have already in effect loaned a lot of money, hundreds of millions of dollars. They are being asked to loan more money. I am sympathetic to NASA's plights. I hope we can find a way to fund them but we have some very serious funding problems in the Department of Defense bill.

This budget request that we have been given by the Budget Committee and passed by the House and the Senate is not being met now by this bill. We have to go to conference and knock billions and billions and billions of dollars off this bill.

If we meet the outlay total and if we do it in an honest way and avoid gimmicks, we are very likely to have to either see an awful lot of people laid off in the military today, which could have devastating effects on the morale, or we are likely to see cancellations of an awful lot of weapons systems that no one on the floor I think wants to count.

That is the dilemma we face now. Next year is going to be worse. So I know why the amendment is being proposed. I know that NASA has a budgetary problem but I think it is time for the administration to face the fact and come over with the kind of request in the proper category so we keep a business relationship with the shuttle and not have it as a charitable endeavor from one agency to another.

Mr. DANFORTH. Mr. President, even before the space shuttle disaster, NASA was counting on a payment of over a half billion dollars in fiscal year 1987 for launches that would take place in 1988. The question now is whether the same payment will be made in 1987 for the same flights but they will take place in 1989. If that counted-on prepayment is not made, then NASA is in very serious trouble.

I would point out that NASA is not just a charity case or a ward of the Defense Department. It is a very important agency which is itself integral to our defense effort.

I yield 5 minutes to the Senator from Utah.

Mr. GARN. I thank the Senator from Missouri.

I served on the Armed Services Committee for 4 years with the distinguished Senator from Arizona. I have served for another 8 years on the Defense Appropriations Subcommittee. I do not think there is anyone who understands better than I the problems of this defense budget.

I think it is an irresponsible budget, entirely too low. We have been trapped into this Gramm-Rudman process that takes care of all of the social programs but, good heavens, do not fund defense adequately. So I understand what the chairman is saying.

The House of Representatives on their defense budget goes—I do not even have a word for their disregard for the defense of this country. For 12 years in this body I do not think anybody could accuse me of anything but being a supporter of defense and on this bill I have voted with the chairman on every single vote, on the 50-to-49 votes. I do not take a back seat to anybody on being a supporter of the defense of this country.

However, look at the record of what has taken place. The Senator from Missouri has outlined the 1987 budget. Let us talk about 1986. The administration requested $7.9 billion. We appropriated $7.7 billion with a real struggle. Gramm-Rudman took it down to $7.3 billion. This is without regard to the *Challenger* accident. And I can remember when the Senator from Arizona and I served on the original Space Committee and we promised NASA at that time, 12 years ago, that they would be kept whole for inflation. They have not been. We spend less than four-tenths of 1 percent of our entire national budget on space flight. That is hardly a very large effort when you consider that we get $8 or $9 back in the private sector in spinoffs for every taxpayer dollar we spend, and I do not know how you put a dollar value on human life from the Pacemaker and the 12,000 other medical devices and/or procedures that have resulted from space research and development or what was going on in the shuttle—electrophoresis in processing pharmaceuticals that will save thousands of lives because you can process pharmaceuticals a hundred times more efficiently and four times more pure in microgravity.

I do not have the time to go on and on, but as strongly as I support defense, there is no budget where the American taxpayer and all the people of this Earth get returns like they do from space research and development, save lives, and you cannot put a dollar value on that.

We get back to the 1986 budget; $1.3 billion and then we have a tragic accident. I think everybody in this body knows that no one can feel worse about that than I do. It was not just a national tragedy. That crew of seven were my friends. Mike Smith was my trainer. No one has ever had a more difficult task than to walk into the crew quarters at Kennedy Space Center with the Vice President and look those families in the eye 3 hours later—Mike Smith's son—and try and feel adequate to say something comforting to them.

So we spend four-tenths of 1 percent of our national budget on space flight with all the returns and then what do we see. We have a tragic accident. The administration cannot get its act together. Six months later it has not come up with a recommendation on whether they want a replacement orbiter, and we have so underfunded NASA that when *Challenger* crashed, no, it was not just *Challenger,* it was pieces of my orbiter, *Discovery II* and pieces of *Columbia* and parts of *Atlantis* because we have not had enough spares in NASA to fly a complete orbiter, so you do what is known as to cannibalize. You take parts of one to make the other one fly. We could not fly two orbiters at the same time because they are not fully put together. NASA was struggling along that way before we had the accident.

Then we get back to $7.3 billion. No administration request. You have a search and rescue, a recovery effort. We have got anomaly resolution, all of those additional costs. So I put in an emergency supplemental of $531 million for NASA and we were able to get it through to help with the problems of the accident, the redesign and all of the things that go with trying to get the orbiter back into space to carry primarily military cargoes to begin with, spy satellites for arms control verification, navigation and communications satellites; so if this succeeded in taking a half a billion dollars away, who is going to suffer the most is DOD. They have critical cargoes that need to be placed in space. If this half a billion dollars is taken away from NASA, this is not just a customer relationship. It is a matter of taking much longer.

I think the Senator from Missouri underestimates 6 months. He will be looking at 2½ or 3 years before you put another military cargo into orbit. So they are cutting off their nose to spite their face, I suppose.

□ 1920

The PRESIDING OFFICER. The Senator has used his 5 minutes.

Mr. GARN. I ask for 1 more minute.

This is a critical issue. We got back to $7.8 billion, $100 million less, absorbing the cost of the accident, and now what do we have? Armed services, admittedly with a lot of problems, wants to take another half-billion dollars away.

NASA cannot survive, and we are not going to have a fourth orbiter. We are not going to get the first three orbiters back into space. The military will suffer. The research and development will suffer.

I could go on and on talking about the difficulties we are going through, trying to get our space program in existence again. We are going to have another Sputnik if we are not careful. The Soviets will surprise us again, as they did before.

It is important for the United States to be back in space. With all the problems the armed services have, and much as I support this committee, this chairman, and this budget resolution, I wish there was a great deal more in it. It is a lot easier to take a half-billion out of the $291 billion than it is out of the $7.3 billion. We must transfer this back to NASA.

Mr. DANFORTH. Mr. President, how much time do I have?

The PRESIDING OFFICER. Sixteen minutes.

Mr. DANFORTH. I yield 5 minutes to the Senator from Washington.

Mr. GORTON. Mr. President, this amendment is not a small one. It involves over a half-billion dollars. The choice is relatively simple and easy to understand. One-half billion dollars is approximately two-tenths of 1 percent of the authorization for the Department of Defense. It is approximately 7 percent of what has been recommended for NASA—almost one-tenth.

This money was included as a reimbursement to NASA in the budget submission of the administration. The assumption that this money would be available to NASA was included in the budget resolution passed by the Senate Budget Committee, passed by the Senate of the United States, passed by the House of Representatives, and passed after a conference committee report.

Unilaterally, to remove it from NASA, to take this 7 percent of the money available for NASA next year, will be absolutely devastating to NASA. The Senator from Utah, in my view, is much more close to being accurate than even my distinguished chairman, the Senator from Missouri.

I am convinced that the loss of this amount of money may well postpone by an additional year the time in which NASA can once again put a shuttle into orbit. Because the largest single share of the work of the space shuttle is for the Air Force and for the Department of Defense, the Department of Defense simply will be cutting off its nose to spite its face if it succeeds in this unilateral repudiation of an obligation which it understands it has, an obligation which the administration understands it has, and an obligation which was assumed in all the budget debates we have had to this point on the floor of the Senate. It is as simple as that.

It will be difficult for the Department of Defense, and especially for the Air Force, to deal with this loss of $500 million. It can be done, as difficult as it is. It will be impossible for NASA to deal with it. NASA has already been subjected to a loss of over $400 million in its pre-*Challenger*-accident request by reason of the actions of this body and the House of Representatives in a budget resolution. NASA cannot keep its skilled employees together; NASA cannot recover at any reasonable rate from the disaster to the space shuttle *Challenger,* and NASA will not be able to conduct any of its new programs or begin any of its new research without this amount of money.

What is a difficult task for the Department of Defense and for the Air Force with the loss of an additional $500-plus million becomes literally an impossible task for NASA.

Mark my words: This is not a choice between whether or not we have an over-rich NASA appropriation for next year. This has to do with the life of NASA and the American space program. This has to do with whether or not we take at all seriously our responsibilities and our opportunities in space.

A Member of this body cannot vote against this amendment and claim with any degree of realism that he or she favors American leadership and excellence in space. That vote and that claim will be simply, completely, and totally inconsistent with one another.

This is not a request to be a banker. This money will be to the credit of the Air Force. By next year's budget submission from the administration, there will be no such reimbursement called for, because there will be a credit there, and the NASA budget submission will include whatever NASA needs directly. It is too late to do that for fiscal 1987.

So you simply have your choice of the last $500 million added on to a $291 billion defense budget on the one hand, or 7 percent or more of NASA's budget—a key 7 percent—the 7 percent which determines whether or not we have the remotest opportunity of retaining our leadership in space and getting back into orbit by early calendar year 1988. That is the choice. There is no other. To vote against this amendment is to vote for a second-rate or third-rate American space program.

Mr. DANFORTH. Mr. President, I yield 5 minutes to the Senator from Ohio.

Mr. GLENN. I thank the distinguished Senator.

Mr. President, this is not an easy vote, because it is in some respects robbing Peter to pay Paul.

From NASA's standpoint, there is little else we can do. NASA has made contracts and set up its budget on a certain basis, and because of its continuing difficulty, some of those expenses cannot be met.

I hate to call for money out of the defense budget when we are already cutting things we would perfer not to cut, but it is more onerous to let NASA languish even further in its difficult situation.

Unfortunately, NASA's experimental program remains mercilessly unforgiving of human error. While NASA corrects its errors and reviews its procedures, we have to support them.

I do not like the situation in which NASA finds itself, and I have discussed these problems repeatedly with NASA officials. Nevertheless, I would like the White House, in the name of Heaven, to give us a clear, unambiguous signal as to the direction in which they want NASA to go. We must not give lip service to the importance of our space program without giving it backing, and support.

Maybe we can give NASA some badly needed financial support tonight.

John F. Kennedy once said words to the effect that if any nation desires to be a world leader, it will have to be a leader in this important area of technology—space. If we want to lead in this field and have nations look up to us, we are going to have to support NASA in these difficult days and get them back on track.

I do not like voting to take money from one project and put it into another. But I think it is the lesser of two evils and so I support the amendment by the Senator from Missouri and urge my colleagues to do the same.

But I would only say once again that I implore the White House to give us a clear indication as to what it wants NASA to do. We want to work with the administration on that.

The American people have shown their support for NASA and we, in Congress, must take the lead in providing some of the funding that NASA so desperately needs right now.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. DANFORTH. Mr. President, I know of no other speakers on this side.

□ 1935

Mr. WARNER. Mr. President, the chairman of the committee, the distinguished senior Senator from Arizona, has stated the case in opposition as eloquently as I know of anyone, together with the distinguished Senator from Maine.

The case has been made that we recognize the need for these funds, but at this time there is no place that we know of in the Armed Services Committee recommendation to the floor of the Senate in this bill that can be curtailed to provide for those funds.

Mr. DANFORTH. Mr. President, I want to just add about 1 minute's worth to say and to reiterate that this amendment is supported by the administration. This amendment is supported by the Department of Defense. This amendment is supported by the Office of Management and Budget.

It is understood by the Defense Department that this amendment is critical to the future of the Space Program which in turn is essential to the mission of the Defense Department.

I wanted to reiterate this because this is not a battle of NASA against the Defense Department. This is simply a matter of carrying out the wishes of the Department of Defense and providing those funds which were anticipated by NASA well before the NASA budget was put together and well before the space shuttle disaster.

The issue before us does not anticipate our answer to the question of whether or not there should be a fourth orbiter. This is not to be decided here. These funds are needed with or without a fourth orbiter.

This was anticipated in the budget well before the space shuttle disaster. It is absolutely necessary to the survival of NASA.

Mr. WARNER. Mr. President, I yield such time as the distinguished Senator from Nebraska may require.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I thank my colleague from Virginia.

Mr. President, this Senator served on the Armed Services Committee that has jurisdiction, the main jurisdiction, over the matter before us, the defense authorization budget. I also serve on the Commerce Committee, which has responsibility for the NASA budget primarily.

I just want to comment on the knot that the Senate finds itself in in this particular matter, and that knot simply is it is critically necessary to the defense of this country that we get satellites back up where they belong. Those of us who have been working with this program know that that is critically important. Yet what we are doing here today, I guess primarily because of the Gramm-Rudman-Hollings bind that we find ourselves in, we do not have any money, so we are going after the biggest part of our budget by and large expensewise and that is the defense budget.

It seems to me, first, we should realize that we are already well over $200 billion in excess of the budget that was assigned to the Armed Services Committee with regard to defense. Yet there have been a whole series of amendments and there are going to be some more as I understand it to add more spending to the budget.

I compliment the proponents of this amendment—they have at least specified and spelled out where the money that they wish to advance to NASA out of the defense budget is coming from but that is a separate argument. I simply want to say that we earlier today approved by voice vote some $300 million-plus for a fight against drugs. I do not really believe that that should have properly come out of the defense budget.

The Senator from Missouri just indicated that the Reagan administration supports taking this money out of the defense budget. The Reagan administration also supported taking the $300 million plus to fight drugs out of the defense budget.

The Reagan administration and its leader, the President of the United States, almost daily attacks the Congress of the United States for not providing enough money for the defense of this Nation.

I suggest that all of this is part and parcel of the knot that we have ourselves in, the box, if you will, with regard to Gramm-Rudman-Hollings.

Everybody is scurrying all over the place to find funds for projects, some of which are worthwhile, and I suggest some of them which are not.

I am for the launching of the shuttle as soon as possible. I am for, if that is what the President of the United States wants, building a shuttle to replace the one that we lost in the tragic accident. It is not clear yet whether or not the President of the United States wants another shuttle.

I realize that the expenses of NASA are going on, and I recognize that that agency is under extreme stress today. I simply say that I am not sure that a defense budget that is already squeezed, that has already been reduced by Congress from the some $320 billion for fiscal year 1987 that the President requested, down to about $294 billion according to the Senate figure, and on down below that to what the House is going to come forth with, can absorb this cut. I simply say that with all of these add ons that we are going through, and we are going to have another one I understand before the night is over, and that has to do with regard to the RAM missile, another $60 million or $70 million on top of what we have already authorized of which there is no money to pay for.

I would simply say that I believe that we are making a serious mistake by taking this out of the budget that is already squeezed. I would hope that we not do it.

I would hope, though, that most of us who recognize the importance of the program that the proponents are talking about here now would join together and come up with a separate bill if necessary to get the money that is tremendously important to keep NASA going, better put, to get NASA back on track, because we all know that it is critically important that we get many satellites up in space.

That we will not be talking about in any great detail for obvious reasons on the floor of the Senate.

Therefore, Mr. President, I hope we will not authorize this additional expenditure, as much as it is necessary, out of the defense funds.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. Mr. President, if I might just add a word to what the Senator from Nebraska has said, he is precisely on target. The administration is for everything in this budget. They are for the Bigeye. They are for the M-1 tank. They are for the F-15. They are for the F-18, and on and on.

I do not know of anything that they are opposed to in our bill. Every time an amendment is offered they say the administration supports it. They would oppose, I assume, paying for a portion of it by increasing the cigarette tax. I am not suggesting that we do that. But where is the money going to come from?

The administration would oppose any effort to raise revenues to support these add ons. So it is wonderful to be able to say we want more and more and more, but someone has to pay for it.

The action taken by the Senate Armed Services Committee was consistent with a recommendation of the Intelligence Committee markup and if, in fact, we are going to add another one-half billion dollars on, we are going to be faced with reducing some other budget, thus far unspecified, perhaps equally as important as this particular program.

So I agree with the Senator from Nebraska on this, as much as we would like to add more money to take care of a program that is of vital interest to our national security, and no one is more aware of this than those members on the Intelligence Committee who know what the loss of the shuttle has meant, who know what the deficiencies in our Satellite Program are right now. No one is more in favor doing something to correct that. But they have now once again pointed to the Department of Defense budget and we simply do not have the money to pay for it.

When the time comes that we have to reconcile these figures with what the budget will allow, we are going to find a dramatic reduction, billions and billions of dollars in programs that are going to be eliminated across the board either in personnel preparedness or weapons, which I think will be a great disservice to the defense needs of this country.

□ 1940

So, reluctantly, I am opposing this amendment and hope an appropriate motion to table will be made by the Senator from Virginia.

Mr. DANFORTH. Mr. President, how much time do I have?

The PRESIDING OFFICER. Five minutes and twenty-nine seconds.

Mr. DANFORTH. Mr. President, I would just raise a question to those who are listening to this debate. Where are we going to get the money to make up for the shortfall of the NASA program if we in the Congress of the United States renege on the commitment that already has been made by the Department of Defense? If we renege on the agreement made by the Department of Defense, where is NASA going to get the money, not just to buy a new orbiter, but for the whole program?

Some people have suggestions. Some people suggest it should come out of Conrail on the theory that Conrail is awash with cash, having been loaned $3 billion-plus from the Federal Government. It has excess cash on hand and some people say, well, that is a source of funds for NASA. On the other hand, there are those who oppose that idea.

But if we cannot get the money from the Department of Defense, as the Department of Defense agrees it should be paid, then where is the money going to come from? I do not understand the answer to that question. This is essential to the mission of NASA, Mr. President. This is essential to the mission of NASA. You cannot tell me that, in the Defense Department authorization, you cannot find a half billion dollars so that the Defense Department can maintain its commitment to NASA. It is not credible.

Mr. President, I do not know if there is any further request for time on this side.

Mr. WARNER. Mr. President, before we vote on this matter, I think it should be made very clear to the Senate the dollar impact on other budgets that are within the DOD numbers. The distinguished chairman of the Intelligence Committee is now seeking recognition. I yield to him such time as he would require.

Mr. FORD. Will the distinguished Senator yield for a question?

Mr. WARNER. Yes.

Mr. FORD. Something is wrong with my mind. I do not quite understand it, because the Defense Department agrees that this is their obligation. We also understand that we had a disaster. The money was still expected to come on October 1. That is just 60 days from now. And with the Defense Department's agreeing to it, why is it so out of order to go ahead and fulfill that commitment under this budget?

Mr. WARNER. Mr. President, I say to my distinguished colleague from Kentucky, I have just been conferring with a representative of the Secretary of Defense just outside the Chamber, the Assistant Secretary of Defense. Regrettably, I do not have a piece of paper from the Secretary of Defense, who opposes this amendment, and the reason why he opposes it are about to be given by the distinguished chairman of the Intelligence Committee.

Mr. FORD. Let me ask just one further question. What was the $6.2 billion that the Secretary of Defense found earlier this year in the Defense Department so that the Armed Services Committee could meet its budget? Where did he get that $6.2 billion, or whatever it was?

Mr. WARNER. Mr. President, that was largely the result of recalculation——

Mr. FORD. Recalculation.

Mr. WARNER [continuing]. Of certain accounts that were budgeted to take care of inflation, primarily, in the fuel area and elsewhere.

Mr. FORD. But they did have a $6.2 billion surplus. Is that surplus growing over there now?

Mr. WARNER. I say to my distinguished colleague, Mr. President, that that surplus is computed on the basis of projected inflation. The question is put: Is it growing? We are talking about a future budget, the one beginning——

Mr. FORD. That is right. And the money assigned to the Department of Defense does not go into a general fund like all the other departments. So I suspect, if I look hard enough and we start digging deep enough, we will find billions of dollars uncommitted over there, and tonight we are arguing over a little over $500 million to save NASA.

Mr. WARNER. Mr. President, I say to my distinguished colleague, the chairman of the committee addressed the Senate just a half hour ago on this very amendment. He indicated that we have already come down $30 billion, we are coming down further, and after the conference in the House we expect the net sum to go to the Department of Defense to be reduced. We do not have these billions that the Senator from Kentucky represents.

Mr. FORD. I do not say I represented that. I said I bet I could find, and the opportunity will be mine to look for it. I think we will come back to this point tonight and find that there was sufficient money there for the Defense Department to keep its word out of approximately $300 billion or $295 billion, for a mere $500 million for NASA.

Mr. COHEN. Will the Senator yield?

Mr. WARNER. Yes, of course.

Mr. COHEN. I might point out, when the Department of Defense initially supported this particular program, we were talking about a much higher figure. Do not forget, it was the Congress who reduced the targets that the DOD had to meet. So we are talking about a much different set of figures when the Department of Defense gave us full endorsement for this procedure.

Second, it is not correct, as the Senator from Missouri has represented, that we are simply adding more money to the DOD budget. We are not adding more money to the DOD budget. The total obligational authority has not increased one penny. What we are doing is designating this amount of money for this program so that when our total obligation authority finally comes, the budget and everything else is reduced, and that means intelligence is cut, it means other programs across the board are going to be cut in order to accommodate this and other programs that have been added. So it is not a simple add-on to a little DOD budget. It is really a zero sum game in which DOD is going to be cut back by billions of dollars in the next few months.

Mr. WARNER. I thank the distinguished Senator from Maine. He has stated the factual case accurately.

I now yield to the Senator from Minnesota.

Mr. DURENBERGER. Mr. President, I thank my colleague from Virginia. I rise to add to this, if I can, given the strictures that are on me and were on the Senator from Maine when he tried to talk about the implications for the intelligence budget in this matter, but I think he has clearly stated the problem that you face when you try to make a decision on this.

The Senator from Missouri has made it look relatively simple. This is just a $556 million add-on. The problem is that this is an earmarked budget. And each of the items in this budget has a particular purpose. The $556 million add-on is earmarked only for NASA.

And when you earmark only for NASA, you get yourself into a variety of problems that all of use face in our relationship with the NASA budget, and that is that we have been making certain contributions to that budget over some period of time for some very specific purposes as customers, if you will, of a delivery system that has not been delivering a great deal against the money that we have paid.

So, throughout the armed services budget, you are going to find a variety

of moneys earmarked for a variety of purposes which include very specific purposes of an intelligence nature in many cases.

When the NASA money, the $556 million is earmarked for NASA only, there is nothing in there to accomplish the ends that are intelligence or may be intelligence in nature.

□ 1750

We have taken our cut not only from some of the failures to deliver on the products that we have tried to purchase from NASA, but we have also taken our cut for intelligence purposes out of the budget that is before us in this authorization bill here.

So I rise, Mr. President, to urge my colleagues, to urge the Senator from Missouri and anyone else who is advocating this amendment to specifically deal with the NASA problem in a very specific fashion somewhere else other than in the DOD authorization.

I regret, Mr. President, to have to apologize to all my colleagues. We have been at this 10 years now with this new intelligence arrangement and I cannot be more specific particularly in an area that is as crucial to our national security as this one. But we have debated this issue back and forth. And much as I would like to be able to support as a Senator the request to help NASA, this is not the place that either as a Senator or as specifically chairman of the Intelligence Committee that I can support the request. I urge all of my colleagues to vote against the amendment.

● Mr. ROCKEFELLER. Mr. President, I am prepared to support this amendment to enable the Air Force to provide funds that are urgently needed by NASA in fiscal 1987. But I am troubled by the way this issue has been framed, and would have preferred to deal with the requirements of the civilian space program in a more direct manner.

Normally, the Air Force reimburses NASA, in advance, for the costs of flying military payloads on the space shuttle. In fiscal year 1987, NASA was anticipating reimbursements of over $500 million. In the wake of the *Challenger* accident, with the shuttle grounded for at least 2 years, these military missions have been postponed. The problem, however, is that if NASA is deprived of the DOD funding, it would be forced to operate with a completely unrealistic budget—dashing any hopes of moving forward with a rebuilding of the space program.

The consequences of the *Challenger* accident are far-reaching—affecting virtually the entire NASA budget. In the Commerce Committee, we are trying to put together an authorization that addresses these changed circumstances—and reflects our beliefs about what space exploration can accomplish. I have cosponsored a bill (S. 2718) which would authorize $8.6 billion for NASA in fiscal 1987. I am not reluctant to recommend this commitment of resources for the civilian space program—and truly believe that society will benefit tremendously from investment in space exploration.

If we provide the resources, I'm convinced that the space program is capable of great achievements. This country should be striving for preeminence in space exploration: To expand our knowledge of the universe; to develop advanced technologies in robotics and other "cutting edge" fields; to produce medical and other discoveries that could have substantial benefits for people here on Earth. The amount of money represented by the DOD reimbursements is clearly an integral part of this effort. But, recognizing this, I would have preferred to authorize this money directly to NASA, instead of pursuing a somewhat circuitous process of having the Air Force pay now for launch services that are several years away.●

Mr. DANFORTH. Mr. President, I yield 1 minute to the Senator from Washington and then such time as remains to the Senator from Utah.

Mr. GORTON. Mr. President, the distinguished Senator from Maine has implied that the approval of the Department of Defense and the administration for these reimbursements was based solely upon the very large original submission of the administration for defense budget.

I ask unanimous consent that a letter to me from the Administrator of NASA and the Secretary of the Air Force jointly supporting these reimbursements dated July 10, 1986, be included in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JULY 10, 1986.

Hon. SLADE GORTON,
*Chairman, Subcommittee on Science, Technology and Space, Committee on Commerce, Science, and Transportation, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: The purpose of this letter is to outline, in view of pending Congressional action upon the FY 1987 Administration budget request for the Department of Defense, the importance of maintaining full funding within the DOD budget for FY 1987 Shuttle reimbursements to the National Aeronautics and Space Administration. We urge your support in maintaining the integrity of the ongoing resource requirements needed for the Space Transportation System (STS) and to preserve the STS recovery plan.

Since 1983, the NASA/USAF Memorandum of Agreement on Reimbursement of Launch and Associated Services for Uses of the Space Shuttle has been established as the primary protocol for interagency reimbursement policy for Space Shuttle Launch activity. A major objective of this agreement is to provide essential stability in budget and program planning in order to have an effective national Space Transportation System. The need for program stability is especially critical to an orderly resumption of Space Shuttle flights at the earliest possible time.

Consistent with current agreements, the President's FY 1987 budget funds a substantial share of FY 1987 Shuttle launch operations requirements from DOD payments to NASA. Following the 51-L accident, NASA and DOD, with OMB concurrence, have agreed that the most effective approach to the STS recovery plan would be to preserve the basic funding provisions of the President's budget and to implement the appropriate adjustments to credit the DOD past reimbursements in the FY 1988 budget. This agreed to approach recognized the reality that since hardware, launch, and mission contracts remain in effect (with some reduction in the hardware production effort), NASA will continue to incur substantial liability, particularly in flight planning, software development, etc., during the FY 1987 timeframe in preparation for future DOD missions.

The budgeted FY 1987 DOD reimbursements, in excess of $500M, along with the requested NASA funding for Shuttle operations, represent the total Government requirement for NASA and DOD Shuttle services. Therefore, if the Congress were to eliminate or substantially reduce the DOD funding budgeted for the FY 1987 Shuttle payment, NASA, in turn, would have to request an equivalent offsetting adjustment to the NASA budget for the lost revenue. A reduction or elimination of DOD reimbursements would therefore introduce inefficient budget adjustments for both NASA and DOD without benefit to the U.S. Government. If NASA's request for such additional funds from the Congress were denied, there would be several major impacts. The immediate effect would be the same as a major cut in the Space Shuttle budget and would directly impact both the timely return of shuttle to flight status and the efficient build up of flight rate required to reduce the backlog of critical national security and major science missions. Further, the entire cost base of the Shuttle would need to be rebaselined with the potential for substantial cost increases.

In summary the Shuttle accident and the recent ELV failures have dealt a serious blow to this Country's capability for launching payloads into space. Recognizing that funding stability was necessary in order for NASA and the DOD to plan an expeditious recovery, we agreed to keep FY 1986 and FY 1987 reimbursements intact. This approach will permit appropriate preparation and planning for DOD missions to proceed in an orderly and efficient manner. It is our joint recommendation, therefore, that the Congress endorse the ongoing efforts of both DOD and NASA for the overall STS recovery, for the orderly and mutually beneficial reconstruction of the DOD STS flight planning, and for the application of credit adjustments for DOD reimbursements in the FY 1988 budget.

Sincerely,

EDWARD C. ALDRIDGE, JR.,
*Secretary of the Air Force.*
JAMES C. FLETCHER,
*Administrator, NASA.*

Mr. GORTON. July 10 is after the Congress adopted the budget resolution by setting the limit of the amount for defense. I also ask unanimous consent that a letter from the Director of the Office of Management and Budget

supporting this amendment and its reimbursement dated today be included in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
*Washington, DC, August 7, 1986.*

Hon. JOHN C. DANFORTH,
*Chairman, Committee on Commerce, Science, and Transportation, U.S. Senate, Washington, DC.*

DEAR JACK: I am deeply concerned about a proposal pending before Congress that would eliminate funding planned in the President's FY 1987 Budget for Shuttle operations payments to NASA by the Department of Defense (DOD).

As you know, DOD and NASA had reached agreement on reimbursements for two years in advance of flights to assure stability in NASA program planning. The Challenger accident created the need for major additional expenditures to restore safely the operation of the existing three orbiter Shuttle fleet, including the unavoidable loss of planned receipts from commercial launches. These increased funding needs will be difficult to accommodate in the current severe fiscal environment, even without any loss by NASA of the $0.5 billion in planned reimbursements from DOD for FY 1987. The further loss of the FY 1987 reimbursements from DOD to NASA would introduce major inefficiencies in the space recovery program and could impact the pace of recovery and the Shuttle's capability to meet priority defense space launch needs in the future.

NASA and DOD have agreed that the most effective approach to U.S. space launch recovery would be for DOD to make the FY 1987 reimbursement payments to NASA as planned and to receive credit in FY 1988 for flights paid for but not flown. I urge strongly that the Congress support the approach agreed upon by NASA and DOD and approve the FY 1987 reimbursement funding as proposed in the President's FY 1987 Budget.

Sincerely yours,
JAMES C. MILLER III,
*Director.*

Mr. GORTON. I assume and I state that this is the purview of the administration. These reimbursements are vital for NASA. They remain administration policy.

Mr. GARN. Mr. President, I am puzzled by what I am hearing from some of the opponents of this amendment. It sounds as if we are trying to take money away from DOD to give to NASA. This was money committed in the budget by the President, by this administration supported by the Secretary of the Air Force, supported by the Secretary of Defense, unless he changed his mind on both sides of an issue again, which is not the first time that has been true. This is attempting to restore to NASA money that the Armed Services Committee took away.

Let us be very clear on that point. My good friend, the chairman of the Intelligence Committee from Minnesota—I served 10 years or 8 years on that Intelligence Committee, too. So I know what he is talking about. I am very familiar with the need for delivery of certain systems into space. It seems to me rather shortsighted of Armed Services tonight, and the Intelligence Committee, to talk about taking money away from NASA as if it were some civilian program because everybody should be well aware where the critical need will be: In spy satellites, in communications, military communications, and navigation satellites, and those will be the very first and probably 80 percent of a lot of the first missions for cargoes delivered into space.

What we are doing here tonight is not hurting NASA as much as we are DOD if this amendment is not approved because then DOD will be sitting back there 1½ years from now saying, "Why is there another 6 months or 1 year delay?" It is amazing.

I am surprised, having served on all three of the committees we are talking about and currently still on defense appropriations, that we are taking the shortsighted view of it. I will guarantee you, if this happens, and this $500 million stays within DOD, it will cost DOD a lot more. Then they will be scrambling around for ELV's, or some means, and there will be a hue and cry of why can we not get our satellites up, and we are trying to negotiate an arms control deal but we have no means of verifying it.

With all good due respect to my good friends who I serve with—and they know where I am coming from for the last 12 years on defense—we are cutting our noses off to spite our face. You have to be willing to put this back into NASA so that it will put defense satellites back into space sooner.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DURENBERGER. Mr. President, do we have time on this side?

Mr. WARNER. How much time remains?

The PRESIDING OFFICER. One-and-a-half minutes remains to the opponent.

Mr. WARNER. Mr. President, I yield at this time to my distinguished colleague.

Mr. DURENBERGER. I will be very brief.

I think the facts of this are—and I hesitate to disagree with my distinguished colleague from Utah that the Department of Defense has already provided to NASA reimbursement for 10 shuttle flights that have not been flown. There is no way that those flights could be flown until somewhere in 1989 or 1990.

If funds were restored by this amendment, they would not be used for future shuttle launches. All they would be used for is to help NASA offset the cost of fixing the shuttle. NASA indicates that it will give the Department of Defense a credit, they call it, for shuttle rides somewhere out there in the future if these funds are restored. These kind of shuttle rides, so-called, have to be paid for. And the cost to NASA providing this credit is going to have to be borne by NASA in the future.

So I have to disagree with my colleague from Utah. We have not gotten the money. We are not taking away money that is owed NASA in any way at the present time.

Mr. WARNER. Mr. President, I move to table the amendment of the Senator from Missouri and ask for the yeas and nays.

THE PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

THE PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Virginia to lay on the table the amendment of the Senator from Missouri. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from South Dakota [Mr. PRESSLER] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Florida [Mr. CHILES] is necessarily absent.

THE PRESIDING OFFICER (Mr. MATTINGLY). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 37, nays 61, as follows:

[Rollcall Vote No. 187 Leg.]

YEAS—37

| | | |
|---|---|---|
| Abdnor | Gore | Proxmire |
| Andrews | Hecht | Quayle |
| Baucus | Humphrey | Roth |
| Biden | Kennedy | Simon |
| Boren | Leahy | Simpson |
| Bradley | Levin | Specter |
| Broyhill | Lugar | Stafford |
| Burdick | McConnell | Stennis |
| Cohen | Melcher | Thurmond |
| DeConcini | Mitchell | Wallop |
| Durenberger | Moynihan | Warner |
| Exon | Murkowski | |
| Goldwater | Nunn | |

NAYS—61

| | | |
|---|---|---|
| Armstrong | Gorton | Matsunaga |
| Bentsen | Gramm | Mattingly |
| Bingaman | Grassley | McClure |
| Boschwitz | Harkin | Metzenbaum |
| Bumpers | Hart | Nickles |
| Byrd | Hatch | Packwood |
| Chafee | Hatfield | Pell |
| Cochran | Hawkins | Pryor |

| Evans | Lautenberg | Wilson |
| Ford | Laxalt | Zorinsky |
| Garn | Long | |
| Glenn | Mathias | |

NOT VOTING—2

| | |
|---|---|
| Chiles | Pressler |

So the motion to lay on the table amendment No. 2633 was rejected.

Mr. GARN. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. DANFORTH. I move to lay that motion on the table. The motion to lay on the table was agreed to.

□ 2020

Mr. NUNN. Mr. President, the amendment has not been voted on, has it?

The PRESIDING OFFICER. It has not.

Mr. NUNN. Mr. President, what is the time agreement on this? How much time remains?

The PRESIDING OFFICER. All time on the amendment has expired. The question recurs on the amendment.

Mr. NUNN. Mr. President, I ask unanimous consent that I be granted 1 minute, or 1 minute on each side will be fair.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. NUNN. Mr. President, let me say I do not think Members understand what is happening here, and I want to be very careful about what I say. I have talked to the chairman of the Intelligence Committee, and he says that we are permitted to say this and it is the fact as we understand it. This is a direct transfer, if this amendment passes, of money out of intelligence to NASA. Now, the Intelligence Committee has gone through this whole area very closely, very carefully, and made certain recommendations to this body. I am not permitted to go into it further than that, but if you want to take money out of some of the most critical intelligence programs we have and transfer it to NASA, that is what this amendment is. I am not opposed to having the money for NASA. I know they need the money. But this administration now today has sent three different endorsements up here over $1½ billion asking us to shift DOD money to somewhere else. They spent Tuesday telling us they had already been decimated in the Department of Defense, but this money is not coming out of the Department of Defense in the final analysis. It is coming out of the intelligence community.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. Mr. President, with all due respect to the Senator from Georgia, his statement is not true. It is not factually accurate. There is nothing in this amendment that transfers anything out of intelligence. This amendment adds to the total authorization for the Defense Department the amount from which the NASA funds are taken. And it adds it to specific categories. The increase goes for missiles, to research and development, for expenses not otherwise provided for, for operation and maintenance.

Those are categories to which additional funds are added. Nothing is transferred. I would invite Senators who have any doubt to simply look at the amendment. I am holding it in my hand. There is nothing that transfers anything from intelligence to NASA.

The PRESIDING OFFICER. The additional time has expired.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, there is nothing more I can say except that I stand by the facts. This amendment will do a great deal of damage to our intelligence.

The PRESIDING OFFICER. All time has expired. The question is on the amendment.

Mr. BOREN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. CRANSTON. I announce that the Senator from Florida [Mr. CHILES] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 58, nays 40, as follows:

[Rollcall Vote No. 188 Leg.]

YEAS—58

| | | |
|---|---|---|
| Armstrong | Grassley | Mattingly |
| Bentsen | Harkin | McClure |
| Bingaman | Hart | Metzenbaum |
| Boschwitz | Hatch | Packwood |

| Exon | Nickles | |

NOT VOTING—2

| | |
|---|---|
| Chiles | Eagleton |

So the amendment (No. 2633) was agreed to.

□ 2050

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, it is my understanding that the distinguished Senator from Massachusetts, the distinguished Senator from Maryland, and the distinguished Senator from Indiana have had an opportunity to talk about the pending amendment.

At this point, I yield to the Senator from Indiana to hopefully——

Mr. KENNEDY. I ask for regular order, Mr. President. I ask for recognition, Mr. President.

Mr. WARNER. I yield the floor.

Mr. KENNEDY. Mr. President.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Thank you.

Mr. President, I send an amendment to the desk on behalf of Senator MATHIAS and myself and ask for its immediate consideration.

The PRESIDING OFFICER. The Wilson amendment is the pending amendment. It takes unanimous consent to set aside.

Mr. KENNEDY. I ask unanimous consent that the pending amendment be set aside.

The PRESIDING OFFICER. Is there objection to setting the Wilson amendment aside?

Mr. LUGAR. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I reserve the right to object so I might have an opportunity to speak with the distinguished Senator from Massachusetts about a time agreement. Would the Senator be willing to enter into 1 hour, equally divided, with the Senator from Indiana having control of 30 minutes and the distinguished Senator from Massachusetts, or his designee, 30 minutes?

Mr. KENNEDY. Mr. President, if I could have the attention of the floor managers. We had indicated earlier that we were prepared to enter into a time limit. I would be happy to enter into a time limit. We would like to establish a process by which Senator MATHIAS, myself, and perhaps others would be able to address this issue. I know the chairman of the Foreign Relations Committee would like to do that, as well. I would be happy to enter into a time agreement. I understand that the Senator from Indiana will offer a substitute to our amendment.

I would be happy if we could receive ½ hour for the Senator from Maryland and myself and then ½ hour on the substitute. If that were to be proposed by the floor managers, I would not object to that.

The PRESIDING OFFICER. Does the Senator from Indiana withdraw his objection?

Mr. LUGAR. I withdraw my objection, if the floor managers will offer that type of an agreement so we might proceed expeditiously.

Mr. DOLE. Will the Senator from Massachusetts yield so I can move the cloture votes forward?

Mr. KENNEDY. Yes; I yield.

CLOTURE VOTE POSTPONED UNTIL 11 P.M.

Mr. DOLE. Mr. President, parliamentary inquiry. The cloture vote on the Dole-Byrd amendments are set for 9 o'clock?

The PRESIDING OFFICER. That is correct.

Mr. DOLE. I ask unanimous consent that that time be moved to 11 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I thank the Senator from Massachusetts.

Mr. WARNER. Mr. President, may I suggest that the proposed time agreement be restated by the Senator from Massachusetts?

Mr. KENNEDY. Mr. President, with the understanding of the majority and minority leaders and the floor managers, I would propose that we have 1 hour time limitation on this amendment and the substitute to be offered by the Senator from Indiana; with that hour to be equally divided between the Senator from Indiana and the Senator from Maryland, and myself.

Mr. WARNER. Mr. President, I move that time agreement.

Mr. NUNN. Mr. President, I want to make it abundantly clear that we are talking about two amendments, as I understand it.

Mr. KENNEDY. Well, we are talking about the Kennedy-Mathias amendment and the Lugar substitute.

Mr. NUNN. Could the unanimous-consent request also include a specific provision that there would be no other amendments allowed to either amendment?

Mr. MATHIAS. Mr. President, I would object if that were the case. I want to have an opportunity to offer one amendment.

Mr. NUNN. We have to know what it is, so we would have to object.

Mr. KENNEDY. We were trying to ensure that we consider the Kennedy-Mathias amendment and then consider the substitute.

Mr. MATHIAS. It is basically a sense-of-the-Senate resolution on the test ban treaty.

Mr. NUNN. How many amendments are we likely to have? I guess that is the question.

Mr. MATHIAS. I have one amendment to the Kennedy amendment.

Mr. LUGAR. Mr. President, I say to the distinguished Senator from Georgia that there will be a substitute amendment offered by the Senator from Indiana to the Kennedy-Mathias amendment.

Mr. NUNN. Would it be correct to say there would be a maximum of three amendments and that all of them deal with this same subject matter, that is, the test ban area?

Mr. MATHIAS. As far as I know.

Mr. BYRD. What does the hour entail? Is that just on the first degree amendment or is that overall hour on all three amendments?

Mr. MATHIAS. All three.

Mr. LUGAR. All three.

Mr. KENNEDY. All three.

Mr. BYRD. If that is agreeable.

Mr. WARNER. That is agreeable to me.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? Without objection, it is so ordered.

Without objection, the Wilson amendment is set aside.

AMENDMENT NO. 2638

(Purpose: To express the sense of the Congress on nuclear explosive testing)

The PRESIDING OFFICER. The clerk will report the Kennedy amendment.

The assistant legislative clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY], for himself and Mr. MATHIAS, proposes an amendment numbered 2638.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 229, between line 14 and 15, insert the following:

SEC. 1221. SENSE OF THE CONGRESS ON NUCLEAR EXPLOSIVE TESTING.

(a) FINDINGS.—The Congress finds that—

(1) the United States is committed in the Limited Test Ban Treaty of 1963 and in the Non-Proliferation Treaty of 1968 to seek to achieve the discontinuance of all test explosions of nuclear weapons for all time;

(2) a comprehensive test ban treaty would promote the security of the United States by constraining the United States-Soviet nuclear arms competition and by strengthening efforts to prevent the proliferation of nuclear weapons.

(3) the Threshold Test Ban Treaty was signed in 1974 and the Peaceful Nuclear Explosions Treaty was signed in 1976, and both have yet to be considered by the full Senate for its advice and consent to ratification;

(4) the entry into force of the Peaceful Nuclear Explosions Treaty and the Threshold Test Ban Treaty will ensure full implementation of significant new verification procedures and so make completion of a comprehensive test ban treaty more probable;

(5) a comprehensive test ban treaty must be adequately verifiable, and significant progress has been made in methods for detection of underground nuclear explosions by seismological and other means;

(6) at present, negotiations are not being pursued by the United States and the Soviet Union toward completion of a comprehensive test ban treaty; and

(7) the past five administrations have supported the achievement of a comprehensive test ban treaty.

(b) SENSE OF CONGRESS.—It is the sense of Congress that at the earliest possible date, the President of the United States should—

(1) request advice and consent of the Senate to ratification (with a report containing any plans the President may have to negotiate supplemental verification procedures, or if the President believes it necessary, any understanding or reservation on the subject of verification which should be attached to the treaty) of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties, signed in 1974 and 1976, respectively; and

(2) propose to the Soviet Union the immediate resumption of negotiations toward conclusion of a verifiable comprehensive test ban treaty.

In accordance with international law, the United States shall have no obligation to comply with any bilateral arms control agreement with the Soviet Union that the Soviet Union is violating.

AMENDMENT NO. 2639

(Purpose: To express the sense of the Congress on nuclear explosive testing)

Mr. MATHIAS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maryland [Mr. MATHIAS] proposes an amendment numbered 2639 to the amendment numbered 2638.

Mr. MATHIAS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

At the end of the amendment add the following:

(2) a comprehensive test ban treaty would promote the security of the United States by constraining the United States-Soviet nuclear arms competition and by strengthening efforts to prevent the proliferation of nuclear weapons;

(3) the Threshold Test Ban Treaty was signed in 1974 and the Peaceful Nuclear Explosions Treaty was signed in 1976, and both have yet to be considered by the full Senate for its advice and consent to ratification;

(4) the entry into force of the Peaceful Nuclear Explosions Treaty and the Threshold Test Ban Treaty will ensure full implementation of significant new verification procedures and also make completion of a comprehensive test ban treaty more probable;

(5) a comprehensive test ban treaty must be adequately verifiable, and significant progress has been made in methods for detection of underground nuclear explosions by seismological and other means;

(6) at present, negotiations are not being pursued by the United States and the Soviet Union toward completion of a comprehensive test ban treaty; and

(7) the past five administrations have supported the achievement of a comprehensive test ban treaty.

(b) SENSE OF CONGRESS.—It is the sense of Congress that at the earliest possible date, the President of the United States should—

(1) request advice and consent of the Senate to ratification (with a report containing any plans the President may have to negotiate supplemental verification procedures, or if the President believes it necessary any understanding or reservation on the subject of verification which should be attached to the treaty) of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties, signed in 1974 and 1976, respectively; and

(2) propose to the Soviet Union the immediate resumption of negotiations toward conclusion of a verifiable comprehensive test ban treaty.

In accordance with international law, the United States shall have no obligation to comply with any bilateral arms control agreement with the Soviet Union that the Soviet Union is violating.

Mr. KENNEDY. Mr. President, I understand that we have 1 hour of debate and that half of the hour is divided by myself and the Senator from Maryland. I yield myself 5 minutes.

Mr. President, I am pleased to join Senator MATHIAS in offering this amendment expressing the sense of the Senate that the President should propose to the Soviet Union an immediate resumption of negotiations to achieve a verifiable comprehensive ban on all nuclear tests and to submit the Threshold Test Ban and Peaceful Nuclear Explosions Treaties to the Senate for its advice on ratification. I also want to thank my colleagues, Senators PELL and DANFORTH, for throwing their support behind this measure. Both had previously offered their own resolution offering constructive suggestions on how we might break the logjam blocking a ban on nuclear testing.

I also want to acknowledge the work that has been done by the ranking minority member of the Foreign Relations Committee, Senator PELL, and also Senator DANFORTH, who has also been active in this area, as well as my other colleagues, Senators KERRY, LEAHY, CRANSTON, HATFIELD, and others for their support on this matter. All have previously offered constructive suggestions and their own resolutions on how we might break the logjam blocking a comprehensive nuclear test ban.

The world is waiting with anticipation and hope for the arms talks now taking place between the United States and the Soviet Union. All of us in Congress are united in our desire for successful negotiations that will end, once and for all time, the spectra of nuclear annihilation that shadows all the Earth.

For over 20 years, ever since the ratification of the Limited Test Ban Treaty negotiated by President Kennedy in 1963, one of the most important and most widely shared goals of arms control has been to halt all nuclear testing on both sides and thereby to prevent the development of even more dangerous generations of these weapons.

□ 2100

The Threshold Test Ban Treaty was signed by President Nixon in 1974, and the Peaceful Nuclear Explosions Treaty was signed by President Ford in 1976. Together, the two treaties limit underground explosions to nuclear devices with an explosive power of 150 kilotons of TNT or less. The treaties have never been ratified by the Senate, but both the United States and the Soviet Union have agreed to abide by their terms.

In spite of a decade of delay, the two treaties are as current as the day they were signed. And ratification now would serve important purposes.

First, it would send a signal that the United States Senate is serious about arms control—that we are prepared to place the full weight of the legislative branch as well as the executive branch behind these arrangements. Currently, we exist in an arms control twilight zone—in fact, the last three major arms control treaties have been signed yet not ratified; two by Republican Presidents, one by a Democrat. We continue to abide by the TTBT and PNET, yet we are unwilling to act to make them binding.

Second, ratification will bring into being several verification and compliance provisions which have not been implemented due to our failure to ratify the treaties. In particular, the Threshold Test Ban Treaty provides for exchanges of geological data that will clarify ambiguities about the size and location of tests. And the Peaceful Nuclear Explosions Treaty sets an important precedent on verification, by providing for onsite inspection whenever it is unclear whether a test is peaceful. The Soviet's willingness to accept some form of onsite inspection was reiterated in the CTB negotiations.

Some have argued that we should not ratify the treaties because the Soviets are already violating them. But the vast weight of expert opinion has concluded that the data on Soviet testing are entirely consistent with compliance. Recently the CIA even revised its estimates of the yields of previous Soviet tests in a manner that reduces significantly the number of Soviet tests that may have exceeded the threshold.

Finally, ratification of these two treaties is the first step toward the goal of a Comprehensive Test Ban Treaty. We should neither over-estimate, nor under-estimate, the value of such an agreement. A CTBT will not end the arms race—it will not by itself lead to the dismantling of dangerous and destabilizing weapons systems. But it does play an important role in putting a brake on the unending proliferation of weapons systems, and it can lead to sharp reductions in nuclear weapons that will lessen the risk of nuclear war. A CTBT would limit the development of dangerous new—so called third generation—nuclear weapons, while preserving U.S. superiority in critical areas such as microcircuitry, safety and security, and command and control. I believe that we should resume real negotiations on a CTBT and that we should do it now.

The Kennedy-Mathias amendment is identical to one that passed several years ago by an overwhelming, bipartisan vote of 77 to 22. Since the Senate vote in 1984, there have been a number of positive developments that have helped to remove obstacles to a total test ban.

Earlier this year, the House of Representatives passed House Joint Resolution No. 3, language identical to Kennedy-Mathias, by a two-thirds majority.

For over a year, the Soviet Union has not conducted a single nuclear test. This unilateral moratorium was initiated and then extended twice without any reciprocal gesture by the Reagan administration. Most experts agree that suspended testing for this period has significantly affected the Soviets' Nuclear Weapons Development Program. The Soviet unilateral moratorium provides a strong indication that a comprehensive test ban is achievable.

There have also been significant recent advances in seismic verification techniques which could effectively remove verification as an obstacle. Most important is the technical breakthrough in the use of high-frequency filtering of seismic signals from nuclear tests. Already, we have practical experience using this technique at a site in Norway jointly manned by United States and Norwegian Government scientists. That site has achieved very good results and has detected Soviets tests with yields below 1 kiloton at considerable distances. The emplacement of such sophisticated monitoring equipment inside the Soviet Union, as they agreed to during test ban negotiations back in 1978–79, would remove any question that a comprehensive test ban can be effectively verified.

Another important development has been the recent action by a group of private United States scientists who, acting on their own, have persuaded the Soviet Government to establish three seismic monitoring stations near the principal Soviet nuclear test site. The stations will be jointly manned by American and Soviet scientists and will operate for at least 1 year. The data from the stations will be made available to both Governments and to the public.

This is the first time the Soviet Union has allowed foreign nationals on its soil to monitor for nuclear tests. With a number of such seismic stations in the Soviet Union, a nuclear test ban or moratorium could be verified with virtual certainty.

The first monitoring station became operational on July 9 and is collecting considerable geological data. Two more stations should be operational by mid-August. All three sites are within 200 kilometers of the Soviet nuclear weapons test site of Semipalatinsk and will be able to detect a nuclear explosion substantially less than 1 kiloton.
